The Engineer reported the need to place a 50 per cent reduced load limit on the Weston-Elgin Secondary State Highway throughout its entire length in Umatilla and Union Counties. The Commission by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, the following road or highway has been designated and declared to be and is a state highway, and has been improved and is being maintained by the State Highway Commission pursuant to the laws of the State of Oregon as a state highway, to-wit:

WESTON-ELGIN SECONDARY STATE HIGHWAY

AND WHEREAS, the said above-named state highway is, in the judgment of the State Highway Commission, being subjected to a kind and character of traffic which is damaging and injuring the said highway, and, in order to protect said highway against such damage and injury, it is deemed and is the judgment of the Highway Commission and said Commission finds that it will be for the best interests of the said highway that the maximum weights permitted and authorized by law be reduced;

NOW, THEREFORE, the premises being in part as above stated, and the State Highway Commission having, as a result of due investigation, found that the road above mentioned and hereinafter designated is being damaged and injured on account of the kind and character of traffic now being hauled over and upon said road; and, by reason of the fact that vehicles carrying maximum loads moved at the maximum speeds specified by the provisions of the laws of the State of Oregon are breaking up, damaging and deteriorating the said road,

IT IS HEREBY ORDERED, that the maximum weight of combined load and vehicle which shall be permitted upon the within-named road shall not exceed the weight herein fixed.

The maximum weights which shall apply to the following highway, to-wit:

WESTON-ELGIN SECONDARY STATE HIGHWAY from Weston, in Umatilla County, to Elgin, in Union County,

shall be as follows: the combined weight in pounds bearing on the surface of the highway at contact with the tread of the wheels of the front axle of a truck or truck-tractor shall not exceed the product of four hundred (400) multiplied by the sum in inches of the tire width of the wheels of such axle; and, the combined weight in pounds bearing on the surface of the highway at contact with the tread of the wheels of any one axle of a vehicle or combination of vehicles, other than the front axle of a truck or truck-tractor, shall not exceed the product of three hundred (300) multiplied by the sum in inches of the tire width of the wheels of such axle; but, in no event shall the combined weight in pounds bearing on the surface of the highway at contact with the tread of the wheels of any one axle of a vehicle exceed the maximum limit set by law for any one axle.

IT IS FURTHER ORDERED, that these rules and regulations as made and found by the State Highway Commission under the provisions of Section 55-2707, Oregon Code 1935 Supplement, shall be in full force and effect until modified, annulled or voided by the order of the State Highway Commission.

AND IT IS FURTHER ORDERED, that a notice be posted in a conspicuous manner and place at each end of the above-named section of said highway and at important crossroads on said highway so that said notice can be readily seen and read, which said notice shall state plainly the limitations and prohibitions of traffic hereby in this order determined and fixed.

AND BE IT FURTHER ORDERED, that certified copies of this order be furnished the county clerks of Umatilla and Union Counties, in which counties said highway is located, and the Superintendent of the Department of State Police for his information.

The Commission considered a letter from the Van Vleet Logging Company requesting permission to truck logs over the Cannon Beach Road during the summer months as well as during the winter months, which operations are now being prohibited during the beach season which extends from June 1 to September 15. The Commission denied the request in the interests of safety to the beach traffic which is extremely heavy at that time of the year.

The matter of hauling overlength loads of logs on the Santiam Highway between Cascadia and Foster had the attention of the Commission. The Commission authorized such movements if the logs are not to be resawed later and provided hand-operated steering devices are used on the trailers and that no part of the load or hauling equipment will extend across the center line of the road. The Engineer was instructed to conduct a trial run to determine the extreme length of load that can be hauled over this section of highway under such conditions. The Secretary was instructed hereafter, before granting permits for overlength log movements, to secure an affidavit from the operator to the effect that the logs are not to be resawed after delivery.

The Engineer requested authority to purchase the following equipment:

1 gasoline-powered centrifugal portable pump for use in connection with drainage tunnel construction. Estimated cost \$140.00

1 powered lawn mower for Portland division. Estimated cost \$300.00

The Commission approved the request by unanimous vote and ordered that the purchases be made through the State Purchasing Agent in accordance with the usual practice.

The Commission considered and approved the request of Arthur Ervin, Los Angeles, California, for permission to operate over certain state highways in Oregon a truck van having an overall height not to exceed 11' 6", subject to the condition that the equipment be properly licensed in the State of Oregon and there be sufficient vertical clearance to allow the movement without endangering highway structures, et cetera.

The Engineer reported a request from Representative Burt K. Snyder, Lakeview, for the construction of a maintenance headquarters and oasis at Alkali Lake on the Lakeview-Burns Highway in Lake County, and for the stabilization of the 15-mile section of this highway north from a place known as Wagontire, which section, he alleges, is in an extremely bad state of repair. He estimated the cost of the maintenance buildings and oasis at Alkali Lake at approximately \$25,000, and the improvement of the highway at \$226,000. The Commission discussed but deferred action on both of these projects pending personal inspection of each, which is to be made as soon as possible.

A letter was presented from the Aleutian Livestock Company, Inc., Salt Lake City, Utah, requesting permission to construct a fence across certain state-owned property adjacent to the Wolf Creek Highway, Clatsop County, and inquiring whether or not the State Highway Commission would join with them in paying the cost of such fence construction. The Commission decided not to grant the company permission to construct its fence on the state property in view of the Commission's established policy in regard to such matters, and also refused to cooperate in the cost of the fence. The Secretary was instructed to inform the company that it is strictly contrary to the Commission's policy to permit fence construction on or across state land; however, the Commission would be pleased to see that right of way stakes are set as a guide to the company in building its own fences; further, that the Commission does not feel obligated to spend state funds for the construction of the fences because it considers this is strictly a private undertaking.

The Engineer presented a list of surveys that he has ordered since the last meeting of the Commission and asked the Commission to confirm them and the amounts allocated for each. After due consideration the Commission authorized and instructed the Engineer to make such location surveys on various sections of the highways of this state, which said sections of highways, together with their identifying survey numbers and the amounts authorized and allocated for such survey expenditures are as follows:

Right of Way - 102-1425	- Pacific Highway West-Polk County Line Section, Tampico Highway, Benton County. 1st authorization \$75.
Right of Way - 102-1425	- Pacific Highway West-Polk Co. Line Section, Tampico Highway, Benton Co. 2nd authorization \$125.
	Total to date \$200.
Scale Site - - - 2-1426	- Philomath Section, Corvallis-Newport Highway, Benton County. 1st authorization \$75.
Right of Way - - 4-1450	- Svensen-Goble Section, Columbia Highway, Clatsop County. 1st authorization \$400.
Plans - - - - 4-1432	- Necanicum Junction Section, Wolf Creek and Necanicum Hwys. 2nd authorization \$400. Total to date \$500.

Right of Way - 105-1423 - Banzer Bridge-Mist Section, Nehalem Highway,
 Columbia County. 2nd authorization \$800.00
 Total to date \$1,450.
 Plans - - - - 106-1423 - Enegren Ferry Section, Coos River Highway, Coos
 County. 1st authorization \$400.00
 Right of Way - 107-1414 - Powell Butte Section, Powell Butte Highway, Crook
 County. 1st authorization - \$50.00
 Right of Way - 107-1415 - Riverside Ranch Section, Crooked River Highway,
 Crook County. 1st authorization - \$300.00
 Plans - - - - 209-1439 - Terrebonne-Lower Bridge Section, Deschutes Market
 Rd. No. 4, Deschutes Co. 2nd authorization - \$800.
 Total to date \$1,600.
 Location - - - 10-1431 - Glendale Junction-Canyonville Section, Pacific Hwy.
 Douglas County. 1st authorization \$17,000.
 Test - - - - 12-1424 - Long Creek-Fox Section, Pendleton-John Day Highway,
 Grant County. 2nd authorization - \$300.00
 Total to date \$2,150.
 Right of Way - 14-1418 - Sam Boardman Park Section, Mt. Hood Highway, Hood
 River County. 1st authorization - \$90.00
 Right of Way - 17-1410 - Wolf Creek-Grants Pass Section, Pacific Highway,
 Josephine County. 2nd authorization - \$2500.00
 Total to date \$35,100.
 Location - - - 18-1441 - Barclay Springs-Terminal City Section, The Dalles-
 California Highway. 2nd authorization - \$2250.00
 Total to date \$7650.
 Plans - - - - 20-1437 - Goshen-Lowell Section, Willamette Highway, Lane
 County. 2nd authorization - \$727.50.
 Total to date \$12,367.50.
 Testing - - - 20-1437 - Goshen-Lowell Section, Willamette Highway, Lane
 County. 2nd authorization - \$250.00.
 Total to date \$12,617.50.
 Plans - - - - 21-1445 - Otter Rock-Agate Beach Section, Oregon Coast High-
 way, Lincoln Co. 1st authorization - \$300.00.
 Right of Way - 122-1429 - Albany West Section, Corvallis Eastside Highway,
 Linn County. 1st authorization - \$200.00
 Plans - - - - 22-1426 - Albany-Lebanon Section, Santiam Highway, Linn
 County. 2nd authorization - \$360.00
 Total to date \$2,220.
 Testing - - - 22-1430 - Foster-Bryant Hill Section, Santiam Highway, Linn
 County. 1st authorization - \$150.00
 Stock Pile - - 22-1431 - Foster-Cascadia Section, Santiam Highway, Linn
 County. 1st authorization - \$50.00
 Bridge - - - - 224-1437 - Independence Bridge Section, Marion County Road
 (Slough Rd.), Marion Co. 1st authorization \$1000.00
 Testing - - - 25-1409 - Jones Hill-Lena Section, Heppner Highway, Morrow
 County. 2nd authorization - \$100.00
 Total to date \$500.
 Plans - - - - 26-1444 - Front Ave.-West End Steel Bridge, Pacific Hwy. West,
 Multnomah County. 2nd authorization \$4,500.00
 Total to date \$13,000.

Plans - - - - 128-1412 - Fulton Canyon-Locust Grove Section, Fulton Canyon-Wasco Hwy., Sherman Co. 1st authorization \$1,500.
 Plans - - - - 231-1423 - West Ranch-Island City Section, Island City-Summer-ville Co.Rd., Union Co. 1st authorization - \$400.
 Plans - - - - 32-1407 - Enterprise-Forest Boundary Section, Unit 1, Enterprise-Lewiston Highway, Wallowa County. 1st authorization \$1,400.
 Plans - - - - 134-1428 - Forest Grove-Banks Section, Nehalem Highway, Wash-ington County. 1st authorization - \$400.
 Plans - - - - 34-1429 - Sylvan-West Slope Section, Tualatin Highway, Wash-ington County. 1st authorization - \$700.
 Right of Way - 36-1426 - Lafayette-Dayton Junction Section, Pacific Highway West, Yamhill County. 1st authorization - \$25.

The Commission considered a request from contractor Arthur T. Fox for an extension of time of 22 days, from November 15 to December 7, 1940, within which to complete his contract No. 2333 with the State Highway Commission for landscaping work at the Medford maintenance station on the Pacific Highway, in Jackson County. He alleged that his failure to complete the project within the specified time limit was due to adverse weather conditions and orders from the Landscape Engineer to postpone the planting of certain shrubs. The Engineer advised that the reasons given by Mr. Fox for failure to complete the job within the specified time limit are correct. He recommended the granting of the extension of time requested without penalty. The Commission approved the recommendation.

In connection with this matter the Engineer reported that Mr. Fox completed the job on December 7, 1940, in accordance with the provisions of the contract or modifications thereof. He recommended acceptance of the project at this time. The Commission approved the recommendation and by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, the Engineer has reported that the following State Highway Commission contract for the construction of a state highway project has been completed according to the terms and provisions of the contract and said job is now ready for acceptance:

Contract No. 2333, with Arthur T. Fox, for land-scaping work at the Medford maintenance station on the Pacific Highway, in Jackson County. Completed December 7, 1940.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contract for the construction of said state highway project be declared completed according to the terms of the contract, and said job is hereby accepted and final payment in connection therewith is hereby authorized.

The Commission had under discussion the setting of a date for its first regular meeting following that scheduled for April 3 and 4, 1941, and decided to hold such meeting on Thursday and Friday, May 8 and 9, 1941, in Portland. The Secretary was instructed to make the usual arrangements to hold this meeting in the auditorium of the Public Service Building. The Commission also tentatively set Tuesday, March 18, 1941, as the date for an interim meeting to be held in Portland to dispose of accumulated routine matters and to confer with the City of Portland Commission regarding the Front Avenue Project. (It was later decided to hold the interim meeting on Monday, March 24, when it is expected that the order of the Public Utilities Commissioner relative to the Front Avenue Project will be available.)

The Commission considered and signed agreements, et cetera, as follows:

Agreement with Lane County providing for improvement of the Richardson-Siuslaw Junction Section of the Eugene-Swisshome Secondary Highway, in Lane County, as a cooperative project between the county and the state, the state's share of the cost to be one-third of the estimated total cost of \$4,000; the work to be done by county forces.

Agreement with The Pacific Telephone and Telegraph Company providing for the use of two telephone poles for the suspension of a traffic signal at the intersection of Kingwood Avenue and Edgewater Street, in West Salem.

Agreement with The Pacific Telephone and Telegraph Company providing for the use of one telephone pole for the suspension of a traffic signal at the intersection of Clark and Edgewater Streets, in West Salem.

Agreement with The Northern Pacific Terminal Company of Oregon, providing for the installation of an automatic grade crossing signal at Crossing 7A-0.59 on Northwest Front Avenue, Portland, more particularly at the Broadway Bridge crossing.

Agreement with the O.W.R. & N. Company, Union Pacific Company, and Southern Pacific Company, pertaining to the use and maintenance of the upper deck of the Steel Bridge in Portland for state highway traffic.

Agreement with the Board of County Commissioners, Multnomah County, relative to the use and maintenance of the upper deck of the Steel Bridge in Portland as a state highway.

Agreement with the Bonneville Power Administration providing for construction of a power transmission pole line over and across certain state highways in Clackamas and Washington Counties, being in connection with the Bonneville-Oregon City transmission line.

Agreement with Bonneville Power Administration authorizing construction of a power transmission pole line over and across the O'Neil Secondary State Highway No. 370 in Deschutes County.

Agreement with the United States of America, Department of Agriculture, Forest Service, providing for snow removal operations on the Timberline Lodge Road.

Lease agreement with Mary C. Hale, et al, providing for lease of 0.35 acre of land in Lane County for stock pile purposes. Right of way file R 8809.

Lease agreement with the heirs of Andrew Smith and Department of Interior, Indian Affairs, providing for lease of a stock pile site near Roads End, in Lincoln County.

Agreement with L. E. Bierce authorizing construction and operation of a logging road across state-owned property adjacent to the Salmon River Highway.

Agreement with W. W. Harris authorizing construction and operation of a logging road across state property adjacent to the Salmon River Highway.

Agreement with Paul Borg granting Mr. Borg permission to use water from a spring located on state-owned property in Columbia County.

Agreement with Strong and McDonald relative to the removal of rock from a state-owned quarry at Bandon.

Agreement with G. M. Giesendorfer covering acquisition from Mr. Giesendorfer of certain property known as Cascadia Park situate adjacent to the Santiam Highway at Cascadia, Linn County.

Agreement with Oregon Baptist State Convention providing for the surrendering of all its right, title, and interest with respect to the use of a portion of Cascadia park property.

Agreement with United States of America for an easement for right of way and for fence construction on the Central Oregon Highway, in Malheur County.

Agreement with the California-Oregon Power Company for the use of a power pole in connection with the suspension of a flashing beacon in the city of Drain.

Agreement with the City of Drain providing for the use of two power poles for the suspension of two traffic signal suspension cable guy attachments near Fourth and B Streets, in Drain.

Agreement with The Portland General Electric Company providing for the use of two of the company's poles for the suspension of traffic signals at Edgewater Street and Clark Street, in West Salem.

Agreement with The Portland General Electric Company providing for the use of three of its poles for the suspension of traffic signals at the intersection of Edgewater Street and Kingwood Avenue in West Salem.

Bargain and sale deed conveying unto Coos Bay Dredging Company Lots 17 and 18 in Block 33, Asburg's Addition to Marshfield. Right of way files No. 8080 and No. 8254.

Bargain and sale deed conveying unto Lester Sell 2.36 acres of land situate in the SE $\frac{1}{4}$ of the NE $\frac{1}{4}$ of Section 23, Township 2 North, Range 4 West, Washington County. Right of way files Nos. 8557 and 6276.

Bargain and sale deed conveying unto Leon V. Mix and Edith M. Mix lots 7 and 9, Block 13, Crescent Addition to Depoe Bay. Right of way files Nol 8644 and No. 6192.

There being no further business to come before the Commission at this time the meeting was adjourned at 6:00 p. m.

William M. Clary
Commissioner

William O. Clary
Commissioner

Portland, Oregon, March 24, 1941

The State Highway Commission met in regular session at 9:00 a. m. in Room 415 (Imperial Room) of the Imperial Hotel. Present were:

Henry F. Cabell, Chairman
Huron W. Clough, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

Commissioner Herman Oliver was excused from attending this meeting. Also present were: W. H. Lynch, District Engineer, T. M. Davis, Senior Highway Engineer, H. D. Farmer, Senior Highway Engineer, and R. T. Bloodsworth, representing the Public Roads Administration.

The Attorney requested authority to acquire certain parcels of real property that are needed for various highway improvements throughout the state. He submitted a list of such properties together with prices that he recommended be paid for each. After careful consideration the Commission approved the request and by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as herein-after more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed:

NOW, THEREFORE, BE IT RESOLVED that the several offers, or bases of settlement hereinafter enumerated be, and the same hereby are, approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

The Attorney also requested authority to institute condemnation proceedings to acquire other properties that are needed for highway purposes, in connection with which he has been unable to reach satisfactory settlements. He submitted the following list of properties to be condemned, together with offers that he recommended for each item:

<u>File No.</u>	<u>Name</u>	<u>Purpose Required</u>	<u>Recommended Offer</u>
8859	Dan Bowman	Gravel Pit	\$750.00 Maximum
8832	*Federal Land Bank of Spokane (Sold to W. P. Smith)	R/W	\$1500.00 "
8803	Laurence Bauman	R/W	\$550.00
8794	Olga Victoria Johanson	R/W	\$350.00

After discussion the Commission approved the Attorney's request and the recommended offers and thereupon adopted the following resolution relative thereto:

WHEREAS, the State Highway Commission is authorized to locate, relocate, construct, reconstruct, maintain, widen, straighten, and otherwise improve state highways, both primary and secondary, and said Commission is also authorized to construct shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, and snow fences, and is authorized to acquire quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, and broadcasting stations, and is further authorized to develop, construct, improve, operate, and maintain parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, and other places of attraction and scenic value; and

WHEREAS, said Highway Commission is authorized to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property, or any interest therein, necessary or deemed by the Highway Commission necessary for the accomplishment of any and all of the foregoing things; and

WHEREAS, in the judgment of the Highway Commission the several tracts or parcels of land hereinafter described are each and all necessary for the specific and particular purposes hereinafter specifically set forth;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the Commission does hereby find and declare that the several parcels of real property hereinafter described are each and all necessary for the accomplishment of the purposes hereinafter expressly and specifically set forth, which said real properties and the specific purposes for which the same are being acquired are described as follows, to wit:

*See Condemnation Resolution No.8, February 28, 1941.

Real property owned by Laurence Bauman and Winifred Bauman, which property is located in the Prior F. Blair D.L.C.#39 in Section 36, Township 17 South, Range 4 West, W. M., Lane County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 1 and is further identified in the records of the Highway Commission as file R 8803, and which property is being acquired for right of way purposes in connection with the Pacific Highway;*

Real property owned by Olga Victoria Johanson and Hans Johanson, which property is located in Lots 1 and 2, Block 3, West-Moreland Addition to Eugene, Lane County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 2 and is further identified in the records of the Highway Commission as file R 8794, and which property is being acquired for right of way purposes in connection with Secondary Highway No. 224;*

Real property owned by Dan Bowman, which property is located in the northwest quarter (NW $\frac{1}{4}$) of the northeast quarter (NE $\frac{1}{4}$) of Section 8, Township 3 North, Range 29 East, W. M., Umatilla County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 3 and is further identified in the records of the Highway Commission as file R 8859, and which property is being acquired for the purpose of securing roadbuilding materials therefrom in connection with the Boardman-Stanfield Highway.*

2. That the Commission does hereby find and declare that each of the said described parcels of real property is necessary and acquisition of the same by the State is required for the specific purposes hereinabove set forth, and the said properties are being acquired for the express and specific purposes in this resolution set forth.

3. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real properties, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of the said real properties, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property or properties, whether said properties be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

4. That I. H. Van Winkle, Attorney General of the State of Oregon, and J. M. Devers, Assistant Attorney General and Attorney

for the State Highway Commission, be and they are hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement or agreements can be reached, then it is hereby further resolved that the Attorney General of the State of Oregon and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they hereby are requested to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated.

5. That this resolution be entered in full in the minutes and records of this Commission.

*(The detailed descriptions of the respective parcels of real property mentioned in this resolution are attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 9, under the heading "Real Property Condemnation Resolutions", and said descriptions by this reference are made a part of this minute entry to the same extent as if copied in full herein.)

The Attorney reported results of a conference with Mr. L. A. McClintock relative to the purchase of right of way needed for the Boardman-Stanfield Highway across Mr. McClintock's property in Umatilla County. He gave as his thought that Mr. McClintock would settle for the sum of \$3,500 if the state would construct for him a cattle pass and do other things of a minor nature. The Commission approved settlement on such basis subject to further investigation by the Engineer relative to the probable cost of doing the extra things that Mr. McClintock demands.

Reconsideration was given by the Commission to the matter of abandoning three small parcels of the former right of way of the Oregon Coast Highway near Nelscott, Lincoln County, particularly two parcels fronting on property owned by Mr. Charles P. Nelson, Nelscott, and one fronting property owned by Mr. Ben Hur Lampman, Portland. The Commission decided to abandon in favor of Mr. Nelson one of the parcels desired by him, described as follows:

That portion of property lying on the westerly side of the reconstructed center line of the Oregon Coast Highway between mile post 979+50 and 988+50

but decided to retain the other, which is situate in front of the Nelscott business buildings, at the intersection of the highway with Washington Street.

At Chairman Cabell's suggestion the Commission approved an expenditure of \$600 for oiling the area between the highway pavement and the business buildings so as to provide a suitable place for the parking of automobiles, except the center portion of such area which is to be landscaped.

The Commission referred to the Attorney Mr. Lampman's request for the vacation of the third parcel with instructions to discuss the same with Mr. H. B. Van Duser, former chairman of the State Highway Commission, inasmuch as Mr. Lampman alleges that he was informed by Mr. Van Duser, at the time that the highway alignment was revised, that all of the land between his property and the new highway would be abandoned by the Commission in his favor. The Attorney was instructed to secure a written statement from Mr. Van Duser with respect to this matter, if possible.

The Commission discussed with Messrs. Lynch, Davis, Farmer and Bloodsworth matters pertaining to the forest highway program and the proposed strategic military highway system. Mr. Lynch advised that indications now are that Congress will not appropriate the full amount recommended for the 1941 forest highway program, the House of Representatives having already taken action reducing the total amount of the appropriation from \$11,000,000 to \$9,000,000, and it now appears that the forest highway program must be revised somewhat to harmonize with this reduction. He recalled that Oregon's share of the recommended appropriation was approximately \$1,119,000, and pointed out that under the new setup the amount would be reduced by about \$375,000, which means that certain projects heretofore approved for such program must be deleted therefrom, at least temporarily. Mr. Lynch also pointed out the possibilities of the government requiring that forest highway funds be expended on the strategic military highway system, and that there is a question whether or not the funds heretofore tentatively approved for the Timberline Lodge and the Cascade Lakes forest highway projects will be eligible inasmuch as they are not in this class. After considerable discussion the Commission agreed to revise the program to fit the moneys available, it being understood that the projects eliminated are to be given priority in the next forest highway program. Due to the absence of Commissioner Oliver a final decision in the matter was deferred until the April 3rd meeting of the Commission at which time it is proposed to confer with the Public Roads Administration officials and officials representing the United States Forest Service to select the projects which are to be deferred.

The Attorney reported the status of the acquisition of right of way that is needed for the reconstruction of the Port Orford South Section of the Oregon Coast Highway, in Curry County. He advised that satisfactory settlements have been reached with all of the property owners except Mr. Knapp, who owns the hotel property. He read aloud a letter from Mr. Collier H. Buffington, Gold Beach, Attorney for Mr. Knapp, in which the Commission is advised that Mr. Knapp values his property at \$15,000, but will accept the sum of \$12,500 as a compromise settlement. He recalled that the Commission previously authorized an offer of \$10,000. Mr. Lynch stated that he is ready to proceed with the contracting of this project as soon as he is assured by the Commission that the contractor can enter upon all of the right of way at once,

excepting the Knapp property, which is in controversy, and that the contractor can enter upon the Knapp property by June 1, 1941. The Commission authorized the Engineer to give Mr. Lynch such assurance by letter.

A communication was presented from the Consolidated Supply Company, Portland, requesting permission to utilize for a period of two or three months as a storage site, a small parcel of property that the state acquired for the Front Avenue improvement, Portland, same being 50 feet by 100 feet in dimension and situate at the southeast corner of Front Avenue and Everett Street. The Company advised that it previously rented this property from the former owner, the Southern Pacific Company, and that it simply wants to continue the use of it until they can make arrangements for another site. The Commission appeared favorably inclined to grant the request if the company will pay a rental charge equal to that heretofore paid the Southern Pacific Company. The matter was referred to the Attorney for handling. The Attorney reported later in the session, at which time the Commission authorized the renting of the property to the Consolidated Supply Company at the rate of \$25 per month.

The Commission adjourned at 12:30 p. m. and reconvened at 2:30 p. m. in the same room with the same persons present and participating.

Mrs. Stella Jones Bailey, Portland, came before the Commission in regard to the construction of a private roadway approach to the Heppner Highway, in Morrow County, from her property fronting on the Jones Hill Section, which matter has previously had the attention of the Commission. She asked the Commission for a decision in the matter. The Engineer advised that a roadway suitable for Mrs. Jones's purposes can be graded and rocked for about \$400. He recommended approval of the expenditure to fulfill an obligation inherited from Morrow County whereby the County agreed to build such roadway as a right of way consideration when it acquired the right of way for the highway. After discussion the Commission approved the recommendation on the basis of a maximum expenditure of \$400.

Messrs. M. J. Lynch and R. D. Hoyt, representing the United Contracting Company, Inc., came before the Commission in regard to the reaward of the contract for the St. Helens Section of the Columbia River Highway in Columbia County, bids for which were taken by the Commission on February 27, 1941. They gave as their understanding that contractor Roy L. Houck, who was the low bidder for this project and to whom the Commission awarded the contract, has defaulted and has paid into the state highway fund the amount of his bid bond, and accordingly urged the Commission to reaward the contract to the United Contracting Company which submitted the second-low bid for the work. They were informed that the award of a contract to the second-low bidder involves a policy of the State Highway Commission and the Commission wants a little time to think the matter over before establishing such policy. Furthermore, it involves an expenditure of federal funds, so the Commission must of necessity discuss the matter with the Public Roads Administration officials. The Commission agreed to make its decision within the next few days.

The Attorney requested instructions relative to the payment of an interest charge in connection with a settlement for right of way acquired by

condemnation from Joseph Puzanowski Parker, et al. He stated that the attorney for the owner of the property demands interest payment of \$78.58; further, that the United States Supreme Court has decided that interest payments in connection with purchases of this kind are a legitimate expense if the property is occupied by the plaintiff before the trial is conducted. However, the Oregon Supreme Court holds that the state cannot be required to pay interest unless there is statutory authority for the same. He recommended, if the Commission approved payment of the claim, that a voucher in the amount of the charge be submitted to the Secretary of State along with a statement of the facts involved. The Commission decided in view of the Attorney's report that it has no alternative but to pay the charge, and accordingly approved the same for payment. The Commission thereupon signed a letter containing a statement of the facts in the case and ordered that it be attached to the voucher for the information of the Secretary of State.

The Commission discussed the purchase of timber strips along the Salmon River Highway, from the Miami Corporation. Chairman Cabell advised that when this matter was last discussed it appeared that the Miami Corporation had raised its price for certain timber stumpage; however, a more thorough study of the facts reveals that such is not the case and that the company's most recent statement is in accordance with its original offer. In the discussion of this matter the question arose whether to proceed with the acquisition of this property, using state funds, or to wait until it is known definitely whether or not it will be possible to secure federal aid funds for the purpose. It was decided to defer the purchase until the rules and regulations governing the expenditure of the federal moneys is received and it is known whether or not they can be used for this purpose. In the event that federal funds cannot be obtained then the purchase is to be made with state funds. The Attorney was instructed to inform Mr. Mills, who represents the Miami Corporation, of the facts and to assure Mr. Mills that the State Highway Commission intends to purchase these timber strips regardless of whether or not the Public Roads Administration will approve an expenditure of federal aid funds for the same.

The Attorney submitted a status report on the controversy concerning the removal of a privately-owned cottage from Casey State Park, in Jackson County. He said that the owner of this cottage, a Mrs. Van Dyke, alleges that she has been assured by Governor Charles A. Sprague that she will not be evicted from the premises and her representative, a Mr. Lamport, Salem, suggests that the Commission confer with the Governor relative thereto. Chairman Cabell stated that he would speak to the Governor about the matter.

The Attorney presented a letter from Wm. G. Hare, Lawyer, Hillsboro, in regard to a right of way purchase from Charles S. Bateman, in which Mr. Hare advises that Mr. Bateman desires to make a settlement outside of court, if possible, and suggests a hearing in his office for the purpose of ascertaining whether or not an agreement can be reached. The Attorney advised that the right of way is needed for the Glenwood-Washburn Section of the Wilson River Highway. The Commission approved the conference with the understanding that Chairman Cabell would inspect the property prior thereto. The Attorney was instructed to secure, if possible, a permit of entry so that the

award of the contract need not be deferred.

The Secretary presented a resolution from Bonneville Post No. 88, American Legion, setting forth its intention to petition the United States National Forest Service to undertake the illumination of Multnomah Falls in connection with its program for beautifying Multnomah Falls Park, so that the falls may be viewed by tourists passing the same during hours of darkness as well as during daylight hours. The Commission considered this a matter entirely out of its jurisdiction, inasmuch as the property belongs to the United States Forest Service, and thereupon ordered the resolution filed.

The Commission discussed briefly a report by Division Engineer K. D. Lytle of Roseburg relative to the cutting of timber along the right of way of the Tiller-Trail Secondary Highway but deferred a decision in the matter pending a study of the report by Commissioner Clough and a recommendation from him and the State Parks Superintendent.

The Engineer reported a request from Mr. Theo. Hoflich for the exchange of certain property that the state acquired from John W. Quattlebaum, et ux., as a borrow pit to be used in connection with the construction of the Albany Section of the Pacific Highway East. The Engineer advised that Mr. Hoflich wants this property to fill out other property that he owns at this location, and has offered to deed to the state, in exchange for the same, certain property containing a quarry site. He recommended approval of such exchange of properties subject to the condition that Mr. Hoflich will allow the state to remove from the property that he wants certain top soil material that is needed in connection with the Albany landscaping project. The Commission approved the recommendation.

The Engineer reported on investigations relative to the application of the Nehalem Telephone and Telegraph Company for a permit to extend its telephone pole line along the ocean side of the Oregon Coast Highway near the town of Brighton, in Tillamook County. He said that this matter was investigated by Division Engineer F. D. Eason and Landscape Engineer George Otten, who recommend that the pole line be not allowed on the ocean side of the highway because it will interfere with the ocean view, and that the company be required either to build its line on the opposite side of the highway, where it could use jointly with the Mountain States Power Company poles now existing on that side of the highway, or to place its wires in an underground cable on the westerly side where they cannot be seen. The Engineer advised that he concurs in this recommendation, whereupon the Commission decided not to authorize the permit. The question arose whether or not the poles already installed should be allowed to remain in place. The Engineer was instructed to ascertain if they interfere with the scenic view and to report his findings, when the Commission will make its decision whether or not to order the removal of the same.

The Attorney brought up for discussion the application of the Bonneville Power Administration to construct its power transmission pole line along and across Secondary State Highways No. 334 and No. 335, Umatilla County. It

was pointed out in the discussion that permits have already been issued for power and telephone pole line construction on these highways; that of the Pacific Power and Light Company occupying the westerly side of the right of way one foot distant from the westerly right of way line, and the other side of the highway being reserved for telephone pole line construction. It was also brought out that the permit issued to the Pacific Power and Light Company contains provision for joint use of poles of the company by any company hereafter applying for a location on this highway, but upon terms mutually agreed upon, and if a mutual agreement cannot be reached by both, then upon such terms and conditions as the Oregon Public Utilities Commissioner may prescribe. The Commission offered no objections to the occupation of the highway right of way by the poles of the Bonneville Power Administration provided a mutual agreement can be reached with the Pacific Power and Light Company for the joint use of poles along sections covered by permits heretofore issued to the Pacific Power and Light Company. The Commission instructed the Attorney to inform the Bonneville Power Administration of its findings and to prepare for the Commission's signature a letter directed to the Pacific Power and Light Company requesting its cooperation in arranging for a joint use of poles with the Bonneville Power Administration. (Such letter was prepared by the Attorney and was signed by the Commission later in the session. See letter dated March 24, 1941. Legal Department file R 9182)

The Engineer brought up for discussion the matter of permitting the use of state-owned scales for weighing privately-owned trucks to determine the weight of such vehicles for use in obtaining licenses. He advised that he discussed this matter with Mr. Charles P. Pray, Superintendent of the Department of State Police, who gave as his opinion that the use of the scales for such purpose would establish a bad precedent and would constitute unfair competition with privately-owned scales; further, that Mr. Pray does not believe that commercial weighing of trucks is a proper function for the state police—in any event his men are not equipped to certify truck weights—and under present conditions he has insufficient force to guarantee that he can assign police officers to do such work upon call. In view of this report the Commission decided not to permit the use of state-owned scales for this purpose.

The Engineer reported on the cost to improve First Street West in the city of Ontario as an alternate route for the Old Oregon Trail through this town, which rerouting has been requested by the city officials. He estimated that it would cost about \$34,000 to put this street in condition for state highway traffic, and gave as his opinion that the change is a good one and will provide better routing than is available at the present time. After discussion the Engineer was instructed to inform Mayor Elmo E. Smith that the Commission looks with favor on this change for some time in the future when funds are available to finance the work involved and that in the meantime a detailed survey of the project will be made. The Engineer was thereupon authorized by the Commission to make such detailed survey.

In this connection the Engineer reported receipt of a letter from H. C. Boyer, Ontario, transmitting a newspaper clipping from an Idaho newspaper, having to do with the rerouting of the Old Oregon Trail between Boise, Idaho, and Huntington, Oregon, so as to bypass the town of Ontario. This

matter was discussed at some length and in view of its importance the Commission authorized the Engineer to make a location survey of alternate routes for a revised location of this highway within the State of Oregon.

The Engineer reported that it would cost about \$34,000 to surface and oil the Adrian-Homedale Junction and Homedale-Spur Sections of the Nyssa-Adrian Highway, in Malheur County, 9.9 miles in length, which improvement was requested by a delegation which appeared before the Commission at its previous meeting. The Commission decided, in view of the fact that the construction budget has already been prepared for all available funds, that it has no alternative but to defer this improvement for some future time, and it so ordered.

Reports were also filed by the Engineer on the cost to construct the following improvements;

Eagle Creek-Sandy Section of the Woodburn-Sandy Secondary Highway, in Clackamas County. Estimated cost \$105,000

Springwater-Estacada Section of the Woodburn-Sandy Secondary Highway, in Clackamas County. Estimated cost \$45,000

Nonskidding of the Jackson County Line-Central Point Section of the Pacific Highway, in Jackson County. Estimated cost \$38,600

Grading and construction of bridges on the Dolph-Boyer Section of Federal Aid Route No. 34, in Polk and Yamhill Counties. Estimated cost \$298,983

The Commission deferred a decision in regard to the first two projects mentioned above, pending an inspection by Chairman Cabell and the Engineer some time this coming spring. The Engineer was instructed in the meantime to ascertain whether or not Clackamas County will approve the elimination of the Eagle Creek-Sandy Section from the state secondary highway system if the Commission will designate as a state secondary highway a county road known as the Boring Road. The Commission by unanimous vote approved the nonskidding of the Pacific Highway between the Jackson-Josephine County Line and Central Point, but disapproved the grading and bridge construction on the Boyer-Dolph Cutoff, this being a forest highway project and there being no forest highway funds available to finance it.

The Commission discussed and denied a request from several property owners along the West Portland-Hubbard Highway near 64th Avenue, for a change in plans for the proposed improvement of this highway so as to provide more satisfactory approaches from their property to the highway, it being the thought of the Commission that the plan proposed by the Engineer, which was formulated after careful study, is the best that could be arranged from the standpoint of all parties concerned.

The Engineer reported receipt of a communication from Mr. Ivan F. Phipps, attorney, Portland, regarding the use of a portion of the right of way

of the Vancouver Avenue approach to the Interstate Bridge in connection with a service station business which he proposes to establish at this point, in which Mr. Phipps alleges that the deed whereby he conveyed the right of way to Multnomah County contains provision for the use of a portion of the right of way if he wants it. The Engineer recalled that the Commission previously denied Mr. Phipps' request for such use of the highway. After discussion the Commission referred the matter to the Attorney to investigate the deed and advise the Commission as to whether or not it has legal authority to prohibit Mr. Phipps from encroaching upon the highway.

The Engineer reported on investigations conducted relative to the construction of the county road connection to the relocated Pacific Highway West near the town of Sherwood and recalled that the Washington County Court, at a previous meeting, offered to build this connection which is about 500 feet long if the state would purchase the right of way. He recommended acceptance of the county's offer provided the county will approve the closing of the present connection of the new highway with the old highway near the Votaw Undercrossing, which is a dangerous intersection because of impaired sight distance. The Commission approved the recommendation subject to such condition and ordered the matter covered by appropriate written agreement between the county and the state.

The Commission discussed briefly the matter of completing the oiling work on the Keating Road-Ruckles Creek Section of the Baker-Homestead Highway. The Engineer advised that the Commission awarded a contract last fall for grading work and bridge construction on the section 4.79 miles in length and this spring awarded another contract for oiling this section, together with grading and topping of an additional 3.38 miles. Further, that savings in contracting these two projects amount to \$8,342.60, which is more than half enough to complete the oiling on the entire section, which is 8.2 miles in length, the extra work being estimated to cost \$14,977.30. He gave as his thought that it would be advisable to complete the oiling on the entire section at one time, rather than in increments, notwithstanding that it would necessitate an additional allocation of \$6,634.70. The Commission concurred in the viewpoint of the Engineer but deferred a definite decision in the matter until later when all three members of the Commission are present.

A brief report was submitted by the Engineer on the purchases of concrete culvert pipe as compared to purchases of corrugated metal pipe which indicates that of total purchases between October 15, 1933, and December 31, 1940, those of corrugated metal pipe exceed those of concrete metal pipe by only 2.1 per cent. The Commission considered this a satisfactory showing and ordered the report filed.

A letter was presented from the Blue Mountain Stage Company complaining of the condition of the Austin-Spur Section of the John Day Highway, in Grant County, and urging repairs to improve traffic conditions. The Engineer advised that this road is inadequately surfaced to afford stability during the spring breakup, and when frost rolls begin to break in the spring many mud holes develop. The condition, he added, is no worse this spring

than it has been for years past and maintenance is being carried on in the best manner possible. He estimated that to resurface the entire highway would cost about \$12,000. The Commission decided not to resurface the road at this time.

The matter of improving the Oregon Coast Highway through the Ocean Lake district in Lincoln County was discussed briefly but action thereon was deferred by the Commission until the next meeting.

The Engineer requested authority for an expenditure of approximately \$12,000 for the stabilizing of the river-run gravel base on a one-mile section of the Crater Lake Highway, between Medford and Trail, using 12 per cent of cement with a bituminous concrete wearing surface. He gave as his thought that such type of base would provide a stable roadway comparable to the more expensive heavy concrete base on an adjoining section. The Commission approved the request.

The Secretary presented a petition from residents of Drew and vicinity, in Douglas County, requesting improvements to the Tiller-Drew Section of the Tiller-Trail Secondary Highway. The Commission denied the petition on account of lack of funds with which to finance the work.

The Engineer requested authority to advertise for bids for the grading, surfacing and construction of bituminous wearing surface on two short sections of the Wolf Creek Highway near Necanicum, heretofore tentatively approved by the Commission. The Necanicum Junction Section, he said, is 0.54 mile in length and will require \$16,500 of state funds, and the Vollmer Creek Section, located about seven miles west of Necanicum Junction, is 0.34 mile in length and will also cost about \$16,500 of state funds. The Commission approved both projects.

In this connection the Engineer advised that it would be advisable to secure the surfacing rock for these two sections, estimated to cost \$2,900, under the existing contract with Babler Bros., who are now producing maintenance material at the Hjortland quarry for the state, inasmuch as there is not sufficient material needed in these two sections to justify a contractor making a special plant setup. He requested authority from the Commission to purchase material from Babler Bros. The Commission approved the request.

A letter was presented from W. B. Snider and others, Paisley, Oregon, requesting construction of a cattle pass under the Fremont Highway near a place known as the "Bathhouse", about five miles north of Paisley, Lake County, for use of stockmen in driving stock out of the mountains at the south end of Summer Lake, to the home ranches in and around Paisley. They advised that the Division of Grazing of the Department of Interior has decided to construct fences on both sides of the highway between the "Bathhouse" and Paisley in order to utilize the adjacent land for grazing units, and upon completion of these fences the former route taken by the stock will be closed. Due to the fact that it is absolutely essential that the stock have some way of crossing from the upper, or hill side, to the lower side of the highway and to drift on down to their home ranches, some means must be provided for

the stock to cross the highway and in their estimation the cattle pass is the proper means and its location should be at the upper, or "Bathhouse", end of the section involved. They also advised that the highway is not now fenced, and each year when stock are driven across the highway numerous accidents occur in which cattle are killed and automobiles are wrecked or damaged, and in their estimation these accidents could be avoided by the use of a cattle pass. The Engineer estimated that the cattle pass would cost about \$1,400. After discussion the Commission approved construction of the same, provided it is requested by the Taylor Grazing Service.

The matter of log hauling on state highways was discussed briefly by the Commission, but action thereon was deferred pending the Engineer's detailed report on this subject which, he said, would probably be ready for the Commission at its meeting on April 3, 1941.

The Commission discussed the matter of furnishing state highway maps free of cost to the Oregon State Motor Association, for general distribution. The Engineer advised that the Association has requested about 35,000 maps and has agreed not to print any special advertising matter on them. He estimated that such quantity of maps would cost about \$850.00. The Commission authorized the furnishing of 25,000 maps as a start.

The Commission discussed the designation of the Nehalem Secondary State Highway as a through highway from Forest Grove to Astoria, and decided to so designate this road in view of the large volume of traffic that it carries. The following resolution in regard thereto was adopted by the Commission by unanimous vote:

WHEREAS, that certain highway known as the Nehalem Highway, and otherwise defined as State Secondary Highway No. 102, is a duly established state secondary highway; and

WHEREAS, said highway begins at Forest Grove in Washington County and extends thence northerly through Buxton, Vernonia and Mist, thence northwesterly through Jewell to a connection with the Oregon Coast Highway at the north end of the Young's Bay Bridge in the City of Astoria, and by reason of the fact that said highway connects with the Tualatin Valley Highway at Forest Grove and with the Oregon Coast Highway at Astoria, said highway now carries a large volume of traffic; and

WHEREAS, because of the importance of said highway and the volume of traffic which now moves thereover, it is the judgment of the Commission that said highway should be designated as a main-traveled or through highway;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Commission, all members being present and affirmatively voting, as follows:

1. That the Nehalem Highway, otherwise defined and known as State Secondary Highway No. 102, from its connection with the Tualatin Valley Highway at Forest Grove to its connection with the Oregon Coast Highway at the north end of the Young's Bay Bridge in Astoria be and said highway hereby is designated and declared to be a main-traveled or through highway.

2. That the Highway Engineer be and he hereby is instructed to place along said highway at all points where roads or highways intersect the said secondary highway appropriate signs or markers notifying drivers of vehicles to stop before entering or crossing the said Nehalem Secondary Highway; provided, however, that where said highway intersects the Wolf Creek Highway and the Wilson River Highway traffic entering the Wolf Creek Highway and the Wilson River Highway from the said Nehalem Secondary Highway shall be required to stop.

3. The Engineer is further instructed to place such signs or markers as nearly as practicable at the place where said cross or intersecting roads or highways meet the prolongation of the nearest property line of such through highway, and the place or places where such signs are installed shall designate to the drivers of motor vehicles entering said through highway from any of said cross or intersecting highways the place where the stop shall be made.

4. This resolution shall be entered in the minutes and records of the Commission as of the twenty-fourth day of March, 1941, and a duly certified copy thereof delivered to the Public Roads Administration and a copy to the County Court of Washington County, the County Court of Columbia County and the County Court of Clatsop County.

Consideration was given by the Commission to the application of Mr. C. I. Good, Eugene, for permission to transport over the Siuslaw Highway, from Eugene to Cushman, a boat 12 feet wide overall, 12 feet 6 inches high overall, and 65 feet long overall. The Engineer was instructed to investigate other means of transportation that might be available, such as the Willamette River and the Southern Pacific Railroad, and if it is determined that the boat cannot be transported by any other method, then a permit to move it over the highway is to be granted, if there is sufficient clearance at bridges and if the movement is properly flagged.

The Engineer requested authority to purchase the following equipment:

- 21 4-wheel-drive trucks of type similar to FWD CU model and trade-in of 21 old trucks as part purchase price. Estimated total cash outlay \$4,500 each, or a total of \$94,500.

10 station wagons. Estimated total cost \$9,000.

1 touring car, light-type Buick for use of Assistant Attorney, estimated cost \$1,200.

2 105-cu. ft. portable compressors. Estimated total cost \$2,500.

2 chipping hammers. Estimated total cost \$120.

4 brushes for use in cleaning and painting bridges. Estimated total cost \$480.

After careful consideration the Commission approved the request and instructed the Engineer to make the purchases through the State Board of Control in the usual manner.

A letter was presented from James A. Davis, Acting Director of Highways of the State of Washington, calling attention to the fact that an application has been filed by The Dalles Bridge Company with the District Engineer of the War Department, Portland, for the construction of a bridge across the Columbia River in the vicinity of The Dalles and suggesting, in view of the fact that the Legislatures of the States of both Oregon and Washington have taken action with respect to the acquisition of existing structures and the construction of new bridges over this river between these states, that the highway departments of both states give consideration to the type of structures which may be erected by private operators and which may at some future time affect the operations of the highway departments. The Engineer was instructed to invite Mr. Davis to attend the meeting of the Commission on April 3 for a discussion of this matter. The Engineer was also authorized and instructed to make a comprehensive economic survey of all prospective interstate bridge sites along the Columbia River throughout its entire length in the state of Oregon. The Assistant Engineer, Mr. C. B. McCullough, was instructed to discuss the matter with the United States Army Engineers on the following day.

The Commission considered and signed agreements, et cetera, as follows:

Certificate to secure \$10 payment from Bonneville Power Administration for right to maintain a guy wire and anchor on state property in Hood River County.

Agreement with Anderson Brothers covering construction and maintenance of a logging road across state property adjacent to the Salmon River Highway, in Lincoln County.

Agreement with Albany School District No. 5, whereby the District leases from the state a portion of the right of way of the Pacific Highway East, in College Square, Monteiths Southern Addition to Albany.

Agreement with Bonneville Power Administration authorizing encroachment of a power line on the right of way of the Lower Columbia River Highway, in the Southwest Quarter ($SW\frac{1}{4}$) of the Northwest Quarter ($NW\frac{1}{4}$) of Section 28, Township 2 North, Range 1 West, W. M., Multnomah County.

Agreement with the United States Bureau of Reclamation providing for the construction of the North Unit Main Canal across The Dalles-California Highway, in Deschutes County.

Agreement with Earl Halley, et al, covering the lease of a maintenance headquarters site at Richland, in Baker County.

Agreement with the County Courts of Marion and Linn Counties relative to the designation of the North Santiam Highway as a state secondary highway.

Agreement and easement for right of way granting the United States of America permission to construct stock fences on the right of way of the Central Oregon Highway, Old Oregon Trail, and John Day Highway.

Bargain and sale deed conveying unto Newell Wright 7920 square feet of land situate adjacent to the Pacific Highway, in Government Lot 7, Northwest Quarter ($NW\frac{1}{4}$) of the Southeast Quarter ($SE\frac{1}{4}$) of Section 20, Township 36 South, Range 5 West, W. M., Josephine County. Right of way files No. 7213 and No. 7736.

There being no further business to come before the Commission at this time the meeting was adjourned at 5:30 p. m.

Commissioner

Stanfield, Oregon, March 26, 1941

The State Highway Commission met with a group of local citizens at 3:00 o'clock p. m. in the lobby of the Stanfield Bank, enroute from Portland to Pendleton. Representing the State Highway Department were:

Henry F. Cabell, Chairman
R. H. Baldock, State Highway Engineer
H. B. Glaisyer, Secretary-

There were twelve local citizens, including Mr. N. D. Bard, Southern Pacific Agent, and R. A. McLain.

Mr. Bard headed the group, which asked the Commission to resurface and oil the county road which extends westerly from the town of Stanfield a distance of about seven miles to a connection with the Stanfield-Boardman Highway, near the site of the U. S. Army Ordnance Depot. They gave as their understanding that it will be quite some time before the easterly end of the Stanfield-Boardman Highway, including the bridge over the Umatilla River, is completed and opened for traffic, and urged the Commission to construct the county road section so as to provide a suitable detour for the main-highway traffic, pending completion of the new highway. The present road, they said, is of light-type construction and not capable of standing up under the large volume of traffic that is bound to use it during and after the construction of the Ordnance Depot and the completion of the westerly end of the Stanfield-Boardman Highway. The Commission took the matter under advisement and authorized the Engineer to make investigations as may be necessary.

Enroute to Stanfield the Commission inspected the site of the railroad grade-separation structure on a proposed roadway connecting the Stanfield-Boardman Highway with the U.S. Army Ordnance Depot, at the Morrow-Umatilla County Line. The Commission confirmed action taken at the previous meeting authorizing the Engineer to make surveys as may be necessary for this structure.

Pendleton, Oregon, March 27, 1941

The State Highway Commission held a short session in Room 411, Pendleton Hotel, at 9:00 a. m., and discussed with representatives of the Public Roads Administration matters pertaining to the proposed strategic military highway system in Oregon. Present were: Henry F. Cabell, Chairman; Herman Oliver, Commissioner; R. H. Baldock, State Highway Engineer; H. B. Glaisyer, Secretary, representing the State Highway Department; and W. H. Lynch, District Engineer, and T. M. Davis, Senior Highway Engineer, representing the Public Roads Administration.

The matter was discussed at some length, but final decision in regard thereto was deferred until the meeting of the Commission on April 3 and 4, due to the absence of Commissioner Huron W. Clough.

MAR 27 1941

Messrs. H. C. Boyer, and H. L. Petersen, Ontario, appeared before the Commission in regard to the routing of U. S. Highway No. 30, between Boise, Idaho, and Huntington, Oregon. They stated that a movement is on foot in the State of Idaho to reroute this highway via Weiser, Idaho, by-passing the town of Ontario, Oregon, and urged the Commission to do what it considers necessary and advisable to maintain the present routing through their city. They were informed that the Engineer has already been authorized to make surveys as may be necessary to determine a proper location for a permanent route for this highway in Oregon, and were assured that the Commission will protect the interests of the State of Oregon and the City of Ontario to the fullest extent.

The Commission discussed the award of contract for the grading and topping of the Morrow County Line-Stanfield Section of the Boardman-Stanfield Highway, in Umatilla County, bids for which were received by the Commission at its meeting on February 28, 1941. The Engineer advised that M. L. O'Neil & Son were the low bidders on this project, with their bid of \$109,749.00, but the Commission deferred the award of the contract pending certain conditions which, he said, have now been fulfilled, and a letter has been received from M. L. O'Neil & Son agreeing to defer construction on certain sections until the right of way for such sections has been acquired, and also agreeing that they will file no claim for extra compensation or allowance of any kind, for any losses or expenses incurred by them by reason of the limiting of their operations on account of right of way difficulties. He recommended the award of the contract at this time to M. L. O'Neil & Son, at their bid price. The Commission approved the recommendation.

The Commission also discussed the re-award of the contract for the grading and paving of the St. Helens Section of the Columbia River Highway, in Columbia County, bids for which were taken by the Commission on February 27, 1941, that of Contractor Roy L. Houck being the low one, at \$17,188.50, and that of the United Contracting Company being second-low, at \$26,459.50. The Engineer recalled that the Commission awarded this contract to Mr. Houck, notwithstanding that he had filed a written request for the withdrawal of his bid, asserting that a mistake was made in entering the unit price for one of the items. Since then, he said, Mr. Houck has refused to accept the award, and has paid into the State Highway Fund the amount of his bid bond, so the Commission is now at liberty to either award the contract to the second-low bidder, United Contracting Company, or to re-advertise the project for new bids. He recommended acceptance of the bid of the United Contracting Company. After discussion, the Commission approved the Engineer's recommendation and thereupon re-awarded the contract to the United Contracting Company at its bid price.

At 10:00 o'clock a. m. the Commission made an inspection of the new Government Airport at Pendleton, in company with Colonel C. R. Moore, District Engineer, and Colonel Frank W. Wright, Commander of the Pendleton Airport Base, and particularly discussed a proposed revision in the route of the present Airport Secondary State Highway No. 336, to accommodate and harmonize with the improvements being made by the Federal Government at this place. Representing the State Highway Department on such inspection trip were: Henry F. Cabell,

Chairman of the Commission; Herman Oliver, Commissioner; R. H. Baldock, State Highway Engineer; H. B. Glaisyer, Secretary, and others.

As a result of such inspection the Commission decided to reconstruct this highway on new alignment for three lanes of traffic, which is estimated to cost approximately \$35,000, including the grading, surfacing and oiling, and authorized the Engineer to make surveys as may be necessary for the same. He was also authorized to prepare detailed plans and specifications for the project and to advertise it for bids to be received at the May meeting of the Commission. The Commission authorized state funds to finance the work.

At 12:00 o'clock noon the Commissioners were guests of the Oregon Trail Association at luncheon at the Pendleton Golf Clubhouse, following which a number of delegations appeared before the Commission and presented highway projects in which they are particularly interested. Mr. Charles H. Reynolds, President of the Oregon Trail Association, presided.

A delegation of five members from Ontario, headed by George M. Merritt, Manager of the Moore Hotel, asked the Commission to construct a proposed revision of the Old Oregon Trail, between Ontario and Huntington, and to also reconstruct the railroad underpass near Durkee.

A delegation from Baker, headed by Mr. John Jenkins, President of the Chamber of Commerce, and including County Judge A. R. Baird and four other members, asked for improvements at two grade separation structures, between Baker and Huntington, being one on each side of the town of Durkee.

A delegation from the town of Union, consisting of seven members, and headed by Mr. Glenn Sams, President of the Chamber of Commerce, was present. Mr. G. I. Hess acted as spokesman for the group, and asked for the modernization of the present highway between Union and North Powder.

A delegation from La Grande, consisting of eight members, was introduced, but presented no specific requests.

A delegation from Pendleton, consisting of seven members, and headed by County Judge Carl W. Chambers, who is also President of the Chamber of Commerce, asked for the elimination of the "bottle-neck" on the Columbia River Highway, between The Dalles and Portland. They also asked for the widening of Court Street (state highway route), in Pendleton, and ultimately the straightening of the Blue Mountain Section of the Old Oregon Trail. Mr. Roy Raley, Chairman of the Highway Committee of the Chamber of Commerce, presented the projects in behalf of the delegation.

Mr. D. L. Lemon headed a delegation of three members from the town of Arlington, which requested the reconstruction of the nine-mile section of the Columbia River Highway from the end of the present, improved section at Quinton to the John Day River crossing, and the reconstruction of the highway easterly from Arlington to Heppner Junction, a distance of eleven miles.

Mr. F. M. Sexton, headed a group, consisting of four members, from The Dalles. The following improvements of the Columbia River Highway desired by this delegation were presented by W. S. Nelson, Secretary of The Dalles Chamber of Commerce:

Reconstruction of the Columbia River Highway, between The Dalles and Portland.

Improvements to facilitate the free flow of traffic through The Dalles. In this connection it was suggested that a belt-line highway around the business district would solve the problem.

Improvement of the highway from The Dalles to the junction with The Dalles-California Highway.

Mr. E. E. Lage headed a delegation from the town of Hood River. The group consisted of four members. They asked for the improvement of the Columbia River Highway between The Dalles and Portland by elimination of curves and reconstruction of bridges. They also asked the Commission to preserve the facilities at the Vista House at Crown Point, and to maintain highway approaches thereto for the benefit of tourists when the new highway is completed.

Mr. Ray Conway, Manager of the Oregon State Motor Association, Portland, was present and spoke on the matter of historic signs and markers, and the diversion of state highway funds.

Mr. Reynolds concluded the presentation of the group by suggesting that if the Highway Commission is unable to finance the construction of the new highway between The Dalles and Portland by any other means, it might be advisable to build this section as a toll road. The Oregon Trail Association at this time voted unanimously to approve the program for the improvement of the Old Oregon Trail and the Columbia River Highway, as outlined by the several delegations.

Following this meeting the Highway Commission conferred further with the Hood River delegation and with the delegation from the town of Union. The Hood River delegation was represented by E. E. Lage; R. E. Steele, Secretary of the Chamber of Commerce, and H. L. Shoemaker. Mr. W. S. Nelson, Secretary of The Dalles Chamber of Commerce, and Mr. F. M. Sexton, also of The Dalles, were included in the group. Mr. Shoemaker brought up for discussion a bill now before Congress, which authorizes the Administration of the Bonneville Project to acquire, on behalf of the United States, either by purchase or condemnation, the interstate bridges, (including the approaches thereto), across the Columbia River at Cascade Locks and Hood River. He asked the Commission to endorse such legislation and to help in securing the passage of the bill, which, he says, is now in the Committee on Commerce. Mr. Shoemaker also asked the help of the Commission in securing an additional bridge across the Columbia River at The Dalles. It was his thought that this bridge would be a paying investment and that the Federal Government might approve an expenditure of federal funds to pay one half of the cost. This matter, he said,

has been discussed with Governor Charles A. Sprague, who has indicated a willingness to cooperate, and like assurance has been received from Mr. James Davis, Acting Director of Highways in the State of Washington.

Mr. Nelson stated that there is a lot of complaint concerning the operation of the Columbia River Ferry at Maryhill, which, he has been informed, returns to the owners about \$50,000.00 annually. He said that The Dalles Chamber of Commerce will collaborate with the Commission in any way to further the construction of a new bridge.

Mr. Lage suggested that it would be advisable to send some one to Washington, D. C., if necessary, to ascertain whether or not it would be possible to secure financial assistance from the Federal Government for the projects under discussion.

Chairman Cabell advised that the Highway Commission has been given certain instructions by the 1941 Oregon Legislature, and that the Commission expects to follow these instructions and to give this bridge matter very careful consideration; further, that the Commission has already taken steps to consult with Mr. Davis, Acting Director of the Washington Highway Department, with respect thereto. He pointed out that there is a question as to the proper location for the bridge near The Dalles; also, as to what benefits the motorists of the state, who provide the funds, will receive by this bridge construction. The Commission, he added, intends to give this matter very careful study and cannot make its decision until all factors involved, including the possibilities of bridge construction at Astoria, and other places, have been considered. He concluded the conference by stating that one of the first things to be done is to consult with the highway authorities of the State of Washington, and that these officials will be contacted as soon as possible.

The Union delegation was headed by Mr. G. I. Hess, and included M. A. Davis, D. E. Richards, Glenn Sams, N. I. Morrison, A. R. Galle, and Lester Bramwell. This delegation asked the Commission to reconstruct the present route of the Old Oregon Trail, between Union and North Powder, as the permanent route for this highway, rather than to reroute the highway via Ladd Canyon, as has been proposed.

Mr. Hess presented resolutions from the County Court of Union County, and from Catherine Creek Grange No. 841, requesting the modernization of this highway in its present location from La Grande, through Union and Telocaset, to North Powder. He also presented pictures showing snow conditions along the Ladd Canyon route, and additional pictures showing snow conditions along the present route. He advised that the elevation at the summit on the Ladd Canyon route is 3,806 feet, as compared with the 3,496-foot elevation on the present route. The distance from North Powder to La Grande, via the proposed Ladd Canyon route, he said, is twenty-five miles, which is only 2.95 miles shorter than the distance along the present route and it was his thought that this difference in distance could be reduced by elimination of excessive curvature in the present route. He gave as his belief that the saving in distance alone would not justify any change in the present routing. He expressed his approval of the construction of a market road along the Ladd

MAR 27 1941

Canyon route, but emphatically opposed the construction of an arterial highway in such location, because it would so adversely affect the towns along the present route.

David I. Stoddard, Secretary of the La Grande Chamber of Commerce, who was present, advised that the Board of Directors of the La Grande Chamber of Commerce favors adoption by the Commission of the present route of the Old Oregon Trail, between La Grande and North Powder, as a permanent route for this highway, because the members of the board are of the opinion that snow conditions in Ladd Canyon are much worse than they are along the present route of this highway.

Mr. Bramwell stated that the City Council of Union has gone on record as favoring an ordinance requiring the parallel parking of vehicles along the Old Oregon Trail, through the town of Union, if the Highway Commission wants such method of parking; further, that the City Council is now considering the adoption of an ordinance prohibiting "U" turns at street intersections along the highway.

Mr. Galle urged retention of the present route of the highway and modernization of the same to eliminate curves. He advised that he is in the insurance business and that the companies he represents pay excessive amounts for accident claims, which are directly attributable to the present condition of this road. He also advised that the proposed Ladd Canyon route passes through some of the worst farming districts in Union County, which will have a very bad effect on tourists.

Mr. Davis endorsed the remarks of the other speakers and pointed out that the schools will be very much benefited by the improvement of the existing highway, because it will facilitate the movement of school busses.

Mr. Morrison declared that changing of the route of the present highway will "kill" the towns of Union and North Powder.

The State Highway Engineer advised that investigations are now under way to determine the facts with respect to the alternate routes under discussion, including the route through what is known as "Pyle Canyon." Chairman Cabell advised that the matter under discussion is one of the hardest problems that the Highway Commission has to decide; that the Commission is not committed to any route at the present time, and will not make its decision until it has had an opportunity to study all of the facts. The Commission wants to make certain, he said, that it does not make a wrong decision knowingly. He suggested deferment of any action until the surveys are completed and studied, at which time the Commission will report its findings to the Union County group.

Mr. Galle then asked the Commission to consider, in arriving at its decision, the construction of a cut-off road between the town of Union and a connection with the Tollgate Road at Elgin. It was his thought that the Commission should look into this matter for the benefit of through traffic to Spokane.

This concluded the conference, whereupon the meeting was adjourned at 3:00 o'clock p. m. The Commission motored to John Day the same evening.

John Day, Oregon, March 28, 1941

The State Highway Commission held a brief session at 9:30 o'clock a. m. in the lobby of the John Day Hotel. Present were:

Henry F. Cabell, Chairman
Herman Oliver, Commissioner
R. H. Baldock, State Highway Engineer
H. B. Glaisyer, Secretary

The Commission discussed the oiling of the Butte Creek-Service Creek Section of the John Day Highway, fourteen miles in length, and the oiling of a thirteen-mile section of the Pendleton-John Day Highway, between Mountain Rest and Mt. Vernon. The Engineer recommended the construction of an O-30 type oiling on both of these projects, with an SC-2 prime coat, which he estimated would cost about \$600 per mile, or a total of \$17,800 for both projects, including 10% for engineering and contingencies. After discussion the Commission approved both projects, and authorized the Engineer to advertise them for bids to be received at the next meeting.

The Engineer brought up for discussion the oiling of the Sunset Tunnel-Davies Section of the Wolf Creek Highway, for which the Commission has budgeted \$45,000. He advised that when this matter was previously discussed with the Commission it was thought that the surfacing work would be done by WPA forces, and that the state's contribution would consist only of oiling work. However, he has been unable to find a suitable quarry in the vicinity, so it is going to be necessary to secure oil rock from the old Wolf Creek quarry, where suitable material may be obtained, but at extra cost. He estimated that the project will now cost the state \$111,500; however, he explained that this amount includes additional expense for a leveling course of rock 2 inches thick over the entire section, and a 3-inch rock base between Sunset Tunnel and the crossing of the P.R. & N. Railroad, which was not included in the original estimate. He recommended approval of the increased allotment for this work, so that the project may proceed in accordance with the plans scheduled. The Commission approved the recommendation and authorized the contracting of the work at the earliest opportunity.

Reconsideration was given by the Commission to the matter of extending construction work on the Baker-Homestead Highway to take up the savings that have accrued by reason of contracting last fall the grading and bridge work on the Keating Road-Ruckles Creek Section, 4.79 miles in length, and the contracting this spring of the oiling of the Flagstaff Hill-Ruckles Creek Section, including the grading and topping of an additional 3.38 miles. The Engineer advised that when the latter-mentioned contract was awarded, it was considered that the funds set up for the work were not sufficient to pay for surfacing and oiling the 3.38 mile section. However, it now develops that a saving has accrued, amounting to about \$8,300, on both projects, which is more than one half of the estimated cost of the remaining work. The

estimated cost to surface and oil the remaining section, he said, is approximately \$15,000, so it would be necessary to allocate only \$6,700 additional funds to complete the entire section. He recommended approval of the additional allocation so that the entire 8.2 mile section may be completed and opened to traffic at one time, instead of in increments. The Commission approved the recommendation.

The Engineer reported a communication from the Hines Lumber Company requesting a revision in the alignment of the John Day-Burns Highway, in the town of Seneca, so as to avoid a site upon which they propose to erect an auditorium. They pointed out that the auditorium site is situate across the highway from their grade school, and advised that their object in having the highway alignment revised is in the interests of safety to pedestrians who will be obliged to cross the highway in going from one building to the other. It was the thought of the Commission, inasmuch as the auditorium has not yet been constructed, that it would be better if another site for the same were selected, which would obviate the necessity to cross the highway. Accordingly, the Commission denied the request.

The Secretary presented a letter from the Assistant Attorney, pointing out a typographical error in the right of way resolution adopted by the Commission on October 9, 1940, particularly under item 8088-A, wherein it was stated that the settlement was for an "undivided 7/12 interest in 909 sq. ft. of land at 7/12¢ a square foot", whereas the consideration should have been shown as "7/12 of 20¢ a square foot", the total consideration for this item being \$106.05. The Commission authorized the Secretary to correct the record accordingly.

At 10:00 o'clock a. m. the Commission met with representatives of the Three Flags Highway Association, in the John Day Theater. Representing the Commission were:

Henry F. Cabell, Chairman
Herman Oliver, Commissioner
R. H. Baldock, State Highway Engineer
H. B. Glaisyer, Secretary

There were about fifty members of the association present, including County Judge J. H. Allen, Grant County, who acted as Chairman; President J. C. Jarman, Alturas, California; Forest Cooper, Secretary, Lakeview; and members from the following communities: Burns, Pendleton, Lakeview, Seneca, Canyon City, John Day, Prairie City, Dayville, Portland, and Modoc County, California.

Dr. W. B. Prophet, Mayor of John Day, welcomed the group, following which Judge Allen called upon the Chairman of each delegation to introduce the members thereof. The meeting was unique in that no requests were filed with the State Highway Commission for State Highway improvements.

The meeting was adjourned at 12:00 o'clock noon, following which the Commission and its party were the guests of the John Day Chamber of Commerce for luncheon.

Irene Boyd

\$102.00

The Commission discussed the selection of the military strategic network of highways for Oregon, particularly the map prepared by W. H. Lynch, District Engineer, Public Roads Administration, on which were shown in colors the highways originally proposed for such system and suggested changes and eliminations. After careful consideration of this matter the Commission approved, with certain reservations and qualifications, the revised system, which includes the following highways:

STRATEGIC HIGHWAY SYSTEM OF OREGON

First Priority Highways

1. Pacific Highway (US 99) and Pacific Highway East (US 99E), from the Oregon-Washington state line north of Portland to the Oregon-California state line south of Ashland.
2. Columbia River Highway (US 30 and US 730), from Portland to the Oregon-Washington state line, near Wallula, Washington.
3. Old Oregon Trail (US 30), from its junction with the Columbia River Highway (US 30) at Umatilla to its junction with the Central Oregon Highway (US 28) near Ontario, including the spur section which extends easterly from Ontario to the Oregon-Idaho state line.
4. Boardman-Stanfield Highway, from its junction with the Columbia River Highway (US 30) near Boardman, to its junction with the Old Oregon Trail (US 30), near Stanfield.
5. Sherman Highway (US 97), from its junction with the Columbia River Highway (US 30), near Biggs, to its junction with The Dalles-California Highway (US 97 and ORE 50) at the head of Cow Canyon, in Wasco County.
6. The Dalles-California Highway (US 97), from its junction with the Sherman Highway (US 97) at the head of Cow Canyon, to the Oregon-California state line near Dorris, California.
7. Klamath Falls-Lakeview Highway (ORE 66), from Klamath Falls to its junction with the Klamath Falls-Malin Highway (ORE 39).
8. Klamath Falls-Malin Highway (ORE 39), from its junction with the Klamath Falls-Lakeview Highway (ORE 66), to its junction with the Hatfield Secondary Highway (ORE 39) near Merrill.
9. Hatfield Secondary Highway (ORE 39), from its junction with the Klamath Falls-Malin Highway (ORE 39) to the Oregon-California state line.
10. Redwood Highway (US 199), from Grants Pass to the Oregon-California state line southwest of Kerby, in Josephine County.

11. Willamette Highway (ORE 58), from Goshen, Lane County to its junction with The Dalles-California Highway (US 97) south of Crescent, Klamath County.

12. Mt. Hood Highway (ORE 50), from Portland to its junction with the Wapinitia Highway (ORE 50).

13. Wapinitia Highway (ORE 50), from its junction with the Mt. Hood Highway (ORE 50) to its junction with the Warm Springs Highway (ORE 27).

14. Warm Springs Highway (ORE 27), from its junction with the Wapinitia Highway (ORE 50) to Madras.

15. Wolf Creek Highway (ORE 2), from Portland to its junction with the Oregon Coast Highway (US 101) at Cannon Beach Junction.

16. Oregon Coast Highway (US 101), from its junction with the Wolf Creek Highway (ORE 2) at Cannon Beach Junction to its junction with the Fort Stevens Road.

Second Priority Highways

1. Oregon Coast Highway (US 101), from Astoria to its junction with the Fort Stevens Road, and from its junction with the Necanicum Highway near Wheeler to the Oregon-California state line south of Brookings.

2. Necanicum Highway, from its junction with the Oregon Coast Highway (US 101) near Wheeler to its junction with the Wolf Creek Highway (ORE 53) at Necanicum Junction.

3. Umpqua Highway (ORE 38), from Drain to Reedsport.

4. Salmon River Highway (ORE 18), from its junction with the Pacific Highway West (US 99W) near McMinnville to Otis.

5. Pacific Highway West (US 99W), from its junction with the Pacific Highway (US 99) in Portland to its junction with the Pacific Highway East (US 99E) at Junction City.

6. Three Rivers Highway (ORE 14), from Valley Junction to Hebo.

7. Wilson River Highway (ORE 6), from Tillamook to its junction with the Wolf Creek Highway (ORE 2) near North Plains.

8. Columbia River Highway (US 30), from Portland to Astoria.

9. Santiam Highway (US 20), from Albany to Sisters.

10. McKenzie-Bend Highway (US 20), from Sisters to its junction with The Dalles-California Highway (US 97) near Bend.

11. Central Oregon Highway (US 20 and US 28), from Bend to its junction with the Old Oregon Trail near Ontario.

12. I.O.N. Secondary Highway (US 95), from its junction with the Jordan Valley Secondary Highway, west of Jordan Valley, to the Oregon-Nevada state line, near McDermitt, Nevada, and from its junction with the Jordan Valley Highway north of Jordan Valley to the Oregon-Idaho state line near Malloy Ranch.

13. Jordan Valley Secondary Highway, from its junction with the I.O.N. Secondary Highway (US 95), north of Jordan Valley, to its junction with the I.O.N. Secondary Highway (US 95), west of Jordan Valley.

Third Priority Highways

1. Albany-Corvallis Highway (ORE 26), from Albany to Corvallis.
2. Corvallis-Newport Highway (ORE 26), from Corvallis to Newport.

The Commission thereupon signed four copies of Mr. Lynch's map* which were then delivered to Mr. Lynch with the following letter of transmittal, said letter being signed by R. H. Baldock, State Highway Engineer, upon approval of the Commission:

Pursuant to our conversation last week in Pendleton, the Highway Commission has carefully studied the routes suggested by the Public Roads Administration for the selection of the military strategic network in Oregon. The Commission has approved the map which you submitted, with the following reservations and qualifications:

1. The Commission is willing to eliminate the designation of its John Day-Ochoco Highway, Federal Route 28, provided the Public Roads Administration is willing to permit the allocation of reasonable sums annually of federal aid and forest funds to this road; provided, of course, there are no mandatory restrictions imposed by the Congress nor administrative orders to prevent such allocation.

2. In the event Congressional or administrative orders prevent the allocation of federal aid and/or forest funds to this road, the Commission reserves the right to again present its reasons for the inclusion of US 28 in the military strategic system.

3. Attention is called to the fact that the final location of that section of US 97 from Shaniko Junction to Biggs is dependent upon the selection of the location of the bridge crossing the Columbia River.

* See map in file No. 1 - Strategic Highway System of Oregon.

APR 5 1941

All other changes and designations of the strategic military network as shown by the map signed by the Commission on April 3 are hereby agreed to without reservations of any kind.

The matter of financing the reconstruction of the Ochoco Highway between Marks Creek and Mitchell was discussed. It was pointed out that federal requirements may prohibit the expenditure of forest highway funds for the improvement of roads that are not on the strategic military system and the probabilities are that funds heretofore allocated to the forest section east of Marks Creek will have to be reallocated. The Commission decided, if forest highway funds cannot be used for such project, to use federal aid funds along with state funds to finance it, so as to insure that the work will proceed as planned.

Senator Howard C. Belton, Clackamas County, headed a delegation, including County Judge E. L. Pope and County Commissioners C. W. Kruse and George G. Randall, County Engineer D. T. Meldrum, and Mayor J. R. Vinyard of Canby, which came before the Commission relative to the designation and improvement, as state secondary highways, of the following county roads:

Market Road No. 10, from Canby to the junction with the Woodburn-Mt. Hood Loop Secondary Highway at a place known as Erickson's Corner.

Market Road No. 25 from Molalla southeasterly to a point near the confluence of the Molalla River with the North Fork Molalla River.

Chairman Cabell expressed regrets that the Commission is not in a position today to decide this matter, but promised that a decision would be made at the May meeting of the Commission. It was agreed that a joint inspection of the roads would be made with Senator Belton and the County Court in the meantime.

County Judge C. L. Allen and County Commissioner Ole Grubb of Deschutes County were present and requested the following improvements: Oiling of the Tumalo-Deschutes Secondary Highway 3.9 miles in length; oiling of the Cline Falls Secondary Highway, from Tumalo north 3.6 miles. They expressed a preference for the Tumalo-Deschutes improvement. They also asked for the improvement of the O'Neil Secondary Highway. The Engineer estimated the Tumalo-Deschutes project would cost about \$16,000, and the Tumalo-Cline Falls project about \$17,000. The County Court was informed that the projects requested are not programmed as yet but that the Commission will consider them in the formulation of the next program.

Representative J. S. Greenwood, of Clackamas County, conferred with the Commission regarding the issuance of continuous permits for log hauling on state highways. He was informed that the Commission is now revising its

rules and regulations in that regard and hopes to be able to publish them in the not distant future.

The Commission discussed a letter from Honorable Robert W. Sawyer, Bend, in regard to the \$1.00 fee that travelers through Crater Lake Park are required to pay regardless of whether or not they drive to the lake or make use of the park facilities. Mr. Sawyer gave as his understanding that a similar condition exists at Rainier National Park in the State of Washington, and that people are relieved from payment of any fee for simply passing through one side of this park. It was his suggestion that this matter be investigated and, if found to be true, that the park authorities be requested to permit travel through Crater Lake Park without charge if the lake is not visited. The Engineer was instructed to inform Mr. Sawyer that the Commission is considering a procedure for the elimination of this \$1.00 fee at this place.

In this connection Chairman Cabell suggested, as an inducement for the elimination of the \$1.00 fee, that it might be advisable for the State to pay a portion of the cost of maintaining the highway through the park, the amount of such cooperation to be in the same proportion that the volume of traffic that simply passes through the park without viewing the lake bears to the total traffic that enters the park. After discussion the Commission voted unanimously in favor of the Chairman's suggestion. The Engineer was instructed to offer this proposition to Mr. E. P. Leavitt, Superintendent of the Park. He was instructed to study Mr. Leavitt's report heretofore filed with the Commission on this subject and to bring the matter up again for further discussion at the next meeting.

The Engineer discussed with the Commission matters pertaining to the proposed reconstruction of the Pacific Highway between Eugene and Springfield Junction. He advised that the improvement as proposed contemplates shifting the Southern Pacific Railroad tracks to a location near the Willamette River and the utilization of the present railroad grade for the highway, and that the plans call for a certain type of construction with respect to the new railroad line; however, the railroad company is experiencing considerable trouble with high water in its California division and is fearful that similar trouble will be encountered between Eugene and Springfield unless special precautions are taken to avoid it, and accordingly, the railroad company officials have stated that they will not approve the specifications unless certain changes are made, which will increase the cost of the project about \$90,000, including \$21,000 for signal installation, and \$5,000 for a Kirkbride fishplate. He also said that there is some difference of opinion relative to the value of the property that the Commission is obtaining from the railroad company, compared with the property that the Commission is purchasing for the new railroad line. He recommended the following procedure for the contracting of this work: Grading of the railroad line change costing about \$150,000, bids to be taken in June if the right of way situation is cleared; taking of bids for the construction of the grade separation structure in January of 1942, and the contracting of the balance of the work later. The Commission indicated approval of the Engineer's recommendation but deferred a decision pending inspection of the premises. It was decided to make

such inspection some time during the week commencing April 14. The Engineer was instructed to invite representatives of the railroad company to be present on such inspection. The Attorney was instructed to re-appraise the properties that the state is receiving from the railroad company, and those which are being acquired by the state for the new railroad line, and to have these figures available at that time.

The Commission conferred with W. H. Lynch, District Engineer, and H. D. Farmer, Senior Highway Engineer, representing the Public Roads Administration; and F. H. Brundage, representing the U. S. Forest Service, in regard to revising the 1941 Forest Highway Program, in view of the probabilities that Congress will not appropriate the full amount of federal funds heretofore recommended for the 1941 program. Mr. Lynch recalled that the program, as originally proposed, necessitates the appropriation of \$11,000,000; however, according to latest information available, the House of Representatives has reduced the amount to \$9,000,000, so it will be necessary to delete a number of projects in the original setup. After full discussion of this matter, it was mutually agreed to defer the construction of the following projects:

Reconstruction and surfacing of the seven-mile section of the John Day-Burns Highway, in Grant County - estimated cost, \$60,000.

Grading of 0.8-mile section of the Flora-Enterprise Highway, in Wallowa County - estimated cost, \$80,000.

It was also agreed that these projects should be given priority consideration in the 1942 Forest Highway Program.

It was decided to defer the contracting of the Wapinitia Highway project, costing \$115,000, and the Klamath Falls-Lakeview Highway project, costing \$100,000, as the last projects to be contracted in the 1941 program; the contract for the Klamath Falls-Lakeview project to be awarded in the program for 1942, rather than this year, when it is proposed to include additional funds to finish the entire project.

The Engineer reported that recent inspection of the Willamette Highway indicates that there are two sections badly in need of resurfacing, one of which is at the summit, and the other near Oakridge. He recommended that the \$85,000 of Forest Highway Funds programmed for this highway be expended for the resurfacing of the seven-mile section at the summit, starting at the Highway Department's maintenance station, near Odell Lake. His recommendation was approved by all concerned. After further discussion, the following revisions in the Fiscal Year 1941 Forest Highway Program were approved by mutual consent:

No.	Project	Present Approved Program Amount		Recommended Revisions	
		Forest Hwy.	Coop.	Forest Hwy.	Coop.
SN 10-D1,E	Oregon Coast Hwy. Reconst. Grad. & Surf., 1.3 mi.	\$70,000	\$50,000	\$110,000	\$10,000
21-F5,Q3,H4	Willamette Hwy. Surf., 7.5 mi.	85,000		designation revised as indicated below	
21-M	Willamette Hwy. Surf., 7 mi.			85,000	
SN 23-E2,G4	Santiam Hwy. Reconst. Grad. & Surf., 7 mi.	100,000	50,000	150,000	
26-C5	Wapinitia Hwy. Reconst. Grad., Surf. & Br., 2.5 mi.	65,000	50,000	115,000	
35-A7	John Day-Burns Hwy. Reconst. Surf., 7.0 mi.	60,000		to be eliminated	
38-E	Flora-Enterprise Hwy. Grad., .8 mi.	80,000		to be eliminated	
46-C1,D	Cascade Lakes Hwy. Grad. & Adv. Clear., 13 mi.	50,000		10,000	40,000
50-A1,B	Timberline Hwy. Grad., Surf. & Adv. Clear., 5 mi.	125,000		25,000	100,000
	Location Survey	30,000		70,000	
	Maintenance	25,000		55,000	
		\$690,000	\$150,000	\$620,000	\$150,000

The readjustments in the financing above cited releasing Forest Highway Funds from two of the Class 3 highways and substituting therefor state cooperative funds is recommended due to the urgent solicitation of the highway department that improvement on these projects be carried out this season. They had previously proffered cooperation on other projects, but now request that their funds be released from those projects and substituted on the Class 3 routes.

Traffic during the past winter has demonstrated that the section of the Willamette Highway in the vicinity of Odell Lake is in greater need of immediate improvement than is the section cited in the present approved program. The revision is recommended in order that the more urgent work may be carried out first.

Due to the fact that we were delayed in advertising the program to such an extent that it seemed impossible to place the bituminous surfacing this season on the John Day-Burns Project 35-A7, the state desired to take over the obligation, and has already put the project under contract with its own funds. There is thus released the \$60,000 programmed to that project. The funds released will finance increases in other items of the program.

It is now found that the State of Washington is not making as rapid progress as had been anticipated on the section of the Flora-Enterprise Route approaching the Oregon line from the north. It is, therefore, unnecessary for us to complete our section this season. It is recommended that the project be eliminated from the current program; thus releasing funds which will be needed to finance overhead and to increase the contingent fund.

Funds requested for location surveys are required to finance surveys on routes which have already been approved.

The sum recommended for lump fund maintenance is planned to cover maintenance obligation on Forest Highways for which the Federal Government is obligated in the fiscal year 1942.

A letter directed to the Chief of the Forest Service and the Commissioner of Public Roads, Washington, D. C. recommending such revisions was signed by the Commission on the following day.

The Commission discussed the application of the City of Newport for the substitution of angle parking for parallel parking along the Oregon Coast Highway through their city, and for the installation of a flashing beacon at the intersection of the Oregon Coast Highway with Hulbert Street. The Engineer recommended the installation of the flashing beacon, which is estimated to cost \$150.00, but that the city's request for the angle parking be denied. The Commission approved the recommendation by unanimous vote.

The Commission also discussed the request from the City of Salem for state cooperation in the installation of traffic signals at the intersection of Capitol Street (Pacific Highway East) and Center Street, in Salem. The Engineer advised that this matter was investigated about a year ago and it was found that the installation is warranted and that the city was so advised but, due to the fact that the city was unable to provide its share of the cost, nothing was done. He estimated the cost of installing semi traffic-actuated signals which, in his estimation, are best adapted to this intersection, at \$2,500, one-half of which, or \$1,250, would be the state's share, in

accordance with the Commission's present policy. He recommended approval of the project provided the city will contribute one half the expense. The Commission approved the recommendation.

A request from Mr. A. J. Witchel, Chief Engineer, S.P. & S. Railroad Company, Portland, for a revision in the grade crossing signalization program had the attention of the Commission. Mr. Witchel asked that the program be revised by deleting therefrom the signalization project heretofore approved on Front Street, in Salem, and substituting therefor a crossing of the Oregon Electric Railway in the town of Beaverton. The Engineer advised that the signalization program has already been prepared and it is now too late to make any changes so, if the Commission wants to install the signal at Beaverton, state funds will have to be used to finance it. He estimated the cost of such installation between \$2,500 and \$3,000. After discussion, the Commission denied the request. However, the Engineer was instructed to bear Mr. Witchel's request in mind in preparing the next program for grade crossing signalization projects and to include in that program at least one installation on the Northern Pacific System, if necessary to secure the approval of that company.

The Commission recessed at 12:00 noon, and reconvened at 2:00 p. m. in the same room with all Commissioners, the State Highway Engineer, the Attorney, and the Secretary present.

The Secretary presented a letter from the Roseburg Chamber of Commerce inviting the members of the Commission and its staff to a banquet in Roseburg on Tuesday evening, April 8, 1941, honoring Mr. W. C. Harding, retiring Secretary of the Chamber. Chairman Cabell and Commissioner Oliver expressed regrets that they would not be able to attend this function and it was decided that Commissioner Clough and the State Highway Engineer should represent the Commission on this occasion.

A delegation from Parkrose, representing the Parkrose Chamber of Commerce and headed by Carl W. Helwage, Secretary, came before the Commission in regard to the installation of "stop" and "go" signals along Sandy Boulevard (Columbia River Highway) at the following intersections: 105th Avenue, 89th and Prescott Streets, and at Columbia Boulevard. Others in the delegation were Frank McQuilkin, Harry H. Pearce, Member of the Parkrose School Board, and Paul Jarrett, Chief of the Fire Department. Mr. Helwage read aloud and presented a letter signed by himself, as Clerk of the Parkrose Public Schools, urging the installation of the signals. The Engineer advised that the signals might help but, in his estimation, the most pressing need is for better police protection. He pointed out that according to the present policy of the Commission, installations of this type are to be paid 50 per cent by the state and 50 per cent by the local community and, in view thereof, he suggested that it would be advisable for the people of Parkrose to incorporate so they can comply with the Commission's requirements in this regard and also secure the benefits of protection offered by police. Mr. Pearce advised that the people of Parkrose are opposed to incorporation. After discussion, the Engineer was instructed by the Commission to make another investigation of traffic volume and accidents at this location.

Mr. Pearce also asked for the widening of the present highway for four lanes of traffic through their community. He declared that the present three-lane highway is too narrow and that if the Commission would approve the widening of the pavement full width between existing curbs, it would not only increase the safety factor but would also eliminate a very bad dust condition along the highway shoulders. Mr. Helwage offered the services of the Parkrose Chamber of Commerce in securing right of way for the widening project, particularly at the point where the land is needed from the Cemetery Association. The Commission took the matter under advisement.

At 2:30 p. m. Chairman Cabell announced the following awards of contracts and sale of property, bids for which were received by the Commission at the morning session, such awards having been previously approved by the Commission by unanimous vote:

"Dixie Summit Section of the John Day Highway, in Grant County. 5.10 miles grading and 2.23 miles bituminous macadam surfacing. Leonard & Slate, Multnomah, submitted the low bid for this work in the amount of \$161,540.00. Max J. Kuney Co., Spokane, Washington, submitted the next low bid in the amount of \$164,783.00. There were six higher bidders. The Commission has referred all bids on this project to the Engineer with power to award the contract to the low bidder when certain conditions have been fulfilled. (Awarded the following day.)

"Vance Creek-Soda Mountain Section of the John Day-Burns Highway, in Grant County. 4.02 miles grading and 18.02 miles surfacing and oiling. The low bid received for this project was that of Babler Bros., Portland, in the amount of \$120,788.00. The second-low bid was that of Norris Bros., Burlington, Washington, in the amount of \$127,798.50. There were three higher bidders. The Commission refers all bids received for this work to the Engineer with power to award the contract to the low bidder when certain conditions have been fulfilled. (Awarded to Babler Bros. the following day).

"Foster-Cascadia Section of the Santiam Highway, in Linn County. 10.39 miles surfacing. Four bids were submitted for this project, the low one being that of O. C. Yocom, Willamina, in the amount of \$12,637.00 and the second-low being that of Salem Supply Company, Salem, at \$13,180.00. The Commission awards this contract to O. C. Yocom, the low bidder, at his bid of \$12,637.00.

"Morrow County Line-Stanfield Section Bridges on the Boardman-Stanfield Highway, in Umatilla County. One 30-foot reinforced concrete span over Butter Creek and one 30-foot reinforced concrete span over the irrigation canal at Station 989+00. A. Milne, Portland, submitted the low bid for this work in the amount of \$7,360.00 and McMutt Bros., Eugene, submitted the second-low bid in the amount of \$7,900.00. The only other bid submitted was that of Norris & Philpott, Portland. The Commission awards this contract to the low bidder, A. Milne, at his bid of \$7,360.00.

"Bridge over Meadowbrook Creek near Starkey on the Starkey Secondary Highway, in Union County. Three 35-ft. untreated timber spans. Three bids were received for this work, the low one being that of Norris and Philpott, Portland, at \$5,030.00 and the second-low being that of A. Milne, Portland, at \$5,224.00. The Commission awards this contract to Norris and Philpott at their low bid of \$5,030.00.

"Vandehey and Van Dyke Sections of the Nehalem Secondary Highway, in Washington County. 1.08 miles grading, surfacing and oiling. Three bids were received for this job, the low one being that submitted by Gales Creek Sand and Gravel, Forest Grove, at \$23,447.00, based on the use of tar. They did not submit a bid based on the use of asphalt. The second-low bid was submitted by C. J. Eldon, Portland, at \$27,741.00 based on the use of tar, and \$27,776.00, based on the use of asphalt. The Commission has referred all bids for this project to the Engineer with power to award the contract to the low bidder when certain conditions have been fulfilled. (Awarded to Gales Creek Sand and Gravel, using tar, on April 4, 1941.)

"Taylor Creek Section of the Ochoco Highway, in Wheeler County. 0.80 mile grading. M. L. O'Neil & Son, Stanfield, submitted the low bid for this project in the amount of \$52,940.00. Leonard & Slate, Multnomah, submitted the second-low bid in the amount of \$58,130.00. There were nine higher bidders. The Commission has referred all bids received for this project to the Engineer with power to award the contract to the low bidder when certain conditions have been satisfied. (Awarded the following day to M. L. O'Neil & Son.)

Sale of Buildings and Property

"Sale of Building No. 3645, formerly owned by Sarah Young Estate, in West Portland. The Commission has rejected both bids received for the purchase of this building. The Commission also rejects the bid of Irene Boyd for the purchase of Tract B in Cottage Grove, which was the only bid received. Tract A in Cottage Grove, former owners A.M. Helliwell and G.M. Hawley, is sold to T.L. Kuhns, at his high bid of \$2,026.00"

- - - - -

A delegation representing the Oregon Coast Highway Association and including Arch B. Sanders, Manager; County Judge E. L. Peterson and County Commissioner Lars Peterson, of Coos County; Ora E. Wilson, President, Gold Beach Chamber of Commerce; Lefe Compton of Coquille; A. A. Hall and C. H. Coe of Marshfield, and Frank Taylor of Reedsport, came before the Commission in regard to the allocation of state highway funds. Mr. Sanders headed the group and Mr. Hall was chief spokesman. He said that the Coast Highway Association approves the Commission's method of allocating highway funds to the various districts of the state, as the normal procedure, but during abnormal times such as now obtain, when the Federal Government is seriously considering the appropriation of special funds with which to finance the improvement of highways on the strategic military highway system, they are of the belief that the Commission should modify its method of allocating the moneys at its disposal so as to provide a more equitable and fair distribution of such funds. He gave as their understanding that the Pacific Highway is to receive a considerable amount of special funds and gave as their feeling that, if such is to be the case, it is only fair and proper that the State Highway

APR 5 1941

Commission transfer the regular funds heretofore budgeted for the Pacific Highway improvement to the Oregon Coast Highway where they can be used to finance the work that is badly needed to take care of civilian traffic.

Chairman Cabell advised that Congress has not yet provided the special funds referred to by Mr. Hall although the appropriation has been recommended by Mr. John M. Carmody, Federal Works Administrator, and by Mr. Thomas H. MacDonald, Commissioner of Public Roads. He also said that the Commission is sympathetic to the tenor of the delegation's request, but is not in a position at this time to make any statement relative thereto. Further, that the Commission has three major projects that it is now undertaking; viz., the reconstruction of the Columbia River Highway, between Troutdale and The Dalles, the improvement of the Pacific Highway, between Roseburg and Grants Pass, and several problems on the Oregon Coast Highway and, if the Commission is able to secure special financial relief in connection with any of these projects, then perhaps it can give consideration to the redistribution of funds for other improvements.

Judge Peterson then brought up for discussion the matter of additional right of way needed for the improvement of the Oregon Coast Highway, between North Bend and Bunker Hill. He said that the county owns considerable property at this location, and has received offers from private parties to purchase some of it. However, the county court will not make any sales until it knows just what the state needs. He asked the Commission to send a right of way man to Marshfield to discuss the matter with the county court. The Commission thanked him for his suggestion and instructed the Attorney to see that a right-of-way man contacts the county court as soon as possible.

Mr. Sanders brought up again the matter of providing sanitary facilities for the general public at Depoe Bay. He was informed that the Commission denied the previous request for such facilities upon recommendation of the State Parks Superintendent, and that it is not inclined to alter its decision at this time.

A delegation from Ashland, consisting of Mayor T. S. Wiley, R. E. Koozer, Councilman; and Frank J. Van Dyke, City Attorney, was present and discussed with the Commission the matter of the elimination of the bottleneck on the Pacific Highway at what is known as Plaza Corner, in Ashland, which matter has heretofore been brought to the attention of the Commission. They urged the improvement at the earliest possible time as a national defense item to facilitate the movement of troops and advised that they are very anxious for the Commission's decision and a definite commitment to the project as soon as possible. The Engineer advised that final plans for the project have not yet been completed, particularly the traffic channelization feature, but he expects to make his report to the Commission on this matter in the near future.

Chairman Cabell advised that approval of this project is dependent on availability of funds, and that the Commission is not in a position at the present time to make a promise, but expects to decide the matter soon. The Commission discussed this matter further after the group departed, and authorized the Engineer at that time to complete the plans and to prepare right of

way descriptions. Mr. Van Dyke reappeared before the Commission later and asked the Commission to authorize negotiations for the right of way. The Commission approved the request and so ordered.

A delegation representing the South Tillamook County Chamber of Commerce came before the Commission and urged the construction of a highway connecting the Salmon River Highway and the Three Rivers Highway, between Boyer and Dolph, and the construction of the Little Nestucca Secondary Highway, between Dolph and the junction with the Oregon Coast Highway near Meda. The delegation was headed by Mr. Mervin Boyer and included the following: James T. Young, S. D. Hammond, Harry Hammell, Jake Reddikopp, Norman Reddikopp, Frank Dordan, Wes. Schulmerich, Howard Owens, Dave Nelson, and former County Judge E. Belts. They urged the above improvements from the national defense standpoint and for the benefit of ranchers. Mr. Boyer filed petitions bearing the names of some 800 citizens of this district urging the construction of the Boyer-Dolph cutoff.

Chairman Cabell advised that the Boyer-Dolph project is an expensive one and the Commission is faced with the problem of balancing this cost against other projects in the Tillamook district and it appears to the Commission that the benefits that would be derived from the construction of this project would not be as great as the benefits derived from other projects costing the same amount of money. Mr. Belts declared that this project is a meritorious one and that Tillamook County is entitled to it because the county up to the present time has not had its share of state secondary money. He was informed by Chairman Cabell that the Commission has spent a considerable amount of Federal Aid Secondary Highway Funds on county roads in Tillamook County. Mr. Young, Secretary of the Association, alleged that the purpose of roads is to develop communities and, in his estimation, improvement of this road will be very beneficial from that standpoint. Mr. Hammond urged construction of the road as a safety measure, stating that the present road between Valley Junction and Dolph is very crooked and dangerous. Mr. Boyer concluded the presentation by a few remarks from the maintenance standpoint, giving as his thought that the state would save considerable sums in maintenance operations by reason of lessening the mileage of highway to be maintained. The Commission took no action on the matter.

Messrs. H. H. McCowan and V. F. Harper, representing the Bonneville Power Administration, were present and asked permission to move, without load, over the Columbia River Highway from Hood River to The Dalles, a truck and semi-trailer attachment weighing 26 tons and being 9'8" wide and 61'6" in length; and to transport on such equipment, from The Dalles to a point two miles westerly thereof, one transformer weighing twenty tons, which is to be used in connection with the Bonneville power project. The Commission granted the request subject to the condition that the movement is accompanied by three flagmen, one to proceed in front of the truck, one to follow in the rear, and one to be stationed on the truck as protection against the side-swiping of passing traffic.

Mr. Glen W. Berry, Prineville, came before the Commission in regard to a settlement for right of way which was acquired for the improvement

of the Ochoco Highway in Prineville. Mr. Berry alleged misrepresentation by the Highway Department right-of-way agent as to the grade line of the highway, and advised that at that time it was his thought that the highway would not adversely affect his property; however, since the highway has been constructed, he finds that it leaves his property in a hole. He further stated that he has already paid \$175.00 for filling in a portion of his lot but believes that he should not be required to go to further expense, and accordingly, is asking the state to raise his house to the proper elevation and fill in the balance of his lot.

The Assistant Attorney explained that the grade of the constructed highway is actually 0.82 of a foot lower than the original plans called for, and that the sidewalk was constructed lower than the concrete curb, rather than on a level with the curb, in order to accommodate Mr. Berry's premises. It was his thought that Mr. Berry has no cause for complaint because, in his estimation, the property is worth more now than it would have been had the original plans been followed. The Commission's Chief Counsel advised that, in his estimation, the Commission has done more for Mr. Berry than it really was obligated to do, and is not legally liable to do anything further for Mr. Berry. The matter was discussed at some length, but decision was deferred pending personal inspection of the premises by Chairman Cabell. Mr. Berry stated his approval of this arrangement.

Messrs. George Cross, City Recorder, and L. D. Taylor, Councilman, representing the City Council of Halsey, were present and inquired as to the plans of the Commission for the improvement of the Pacific Highway East through their city. They were informed that the Commission has this project in mind and expects to undertake it as soon as funds are available to finance the work but it is not likely that it can be contracted until some time this fall. Mr. Taylor inquired as to the obligation of the city with respect to the clearing of the right of way of encroachments and whether the Commission has any record of an agreement with the city covering such matter. He was informed by the Engineer that a written agreement was entered into by the city and the state covering such matter, which obligates the city to remove all encroachments at city expense.

A large delegation from Oswego, headed by Fred C. Inkster, President of the Oswego City Council, came before the Commission in the interests of the improvement of the Oswego Highway through their town. The delegation included the following: Mayor O. C. Roehr, Mesdames V. H. Sadilek, Claude A. Smith, F. C. Inkster, I. J. Vinson, Elizabeth Salway, R. M. Gifford, A. G. Persels, and E. L. Soule; also Messrs. Earl G. Goss, I. J. Vinson, Ed Bartels, Dr. R. E. Walstrom, W. H. Persels, Paul Murphy, Ben F. Walling, Charles Needham, A. J. Huddleston, Allen Morris, E. L. Gray and Ray L. Martin.

The Engineer explained the plans for the proposed improvement which provides for four lanes of traffic along the section that begins at Kirkham Street on the south and ends at "B" Street on the north. Such improvement, he said, involves the widening of the present three-lane highway and considerable landscaping in the area between the highway and the railroad. The road

work, he said, is estimated to cost about \$25,000 and the landscaping work about \$5,000. He further advised that the Commission considers this a priority project for federal aid funds. Mayor Roehr reported that arrangements have already been made for the removal of utility poles from the highway, and for the parallel parking of automobiles through the business district. There followed a general discussion of the project and inspection of the plans, which were exhibited by the Engineer. Chairman Cabell advised that if the plans appear to be satisfactory to the people of Oswego, then, in his estimation, the project should go forward without delay. Commissioners Clough and Oliver approved Chairman Cabell's statement. The group was then informed by Chairman Cabell that the project will be placed in the Commission's program for early construction and, while there is still a question as to just when the Commission will contract the work, he anticipates that bids will be taken within a reasonable time.

Mr. D. F. Moehnke, Alsea, was present and asked the Commission to improve the 1.3-mile section of the Alsea-Deadwood Secondary Highway, in Lincoln County, so as to facilitate log hauling operations in that district. He was informed that there are no funds available to finance such improvement at the present time, but the Commission will keep the project in mind, and will inspect it when in that vicinity.

The Attorney brought up for discussion matters pertaining to the proposed Front Avenue project in Portland, particularly a letter directed to Ormond R. Bean, Public Utilities Commissioner, with respect to a petition that is now pending before him as Public Utilities Commissioner for Oregon and as Examiner for the Interstate Commerce Commission with respect to the abandonment by the United Railways Company of certain rail service from Front Avenue and the removal of the Company's tracks and other rail facilities therefrom. (For details see letter dated April 3, 1941.) He read aloud such letter, which the Commission approved and thereupon signed.

The Engineer presented a list of proposed sidewalk projects covering the entire state, as previously instructed by the Commission, consisting of projects which he considered to be of first importance among those that have been requested. After discussion, the Commission authorized an expenditure of \$35,000 of state funds to finance such program which shall include the construction of the walk along the Central Oregon Highway, between Burns and Mines Mill, in Harney County, and a sidewalk project in Division No. 4, (Central Oregon), the balance to be made up of projects at other points throughout the state, selected from the priority list prepared by the Engineer, to make up the total of \$35,000.

The Engineer read aloud a report from Bridge Engineer G. S. Paxson in regard to the construction of a storm sewer on Main Street in Nyssa, heretofore requested by the Nyssa City Council. According to the report, in order to handle this drainage through the pump located in the undercrossing at the south end of Main Street, a pump having a capacity of about 8 cu. ft. per second will be required and, in view thereof, it is considered that the handling of the drainage in this manner is not feasible. On the other hand, it

has been found possible and practicable to serve the area by the use of a gravity sewer line which is estimated to cost about \$14,000, including the pipe, manholes, inlets, connections, et cetera. The report also indicated that, if the gravity sewer line is constructed, it will be possible to make a saving of approximately \$1,550 by changing the present proposed drainage system for the underpass. The matter was discussed at some length but no decision reached. (Reconsideration was given to the matter on the following day, when a delegation from Nyssa was present.)

The Honorable R. E. Riley, Mayor of Portland; City Commissioner Wm. A. Bowes; Ben Morrow, City Engineer; and R. G. Regan, City Right-of-Way Buyer, appeared before the Commission in regard to the Front Avenue project, particularly with respect to right of way needed to reestablish certain railway facilities. They discussed the purchase of some additional properties to be used for the construction of spur tracks or service tracks to serve industries which are now served by the tracks on Front Avenue. Representatives of the city said that the city is without funds to pay for the right of way, but offered to use funds available to the city for street purposes to reimburse the state for funds spent by the state in the acquisition of the properties needed for the service or spur tracks. It was agreed that any properties purchased for the spur or service tracks would be purchased on the same percentage of allocation as other real properties purchased for Front Avenue; viz., 60 per cent by the city, and 40 per cent by the state. It was also agreed and understood that properties purchased would be dedicated for street purposes and then franchise given to the railways to operate thereover. The city asked the state to pay all of the cost of real properties for the spur or switch tracks in the first instance, and then the city would reimburse the state in connection with some other project, toward the cost of which both the city and the state would be obligated.

The Attorney advised the Commission that it has legal authority to handle the matter in this manner. Commissioner Bowes advised that the industries along this street will withdraw their objections if such right of way is acquired and physical connections provided for the railroad at both ends of the project. The Commission, by unanimous vote, approved acquisition of this property on the basis outlined.

In the discussion it was pointed out that Public Utilities Commissioner Ormond R. Bean is now in Washington, D. C. in the interests of the Front Avenue project and that it is his intention to wire the action taken by the Interstate Commerce Commission relative thereto. The Engineer was instructed, when such wire has been received, to 'phone the same to the individual members of the Commission who would authorize him to advertise the Front Avenue project for bids, and to readvertise the Hawthorne Bridge reconstruction project, for which the Frank Watt Construction Company submitted the low bid, on December 18, 1940, in the event that this company will not agree to take the job on the basis of such bid. Chairman Cabell recommended approval of the options taken for the property in question, but suggested that Commissioners Clough and Oliver defer their approval pending study of the details at the evening session. It was agreed by all that title to the properties should be taken in the name of the city when the options are closed.

The Commission adjourned at 5:30 p. m. and reconvened at 7:30 p.m. in Room 415 (Imperial Room) of the Imperial Hotel. Present at such meeting were Huron W. Clough, Commissioner; Herman Oliver, Commissioner; R. H. Baldock, State Highway Engineer; J. M. Devers, Attorney; and H. B. Glaisyer, Secretary. Chairman Cabell was excused on account of illness.

The Assistant Attorney reported the status of the right of way budget, pointing out that of the \$600,000 budgeted by the Commission for real property purchases in 1941, \$231,000 has been obligated, and that out of the \$800,000 budgeted by the Commission for the purchase of right of way along Front Avenue, Portland, \$466,000 has been obligated. The Commission approved the report.

The Attorney requested authority to purchase certain parcels of real property that are needed for various highway improvements throughout the state. He submitted a list of such properties together with the prices that he recommended be paid for each. After careful consideration the Commission approved the request and, by unanimous vote, adopted the following resolution with respect thereto:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed:

NOW, THEREFORE, BE IT RESOLVED that the several offers, or bases of settlement hereinafter enumerated be, and the same hereby are, approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

8650-Palandri, Mary	R/W	5,000 sq.ft.	\$3,903.00 (Based on cash payment of \$2,903 and exchange of 1 lot, cost price \$1,000)	McCallister
<u>North Bend-Marshfield Section, Oregon Coast Highway</u>				
8058-Peterson, L. P.	R/W	7,571 sq.ft.	12¢ sq.ft. plus \$8550.70, less cred- it by deduction of \$908.52 for land being deeded by the state.	Collins Landon

The Commission also discussed the acquisition of the following properties:

<u>Klamath Falls Section, Midland Highway</u>				
8876-Kelley, C. C. Trustee	Quarry	Approx. 21 a.	\$4,000 Lump Sum	Parker
<u>Sisters-Redmond Section, McKenzie Highway</u>				
8642-Hill, Louis W.	Scale Site	2.52	\$625 Lump Sum	Benson

The Commission approved the purchase of the quarry for the sum of \$4,000, if a test of the rock therefrom reveals that it is satisfactory for highway construction purposes. The Commission also approved the purchase of the scale site of Louis W. Hill, for the sum of \$625, subject to inspection and approval of the site by the Engineer.

The Attorney requested authority to institute condemnation proceedings to acquire certain properties concerning which he has been unable to reach satisfactory settlements. He submitted a list of such properties, together with the amounts that he recommended be offered in condemnation, as follows:

<u>File No.</u>	<u>Name</u>	<u>Purpose Required</u>	<u>Recommended Offer</u>
*9010	Ramsay Webster Estate	Gravel Pit	\$ 300.00
*8862	H. C. Thompson	Right of Way	4,785.00
8875	Oliver Jack	Quarry	500.00
9016	B. F. Friday	Right of Way	200.00
6515	(W. O. Galaway, et ux. and (B. F. Friday	" "	400.00
**4248	Marguerite C. Kaufman	" "	7,575.00

*For the purpose of clearing title

**Subject to further inspection by Mr. Cabell

After discussion the Commission approved the recommended offers and thereupon authorized the Attorney to condemn the several parcels. The following resolutions with respect thereto were adopted by the Commission by unanimous vote:

WHEREAS, the State Highway Commission is authorized to locate, relocate, construct, reconstruct, maintain, widen, straighten, and otherwise improve state highways, both primary and secondary, and said Commission is also authorized to construct shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, and snow fences, and is authorized to acquire quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, and broadcasting stations, and is further authorized to develop, construct, improve, operate, and maintain parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, and other places of attraction and scenic value; and

WHEREAS, said Highway Commission is authorized to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property, or any interest therein, necessary or deemed by the Highway Commission necessary for the accomplishment of any and all of the foregoing things; and

WHEREAS, in the judgment of the Highway Commission the several tracts or parcels of land hereinafter described are each and all necessary for the specific and particular purposes hereinafter specifically set forth;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the Commission does hereby find and declare that the several parcels of real property hereinafter described are each and all necessary for the accomplishment of the purposes hereinafter expressly and specifically set forth, which said real properties and the specific purposes for which the same are being acquired are described as follows, to wit:

Real property owned by the unknown heirs of Ramsay Webster, deceased, which property is located in the west half (W $\frac{1}{2}$) of the southeast quarter (SE $\frac{1}{4}$) of Section 28, Township 13 South, Range 2 East, W.M., Linn County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 1, and is further identified in the records of the Highway Commission as file R 9010, and which property is being acquired for the purpose of securing roadbuilding materials therefrom in connection with the Santiam Highway;*

Real property owned by the heirs of Lizzie N. Thompson, deceased, which property is located in the Prior F. Blair D.L.C. No. 39, in Sections 35 and 36, Township 17 South, Range 4 West, W.M., Lane County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 2 and is further identified in the records of the Highway Commission as file R 8862, and which property is being acquired for right of way purposes in connection with Secondary Highway No. 224;*

Real property owned by Oliver Jack, which property is located in the southwest quarter (SW $\frac{1}{4}$) of the northeast quarter (NE $\frac{1}{4}$) of Section 23, Township 2 North, Range 4 West, T.M., Washington County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 3 and is further identified in the records of the Highway Commission as file R 8875, and which property is being acquired for the purpose of securing roadbuilding materials therefrom in connection with the Wolf Creek Highway;*

Real property owned by Marguerite C. Kauffman, which property is located in Government Lot 3 of Section 5, Township 10 South, Range 11 West, W.M., Lincoln County, Oregon, and is more particularly described on the attached sheets

and designated as Parcel No. 4 and is further identified in the records of the Highway Commission as file R 4248, and which property is being acquired for right of way purposes in connection with the Oregon Coast Highway.*

2. That the Commission does hereby find and declare that each of the said described parcels of real property is necessary and acquisition of the same by the State is required for the specific purposes hereinabove set forth, and the said properties are being acquired for the express and specific purposes in this resolution set forth.

3. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real properties, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of the said real properties, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property or properties, whether said properties be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

4. That I. H. Van Winkle, Attorney General of the State of Oregon, and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they are hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreements can be reached, then it is hereby further resolved that the Attorney General of the State of Oregon and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they hereby are requested to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated.

5. That this resolution be entered in full in the minutes and records of this Commission.

*(The detailed descriptions of the respective parcels of real property mentioned in this resolution are attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 10, under the heading "Real Property Condemnation Resolutions", and said descriptions by this reference are made a part of this minute entry to the same extent as if copied in full herein.)

WHEREAS, the State Highway Commission is authorized to locate, relocate, construct, reconstruct, maintain, widen, straighten, and otherwise improve state highways, both primary and secondary, and said Commission is also authorized to construct shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, and snow fences, and is authorized to acquire quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, and broadcasting stations, and is further authorized to develop, construct, improve, operate, and maintain parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, and other places of attraction and scenic value; and

WHEREAS, said Highway Commission is authorized to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property, or any interest therein, necessary or deemed by the Highway Commission necessary for the accomplishment of any and all of the foregoing things; and

WHEREAS, that certain highway known and designated as State Highway No. 47, and otherwise known as the Wolf Creek Highway, is a duly designated and adopted state highway; and

WHEREAS, the Highway Commission has heretofore, by resolution duly adopted and entered in the minutes of the Commission, declared said highway to be a highway of major importance and did further find and declare that in connection with the acquisition of real properties for rights of way for said highway there should be acquired also all rights of access from the abutting property to said highway, to which said resolution reference is now made; and

WHEREAS, B. F. Friday and W. O. Galaway and DeEtte Galaway are the owners of the following described real property, to wit:

The south half ($S\frac{1}{2}$) of the northwest quarter ($NW\frac{1}{4}$) of the northeast quarter ($NE\frac{1}{4}$) of Section 30, Township 2 North, Range 3 West of the Willamette Meridian, Washington County, Oregon;

and

WHEREAS, it is the judgment of the Highway Commission that the real property hereinafter described, which is a part or portion of the above described real property, is necessary and needed for right of way and other highway purposes in connection with the construction and maintenance of the said Wolf Creek Highway;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. The Commission does hereby find and declare that the real property hereinafter described, and which real property is a

part or portion of the above described real property, is necessary and is needed in connection with the construction and maintenance of the Wolf Creek Highway, which said real property is described as follows, to wit:

Parcel No. 1

A parcel of land lying in the south half ($S\frac{1}{2}$) of the northwest quarter ($NW\frac{1}{4}$) of the northeast quarter ($NE\frac{1}{4}$) of Section 30, Township 2 North, Range 3 West, W. M., Washington County, Oregon, and being a portion of the following described property: that tract of land which was conveyed by that certain deed to B. F. Friday and W. O. Galaway and DeEtte Galaway recorded in Book 185, Page 105, of Washington County Record of Deeds; the said parcel being all that portion of the foregoing described property included in a strip of land of variable width on each side of the center line of the Wolf Creek Highway as said highway has been located over and across or adjacent to the said property; the location of the said strip of land (in so far as it encroaches upon said property) being determined by the said center line from Station 2238+92.4 to Station 2251+46.8, which portion of center line is described as follows:

Beginning at a point which is Engineer's center line Station 2238+92.4, opposite and 100 feet distant from which point the northerly line of the said strip of land intersects the north and south center line of said Section 30; said point being 879 feet south and 58 feet west of the north quarter corner of Section 30, Township 2 North, Range 3 West, W. M.; thence South $62^{\circ} 45'$ East a distance of 1254.4 feet to Engineer's Station 2251+46.8, opposite and 80 feet distant from which station the northeasterly line of the said strip of land intersects the south line of said property.

The widths (in feet) of the strip of land above referred to are as follows:

Station	to Station	Total Width	Width on Northerly Side of Center Line	Width on Southerly Side of Center Line
2238+92.4	to 2242+00	180 feet	100 feet	80 feet
2242+00	to 2246+00	160 feet	80 feet	80 feet
2246+00	to 2251+46.8	190 feet	80 feet	110 feet

The parcel of land to which this description applies contains 4.1 acres.

Parcel No. 2

A parcel of land lying in the south half ($S\frac{1}{2}$) of the northwest quarter ($NW\frac{1}{4}$) of the northeast quarter ($NE\frac{1}{4}$) of Section 30, Township 2 North, Range 3 West, W. M., Washington County, Oregon, and being a portion of the following described property: that tract of land which was conveyed by that certain deed to B. F. Friday and W. O. Galaway and DeEtte Galaway recorded in Book 185, Page 105, of Washington County Record of Deeds; the said parcel being described as follows:

Beginning at the southwest corner of the northwest quarter ($NW\frac{1}{4}$) of the northeast quarter ($NE\frac{1}{4}$) of said Section 30, Township 2 North, Range 3 West, W. M.; thence North $0^{\circ} 52'$ East along the north and south center line of said section a distance of 372.5 feet to a point which is 80 feet distant southwesterly from (when measured at right angles to) the center line of the Wolf Creek Highway at Engineer's Station 2239+81.7; thence South $62^{\circ} 45'$ East parallel to said highway center line a distance of 618.3 feet; thence South $27^{\circ} 15'$ West a distance of 30 feet to a point which is 110 feet southwesterly from (when measured at right angles to) the said highway center line at Engineer's Station 2246+00; thence South $62^{\circ} 45'$ East parallel to said highway center line a distance of 162.1 feet to the south line of said northwest quarter ($NW\frac{1}{4}$) of the northeast quarter ($NE\frac{1}{4}$); thence North $89^{\circ} 02'$ West along said south line a distance of 685.8 feet to the point of beginning, containing 3.1 acres.

2. The Commission does hereby further find and declare that the last above described parcels of real property are needed and required, and the appropriation and acquisition of the same is sought under these proceedings, for right of way and other highway purposes in connection with the construction, improvement, and maintenance of the said Wolf Creek Highway.

3. The Commission does further find and declare that, in addition to the acquisition of the said last described tracts of real property for the purposes herein stated, it is likewise necessary that there be acquired all right of access from the remaining property of the said B. F. Friday and W. O. Galaway and DeEtte Galaway, which said remaining real property abuts upon or joins the real property last above described and will, when said highway is constructed, abut upon said highway.

4. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real property, and said Engineer is further

instructed to prepare and submit to the Legal Department necessary and adequate descriptions of the said real property, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property, whether said property be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

5. That I. H. Van Winkle, Attorney General of the State of Oregon, and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they are hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement can be reached, then it is hereby further resolved that the Attorney General of the State of Oregon and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they hereby are requested to commence and prosecute to a final determination such suit or action as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated, together with all right of access from adjoining or abutting property to said highway.

6. That this resolution be entered in full in the minutes and records of this Commission.

WHEREAS, the State Highway Commission is authorized to locate, relocate, construct, reconstruct, maintain, widen, straighten, and otherwise improve state highways, both primary and secondary, and said Commission is also authorized to construct shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, and snow fences, and is authorized to acquire quarry sites, gravel pits, storage sites, stock pile sites, weighing stations, and broadcasting stations, and is further authorized to develop, construct, improve, operate, and maintain parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, and other places of attraction and scenic value; and

WHEREAS, said Highway Commission is authorized to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property, or any interest therein, necessary or deemed by the Highway Commission necessary for the accomplishment of any and all of the foregoing things; and

WHEREAS, that certain highway known and designated as State Highway No. 47, and otherwise known as the Wolf Creek Highway, is a duly designated and adopted state highway; and

WHEREAS, the Highway Commission has heretofore, by resolution duly adopted and entered in the minutes of the Commission, declared said highway to be a highway of major importance and did further find and declare that in connection with the acquisition of real properties for rights of way for said highway there should be acquired also all rights of access from the abutting property to said highway, to which said resolution reference is now made; and

WHEREAS, B. F. Friday is the owner of the following described real property, to wit:

The northwest quarter (NW $\frac{1}{4}$) of Section 30, in Township 2 North, Range 3 West, of the Willamette Meridian, Washington County, Oregon, containing 156.01 acres;

and

WHEREAS, it is the judgment of the Highway Commission that the real property hereinafter described, which is a part or portion of the above described real property, is necessary and needed for right of way and other highway purposes in connection with the construction and maintenance of the said Wolf Creek Highway;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. The Commission does hereby find and declare that the real property hereinafter described, and which real property is a part or portion of the above described real property, is necessary and is needed in connection with the construction and maintenance of the Wolf Creek Highway, which said real property is described as follows, to wit:

A parcel of land lying in the north half (N $\frac{1}{2}$) of the northwest quarter (NW $\frac{1}{4}$) of Section 30, Township 2 North, Range 3 West, W. M., Washington County, Oregon, and being a portion of the following described property: that tract of land which was conveyed by that certain deed to B. F. Friday recorded in Book 131, Page 626, of Washington County Record of Deeds; the said parcel being all that portion of the foregoing described property included in a strip of land of variable width on each side of the center line of the Wolf Creek Highway as said highway has been located over and across or adjacent to the said property; the location of the strip of land above mentioned (in so far as it encroaches upon said property) being determined by the said center line from Station 2217+07.9 to Station 2239+81.7, which portion of center line is described as follows:

Beginning at a point which is Engineer's center line Station 2217+07.9, opposite and 100 feet distant from which

point the southwesterly line of the said strip of land intersects the north line of said Section 30; said point being 90 feet north and 570 feet east of the northwest corner of Section 30, Township 2 North, Range 3 West, W. M.; thence South $62^{\circ} 45'$ East a distance of 2273.8 feet to Station 2239+81.7, opposite and 80 feet distant from which station the southerly line of said strip of land intersects the north and south center line of said Section 30.

The widths (in feet) of the strip of land above referred to are as follows:

Station	to Station	Total Width	Width on North- erly Side of Center Line	Width on South- erly Side of Center Line
2217+07.9	to 2224+00	240 feet	140 feet	100 feet
2224+00	to 2228+00	290 feet	140 feet	150 feet
2228+00	to 2236+00	250 feet	100 feet	150 feet
2236+00	to 2239+81.7	180 feet	100 feet	80 feet

The parcel of land to which this description applies contains 11.06 acres, of which 8.08 acres were acquired by the State and recorded in Book 161, Page 461, Washington County Records, title to which hereby is acknowledged to be in the public, and 2.98 acres lie outside of said right of way.

2. The Commission does hereby further find and declare that the last above described parcel of real property is needed and required and the appropriation and acquisition of the same is sought under these proceedings for right of way and other highway purposes in connection with the construction, improvement, and maintenance of the said Wolf Creek Highway.

3. The Commission does further find and declare that, in addition to the acquisition of the said last described tract of real property for the purposes herein stated, it is likewise necessary that there be acquired all right of access from the remaining property of the said B. F. Friday, except access at approximately state highway engineer's station 2220+00, which said remaining real property abuts upon or joins the real property last above described and will, when said highway is constructed, abut upon said highway.

4. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real property, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of the said real property, which said descriptions shall be available for the preparation of any deed

or deeds or other instrument or instruments necessary to complete the acquisition of said property, whether said property be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

5. That I. H. Van Winkle, Attorney General of the State of Oregon, and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they are hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement can be reached, then it is hereby further resolved that the Attorney General of the State of Oregon and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they hereby are requested to commence and prosecute to a final determination such suit or action as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated, together with all rights of access from adjoining or abutting property to said highway, except as provided herein.

6. That this resolution be entered in full in the minutes and records of this Commission.

The Attorney brought up for discussion the controversy with Orris Knapp with respect to the purchase of right of way needed for the improvement of the Port Orford South Section of the Oregon Coast Highway in Curry County. He recalled that the Commission at one time authorized him to offer Mr. Knapp \$10,000 for his property, including the Knapp Hotel, but Mr. Knapp is demanding \$12,500. He further advised that since this offer was made he has been informed by reliable parties that Mr. Knapp has had his property for sale for a couple of years at \$6,000 and he recommended, in view of this information, that the State's offer of \$10,000 be withdrawn and that an amended complaint be filed with the court with an offer of \$6,000. The Commission approved the recommendation.

The Commission also discussed the controversy with Gordon H. Smith regarding the right of way settlement in Umatilla County involving a duck lake. Action on this matter was deferred by the Commission until the following day when Mr. Smith will be present.

The Engineer reported the results of investigations to determine the value of buildings located on property required by the Commission in connection with the widening of the Columbia River Highway at Celilo Indian Village, Wasco County. He said that two estimates were prepared, one based upon the actual value of the buildings and the grounds and the other on the present usage of the buildings by the Indians. The land on which the buildings are situated, he said, was appraised at the rate of \$1,000 an acre and the balance

of the land, consisting for the most part of a rocky ledge, was appraised at \$100 an acre. He estimated the total value of the buildings under the first-mentioned alternate at \$1,160 and on the basis of the second alternate at \$1,860 and the total appraised value under the first alternate, including both land and buildings, at \$2,095, as compared to \$2,795 under the second alternate. He recommended settlements based on the second alternate totaling \$2,795 at such time as the Commission authorizes right of way negotiations. The Commission approved the recommendation.

The Commission had under discussion the abandonment of portions of the Lamonta Section of the Madras-Prineville Secondary Highway, in Jefferson County, a portion of the Grant-Rufus Section of the Columbia River Highway, in Sherman County, and the abandonment and retention of portions of the Dairy Section of the Klamath Falls-Lakeview Highway, in Klamath County. The Engineer advised that the alignment of the above-mentioned highways has been revised, and with the exception of a portion of the Dairy Section of the Klamath Falls-Lakeview Highway, the parcels referred to are no longer of value for state highway purposes. He recommended that such parcels be abandoned in favor of the respective counties in which they are situate and that such portions of the Dairy Section of the Klamath Falls-Lakeview Highway as can be used for state highway purposes be retained under the control of the Commission. The Commission approved the recommendation and thereupon adopted the following resolutions in regard thereto:

WHEREAS, in order to afford a better alignment and a more satisfactory, safe and convenient highway for the traveling public, the Commission found it necessary to relocate a portion of the Madras-Prineville Highway in Jefferson County; and

WHEREAS, by reason of said relocation and reconstruction of the Lamonta Section of said highway there were eliminated and made unnecessary as parts of the permanent highway certain sections or parts thereof, which sections are more specifically defined and designated hereinafter in this resolution; and

WHEREAS, it is the judgment and opinion of the Commission that there should be recorded in the minutes and records of the Commission its purpose and plan to abandon as a part of the said state highway the fragments or portions of right of way hereinafter designated and heretofore included within the area of the right of way of the said highway as formerly located, improved and used;

NOW, THEREFORE, the premises being in general as above stated, it hereby is resolved by this Commission, all members being present and affirmatively participating, as follows:

1. That the fragments of land confined within the areas of land hereinafter designated, which fragments or parcels of land were formerly within the limits of the right of way of the Madras-Prineville Highway in Jefferson County but are now without the

limits of the right of way of said highway, as said highway has been relocated and constructed, be and said fragments or parcels of land or portions of the old right of way are abandoned as parts of the right of way of said highway, and said fragments or parcels of land or old right of way are, so far as control and supervision by this Commission is concerned, eliminated and left to revert to the adjoining and abutting property owners or to the control and supervision of the County Court of Jefferson County for highway or other public purposes as the Court may determine. The fragments or parcels of land affected by this resolution are defined and described as follows, to wit:

All those certain parts of the old right of way of the Lamonta Section of the Madras-Prineville Highway in Section 34, Township 12 South, Range 14 East, and in Sections 3, 10, 15, 22, 23, and 26, Township 13 South, Range 14 East, W.M., Jefferson County, Oregon, lying on the easterly and westerly side of the right of way required for the reconstructed Madras-Prineville Highway between Engineer's Station 663+00 on the northerly end and Station 928+00 on the southerly end.

The location of said abandoned right of way may be more definitely and particularly ascertained and determined by reference to a map or blueprint, marked "Exhibit A", attached hereto and by this reference made a part hereof, which said exhibit for identification purposes bears the signatures of W. E. Chandler, Division Engineer, H. G. Smith, Construction Engineer, and C. B. McCullough, Assistant State Highway Engineer, and is dated March 26, 1941, upon which map or exhibit there are reflected the above described parcels of land by showing the same shaded in red.*

2. In the event there remains any physical connection between any portion of said abandoned right of way or highway and the present highway, and by reason of such physical connection traffic from the existing highway may enter or use the said abandoned portions of the said old road to the possible damage or injury of such traffic by reason of any unsafe condition existing with respect to said old or abandoned road, then the State Highway Engineer is hereby authorized and directed to erect such barricade or other safeguards as may be necessary to protect and safeguard traffic using and employing said newly located, constructed and dedicated section of said highway.

3. That this resolution be entered in the minutes and records of the Commission and a certified copy thereof promptly delivered to the County Court of Jefferson County, together with a copy of said map or exhibit, for such action as said County Court

*Map filed Right of Way Abandonment and Retention File - No.89.

may desire to take with respect to said fragments of land, and should said abandoned sections of the right of way of said highway be further employed for public or private highway purposes such use shall be entirely under the control and supervision of the County Court of Jefferson County and beyond any responsibility or supervision by the State Highway Commission.

WHEREAS, in order to afford a better alignment and a more satisfactory, safe and convenient highway for the traveling public, the Commission found it necessary to relocate a portion of the Columbia River Highway in Sherman County; and

WHEREAS, by reason of said relocation and reconstruction of the Grant-Rufus Section of said highway there was eliminated and made unnecessary as a part of the permanent highway a certain section or part thereof, which section is more specifically defined and designated hereinafter in this resolution; and

WHEREAS, it is the judgment and opinion of the Commission that there should be recorded in the minutes and records of the Commission its purpose and plan to abandon as a part of the said state highway the fragment or portion of right of way hereinafter designated and heretofore included within the area of the right of way of the said highway as formerly located, improved and used;

NOW, THEREFORE, the premises being in general as above stated, it hereby is resolved by this Commission, all members being present and affirmatively participating, as follows:

1. That the fragment of land confined within the area of land hereinafter designated, which fragment or parcel of land was formerly within the limits of the right of way of the Columbia River Highway in Sherman County but is now without the limits of the right of way of said highway, as said highway has been relocated and constructed, be and said fragment or parcel of land or portion of the old right of way is abandoned as a part of the right of way of said highway, and said fragment or parcel of land or old right of way is, so far as control and supervision by this Commission is concerned, eliminated and left to revert to the adjoining and abutting property owners or to the control and supervision of the County Court of Sherman County for highway or other public purposes as the Court may determine. The fragment or parcel of land affected by this resolution is defined and described as follows, to wit:

All that certain section of the old right of way of the Grant-Rufus Section of the Columbia River Highway in Sections 1 and 2, Township 2 North, Range 16 East, in Section 6, Township 2 North, Range 17 East, and in Section

31, Township 3 North, Range 17 East, W. M., Sherman County, lying on the southerly side of the right of way required for the reconstructed Columbia River Highway, the beginning and ending points with reference to the engineer's station of the said reconstructed highway being Station 8+00 on the easterly end and Station 153+00 on the westerly end.

The location of said abandoned right of way may be more definitely and particularly ascertained and determined by reference to a map or blueprint, marked "Exhibit A", attached hereto and by this reference made a part hereof, which said exhibit for identification purposes bears the signatures of W. E. Chandler, Division Engineer; H. G. Smith, Construction Engineer; and C. B. McCullough, Assistant State Highway Engineer, and is dated March 27, 1941, upon which map or exhibit there is reflected the above described parcel of land by showing the same shaded in red.*

2. In the event there remains any physical connection between any portion of said abandoned right of way or highway and the present highway, and by reason of such physical connection traffic from the existing highway may enter or use the said abandoned portion of the said old road to the possible damage or injury of such traffic by reason of any unsafe condition existing with respect to said old or abandoned road, then the State Highway Engineer is hereby authorized and directed to erect such barricade or other safeguards as may be necessary to protect and safeguard traffic using and employing said newly located, constructed and dedicated section of said highway.

3. That this resolution be entered in the minutes and records of the Commission and a certified copy thereof promptly delivered to the County Court of Sherman County, together with a copy of said map or exhibit, for such action as said County Court may desire to take with respect to said fragment of land, and should said abandoned section of the right of way of said highway be further employed for public or private highway purposes such use shall be entirely under the control and supervision of the County Court of Sherman County and beyond any responsibility or supervision by the State Highway Commission.

WHEREAS, in order to afford a better alignment and a more satisfactory, safe and convenient highway for the traveling public: the Highway Commission found it necessary to relocate portions of the Dairy Section of the Klamath Falls-Lakeview Highway in Klamath County; and

WHEREAS, by reason of said relocation and reconstruction of said section of said highway there have been eliminated from the main

*Map filed Right of Way Abandonment and Retention File - No. 91

traveled portion of said highway certain sections or fragments of land, which said sections or fragments of land are more specifically defined and described hereinafter in this resolution and are reflected on a print, marked "Exhibit A", a copy of which is attached hereto and made a part hereof; and

WHEREAS, while those sections hereinafter described as the parcels to be retained and shown in yellow on the attached print are not required for use as a part of the main or traveled section of the highway, nevertheless the same are required, can be used, and are essential for other public purposes, to wit: storage purposes, parking area and other public uses in connection with said highway; and

WHEREAS, it is the judgment and opinion of the Commission that there should be recorded in the minutes and records of the Commission its purpose and plan to preserve for public use in connection with said highway the fragments or parcels of land hereinafter described as the parcels to be retained and shown in yellow on the attached print; and

WHEREAS, it is the judgment and opinion of the Commission that there should be recorded in the minutes and records of this Commission the purpose and plan of the Commission to abandon as a part of the state highway system a certain portion of the highway eliminated from the main traveled portion of said highway, which section is made unnecessary as a part of the completed highway and is shown shaded in red on the attached print or map.*

NOW, THEREFORE, the premises being in general as above stated, it hereby is resolved by this Commission, all members being present and affirmatively participating, as follows:

1. The fragments or parcels of land which heretofore were within the right of way proper of the Dairy Section of the Klamath Falls-Lakeview Highway but which by reason of a relocation or realignment of said highway are now without the area improved and used by the traveling public, but are adjacent to and abut upon the said right of way, which parcels are shown shaded in yellow on the attached print, shall be preserved by the Highway Commission for such other public use as said land may serve in connection with the construction, improvement, and maintenance of said highway or the use of the same, which said parcels or fragments of land are described as follows, to wit:

All those certain parts of the old right of way of the Dairy Section of the Klamath Falls-Lakeview Highway, lying on the northerly side of the right of way required for the reconstructed Klamath Falls-Lakeview Highway over and across Sections 33 and 34, Township 38 South, Range

*Map filed Right of Way Abandonment and Retention File - No. 90

APR 3 1941

11½ East, W. M., Klamath County, the beginning and ending points with reference to the engineer's stations of the reconstructed highway being as follows: between Engineer's Stations 889+00 to 895+00, Stations 901+50 to 904+00, Stations 907+20 to 912+40, and Stations 935+00 to 941+00.

2. That the fragment of land confined within the area hereinafter described and designated as the parcel of land to be abandoned, which fragment was formerly within the limits of the right of way of the Dairy Section of the Klamath Falls-Lakeview Highway, be and said fragment of land is abandoned as a part of the right of way of said highway, and said fragment of right of way is, so far as control and supervision of this Commission are concerned, left to revert to the adjoining and abutting property owners or to the control and supervision of the County Court of Klamath County. The fragment of land to be abandoned is described as follows, to wit:

All that certain part of the old right of way of the Dairy Section of the Klamath Falls-Lakeview Highway, lying on the northerly side of the right of way required for the reconstructed Klamath Falls-Lakeview Highway over and across Sections 33 and 34, Township 38 South, Range 11½ East, W. M., Klamath County, the beginning and ending points with reference to the engineer's stations of the reconstructed highway being Station 921+30 on the westerly end and 935+00 on the easterly end.

3. In addition to the foregoing descriptions of said fragments or parcels of land there is attached hereto a print or map, marked "Exhibit A", which by this reference is made a part hereof, and upon which map there are shown shaded in yellow the parcels of land formerly within the old right of way, but which are now by this official act preserved for public purposes, and upon which map there is shown shaded in red the abandoned section of said right of way. Said exhibit or map for identification purposes bears the signatures of W. E. Chandler, Division Engineer; H. G. Smith, Construction Engineer; and C. B. McCullough, Assistant State Highway Engineer, and bears date of March 18, 1941.*

4. The Engineer hereby is instructed to properly and completely mark on the ground the boundaries of the fragments of land to be retained by the Highway Commission by erecting and maintaining thereon proper monuments or posts upon which shall be inscribed the words "State Property".

5. In the event there remains any physical connection between any portion of said abandoned right of way or highway and the present highway, and by reason of such physical connection traffic

*Map filed Right of Way Abandonment and Retention File - No. 90

from the existing highway may enter or use the said abandoned portion of the old road to the possible damage or injury of such traffic by reason of any unsafe condition existing with respect to the said old or abandoned road, then the State Highway Engineer is hereby authorized and directed to erect such barricade or other safeguards as may be necessary to protect and safeguard traffic using and employing said newly located, constructed, and dedicated section of said state highway.

6. That this resolution be entered in the minutes and records of the Commission and a certified copy thereof promptly delivered to the County Court of Klamath County, together with copies of said exhibit or map, for such action as said County Court may desire to take with respect to the fragment of land to be abandoned, and should said abandoned portion of the right of way of said Klamath Falls-Lakeview Highway be further employed for public or private highway purposes such use shall be entirely under the control and supervision of the County Court of Klamath County and beyond any responsibility or supervision by the State Highway Commission.

The Commission discussed briefly the Engineer's report on the cost to improve the Oregon Coast Highway through the Oceanlake district, in Lincoln County. The Engineer was instructed to submit an estimate of cost based on 60-Foot right of way as compared with right of way 80 feet wide. He was also authorized by the Commission to make a location survey of the project.

The Engineer reported on investigations to determine which section of the Territorial Secondary State Highway should be oiled in the 1941 construction program for which the sum of \$20,000 has already been budgeted. The Commission decided to spend this money for the improvement of the section south of Monroe, in Benton County, as originally proposed, and to consider the oiling of a section in Lane County later on when additional funds become available.

A letter was presented from the Oromite Company, Los Angeles, California, requesting the early improvement of the Terrebonne-Lower Bridge County Road in Deschutes County, which road the Commission heretofore agreed to oil using Federal Aid Secondary Highway Funds when Deschutes County has completed the grading and surfacing of the same. The Secretary was instructed to inform the company that the Commission is committed to the project and will do the oiling work as soon as the grading and surfacing have been completed by the county, provided the federal authorities will approve it as a federal aid secondary highway project.

The Commission considered and ordered filed a letter from the Oregon-Washington Bridge Board of Trustees, Washington, D. C. with reference to a proposed bridge across the Columbia River at Astoria.

A letter was presented from Elk Creek School District No. 74, Trail, Oregon, requesting the reconstruction of the Crater Lake Highway and the elimination of curves. The Commission deferred action on the matter pending inspection of the road by Commissioner Clough.

The Commission discussed the matter of constructing a new highway from the Old Oregon Trail to the new U. S. Army Airbase at Pendleton, as a substitute for the present secondary highway leading to the Pendleton airport. The Engineer estimated that such highway, providing a roadway for three lanes of traffic, would cost about \$50,000. The Commission approved the project as a national defense measure, confirming the tentative decision reached at its meeting in Pendleton on March 26, 1941. The Engineer was instructed to secure if possible federal aid secondary highway funds to finance the work.

A petition was presented from Hope Grange, Mary's River Grange, Benton County Pomona Grange, and others, requesting improvement of the Alsea-Deadwood Secondary Highway. The Secretary was instructed to inform the petitioners that the Commission is not in a position to undertake such improvement at the present time on account of lack of funds to finance the work, but the Commission will inspect the road to secure first-hand information as to its present condition when it is in that vicinity.

A petition was presented from the residents of Taft, Oregon, requesting the improvement of the Oregon Coast Highway through this town by constructing concrete curbs and paving full width between curbs. The Engineer was instructed to make a survey of the project and report how much it will cost.

The Engineer requested authority to take bids for the construction of a concrete bridge, costing \$10,000, over the North Fork of the Necanicum River near the fish hatchery, in Clatsop County, to replace the existing pile trestle bridge which is badly decayed. The Commission approved the request. This action was confirmed by Chairman Cabell on the following day.

A request was presented from the Board of County Commissioners of Multnomah County for additional improvement on the Skyline Boulevard project in the 1941 Federal Aid Secondary Highway Program. The Engineer estimated that the next project on this road would cost about \$30,000 and recommended approval of the request. The Commission approved the recommendation and authorized the Engineer to make application for federal aid secondary highway funds to finance the work, notwithstanding that there is a possibility that the project will not be approved by the Public Roads Administration.

A letter was presented from Fred S. Groth, Freewater, Oregon, requesting the improvement of the Oregon Section of the secondary highway which extends from Umapine, Oregon, to Gardina, Washington. The Commission denied the request in view of its decision to construct the new airport road at Pendleton, there being no further funds available.

A request from John A. McCall, Klamath Falls, for the oiling of the Midland Secondary Highway, in Klamath County, had the attention of the Commission.

The Engineer advised that this is a meritorious project but there are no funds available to finance it. In view thereof the Commission denied the request; however, instructed the Engineer to keep the project in mind for future consideration.

A letter was presented from Mayor G. H. Hanson of Paisley requesting the construction of an airplane landing field adjacent to the Fremont Highway about one mile north of Paisley, as authorized by the 1941 Legislature. The Commission ordered that Mr. Hanson be informed that the State Highway Commission has nothing to do with the selection or designation of landing fields under such authority, that function being a responsibility of the Oregon State Board of Aeronautics.

A letter was presented from Charles H. Reynolds, President, Oregon Trail Association, urging additional improvements to the Minam Hill Section of the Wallowa Lake Highway. The Commission made no definite commitment to the project, but indicated that it would authorize additional work at this location if savings accrue from the contracting of other work. The Engineer was instructed to bear this in mind.

The Commission considered a petition from 42 property owners residing along the O'Neil Secondary Highway, in Deschutes County, in which request was made for the oiling of this road at the earliest opportunity, particularly the section between The Dalles-California Highway junction and the crossroad at O'Neil. The request was denied because there are no funds available to finance the work, and for the further reason that the County Court has asked for the oiling of the Tumalo-Deschutes Secondary Highway as the project of most importance to Deschutes County for any funds that the Commission may have available for expenditure in this county.

A resolution was presented from Catherine Creek Grange No. 841, Union County, urging the Commission to maintain and improve U. S. Highway No. 30 (Old Oregon Trail) from La Grande to North Powder, via the town of Union, as the permanent route of this highway between these points. The Secretary was instructed to inform the Grange that the Commission is now investigating alternate routes for the permanent location of the highway at this point and is not in a position at the present time to make a definite statement in regard thereto.

Consideration was given by the Commission to the request of Charles R. Dyer, Myrtle Creek, Oregon, for the construction of a cattle pass across the Pacific Highway at his home, about two miles south of the town of Myrtle Creek. The Engineer advised that a 10' cattle pass constructed at such location would cost about \$1,000. He recommended that the request be denied because there are many places throughout the state where similar conditions obtain, and if the Commission should embark on a program of this kind it would eventually mean an expenditure of a large sum of money which the Commission can ill-afford under present conditions. The Commission thereupon denied the request.

The Engineer reported receipt of a request from Mic Monte, Regional Grazier, U. S. Department of the Interior, for permission to construct a standard cattle guard across the Central Oregon Highway, in Harney County, under the provisions of the new law enacted by the 1941 Legislature. He said that Mr. Monte is simply asking the Commission's approval to build this cattle guard, which will be paid for with funds under his control, and he recommended approval of the request. The Commission approved the project subject to the condition that the work is done under the general supervision and to the entire satisfaction of the State Highway Engineer and in a location approved by him.

The Secretary presented several requests from residents of Lane County for the oiling of the Veneta-Crow Section of the Territorial Secondary State Highway. He was instructed to inform the petitioners that the Commission does not have funds available at the present time to finance such improvement but will bear it in mind in the formulation of future construction programs.

Matters pertaining to the renewal of the State Highway Engineer's official bond were discussed by the Commission, particularly the question whether the bond should be renewed in the companies in which it is now written or be given to other companies. The Engineer advised that the total amount of the bond is \$200,000 and at the present time this is divided among ten different companies, each of whom carries \$20,000; further, that the selection of the various companies was made by drawing names from a hat. The Commission considered this method of selecting the various agents fair, and ordered that the same procedure be followed when the bond comes up for renewal this year.

The Commission discussed a bill now before Congress extending the time limit for the construction of a bridge across the Columbia River near The Dalles, Oregon, three years, from March 4, 1942. The Commission considered that the Oregon delegation in Congress should be notified of the action taken by the Oregon Legislature, which authorizes and empowers the Highway Commission to construct, reconstruct, purchase, rent, lease, or otherwise acquire, improve, operate, and maintain a bridge or bridges over the Columbia River connecting the states of Oregon and Washington, so that they will have this information when the bill comes up for discussion. The Commission also considered it advisable to further inform the Congressmen that the Commission feels that it would be the part of wisdom to defer the construction of a privately-owned interstate bridge across the Columbia River near The Dalles, or at any other point, until a cooperative survey of the entire river has been completed by the highway departments of the states of Oregon and Washington, which survey has already been authorized. The matter was referred to Chairman Cabell with authority to send a letter containing such information to each of the Oregon senators and representatives in Congress, with a carbon copy of such letter to the U. S. War Department. (See letter directed to Senator Charles L. McNary, dated April 14, 1941, for details.)

The Engineer reported receipt of information to the effect that the City of Oregon City contemplates the installation of parking meters on its city streets and has inquired whether or not the State Highway Department

would object to the installation of such meters on the newly constructed highway on Water Street. The Commission voted unanimously to oppose such installations on this state highway route. W. H. Lynch, District Engineer, Public Roads Administration, who was present, also voiced his disapproval of the same. This action was confirmed by Chairman Cabell on the following day.

The Commission considered and approved a resolution from the Jackson County Court in which the court declared its intention to reestablish and maintain as a county road the portion of the Tiller-Trail Highway in Jackson County which was abandoned by the State Highway Commission as a state highway on November 13, 1940, because of the reconstruction of the highway on other alignment.

The Commission also considered and approved a resolution from the County Court of Marion County in which the county declared its intention to preserve as a county road a portion of the Salem-Pringle Creek Section of the Pacific Highway which was abandoned by the State Highway Commission on December 18, 1940, in view of the reconstruction of this highway on other alignment.

The Engineer reported that the Lake Creek Bridge, No. 220-36.70, on the Eugene-Swisshome Secondary Highway, in Lane County, has been repaired and that twenty-five other small bridges on the Eugene-Swisshome Secondary Highway have been repaired and that it is no longer necessary to maintain the reduced load limit heretofore placed on them. Also, that the old Neahkahnie Chasm Bridge, on the Oregon Coast Highway, has been replaced with a new structure, and that the bridges on the Little Nestucca Secondary Highway, at Mile Posts 05.30 and 06.40, have been repaired, so that the reduced load limits for which these bridges have been posted are no longer necessary. He also reported that it is no longer necessary to maintain the 50 per cent reduced load limit on the Tiller-Trail Secondary Highway in Douglas County. He accordingly recommended appropriate action by the Commission restoring the bridges and the road for statutory weights. The Commission approved the recommendation and, by unanimous vote, adopted the following resolutions with respect thereto:

WHEREAS, on the 2nd day of July, 1934, at a meeting of the State Highway Commission, two members being present and participating, the Commission passed and adopted a resolution ordering a reduction of the maximum permissible load limit on certain state highway bridges, including the following, to-wit:

EUGENE-SWISSHOME SECONDARY HIGHWAY NO. 220

25 small bridges between Mile Post 27.3 and	
Mile Post 35.4	5 tons
220-36.7 covered wooden bridge across Lake	
Creek	10 tons

and

WHEREAS, on the 18th day of May, 1937, at a meeting of the State Highway Commission, all members being present and

participating, the Commission passed and adopted a resolution ordering a reduction of the maximum permissible load limit on certain state highway bridges, including the following, to-wit:

LITTLE NESTUCCA SECONDARY HIGHWAY

130-05.3	Little Nestucca River Bridge	5 tons
130-06.4	Little Nestucca River Bridge	5 tons

and

WHEREAS, on the 19th day of September, 1938, at a meeting of the State Highway Commission, two members being present and participating, the Commission passed and adopted a resolution ordering a reduction of the maximum permissible load limit on the following state highway bridge, to-wit:

OREGON COAST HIGHWAY (NEAHKAHNIE ROUTE)

9A-40.0 Neahkahnie Mountain Chasm Bridge 10 tons

and

WHEREAS, subsequent to the passage of said resolutions the said above-named bridges have been repaired so that it is no longer necessary or desirable to maintain the reduced load limits set out in said resolutions;

NOW, THEREFORE, BE IT RESOLVED that the action of the State Highway Commission reducing the maximum permissible load limit on the following bridges, to-wit:

EUGENE-SWISSHOME SECONDARY HIGHWAY NO. 220

25 small bridges between Mile Post 27.3 and Mile Post 35.4
220-36.7 covered wooden bridge across Lake Creek

LITTLE NESTUCCA SECONDARY HIGHWAY

130-05.3	Little Nestucca River Bridge
130-06.4	Little Nestucca River Bridge

OREGON COAST HIGHWAY (NEAHKAHNIE ROUTE)

9-40.0 Neahkahnie Mountain Chasm Bridge

be and the same hereby are rescinded and vacated as of this date, and the maximum load limit permissible on the said bridges shall hereafter be the maximum load limit provided by law.

IT IS FURTHER ORDERED that certified copies of this resolution be furnished to the county clerks of each county in which said

above-named bridges are located, and to the Superintendent of the Department of State Police for his information.

WHEREAS, on the 18th day of December, 1940, at a meeting of the Oregon State Highway Commission, all members being present and participating, the Commission passed and adopted a resolution reducing the maximum load limit on the

TILLER-TRAIL SECONDARY HIGHWAY between mile post 38.55 and mile post 45.53, in Jackson County,

and

WHEREAS, subsequent to the passage of said resolution, conditions have changed so that it is no longer necessary or desirable, and the Commission hereby finds that it is no longer necessary or desirable to maintain the reduced load limit set out in said resolution on the said above-named highway;

NOW, THEREFORE, BE IT RESOLVED that the action of the State Highway Commission, reducing the maximum permissible load limit on the

TILLER-TRAIL SECONDARY HIGHWAY between mile post 38.55 and mile post 45.53, in Jackson County,

be and the same hereby is rescinded and cancelled as of this date, and the maximum load limit permissible on the said section of said highway hereafter shall be the maximum load limit provided by law.

IT IS HEREBY ORDERED that certified copies of this resolution be furnished to the county clerk of Jackson County, in which county said section of said highway is located, and to the Superintendent of the Department of State Police for his information.

The Engineer reported receipt of a letter from Roy Kilpatrick, lawyer, Canyon City, advising that the people of Seneca have changed their minds with respect to their previous request for the revision of the alignment of the John Day-Burns Highway through their city to accommodate an auditorium which they propose to build, and that these people now propose to construct a passageway under the highway between their school house and the proposed auditorium and expect to raise funds to pay the cost thereof by subscription. The Commission approved the construction of the underpass subject to the condition that the design of the same be made by Highway Department engineers and that the work be carried on in a manner satisfactory to such engineers, and with the further understanding

that local authorities will assume responsibility for policing the underpass. This action by the Commission was approved by Chairman Cabell the following day.

The Engineer requested instruction relative to the furnishing of new railroad ties that are needed in connection with the construction of the proposed undercrossing of the City of Prineville Railroad north of Prineville. He said that it was intended to build this structure in accordance with the Public Roads Administration rules and regulations covering grade separation projects, which provide that the railroad company shall furnish all new ties that are needed and have the privilege of salvaging the existing ties from the abandoned section of the road; however, the manager of the railroad objects to this provision because, he alleges, in practice a tie which has once been used is valueless from the railroad standpoint, and accordingly he wants the state to furnish the new ties. He estimated the cost of the ties on this project at approximately \$1,000 and inquired whether or not an exception should be made in this case and the ties be paid for with state funds. The Commission decided to let the Public Utilities Commissioner pass on the matter when the hearing is held with respect to this grade separation project, in the event that the owners of the railroad will not recede from their present stand in the matter.

The Commission discussed a communication from the Southern Pacific Railroad Company suggesting the construction of a stairway at the south end of the Albany overcrossing for the use of school children and other pedestrians who persist in using some of the abandoned railroad crossings, particularly one at Jackson Street. They advised that school children have formed the habit of crossing the tracks at grade and climbing through trains, which is very hazardous, and refuse to use the steps already constructed at the easterly end of the structure because it takes them several blocks out of their way; also, that the same practice is followed during the summer months when people cross the tracks at grade in going to and from the city swimming pool. They suggested the construction of steps at the westerly end and on the northerly side of the structure, so that pedestrians could cross over the tracks on the structure and then descend to the ground level in the vicinity of their destination, would be a satisfactory solution of this problem, provided a walk were constructed from the steps to the existing walk on Seventh Street. The Engineer gave as his thought that such solution would prove satisfactory if the railroad company would build a fence across Jackson Street to prevent people crossing the tracks at such point. He estimated the cost of the stairway and the sidewalk at \$2,600 and recommended approval of the project if the railroad company will pay one-half the cost thereof. The Commission approved the recommendation subject to the condition that no state funds shall be expended in connection therewith until the railroad company has built the fence, and ordered the matter covered by written agreement.

The Engineer requested instructions relative to the removal of certain trolley wires from the Interstate Bridge between Portland and Vancouver. He advised that under the Commission's agreement with the Portland Traction Company the Company was to remove the wires from the structure and

pay the state the salvage value of the materials, less the cost of removal, which the company now estimates will cost about \$1,325.50, whereas the estimated salvage value of the material is only \$437.00. He gave as his thought that some expense could be avoided if the state would assume the responsibility for the removal of the wires and, accordingly, requested authority to advertise the material for sale and removal at the next meeting, and to do the work with state forces in the event a satisfactory bid is not received. The Commission approved the request and so ordered.

The Commission discussed the use of a new type silhouette school crossing sign designed by a citizen of the town of Hood River, which sign not only cautions the public about the school zone but also contains advertising matter and, in the case of Hood River, shows children holding fruit grown in that locality. The Engineer gave as his thought that there is no justification for this type of sign, inasmuch as the State Highway Department furnishes free of charge silhouette type school signs and, furthermore, the law prohibits advertising on state highway rights of way. The Commission concurred in the viewpoint of the Engineer and thereupon instructed him to notify the Hood River authorities to discontinue the use of the signs, as they are unconventional and contrary to the Commission's policy, and to suggest to them that they secure school signs as they may need from the State Highway Department.

The Commission discussed and approved the granting of a permit to the Waitsburg Welding Works, Waitsburg, Washington, to operate truck and semi-trailer equipment, having an overall length of 44'10", over the Pacific Highway from Portland to the Interstate Bridge, and over the Columbia River Highway from The Dalles to the Oregon-Washington State Line near Wallula, Washington, in view of the action of the 1941 Legislature which increased the allowable overall length of such equipment from 35' to 50'. In the discussion it was pointed out that the new law will not go into effect until June, 1941. The Secretary was authorized to grant permits in the meantime up to the 50' overall length limit, provided the applicant will furnish the customary insurance.

The Commission considered and denied as a matter of policy the request of the Stayton Lions Club to place a city entrance sign on the right of way of the North Santiam Highway just east of Stayton, being outside of the city limits.

A request was presented from the Willamette Hauling Company, Portland, for a permit to transport over the Columbia River Highway, from the Bridge of the Gods at Cascade Locks to Viento, a distance of twelve miles, one power shovel having an overall width of 9'6" and an overall height of 12'6". The Commission authorized the granting of the permit subject to the condition that the Willamette Hauling Company will furnish the customary insurance protecting the Commission, and will provide three flagmen to accompany the movement, one to proceed in advance, one to follow in the rear, and the third to ride on the truck to protect passing traffic.

The Commission considered and denied the request of the Campbell Conro Lumber Company, Eugene, for permission to transport piling 110 feet long over the Coos Bay-Roseburg Highway enroute from Camas Mountain to Roseburg, investigations having revealed that loads in excess of 95 feet in length cannot be transported over this highway without taking up more than one-half the roadway.

The Commission also denied the request from the Parker Lumber Company, Eugene, for permission to transport over the Crater Lake Highway near the town of Prospect loads of logs having an overall length in excess of 70 feet, investigations having revealed that this section of highway is very crooked and that loads of such length cannot be transported thereover without taking up more than one-half the traveled roadway.

The Commission considered a request from Alex La Voy, Allegany, to drag logs across the Coos River Secondary Highway about three miles above the town of Allegany. The Commission was of the opinion that it has no authority to permit the dragging of logs across any state highway and accordingly denied the request. However, the Secretary was instructed to inform Mr. La Voy that, if he cares to go to the expense of constructing a roadway over the highway, the Commission will offer no objections thereto, provided the structure is built in conformance with plans approved by the State Highway Engineer.

The Commission confirmed the Engineer's award of the following contracts, bids for which were taken by the Commission at its meeting on February 27 and 28, 1941, the Engineer having reported the conditions of the awards satisfied:

Surfacing and oiling Donaldson Creek-Mills Bridge and McNamar's Camp-Washburn Sections of Wilson River Highway. Bids taken February 27; contract awarded March 25, 1941, to Roy L. Houck, the low bidder.

Grading and topping Lytle Creek-Ochoco Creek Section of Madras-Prineville Secondary Highway. Bids taken February 27; contract awarded March 25, 1941, to Berke Bros., the low bidders.

Grading and paving West Sheridan Section of the Salmon River Highway. Bids taken February 28; contract awarded to Berke Bros., the low bidders, on March 25, 1941.

Grading, surfacing and oiling Jones Hill-Lena Section of the Heppner Highway. Bids taken February 28; contract awarded March 25, 1941, to R. O. Dail & Warren Bros., Inc., the low bidders.

Grading, topping and bridge construction on Gilliam County Line-Zinter Ranch Section of the Wasco-Heppner Secondary Highway. Bids taken February 28; contract awarded March 25, 1941, to M. L. O'Neil & Son, the low bidders.

A request was received from Fremond Bean for reinstatement of his log hauling permit which was revoked on December 11, 1940, because he was

operating his truck with switched P.U.C. plates. The Secretary advised that Mr. Dean's truck was demolished in a collision with a freight train and that he has not been hauling logs since the accident, but he has now purchased a new truck and would like to resume his log hauling business if the Commission will approve reinstatement of his permit. After discussion, the Commission granted the request subject to the condition that if Mr. Dean again violates the law in any respect his permit will be cancelled permanently.

The Engineer discussed with the Commission matters pertaining to the proposed improvement of South Sixth Street in Klamath Falls. He reported that it would cost about \$43,000 for land to provide a 60-foot right of way, and \$89,000 to provide a right of way 80 feet wide. He recommended improvement of this street for local traffic on 60-foot right of way, and the construction of a new highway along the north bank of the irrigation canal in Klamath Falls, for through traffic. The Commission tentatively approved the Engineer's recommendation, but deferred final action and the adoption of a resolution relative thereto until a later meeting. The Engineer was authorized to conduct surveys as may be necessary to complete plans for both projects and to report to the Commission at the next meeting the estimated cost to construct each so the Commission can order the Sixth Street project advertised for bids at that time, if it so desires.

The Commission discussed a letter from the Oregon Association of Trade Executives, Portland, suggesting the adoption in Oregon of ambulance service similar to that now being offered by the State Police Department in the State of Washington. The Commission considered such matter to be a function of the State Police Department and accordingly ordered the communication filed without action.

A letter was presented from School District No. 7, Lostine, Oregon, requesting the privilege of purchasing about 20 cubic yards of sand and gravel from State Highway Department stock pile for use in connection with construction of a concrete tennis court. The Commission authorized the sale of this material to the School District at actual cost if investigation reveals no commercial plant in the vicinity that is able to furnish such material.

A letter from the Hood River Chamber of Commerce, requesting snow removal operations on the Mount Hood Highway, so as to open this road for tourist travel, had the attention of the Commission. The matter was referred to the Engineer for investigation and report as to how much it will cost to open the road.

The Commission considered and ordered filed a letter from Thomas H. MacDonald, Commissioner of Public Roads, Washington, D. C., complimenting the Commission on its Fourteenth Biennial Report.

A letter was presented from the Forest Supervisor of the Rogue River National Forest, Medford, Oregon, requesting state cooperation in the construction of a cattle guard across the Little Butte Secondary State Highway in Section 4, Township 37 South, Range 3 East, W. M., Jackson County. The

Commission authorized granting of the permit for the construction of such cattle guard provided the Forest Service will pay all of the costs involved and will construct the guard in accordance with plans approved by the State Highway Engineer and will carry on the work under the general supervision of such Engineer.

A letter was presented from H. I. Kibler, Portland, suggesting the construction of bridle paths along the old Columbia River Highway between Multnomah Falls and Eagle Creek when the new water-grade highway has been constructed between these points. The Secretary was instructed to inform Mr. Kibler that there is a question whether or not the Commission can use for such purpose funds that are provided by the motorists. In any event, the new highway is not scheduled for early completion, so there will be sufficient time in the interim for the Commission to give the matter the study that it deserves.

The Commission discussed briefly and ordered filed a communication from W. C. Markham, Secretary, American Association of State Highway Officials, advising the status of the "Carmody Report on Highways." The Secretary was instructed to send a copy of this letter to each member of the Commission.

The Engineer reported on the complaint of the Cougar Independence Lessees, Baker, Oregon, relative to the condition of the Sumpter Valley Secondary Highway. He said that during the recent period of thaw a few bad frost rolls developed and broke, causing a muddy condition; however, the maintenance forces have repaired these, and the entire section up to Sumpter is now dry and in fair condition, but from Sumpter to the end of the secondary highway at McCully's Forks the road is unsurfaced and is quite muddy, although the maintenance forces are doing their best to keep it travelable. Until such time as the road is surfaced, he said, it will be practically impassable during each spring breakup. The Engineer was instructed by the Commission to continue the maintenance of the section as best he can under prevailing conditions, as there are no funds available to finance surfacing work at this time.

The Commission discussed a letter from Sterling J. Behnke, Eugene, on behalf of the Eugene Obsidians, which letter was forwarded from the office of Governor Charles A. Sprague and in which request was made for snow removal operations on the McKenzie Highway up to the winter sports recreational area at Hand Lake. The Commission ordered the communication filed because the season is so far advanced and there is no apparent reason for an expenditure at this time.

The Commission also discussed and ordered filed a letter from M. A. Lynch, former State Highway Commissioner, Redmond, transmitting an editorial from the Redmond Spokesman expressing approval of the Commission's purchase of "The Cove" area in Jefferson County for state park purposes.

The Secretary presented a letter from the Honorable Robert W. Sawyer, Bend, former State Highway Commissioner, recommending the selection of

the Central Oregon Highway as one of the roads in the strategic military highway system rather than the John Day Highway, and offering the services of the people of Bend to effect such designation. The Commission took no action, this matter having been disposed of earlier in the session.

The Commission discussed a letter from the Central Labor Council, Portland, in which the Commission was requested to withdraw its support from the Collins Concrete and Steel Pipe Company of Portland, because this company employs non-union workers in its various departments, is paying a lower scale of wages than is being paid by other pipe companies, and is on the Labor Council's unfair list. The Commission instructed the Secretary to inform the Central Labor Council that the State Highway Commission makes its purchases through the State Board of Control which takes bids for materials on a competitive basis; further, that it is the long-established policy of the Commission to recommend to the Board of Control acceptance of the low bid in each instance, provided the material being furnished meets the specifications, and in any event, such procedure must be followed in order to meet the federal requirements in connection with purchases where federal funds are involved.

The Commission's attention was also brought to the letter from the Southwestern Oregon Central Labor Trades Council advising that the Houck Construction Company of Salem, which has a contract with the Commission for highway construction at Marshfield, is on the Council's unfair list and its operations are picketed, because it is paying its employees wages that are below the prevailing wage in that district. They urged the Commission to force Mr. Houck to pay the prevailing wage. The Commission instructed the Secretary to inform the Council that the work being done by the Houck Construction Company at this place is contract work which was awarded to the company as a result of competitive bidding, this company being the low bidder, and further, that the contract contains a certain wage scale which must be paid by the contractor and if he pays his men according to this scale the Commission cannot force him to pay more, in fact, the Commission cannot make any contractor do anything outside of the limits of his contract.

A letter was presented from Mr. Lee U. Eyerly, member of the Oregon State Board of Aeronautics, requesting the appointment of some members of the Highway Department's organization to confer with the State Director of the State Board of Aeronautics, relative to the making of a preliminary survey for a tentative program to establish airports, as authorized by the 1941 Legislature. The Engineer advised that he has already informed Mr. Eyerly that he would be glad to discuss the general situation with the Director of Aeronautics at any convenient time, and that he would recommend to the Commission that the Commission cooperate with the board in conformance with the provisions of this new statute, although there is a question whether or not there can be very much correlation between airport and highway construction except under unusual conditions wherein the spoil or waste materials from the one facility can be used by the other. The Commission approved the reply.

The Commission discussed a letter from Loy W. Rowling, Chairman, Executive Committee, United Commercial Travelers of America, Eugene, requesting representation for this organization on the service club sign racks

recently installed at Eugene. The Commission considered that the Commercial Travelers of America does not meet the Commission's requirements for representation on such racks and, accordingly, denied the request.

The Commission considered and ordered filed a letter from Arthur Podell, Multnomah, Oregon, complaining of the condition of the Oregon Coast Highway south of Bandon, in Coos County.

The Commission also discussed and ordered filed communications as follows:

Letter from Josephine County Court expressing confidence in the State Highway Commission and approval of its present method of allocating the funds at its disposal

Letters from Senator Rufus Holman and Hood River Chamber of Commerce, forwarded through the Public Roads Administration, relative to construction of a road leading to Lost Lake, in Hood River County

Letter from North Lincoln County Chamber of Commerce thanking the Commission for roadside beautification accomplishments in North Lincoln County

A letter was presented from Mr. George E. Lewis, Algoma, Oregon, objecting to the employment of Union labor exclusively on the state highway project north of Klamath Falls. Mr. Lewis advised that local people desiring employment on this project are being refused work because they do not belong to the Union, and he enclosed in his letter a clipping from the Klamath Falls paper which quoted the Oregon State Employment Service as saying: "***** labor on the project will be entirely Union and will be hired through the Employment Service Office. He cautioned men against attempting to find work by going out to the job.*****" The Secretary was instructed to inform Mr. Lewis that no one is required to belong to the Union in order to secure employment on any state highway contract, inasmuch as the contract does not contain provision to that effect. However, if the contractor is signed up with the Union and demands Union labor, he is within his rights in so doing, and the Commission is not in any position to object.

The Commission discussed briefly and ordered filed a copy of Senate Bill No. 812 of the 77th Congress, First Session, providing for the acquisition and toll-free operation by the United States of the interstate bridges at Cascade Locks and Hood River.

The Secretary presented a certified copy of the resolution adopted by the Eugene City Council approving the routing of the Pacific Highway through the City of Eugene, as heretofore adopted by the Commission. The Commission ordered the resolution filed for future reference.

The Commission considered and denied the request from Anthony Schaffer, Elsie, Oregon, for permission to operate a luncheon stand on the Wolf

Creek Highway right of way near the Nehalem River Bridge at Elsie.

The Secretary presented a letter from the Lane County Court recommending the oiling of the Veneta South Section of the Territorial Secondary Highway, Lane County, in preference to other sections of this highway. The Commission confirmed the action previously taken at this meeting in which it was decided to make no change in the present construction program so far as it relates to the Territorial Secondary Highway, and to retain in the program a \$20,000 allotment for the oiling of the Monroe South Section. However, the Commission agreed to give consideration to the oiling of other sections of this highway in the formulation of future programs.

The Commission discussed briefly, and referred to Commissioner Clough, for study and report, a communication from H. J. Andrews, Assistant Regional Forester, Division of State and Private Forestry, relative to the county-owned land problem of Douglas County.

Letters were presented from the Honorable W. J. Johnson, County Judge of Josephine County, and from the Cave City Chamber of Commerce, in which the Highway Commission was requested to assist in securing a reclassification of the Happy Camp-O'Brien Road in Josephine County, from a forest trail to a No. 3 Forest Road. Judge Johnson advised that if the Highway Commission would request such reclassification the probabilities are that the U. S. Forest Service would grant the request, because it would enable the Forest Service to spend federal funds for the improvement of the road. He further advised that the district served by this road is now practically isolated and, if improved, would be available for year-round traffic, which would make it possible to market timber products, farm products and mine products that cannot be taken to market under present road conditions. The Engineer advised that this road lies partly in the State of California. He was instructed by the Commission to inform Judge Johnson that the Commission feels that it is obligated to spend the moneys under its control for the improvement of highways on the strategic military highway system and for the improvement of other state highways, rather than for the construction of an entirely new project such as the road under discussion.

The Engineer requested authority to purchase, at an estimated cost of \$100.00, a small centrifugal pump for use in connection with irrigating the landscaped area around the historical monument situate adjacent to the Fremont Highway at Summer Lake. The Commission approved the purchase of this pump through the State Board of Control.

The Engineer presented a list of surveys that he has ordered since the last meeting of the Commission and asked the Commission to confirm them and the amounts allocated for each. After due consideration the Commission authorized and instructed the Engineer to make such location surveys on various sections of the highways of this state, which said sections of highways, together with their identifying location survey numbers and the amounts authorized and allocated for such survey expenditures are as follows:

Plans - - - - 1-1427 - Baker Undercrossing Section, Baker-Unity Highway,
Baker County. 1st authorization - \$1500

Plans - - - - 204-1446 - Camp Clatsop-Ft. Stevens Section, Military Access
Road. Clatsop County. 2nd authorization - \$3780
Total to date \$6780.

Right of Way - 107-1415 - Riverside Ranch Section, Crooked River Highway,
Crook County. 1st authorization - \$300

Right of Way - 21-1446 - Otter Rock Section, Oregon Coast Highway, Lincoln
County. 1st authorization - \$50

Level - - - - 22-1432 - Various sections, various highways, Linn County.
1st authorization - \$150

Plans - - - - 22-1433 - Marion County Line-Junction Pacific Highway West,
Pacific Highway East, Linn and Lane Counties
1st authorization - \$150

Plans - - - - 124-1438 - East Oak Street, Silverton Section, Cascade Highway,
Marion County. 1st authorization - \$100

Plans - - - - 24-1439 - Clackamas County Line-Linn County Line, Pacific
Highway East, Marion Co. 1st authorization - \$100

Plans - - - - 136-1427 - Dayton Bridge Section, Three Mile Lane Highway,
Yamhill County. 1st authorization - \$100

The Commission had under consideration the following requests for extensions of time within which to complete highway construction projects:

Roy L. Houck, contract No. 2159, for grading and paving the Albany Overcrossing Project on the Pacific Highway East, in Linn County, requested an additional extension of time, from July 23 to October 26, 1940, within which to complete this job. He alleged that he failed to complete the project within the specified time limit for the following reasons: unsuitable weather conditions during the spring of 1940 which necessitated closing down the work at the request of the engineer; award to him of the contract for grading and paving the Albany Section, resulting in the necessity to work both jobs simultaneously; and extra time needed for the drying-up of soft spots that developed in the grade. The Engineer advised that this contract was awarded by the Commission on January 31, 1939, and the date of completion specified in the contract was December 31, 1939. Further, that the Commission previously extended the time limit to July 23, 1940, without penalty, because of bad weather conditions which necessitated the closing down of the work in the spring. At the time of resuming the work in 1940 it was

concluded that better results would be obtained if the finishing of the fills of the grading project were deferred until the pavement had been laid, and as a consequence the overcrossing project was not completed within the extended time limit. He further advised that the state received a better job by reason of delaying the finishing of the fills until the pavement was completed and, in view thereof, he recommended that the extension of time now requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

Tom Lillebo, contract No. 2361, for construction of fenders on the Yaquina Bay Bridge piers on the Oregon Coast Highway at Newport, Lincoln County, requested an extension of time of 20 days, from January 31 to February 20, 1941, within which to complete this job. He attributed his failure to complete the project within the specified time limit to bad weather conditions which did not permit work on certain days without endangering the lives of his crew. The Engineer advised that the main reason that the contractor failed to complete the project within the specified time limit was the fact that he rented a pile driver for the work and the owner of the same took it off the job on December 1 and did not return it to Mr. Lillebo until January 9, 1941. He gave as his thought that this is no valid reason for granting the extension of time without penalty, and he accordingly recommended approval of the request for an extension of time subject to the condition that the contractor reimburse the state for engineering expense incurred on the job subsequent to January 31, 1941, the specified date of completion. The Commission approved the recommendation unanimously.

The Engineer brought up for discussion the question whether or not to penalize contractor K. L. Goulter for failure to complete, within the specified time limit, contract No. 2259 for grading and construction of structures on the Necarney Creek-Neahkahnie Mountain Section of the Oregon Coast Highway, in Tillamook County. He advised that the date of completion specified in the contract was November 30, 1940; however, on December 5, 1940, the Commission granted an extension of time to April 1, 1941, with a proviso that Mr. Goulter be charged with the engineering costs incurred by the state in connection with the job after March 10, which is the date covered by an automatic extension of time due to increased work authorized on the project. All work in connection with this job, he said, was completed on March 10; however, due to a change in the plans, the contractor was required to remove the temporary crib from the bottom of the Chasm Bridge, which required an additional five-days time. He gave as his thought that the contractor should not be charged with the engineering expense incurred during this five-day period and accordingly recommended that the penalty be waived. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation.

The Commission discussed a letter from E. C. Hall Company requesting release from payment of a portion of the penalty charged it for failure to complete its contract with the state for grading, surfacing, oiling and construction of a structure on the Warren Creek Section of the Columbia River Highway, in Hood River County, contract No. 2204. Mr. Hall alleged that bids for this job were taken by the Commission on July 27, 1939, but the contract was not awarded to him until September 9, 1939, necessitating an automatic extension of the time limit to July 31, 1940; further, that owing to a serious traffic condition he was not able to start the grading work until July 15, 1940, and even at that late date the material handled was so wet that it had to be mixed with other material so as to maintain traffic over the road. It was his thought that he would be entitled to an extension of time without penalty up to September 1, 1940, for such reason. The Engineer advised that the reasons given by Mr. Hall for his failure to complete this job within the specified time limit are substantially correct—that July 15 was about the earliest that this section could be worked satisfactorily without interfering with free flow of traffic on the Columbia River Highway. He recommended in view of the circumstances that the E. C. Hall Company be relieved of the payment of the extra engineering expense incurred by the state prior to September 1, 1940, but that it be charged with the cost of engineering supervision incurred by the state subsequent thereto. The Commission approved the recommendation and so ordered.

The Engineer reported that contracts Nos. 2159, 2259, 2361, 2378, 2389, 2391, and 2394, for the construction of state highway projects, have been completed according to the requirements of the contracts or modifications thereof, and that said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and was adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts and said jobs are now ready for acceptance:

Contract No. 2159, with Roy L. Houck, for grading and paving the Albany Overcrossing Section of the Pacific Highway, in Linn County. Completed October 26, 1940.

Contract No. 2259, with K. L. Goulter, for grading and structures on the Necarney Creek-Neahkahnie Mountain Section of the Oregon Coast Highway, in Tillamook County. Completed March 15, 1941.

Contract No. 2361, with Tom Lillebo, for redriving pier fenders on the Yaquina Bay Bridge on the Oregon Coast Highway at Newport, in Lincoln County. Completed February 19, 1941.

Contract No. 2378, with M. L. O'Neil & Son, for the Wasco County Line-Madras Rock Production Project on The Dalles-California Highway, in Jefferson County. Completed February 3, 1941.

Contract No. 2389, with Blair T. Alderman, for roadside improvement on the Third Street (Bend) Undercrossing Section of The Dalles-California Highway, in Deschutes County. Completed March 28, 1941.

Contract No. 2391, with Rogers Construction Company, for the Pendleton-Pilot Rock Rock Production Project on the Pendleton-John Day Highway, in Umatilla County. Completed February 22, 1941.

Contract No. 2394, with A. S. Wallace, for the Woodburn-Molalla-Silverton Rock Production Project on the Pacific, Woodburn-Sandy, Cascade, Hillsboro-Silverton and Silver Creek Falls Highways, in Clackamas and Marion Counties. Completed March 13, 1941.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

The Commission discussed a date for its next regular meeting for receiving bids for construction work, following that scheduled for May 8 and 9, 1941, and decided to hold such meeting in Portland on Thursday and Friday, June 12 and 13, 1941. It was also decided to hold a special meeting on Thursday, May 22, in Portland, to receive bids on the Front Avenue project, Portland, and to dispose of routine matters. The Secretary was instructed to make the usual arrangements to hold these meetings in the auditorium of the Public Service Building.

The Commission adjourned at 10:45 p. m. to reconvene at 9:00 o'clock the following morning in the auditorium of the Public Service Building.

Portland, Oregon, April 4, 1941

The State Highway Commission reconvened at 9:00 a. m. in the auditorium of the Public Service Building. Present were:

Henry F. Cabell, Chairman
Huron W. Clough, Commissioner
Herman Oliver, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

Bids, as follows, for highway construction projects were opened and read in conformance with previously-published notice following which Chairman Cabell announced that the award of contracts would be made at 2:30 p.m. in the same room:

CASCADE SECONDARY HIGHWAY
CLACKAMAS GRADE SEPARATION

Frank Watt Construction Co.	\$25,954.00
Birkemeier & Saremal	26,954.00
C. J. Montag & Sons	28,071.00
McNutt Bros.	28,108.00
C. J. Eldon	30,049.00
Barham Bros.	31,158.20

FENDLETON-JOHN DAY HIGHWAY
LONG CREEK-FOX SECTION
GRADING, SURFACING, OILING AND TWO BRIDGES

A. Milne	\$115,600.80
E. C. Hall Co.	126,318.00
Babler Bros.	149,889.00
McNutt Bros.	153,965.00

WARNER SECONDARY HIGHWAY
WARNER SUMMIT-CAMAS CREEK SECTION - SURFACING AND OILING

No bids received on this project

OREGON COAST HIGHWAY
MINER CREEK-SPENCER CREEK SECTION - GRADING

Berke Bros.	\$56,303.00
A. C. Greenwood Co., Inc.	63,065.00
Leonard and Slate	64,226.00
Frank Penepacker	69,945.00
E. C. Hall Co.	70,458.00
C. J. Eldon	70,686.00
E. L. Gates	72,185.00
Sam Orino	72,459.00
Coos Bay Dredging Co.	73,414.25
McNutt Bros.	77,990.00
Roy L. Houck	85,845.00

VALE-ADRIAN COUNTY ROAD
COT HOLLOW CREEK-ADRIAN JUNCTION SECTION
SURFACING, OILING AND BRIDGE

No bids received on this project

PACIFIC HIGHWAY
INTERSTATE BRIDGE - PLACING NEW EXPANSION PLATES

Birkemeier & Saremal	\$7,770.00
Curtis Gardner	12,994.00

PACIFIC HIGHWAY WEST
ONION FLAT SECTION - GRADING AND PAVING

Roy L. Houck	\$45,329.00
Berke Bros.	45,605.50
Porter W. Yett	47,031.50
McNutt Bros.	49,183.50
United Contracting Co.	58,575.50

THREE MILE LANE SECONDARY HIGHWAY
YAMHILL RIVER BRIDGE AT DAYTON
REDECK AND RECONSTRUCT TIMBER APPROACHES

J. F. Johnston	\$26,684.50
Frank Watt Construction Co.	26,746.00
Harry I. Hamilton	26,839.50
Averill & Corbin	26,997.25
C. J. Eldon	27,207.00
Barham Bros.	27,743.50
Curtis Gardner	29,140.00
Birkemeier & Saremal	30,248.00
McNutt Bros.	32,532.50
Babler Bros.	32,798.00

County Judge Nelson B. Higgs of Harney County was present in regard to the improvement of the Burns-Crane Highway and the Hanley Lane Section of the Frenchglen Secondary Highway. He gave as his understanding that the Commission has budgeted \$50,000 for the Hanley Lane Section and \$15,000 for the improvement of the section south of Wright's Point. The Engineer estimated that it would cost about \$85,000 to improve the Burns-Crane Highway from Burns to the Hanley Lane junction and the Hanley Lane-Wright's Point Section of the Frenchglen Secondary Highway. Judge Higgs suggested that the \$15,000 set up for the section south of Wright's Point be transferred to the Hanley Lane project, making a total of \$65,000 available for the improvement of this section, and that additional funds be appropriated for the oiling of the 1½-mile section from Burns to the Hanley Lane junction. Chairman Cabell said that it would be advisable to make such transfer and suggested that the \$10,000 savings accruing on the previous day from the contracting of the Vance Creek project on the Pendleton John Day Highway could be reallocated to the Hanley Lane Section, making a total of \$75,000 available for this work, and to augment such sum with additional savings as may accrue on other projects in this vicinity so as to finance the entire improvement from the Burns-Crane Highway to Wright's Point. Also, that if savings accrue from the contracting of this work such savings could be applied to the oiling of

the 1½-mile section between Burns and Hanley Lane junction. This arrangement was satisfactory to Judge Higgs and was thereupon approved by the Commission by unanimous vote. The Engineer was authorized to advertise this project for bids to be received at the meeting on May 8, if the plans and specifications can be prepared in time.

Judge Higgs also asked for the improvement of the Buchanan-Juntura Section of the Central Oregon Highway which, he said, is going to pieces under heavy traffic. He was informed that the Commission does not have funds available to finance a standard improvement, but will do what it can by way of maintenance to keep it in passable condition.

Judge Higgs also asked the Commission to bear in mind improvement of a roadway from the town of Burns to the Burns airport, which is now being surveyed, a distance of four miles. He was informed by the Engineer that there are only two recognized Government airports in Oregon, being those situated at Portland and Pendleton, and it is doubtful whether the Commission would have funds that could be applied to the construction of a road leading to any other airport.

A delegation from the town of Nyssa, headed by Frank Morgan, and including L. P. Thomas, R. G. Whitaker, and Herschel Thompson, all members of the Nyssa City Council, came before the Commission in regard to the improvement of Main Street through their town (route of the Old Oregon Trail). They asked for the paving of this street from curb to curb from a point near the public school building to the crossing of the O.W.R. & N. Railroad, and also asked for the construction of a storm sewer to drain the surface water from this street, both of which projects have been previously requested by the city. The Engineer advised that investigations of the drainage problem reveal that it would not be feasible to install a pump at the undercrossing to take care of drainage water, because it would take a pump of a capacity of 8 cubic feet per second. He suggested a gravity sewer line to serve the area which, he said, would cost about \$14,000. If the Commission decides to do this work, he said, a saving of about \$1,550 could be realized by changing the plans for the drainage system for the underpass now under construction, which would reduce the cost of the gravity system from \$14,000 to \$12,500. The Attorney advised that the Commission can legally expend state funds for this work provided it is confined to the street that is the state highway route, but not beyond those limits. The Engineer advised further that it would cost about \$35,000 to construct the sewer facilities and to pave the street, which estimate includes the construction of a good type of pavement through the business district. Mr. Thompson advised that the city is not in a position financially to do this work on its own account.

Chairman Cabell pointed out that the project involves a policy of the Commission and it was his thought that the Commission should adopt a standard policy to apply to all cities and towns before giving a definite answer to this particular request. After discussion, the Commission instructed the Engineer to report at the next meeting the localities where the state has constructed sewers and other drainage facilities. Chairman Cabell then advised that there is a question whether the state will pay for the sewer

construction, but stated definitely that the state would pave the street if some other agency would finance the sewer work. The Engineer suggested that it would be advisable, pending the Commission's decision in the matter, to install the 24" pipe line along First Street to the Snake River and construct a manhole in connection therewith, now, so that this feature will be taken care of in the event the Commission decides to go ahead with the sewer construction. He explained that such work can be done much cheaper at the present time than later, because of the underpass structure which is now being built, and added that this part of the work would have to be done regardless of who pays for the sewer. The Commission approved such installation. The delegation was informed that the Commission would render a decision in the matter as soon as possible.

The delegation also renewed its request for the oiling of the secondary state highway between Adrian and the Idaho State Line, opposite Homedale, Idaho, and for the construction of a new bridge across the Snake River at Nyssa. The Commission agreed to inspect these projects the next time it is in that vicinity.

The Commission discussed the matter of rerouting the Baker-Homestead Highway and, in connection therewith, considered resolutions from the Baker County Court requesting the following:

1. Rerouting the Baker-Homestead primary highway from Baker to Homestead, via Robinette.
2. Designating the road from the town of Halfway to Cornucopia a secondary state highway.
3. Eliminating from the primary highway system all but approximately the westerly 3-mile section of the highway which extends from Halfway to Homestead.

After discussion the Commission approved the county's resolutions and thereupon, by unanimous vote, adopted resolutions as follows, effecting the changes requested:

WHEREAS, the Baker-Homestead Highway as now located extends from Baker easterly by way of Richland to the foot of Timber Canyon Grade, thence northerly to Halfway, thence northeasterly to Homestead and Ballards Bridge over the Snake River, and

WHEREAS, it is the judgment and opinion of the State Highway Commission that a relocation of the section of said highway extending from Halfway to a point approximately 6.5 miles southerly from Ballards Bridge over the Snake River will result in better alignment, more economical highway construction and maintenance and will better serve the motoring public.

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Highway Commission, all members being present and affirmatively

APR 4 1941

voting, as follows:

1. That the section of the Baker-Homestead Highway extending from the foot of Timber Canyon Grade northerly to Halfway and thence northeasterly to a point approximately 6.5 miles southerly from Ballards Bridge be and said section of said highway hereby is relocated so that the same shall follow a route and course beginning at the foot of Timber Canyon Grade thence easterly to Robinette, thence northerly via Brownlee to a connection with the present Baker-Homestead Highway at a point approximately 6.5 miles southerly from Ballards Bridge, thence northerly to Ballards Bridge over Snake River.
2. Said route and location hereby is designated and adopted as a part of the route and location of the Baker-Homestead Highway.
3. That the Engineer be and he hereby is instructed to appropriately mark on the ground with permanent posts or other monuments the course and right of way boundaries of said new location.
4. That the field notes and other engineering data made and prepared by the Engineer in making said location be and the same hereby are adopted as the field notes and engineering data establishing the said location and route.
5. From and after the adoption of this resolution that portion of the Baker-Homestead Highway extending from Halfway to a point approximately 6.5 miles southerly from the said Ballards Bridge shall no longer be a part of said state highway but shall revert to Baker County and thereafter shall be a county road under the jurisdiction and control of said Baker County.
6. That the section of the Baker-Homestead Highway as heretofore located, beginning at the foot of Timber Canyon Grade east of Richland, thence northerly to Halfway, shall continue to be a state primary highway but shall be known as the Halfway Highway.
7. That this resolution be entered in the minutes and records of the State Highway Commission and that a duly certified copy thereof be delivered to the County Court of Baker County and to the Public Roads Administration.

WHEREAS, under the provisions of Chapter 248, Laws of 1931; Chapter 196, Laws of 1935; and Chapter 529, Laws of 1939; the State Highway Commission, by mutual agreement with the respective county courts of the several counties of the State, is authorized and empowered to select, locate, and designate a system of secondary

state highways, which highways shall be selected from the market roads or other county roads, or available locations or routes of the several counties; and

WHEREAS, the State Highway Commission, by mutual agreement with the Baker County Court of the State of Oregon, has selected the road or highway hereinafter named, and it is the purpose of the Commission to officially and regularly designate and adopt said highway as a highway to constitute, together with other highways heretofore adopted and/or which may hereafter from time to time be added, the system of secondary state highways under the provisions of said acts;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission, all members being present and affirmatively voting and participating, as follows:

1. That the following described market road, county road, highway, route, or location of a highway in Baker County be and the said market road, county road, highway, location, or route, hereby is selected, designated, established, adopted and approved as a secondary state highway and shall be and hereby is designated as a part of the secondary state highway system, to wit:

Halfway-Cornucopia Secondary State Highway No. 413:

Beginning at the junction of the former Baker-Homestead Primary State Highway with the county road extending from Halfway to Cornucopia in the Town of Halfway; thence in a northerly direction along Pine Creek to Cornucopia, a distance of approximately 11.0 miles.

2. That the said highway shall be and hereby is qualified for improvement under the provisions of said Chapter 248, Oregon Laws 1931; Chapter 196, Oregon Laws of 1935; and Chapter 529, Oregon Laws of 1939; and amendments thereof.

WHEREAS, under the provisions of Chapter 248, Laws of 1931; Chapter 196, Laws of 1935; and Chapter 529, Laws of 1939; the State Highway Commission, by mutual agreement with the respective county courts of the several counties of the State, is authorized and empowered to select, locate, and designate a system of secondary state highways, which highways shall be selected from the market roads or other county roads, or available locations or routes of the several counties; and

WHEREAS, the State Highway Commission, by mutual agreement with the Baker County Court of the State of Oregon, has selected the road or highway hereinafter named, and it is the purpose of the Commission to officially and regularly designate and adopt said highway as a highway to constitute, together with other highways heretofore adopted and/or which may hereafter from time to time be added, the system of secondary state highways under the provisions of said acts;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED, by the State Highway Commission, all members being present and affirmatively voting and participating, as follows:

1. That the following described market road, county road, highway, route, or location of a highway in Baker County be and the said market road, county road, highway, location, or route, hereby is selected, designated, established, adopted and approved as a secondary state highway and shall be and hereby is designated as a part of the secondary state highway system, to wit:

Pine Creek Secondary State Highway No. 414:

Beginning at a point in the Town of Halfway at the Junction of the Halfway-Cornucopia County Road with the former Baker-Homestead Highway; thence easterly to a point near the crossing of Dry Creek; a distance of approximately 3.0 miles.

2. That the said highway shall be and hereby is qualified for improvement under the provisions of said Chapter 248, Oregon Laws 1931; Chapter 196, Oregon Laws of 1935; and Chapter 529, Oregon Laws of 1939; and amendments thereof.

The County Court of Klamath County represented by County Judge U. E. Reeder and County Commissioners E. E. Benner and John R. Reber; also County Engineer Frank Z. Howard, came before the Commission and urged improvement of the Sprague River County Road which passes through the Klamath Indian Reservation. They particularly urged the oiling of the nine-mile section between the town of Sprague River and the junction with the Klamath Falls-Lakeview Highway, although they alleged that the improvement of the entire road is important from the standpoint of providing a detour for The Dalles-California Highway traffic in the event of interruption of traffic on this highway between Klamath Falls and Chiloquin because of floods, or for other reasons. The Engineer estimated that it would cost about \$30,000 to oil the nine-mile section. Chairman Cabell pointed out that the improvement of this road is a costly undertaking and one which the Highway Commission could not very well undertake at this time in view of the many obligations of the Commission that

are as yet unfulfilled. Judge Howard advised that the county plans to spend some county money for grading and surfacing the worst sections of the road, but the county is absolutely unable to finance the entire improvement. He said that the county endeavored to secure Federal funds that have been allocated for the improvement of roads within Indian reservations to finance this work, but failed. He urged the Commission to give the project serious consideration.

Judge Reeder also asked the Commission to continue the improvement of the county road between Malin and Bonanza, particularly the Poe Valley Section. He requested the oiling of the three-mile section that was graded and surfaced by the state in 1939, which section, he said, is now in good condition but is very difficult to maintain. He also asked for the oiling of a two- and three-quarters-mile section of the county road north from Midland, which the county has graded and graveled. Request was also made by the County Court for the improvement of the Midland Secondary State Highway. The Engineer estimated that oiling work on the Malin-Bonanza Road would cost about \$6,000 per mile and that the surfacing, oiling, and bridge construction on the Midland road would cost a total of approximately \$65,000. The Commission took the request under advisement.

The matter of the improvement of South Sixth Street, Klamath Falls, was next discussed. The Engineer estimated that it would cost more to modernize South Sixth Street, including acquisition of right of way and incidental expense than to construct an entirely new highway bypassing the South Sixth Street congested district and entering Klamath Falls by the Main Street underpass. He gave as his thought that it would be advisable to construct the permanent highway on such revised alignment and to improve South Sixth Street on the present 60' right of way for local use. He estimated the cost of extra right of way along South Sixth Street, to provide 80' width, at \$100,000, and gave as his thought that it would be logical to expend this sum of money for construction of the bypass route, which would not only conserve funds but would provide a shorter route for motorists in passing through Klamath Falls. After discussion the County Court indicated approval of the arrangement mentioned by the Engineer.

The County Court brought up for discussion a local controversy with respect to a small area of land at the junction of The Dalles-California Highway and the Green Springs Highway. It appears that Klamath County acquired the right of way at this point with the intention of conveying it to the state, but there seems to be no record of the transfer. The question arises whether or not the property was ever deeded to the State, because there is a clause in the county's deed which provides that any portion of the property that is not utilized for highway right of way within a reasonable length of time shall revert to the former owners, and such former owners are now demanding the return of such portion of this area. After discussion, the Commission referred the matter to the Attorney with instructions to assist the county in any way possible, to iron out the difficulty.

Chairman Cabell brought up the matter of the state cooperating in the construction of a bridge over the Willamette River at Independence. After

discussion the Commission decided not to cooperate in the cost of this structure because the project is not of military importance and the Commission cannot spare the funds. The Engineer was instructed to so inform the sponsors of the project.

The Commission discussed the matter of permitting Mr. Chat Goode of Eugene to transport a boat 12' wide, 65' long overall, and 13' high over state highways from Eugene to Mapleton, and decided to grant Mr. Goode such authority provided there is sufficient vertical clearance to permit the movement across bridges enroute, and provided further that Mr. Goode will furnish public liability and property damage insurance in the customary amounts and will arrange for a state police escort. The Engineer was instructed to investigate the matter of clearances.

Messrs. Marshall E. Nauman and L. J. Cronkhite, representing the Fruehauf Trailer and Equipment Company, came before the Commission with respect to operating truck and semi-trailer equipment 50' overall in length over Oregon highways pending the date when the law passed by the 1941 Legislature authorizing such movements goes into effect. The Attorney advised that the Commission has authority to grant such permits if it so desires. The Commission considered that the enactment of the law by the Legislature is indicative of the Legislature's approval of the movement of such length vehicles over the highways of this state and, thereupon, authorized the granting of the permit.

The Attorney brought up for discussion the offer of Leslie Watters to pay the sum of \$200.00 for certain residence buildings owned by the state on property acquired from J. W. Morefield, at St. Helens. He recommended acceptance of this offer without advertising the property for sale, particularly because, in his estimation, the offer is very fair, and also for the reason that the contract for the improvement of the Columbia River Highway, at St. Helens, involving this property, has already been awarded. The Commission approved the recommendation.

The Commission also authorized the sale of a shack located on state-owned property on the West Portland-Cooke Overcrossing Section of the West Portland-Hubbard Highway, in Clackamas County, to Mr. Glenn S. Ehle, for the sum of \$5.00, upon advice from the Attorney that the building is of no value whatsoever, and that it would cost the state more to demolish it than could be salvaged.

The Commission adjourned at 12:20 p. m. and reconvened at 1:30 p.m. in the same room with the same persons present and participating.

The Engineer discussed with the Commission matters pertaining to the granting of permits for the continuous hauling of logs over state highways. He presented for adoption by the Commission a form of resolution containing rules and regulations with respect thereto. A decision in the matter was deferred by the Commission until a future meeting. A copy of the resolution was furnished each Commissioner for study in the meantime.

Messrs. W. H. Tugman and Chet Goode, Eugene, appeared before the Commission with respect to Mr. Goode's application for a permit to transport a boat over state highways from Eugene to Mapleton, the overall dimensions being 12' wide, 65' long, and 13' high. They agreed to comply with all rules and regulations that the Highway Commission might make with respect to this movement and presented a letter from the Sheriff of Lane County offering the services of his department in safeguarding traffic during progress of the movement.

The Engineer pointed out that there are several structures on this section of highway that have restricted vertical clearance and there is a question whether the boat will pass through them. After considerable discussion the Commission voted unanimously to approve the granting of the permit in the event investigation reveals that clearances are satisfactory and provided further that Mr. Goode will furnish public liability insurance in the amount of \$50,000/100,000 and property damage insurance in the amount of \$10,000, protecting the state and the State Highway Commission in the event of accidents and, provided further, that the movement is accompanied by at least one State Police Officer and by at least two deputy sheriffs to safeguard other traffic, it being understood that Mr. Goode would make the necessary arrangements for the police escort. The Engineer was instructed to investigate the clearances.

Mr. James Morrell, representing Consolidated Freightways, was present and requested permission to operate over The Dalles-California Highway between the California State Line and Klamath Falls, and over the Pacific Highway between the California State Line and Medford, freight-hauling equipment having an overall height of 12' 6", and to operate over other state highways, equipment having an overall height of 12'. The Attorney advised that the Commission has legal authority to issue continuous permits up to a maximum height of 12' 6", if it so desires. After discussion the Commission approved the granting of the permits requested if investigation reveals that vertical clearances of bridges and other overhead facilities are satisfactory.

Mr. Elmo Smith, Mayor of Ontario, was present and discussed with the Commission the city's proposal for rerouting the Old Oregon Trail through the city of Ontario from Oregon Street to First Street, and inquired as to the possibility of securing such change this year. The Engineer advised that it would cost about \$34,000 to improve First Street, using an oiled pavement, and that it would cost about \$80,000 if the pavement were constructed of Portland cement concrete. Chairman Cabell advised the status of the Commission's funds and stated that the outlook for performance of this work this summer is not very promising but the change appears to be a good one and, if the Commission cannot finance it this year, it will probably be included as a priority project in next year's program, if the Commission has funds available at that time. He added that the Commission will consider it for this year's construction if funds can be spared. Chairman Cabell's remarks were endorsed by Commissioners Clough and Oliver. The Secretary was instructed to forward to Mr. Smith a copy of the Engineer's estimate based upon the use of the oil type pavement.

At 3:00 p. m. Chairman Cabell announced the following awards of contracts, bids for which were taken on the previous day, such awards having been previously approved by the Commission by unanimous vote:

"Dixie Summit Section of the John Day Highway, in Grant County. 5.10 miles grading and 2.23 miles bituminous macadam surfacing. Leonard & Slate, Multnomah, submitted the low bid for this work, in the amount of \$161,540.00. Max J. Kuney Company, Spokane, Washington, submitted the next-low bid in the amount of \$164,783.00. There were six higher bidders. The Commission awards this contract to the low bidders, Leonard & Slate, at their bid of \$161,540.00.

"Vance Creek-Soda Mountain Section of the John Day-Burns Highway, in Grant County. 4.02 miles grading and 18.02 miles surfacing and oiling. Babler Bros., Portland, were the low bidders with their bid of \$120,788.00. Morris Bros., Burlington, Washington, submitted the next-low bid, in the amount of \$127,798.50. There were three higher bidders. The Commission has awarded this contract to the low bidders, Babler Bros., at their bid of \$120,788.00.

"Vandehey and Van Dyke Sections of Nehalem Secondary Highway, in Washington County. 1.08 miles grading, surfacing, and oiling. Gales Creek Sand & Gravel Co., Forest Grove, were the low bidders for this work with their bid of \$23,447.00, based on the use of tar. They did not submit a bid using asphalt. C. J. Eldon, Portland, was the second-low bidder, with his bid of \$27,776.00, based on the use of asphalt, and \$27,741.00, using tar. There was one higher bidder. The Commission awards this contract to the Gales Creek Sand & Gravel Company at their low bid of \$23,447.00, using tar.

"Taylor Creek Section of the Ochoco Highway, in Wheeler County. 0.80 mile grading. M. L. O'Neil & Son, Stanfield, were the low bidders for this work with their bid of \$52,940.00. Leonard & Slate, Multnomah, were the second-low bidders with their bid of \$58,130.00. There were nine higher bidders. The Commission awards this contract to the low bidders, M. L. O'Neil & Son, at their bid of \$52,940.00."

Chairman Cabell also announced the awards of the following contracts, bids for which were taken at the morning session, such awards having been previously approved by the Commission by unanimous vote:

"Clackamas Grade Separation Project on the Cascade Secondary Highway, in Clackamas County. Six bids were received for this project, the low one being that of Frank Watt Construction Company, Portland, in the amount of \$25,954.00, and the second-low being that of Birkemeier & Saremal, Portland, at \$26,954.00. The Commission awards the contract to Frank Watt Construction Company at its low bid of \$25,954.00.

"Long Creek-Fox Section of the Pendleton-John Day Highway, in Grant County. 9.18 miles grading, surfacing and oiling; also construction of two concrete bridges. A. Milne, Portland, submitted the low bid in the amount of \$115,600.80 and E. C. Hall Company, Eugene, submitted the second-low bid in the amount of \$126,318.00. There were two higher bidders. The Commission awards the contract to A. Milne at his low bid of \$115,600.80.

"Warner Summit-Camas Creek Section of the Warner Secondary Highway, in Lake County. 4.07 miles surfacing and oiling. No bids were received on this project.

"Miner Creek-Spencer Creek Section of the Oregon Coast Highway, in Lincoln County. 1.17 miles grading. The low bid for this project was submitted by Berke Bros., Portland, at \$56,303.00. The second-low bid was submitted by A. C. Greenwood Company, Inc., Portland, at \$63,065.00. There were nine higher bidders. The Commission has referred all bids received for this project to the Engineer with power to award the contract to the low bidder when certain conditions have been satisfied.

"Cow Hollow Creek-Adrian Junction Section of the Vale-Adrian County Road, in Malheur County. 0.25 mile grading and 6.01 miles surfacing and oiling; also construction of a concrete bridge. No bids were received for this project.

"Placing new expansion plates on the Interstate Bridge, in Multnomah County. Two bids were received for this project, the low one being that of Birkemeier & Saremal, Portland, at \$7,770.00, and the other bid being that of Curtis Gardner, Portland, at \$12,994.00. The Commission awards the contract to Birkemeier & Saremal at their low bid of \$7,770.00.

"Onion Flat Section of the Pacific Highway West, in Washington County. 0.76 mile grading and paving. Five bids were received for this project, the low one being that of Roy L. Houck, Salem, at \$45,329.00, and the second-low being that of Berke Bros., Portland, at \$45,605.50. The Commission has referred all bids received for this project to the Engineer with power to award the contract to the low bidder when certain conditions have been satisfied.

"Reconstruction of timber approaches and timber deck to steel span over the Yamhill River on the Three Mile Lane Secondary Highway, in Yamhill County. J. F. Johnston, Newberg, submitted the low bid in the amount of \$26,684.50, and Frank Watt Construction Company, Portland, submitted the second-low bid in the amount of \$26,746.00. There were eight higher bidders. The Commission awards the contract to J. F. Johnston at his low bid of \$26,684.50."

The County Court of Linn County, represented by County Judge J. J. Barrett and County Commissioner H. A. Renninger and County Engineer Walter

W. Larsen was present. They advised that the Santiam River Bridge on the spur road leading from the Santiam Highway to Cascadia State Park is in a bad state of repair and asked the Commission to assume jurisdiction over this bridge in view of the fact that the Commission has recently acquired the state park there and this bridge is the only means of access to the park. The Engineer advised that the road from the highway to the park is only about 600 ft. long, and gave as his thought that it should be under state control. He suggested the designation of the road as a state secondary highway. The Commission approved the suggestion subject to the condition that the County Court will make proper application for such designation. The Engineer was instructed to have the bridge inspected to ascertain just what is needed to put it in proper condition.

Judge Barrett then inquired whether or not the Commission intends to spend any money this year for the improvement of farm-to-market roads. He was informed that due to the limited amount of federal aid secondary highway funds available to the Commission and the fact that such funds must be distributed to the counties of the state in an equitable manner, it has not been possible to allocate any of them this year to Linn County, and the best the Commission can do is to consider Linn County's needs in the allocation of the next allotment of such funds. Judge Barrett advised that the County's first choice for improvements under this program is the Albany-Brownsville Road. The Commission agreed to bear this project in mind and to ascertain whether or not it is eligible for the funds under discussion.

Improvement of the Shady Hill Section of the Santiam Highway was also discussed briefly and the County Court was informed of the Commission's plans in regard thereto.

Judge Barrett asked the Commission to grant a Mr. Ford Harvey permission to transport piling 42' long over the South Santiam Highway, which piling is to be used in county bridge construction. He said the overall length of the piling and equipment would not exceed 60', and that there would be only a few loads. The Commission authorized the granting of the permit.

Mr. Roman Kintz and his Attorney, Fred Williams, Salem, came before the Commission in regard to the renewal of Mr. Kintz' lease of state-owned property at the entrance to Silver Creek Falls State Park. Mr. Williams explained that Mr. Kintz has a five-year lease on this property from the previous owner, which lease expires in June, 1941, and that he would like to have this privilege renewed by the state for another five-year period. He also explained that Mr. Kintz conducts a soft drink and lunch business on the premises and that the Marion County Court has declared that such business is a public necessity and convenience. The Commission deferred a decision in the matter pending consultation with the State Parks Superintendent and the formulation of a policy with respect to the sale of a concession in this state park.

The Commission discussed a letter from the City Attorney of Albany relative to state maintenance of city streets over which logs are transported.

The City Attorney advised that logging traffic is seriously damaging their city streets and the city is without funds to maintain them and believes that such maintenance work is an obligation of the State. The Engineer advised that similar situations exist in Lebanon and in Canby. He suggested the adoption of a policy by the Commission which would permit maintenance of such logging routes within cities by the state at state expense, the arrangements to be covered by written agreement between the state and the city concerned. He further suggested that it might be advisable for the Commission to assume full responsibility for maintenance of city streets, outside of Portland, over which general trucking operations are carried on. The Commission deferred a decision in the matter; however, indicated that the suggestions were well worth considering. As to the situation in Albany, the Commission instructed the Engineer to inform the City Attorney that the problem is now being considered by the Commission, but decision cannot be reached until the Commission has had an opportunity to discuss it from a statewide standpoint. The Engineer was also instructed to investigate the condition of the old highway route in Albany and to make repairs as may be necessary to the same, in the event investigation reveals that it is the state's obligation.

The Engineer reported on the request of the City of Hood River for the rerouting of the Hood River Secondary Highway within the Hood River city limits, as follows:

Beginning at the intersection of 12th Street and May Street, thence west a distance of one block to 13th Street, thence north along 13th Street to Oak Street, the present route of the Columbia River Highway.

The Engineer advised that the proposed routing has been investigated and it was found that the adoption of the same will eliminate two right-angle turns in the present route, which intersects the Columbia River Highway at 9th Street. Furthermore the proposed route will avoid two schools and will provide a much easier grade for traffic and is on a wider paved street that is improved with penetration type macadam in excellent condition. He recommended approval of the change. After discussion the Commission approved the recommendation and thereupon, by unanimous vote, adopted the following resolution in regard thereto:

WHEREAS, the Highway Commission is authorized and directed whenever the route of a state highway passes through the corporate limits of any incorporated city or town to select and designate the street or streets of such city or town over which said highway shall be routed, and the Commission is given authority to alter or change such routing whenever in its opinion the interests of the motoring public will be better served; and

WHEREAS, the Commission has heretofore routed the Hood River Secondary Highway from the point where said highway enters the city at or near the terminus of 12th Street over the following streets: 12th Street from the city limits to Eugene Street, thence

over Eugene Street to 9th Street, thence over 9th Street to Oak Street; and

WHEREAS, the municipal authorities of the City of Hood River have requested that said routing be changed so that the streets selected shall be 12th Street to May Street, thence over May Street to 13th Street, thence over 13th Street to Oak Street; and

WHEREAS, it is the judgment and opinion of the Commission that the request and application of the municipal authorities of Hood River can be granted without in any way interfering with the interests of the motoring public;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Commission, all members being present and affirmatively voting, as follows:

1. That Hood River Secondary Highway from the point where said highway enters the city limits of Hood River shall be routed over the following streets: 12th Street from the city boundary to May Street, May Street to 13th Street, and 13th Street to Oak Street.

2. That from and after the adoption of this resolution the following streets shall no longer be deemed a part of the route of the Hood River Secondary Highway within the corporate limits of the City of Hood River, to wit: 12th Street from May Street to Eugene Street, Eugene Street from 12th Street to 9th Street and 9th Street from Eugene Street to Oak Street, and that said last named streets, or sections thereof, shall no longer be a part of the route of said Hood River Secondary Highway but said streets, or sections thereof, shall be and hereby are released and surrendered back to the jurisdiction of the municipal authorities of the City of Hood River.

3. That the Engineer be instructed to erect the necessary and appropriate signs along said newly designated route so that the traveling public may be properly advised with respect to said route.

4. That this resolution be entered in the minutes and records of the Commission and a duly certified copy thereof delivered to the municipal authorities of the City of Hood River and a duly certified copy thereof delivered to the Public Roads Administration.

The Engineer reported on the application of the Nehalem Telegraph and Telephone Company to construct a telephone pole line along the west side of the Oregon Coast Highway in the vicinity of Brighton. He said that Division Engineer F. D. Eason and Landscape Engineer George Otten made a careful

inspection of the premises and it is their recommendation that the application be denied because the existence of the poles and telephone facilities on the ocean side of the highway will interfere with the scenic view, and for the further reason that it is possible for the company to arrange for the joint use of poles with either the Mountain States Power Company, on the easterly side of the highway, or with the Western Union Telegraph Company, which now maintains a pole line on the Southern Pacific Railroad right of way. In the event that such arrangements could not be effected, the Telephone Company could install an inexpensive underground cable on the westerly side of the highway for the limited service required in the Brighton area. After discussion, the Commission decided not to grant the permit, and ordered the removal of the telephone poles already installed on the westerly side of the highway that are not now covered by permit from the State Highway Department.

A letter was presented from Mr. Howard Merriam, President, Oregon Pacific Highway Association, suggesting, in view of the fact that the 1941 Legislature voted down a bill which provided that a portion of the highway funds should be set aside for the improvement of city streets, that it might be advisable for the Commission to investigate the matter of maintenance of city streets other than state highway routes. The Commission approved the suggestion, and authorized the Engineer to make such investigation and to hire a special man for this work, if necessary.

Mr. Gordon H. Smith, Umatilla, Oregon, was present in regard to settlement for right of way needed for the Boardman-Stanfield Highway, near Stanfield. Mr. Smith stated that he has been offered \$800.00 for his property, but he is not inclined to settle on such basis because the construction of the highway in the proposed location will render valueless from a hunting standpoint a certain duck lake that he owns and from which he derives considerable annual income in rentals. He said that he acquired this property principally on account of the duck lake, which he considers more valuable than the adjacent land. He asked the Commission to pay him the sum of \$1,600, which is the amount of the Federal Land Bank's mortgage against the property, and \$1,000 as damages for the loss of his income from the duck lake, or, he said, he would accept the sum of \$4,000 for his entire holdings consisting of about 160 acres. The matter was discussed at considerable length but no decision was reached, the Commission desiring to give the matter further study.

The Engineer reported that the State of Idaho would like to have two roads in the State of Oregon placed on the Federal Secondary Highway System so they can be improved with federal funds to a standard comparable with connecting roads in the State of Idaho. He advised that the roads in question are in Malheur County, but are located on the east side of the Snake River, the Idaho-Oregon boundary line being east of the Snake River at this particular point. The Commission deferred action on this matter; however, instructed the Engineer to inform the Idaho authorities that the Commission will give the matter consideration.

The Attorney brought up for discussion the matter of granting right of access to the Wolf Creek Highway. He read aloud the provisions of a form of resolution prepared with respect thereto. After discussion, the Commission by unanimous vote adopted said resolution, as follows:

WHEREAS, there has heretofore been definitely located and established a route over which to construct and thereafter maintain a state highway, which highway has been designated as State Highway No. 47, and is otherwise known as the Wolf Creek Highway, the western terminus of which is at the intersection of said highway with the Oregon Coast Highway at Cannon Beach Junction, and the eastern terminus of which is at the intersection of said highway with the Pacific Highway West at Fourth Avenue and Jefferson Street in Portland, Oregon; and

WHEREAS, the section of said highway extending from Cannon Beach Junction to Sunset Camp has been constructed and is now in general use, and the section of said highway extending from Sunset Camp to the eastern terminus of said highway at Portland is now under consideration for construction in the immediate future, and therefore necessary rights of way for the same must be acquired at the earliest possible date; and

WHEREAS, it is the judgment of the Commission that the type, character and volume of traffic which will use said highway when completed warrant and make necessary the acquisition of a wide right of way and make advisable and necessary as well the acquisition not only of title in fee simple to the real property needed for right of way purposes but the acquisition of all rights of access from abutting properties to said highway so that the Commission may control the points at which traffic may leave said highway and the points at which traffic may enter said highway; and

WHEREAS, in order to provide sufficient land for the proper and adequate construction and maintenance of said highway and for appropriate and proper landscape and roadside development it is necessary that with respect to a portion of said highway the right of way shall be not less than two hundred feet in width and over other portions of said highway the right of way shall be not less than one hundred feet in width, with in each instance necessary additional widths for embankment and cut slopes and other highway purposes; and

WHEREAS, the estimated cost of the construction of said highway, including rights of way, is \$9,500,000.00, and, therefore, because of the large amount of motorists' money which will be invested in said highway, it is the judgment of the Commission that a right of way of the widths hereinafter fixed should be acquired for the construction and maintenance thereover of said Wolf Creek Highway and that there should be acquired also all rights of access thereto; and

WHEREAS, one of the main purposes governing the location and construction of said highway is to make available to the motoring public a fast, safe, convenient and practicable short route from valley points to ocean beaches, and unless public authorities having jurisdiction over said highway can control access to and from the same, a large portion of the value of the highway will be destroyed by the construction, maintenance and operation of all sorts of small commercial activities of various types and designs on abutting properties, thus resulting in a destruction of the beauty and value of said highway.

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Commission, all members being present and affirmatively voting, as follows:

1. The Commission does hereby find and declare that with respect to the portion of the Wolf Creek Highway lying between the Barnes Road and the Wilson River Highway junction the minimum width of right of way procured shall be two hundred feet with such additional widths as may be necessary to provide for cuts, fills and other highway purposes, and that the section of said Wolf Creek Highway from its junction with the Wilson River Highway to the westerly terminus thereof shall have a minimum right of way width of not less than one hundred feet, plus such additional widths as may be necessary to provide for cuts, fills, borrow and other highway purposes.

2. The Commission does further find and declare that said established minimum widths of rights of way shall prevail throughout the entire length of said highway except at such places where the Commission may by order approve and establish a lesser width.

3. The Commission does further find and declare that the existing and potential volume of traffic which will use said highway and the purposes for which said highway will be used when completed make necessary the acquisition of a right of way of such width throughout the entire length of the same and make necessary also certain additional widths at appropriate places for borrow, for embankment and for slope purposes.

4. The Commission does further find and declare that, in order to make available to the traveling public the maximum degree of safety, convenience and accommodation and in order to make possible proper and adequate landscaping and roadside development, it is necessary that there be acquired, along with title in fee simple to the real properties needed for right of way purposes, all rights of access from abutting properties to said highway so that the Commission may for the convenience, safety and accommodation of the traveling public control the points of access from abutting properties to said highway and the points at which traffic may leave said highway to reach abutting properties or to reach connecting roads.

5. The Commission does further find and declare that for the purposes herein stated the acquisition of title in fee simple to the real properties required in connection with the location and construction of said highway and the acquisition of all rights of access from abutting properties to the properties acquired for right of way purposes is necessary for the proper construction, maintenance and use of said highway, for the control of access thereto, and for proper and appropriate landscaping and roadside development.

6. The Commission does hereby order and direct the Engineer to properly survey, locate and mark upon the ground by permanent monuments the limits and boundaries of said right of way and the limits and boundaries of real properties necessary for the purposes announced and declared in this resolution, and said Engineer is further authorized and instructed to prepare appropriate and correct descriptions of all of the real properties needed for the purposes herein set forth and to furnish the Commission's Chief Counsel with correct copies thereof.

7. The Commission does further order and direct its Chief Counsel to negotiate with the owners of the several parcels of real property required for the purposes herein set forth and to take appropriate options or offers for which such real properties can be purchased, together with all rights of access thereto, and to submit such options or offers to the Commission for approval.

The State Parks Superintendent was present and reported on the following matters:

Acquisition of property to protect the Rogue River bridgeheads at Gold Beach:- He estimated that it would cost about \$16,000 to purchase the necessary property, which is owned by Collier H. Buffington, Lawyer, Gold Beach, and gave as his thought that the expenditure is not justified. The Commission decided not to buy this property.

Use of federal aid funds to finance acquisition of wayside strips:- Mr. Boardman inquired as to whether or not the rules and regulations have as yet been received for the use of federal funds for purchases of this kind. He was informed by W. H. Lynch, District Engineer, Public Roads Administration, that the rules have not yet been received.

Superintendent Boardman then requested instructions relative to the purchase of timber strips along the Salmon River Highway from the Miami Corporation, involving an expenditure of \$23,800. He recalled that the Commission previously agreed to use state funds for this purpose if it were impossible to secure the federal funds within a reasonable length of time. The Commission confirmed such action provided an extension of time to complete the purchase, using federal funds, will not be granted by the Miami Corporation. The Attorney was instructed to assure the Miami Corporation, by letter, that the Highway Commission will purchase these wayside strips, using state funds, if approval of the expenditure of federal funds for this purpose cannot be obtained.

Concession at Silver Falls State Park:- The Parks Superintendent recommended denial of the request of Mr. Roman Kintz for the renewal of his lease of state property at the entrance to the South Falls, because, he said, the business conducted by Mr. Kintz is principally the sale of beer, which detracts from the park. He pointed out that the concession house that is now being constructed in the park will be completed about June 1st, and gave as his thought that the public could be served by a concession in this building very satisfactorily. He recommended the advertising for bids for the purchase of this concession, and that it be awarded to the highest bidder therefor. The Commission deferred action on the matter pending inspection of the park.

In this connection the Parks Superintendent suggested that it would be appropriate to install in this park two bronze plaques, one honoring the C.C.C. veterans who constructed the building, and the other honoring Mr. Elmer Bankus of Brookings, who donated the myrtlewood from which the furniture in the buildings was constructed. Action on this matter was also deferred by the Commission pending adoption of a policy with respect thereto.

Del Rogue tract at Grants Pass:- The Parks Superintendent advised that when the Pacific Highway was reconstructed south of Grants Pass the county donated to the state for park purposes a certain tract situate about four miles south of the city, which tract has not yet been developed. The county, he said, would like to develop this property, and has asked that it be deeded back to the county for park purposes. The Commission approved the request subject to the condition that the property be held for general public use.

N.Y.A. Camp on Camas Mountain, in Douglas County:- The Parks Superintendent advised that the Forestry Department at Oregon State College is sponsoring a National Youth Administration project and would like to institute such a project in the state park on Camas Mountain adjacent to the Coos Bay-Roseburg Highway. He said that they will establish their own camp and do everything in connection with it; furthermore, the development work that is done will be in conformance with the state's plans for this park. The state's sole obligation, he said, would be to furnish certain materials costing about \$150.00. He recommended approval of the project. The Commission approved the recommendation as a trial proposition.

Addition to the State Park at The Cove, in Jefferson County:- The Parks Superintendent recommended the purchase of a 40-acre tract from the Pacific Power and Light Company, for which the owners are asking \$3.75 per acre, which is 75 cents more per acre than the Commission has authorized for payment of land at this location. The Commission approved the purchase and referred the matter to the Attorney to negotiate with the Power Company on the basis of paying not in excess of \$3.00 per acre for this land.

Purchase of the Mead-Gantenbren property adjacent to the Upper Columbia River Highway, near Shell Rock Mountain, in Hood River County:- The Parks Superintendent advised that, as previously instructed by the Commission, he has investigated this property and finds that it will fit in very nicely in the state park program; that the tract contains ninety-three acres lying between the Bonneville Power Administration right of way and the Columbia River, exclusive of the railroad right of way, and is owned by four different people. It was his thought that the purchase of the tract would be quite costly. After discussion the Commission decided not to purchase the tract at this time; however, agreed to reconsider the matter later when an additional appropriation is made for the purchase of land for parks.

Timbered wayside strips along the Tiller-Trail Secondary Highway:- The Parks Superintendent reported receipt of a letter recommending that the state purchase strips along this highway so as to prevent the removal of timber standing thereon, it being pointed out that extensive logging operations are now under way in this

vicinity and it will not be long before the timber along the highway is cut. The Commission deferred action on the matter pending inspection of the premises by Commissioner Clough and the Parks Superintendent.

Warrior Rock at St. Helens:- The Parks Superintendent requested instructions relative to the acquisition of an island known as "Warrior Rock", located in the Columbia River opposite the town of St. Helens, containing $1\frac{1}{2}$ acres. The Commission decided not to acquire this tract.

Cooperation with Lincoln County in the purchase of the Spruce Production Railroad right of way:- The Parks Superintendent advised that Lincoln County is acquiring a considerable portion of the old Spruce Production Railroad's right of way, for which the county is paying \$500.00, and the county feels that the state should contribute \$100.00 toward the expense, in view of the fact that a portion of the right of way lies within the boundaries of a 40-acre tract that the county deeded the state free of cost as a wood lot. He gave as his thought that it is only fair that the state should pay a share of the expense involved. The Commission instructed the Parks Superintendent to discuss the matter with County Judge Gilkey.

C.C.C. Camp operations:- The Parks Superintendent reported that only two C.C.C. camps have been allotted to the State of Oregon for the coming summer, being those at Short Sand Beach and at Silver Creek Falls. The Commission took no action on this matter.

The Commission considered and signed agreements, et cetera, as follows:

Agreement with United States Bureau of Reclamation providing for an irrigation canal encroachment across the Old Oregon Trail, in Umatilla County.

Agreement with Bonneville Power Administration covering power line construction on the Pendleton-Cold Springs Highway, in Umatilla County.

Agreement with Bonneville Power Administration covering location of transmission power pole line on the Columbia River Highway, in Multnomah County.

Agreement with the Northern Pacific Railway Company for slope encroachment on the Lower Columbia River Highway, at St. Helens.

Agreement with Sunset Logging Company granting the Company an easement for the construction, operation, and maintenance of a truck logging road over and upon state-owned property described as the north one-half ($N\frac{1}{2}$) of the southwest quarter ($SW\frac{1}{4}$) of Section 2, Township 3 North, Range 6 West, W. M., Tillamook County.

There being no further business to come before the Commission at this time the meeting was adjourned at 5:15 p. m.

R. H. Baldock
State Highway Engineer

H. B. Glaisyer
Secretary

Henry F. Cabell
Chairman

Huron W. Clough
Commissioner

Herman Oliver
Commissioner

Portland, Oregon, May 8, 1941

The State Highway Commission met in regular session at 9:00 a. m. in the auditorium of the Public Service Building. Present were:

Huron W. Clough, Acting Chairman
Herman Oliver, Commissioner
R. H. Baldock, State Highway Engineer
H. B. Glaisyer, Secretary

Chairman Cabell was absent due to attendance at the special committee meeting of the American Association of State Highway Officials in Chicago, Illinois.

Bids, as follows, for highway construction work, and for the sale of buildings at Glenwood, were opened and read in conformance with previously published notice, following which Commissioner Clough announced that the award of contracts would be made at 3:00 p. m. in the same room:

Mr. Don Peoples, Secretary of the Bend Chamber of Commerce, was present and inquired when the Commission contemplates inspecting the Warm Springs Highway. He was informed that a date has not as yet been set for such inspection, but that he will be advised when it is set.

Mr. Paul B. Rynning, County Engineer of Jackson County, was present representing the Jackson County Court. He asked the Commission to widen and straighten the Crater Lake Highway, between Prospect and Trail, and to eliminate the curve at a place known as Agate Station. The Engineer advised that to widen the curves between Prospect and Trail would cost about \$30,000. He recommended the budgeting of such amount for this purpose, together with additional sums for widening sharp curves at other points on this highway, and that the work be contracted this coming fall and, in the meantime, that the present road be maintained as well as possible under the existing conditions. The Commission approved the recommendation.

The Commission instructed the Engineer to investigate the curve mentioned by Mr. Rynning at Agate Station to ascertain what is necessary to improve the conditions at this point, the idea being that the Commission would authorize the work if it is not too costly.

A delegation from Corvallis, representing the City Council, and consisting of Mayor H. W. Hand; Ralph P. Schindler, City Recorder; Mr. Beck, Park Superintendent; C. L. Willey, City Engineer, was present in regard to the improvement of North 9th Street (route of the Pacific Highway West). Mayor Hand

was spokesman. He alleged that the present pavement is too narrow for the large volume of traffic that uses this road and that the improvement is very important to the City of Corvallis, because the district through which the road extends is building up rapidly. The Engineer advised that to improve this highway to proper standards on the present 60-foot right of way would cost about \$30,000. He recommended the improvement as desirable, feasible, and economical, and that it be constructed as soon as funds are available. He questioned whether it would be possible to place the work under contract before 1942, although, in his estimation, it is a priority project and should be done this year if it can be financed. The Commission indicated a favorable attitude with respect to the project, but deferred definite action until its meeting on May 22, when Chairman Cabell will be present.

Mayor Hand also asked for the widening of the highway on Third Street, south from Adams Street to the Mary's River Bridge. He said that this street is quite wide north of Adams Street, but narrows down at Adams Street, producing a bottleneck condition. He urged the Commission to do the widening work as soon as possible and declared it to be the city's second priority choice of projects. The Engineer was instructed by the Commission to make a survey of the project and work up the plans for the same. He was also instructed to investigate the possibilities of ordering the parking of cars on only one side of the street, which might solve the city's problem as a temporary expedient.

The County Court of Tillamook County, represented by County Judge Harland M. Woods and County Commissioners E. H. Lindsey and E. G. Anderson, and County Engineer Stanley Coates, was present with respect to the Trask River Bridge approaches on the Fairview-Clements Corner County Road. The Engineer advised that it is proposed to reconstruct a section of this road as a federal aid secondary highway project, and that the plans for the project call for the replacement of a portion of the bridge approaches with a fill, which would necessitate the raising of the grade and probably the balance of the approaches, which are in bad condition. He further stated that no provision has been made in the budget for the reconstruction of the approaches; hence it would not be possible to use federal funds to finance the work, so, in view of the fact that this is a county road, the expense would have to be paid by the county. He estimated the cost at \$6,000, and suggested that the state advance the necessary funds provided the county will reimburse the state later on by assigning a portion of its share of the state gasoline tax funds. Judge Woods advised that it would not be possible for the county to pay for the work this year. After discussion, the Commission agreed to include the approach work in the contract for construction of the balance of the road and to advance the funds to pay the cost thereof, if the county will reimburse the state in 1942 by assignment of its share of the gasoline tax funds, \$3,000 to be paid in June, 1942, and the balance to be paid when the Secretary of State makes the final distribution of such funds. The Commission ordered the matter covered by appropriate agreement and authorized the Engineer to advertise the project for bids to be received at the June meeting of the Commission.

The County Court then inquired as to the possibilities of opening the Wilson River Highway to traffic throughout its entire length between Tillamook and Glenwood at an early date. The Engineer recommended against such proposal because it would interfere with construction operations, and said it is hoped that the highway can be opened by September 15. The Commission approved the recommendation; however, informed the County Court that traffic would be allowed to use the highway before that time if at all possible.

Commissioner Lindsey also brought up for discussion the matter of reconstruction of the twelve-mile section between Glenwood and Banks, where it connects with the Wolf Creek Highway, and was informed that the Commission considers it inadvisable to construct such section before the main highway between Banks and Portland has been completed and a study of traffic conditions has been made.

Mr. W. A. Lovelace, member of the Port of Umpqua Commission, was present in regard to the storage of logs in the Umpqua River at the south end of the Umpqua River Bridge, at Reedsport. He was accompanied by Messrs. C. A. Manschreck and Lawrence Lindquist, of Seattle, who are negotiating for the lease of some of the Port's property on the upstream side of the bridge and between the main channel of the Umpqua River and MacIntosh Slough, on which to conduct a sawmill business. Mr. Lovelace explained that the operators propose to store logs in MacIntosh Slough, and also in the river below the highway bridge, which are the only convenient places available, and in order to get the logs to the mill they will have to be pushed under the bridge through an opening between piers. Also, that it is proposed to cut the logs into shorter lengths and to store them temporarily in the river under the bridge and opposite the sawmill, for use as occasion demands. He asked the Commission to approve such arrangement. The Engineer advised that this matter was investigated on the ground by engineers of the Bridge Department and the Maintenance Department, who offer no objection to the use of the state's property for this purpose, provided the operators would assume all the responsibility for damage that might occur to the state's property, including the bridge. He recommended approval of the request, subject to the condition that the sawmill operators protect the bridge piers by the installation of fender piles as may be required, and that they furnish the state with a surety bond in the amount of \$1,000, as a guarantee for the repair of damage that may occur, and that the operators pay to the state a rental charge of \$100 per year for the first five years of operation, and \$50 per year thereafter for the use of the state's property. Mr. Lovelace assured the Commission that the Port of Umpqua Commission would assume the responsibility for any damage that might be done to the bridge. After discussion the Commission approved the granting of the permit as outlined by the Engineer, provided, in the opinion of the Engineer and the Attorney after further study, there is no objection from the state's standpoint. The Commission ordered the matter covered by written agreement, which is to be signed by the operators and then presented to the Commission for execution. The Engineer was thereupon instructed by the Commission to prepare plans as may be necessary to show what has to be done to protect the state's property.

The Engineer reported briefly the results of investigation made by Traffic Engineer John Beakey and Division Engineer K. D. Lytle of conditions at the intersection of the Pacific Highway and the Redwood Highway at Grants Pass concerning which a delegation, representing the Redwood Empire Association, is to appear before the Commission during the afternoon session. He said that Messrs. Beakey and Lytle met with members of the Redwood Empire Association at Grants Pass, and discussed thoroughly the matters complained of, and it is their recommendation that no change whatsoever be made in the highway as constructed, although they do recommend the installation of larger signs and better lights, as an accommodation to the traveling public. He said that he concurred in this recommendation. The Commission approved the recommendation and decided to discuss the matter with the delegation from that standpoint.

The Engineer reported that in connection with the Vollmer Creek line change, on the Wolf Creek Highway, in Clatsop County, it has been found that the present state highway is occupying certain land that is under lease to the City of Seaside for maintenance of the city's water pipe line, and that the city is insisting that the pipe line be re-established so as to avoid crossing the same with the highway. It was thought at first, he said, that the highway right of way easement was of longer standing than the pipe-line easement; however, a study of the facts reveals that assumption to be in error, and it is evident that the city has prior rights and is in a position to dictate a settlement. He further stated that after a conference with Aldermen Gray and Waterhouse, and City Attorney Irving C. Allen, of Seaside, it was agreed that the state would reconstruct the pipe line in the location desired by the city, and that the city would contribute the sum of \$500 toward the cost thereof, which is estimated at \$2,500. He pointed out that the cost to the state would really be only about \$700, because it would eliminate the necessity for the installation of 200 lineal feet of 42" half-round culvert, estimated to cost \$1,000, and extra right of way costing about \$300. The Commission considered this a good settlement, and thereupon approved the same.

The Engineer reported on the cost to surface Main Street (state highway route), in the town of Nyssa, Malheur County, full width between curbs, as has been requested by the City Council. He estimated that a B2 bituminous macadam surfacing would cost about \$31,500, and concrete pavement about \$45,000, both amounts including the cost of installing a storm sewer along this street, as has also been requested. He recommended construction of the concrete pavement, notwithstanding the extra cost involved, because it is through the business section of the town and would be much easier and less costly to maintain. He also recommended approval of the storm sewer construction, because investigation reveals that the Commission, during recent years, has approved such type of work in numerous localities throughout the state. He submitted a list of the towns in which the Commission has paid for this type of sewer construction. After discussion, the Commission approved the Engineer's recommendation unanimously, and agreed to do the work when there are funds available to finance it. It was decided to so inform the delegation from Nyssa, which is to appear before the Commission at this meeting.

The Engineer submitted a status report on the matter of securing relief from the payment of the \$1.00 fee that the National Park Service charges the motoring public for the privilege of passing through Crater Lake National Park, on the Crater Lake Highway, when the lake is not visited. He said that he wrote the Superintendent of the park, Mr. E. P. Leavitt, concerning this matter, and outlined to Mr. Leavitt the proposition authorized by the Commission at the previous meeting, and that reply has been received from Mr. Leavitt to the effect that he is submitting the matter to the National Park officials in Washington, D. C. for instructions. The Commission approved the report.

A request from the General Grocery Company, Portland, for the oiling or paving of the shoulders adjacent to The Dalles-California Highway, in front of its wholesale grocery building in Bend, had the attention of the Commission. The Engineer advised that investigation reveals that the building is in a district that was not built up when the highway was first constructed, and consisted simply of vacant lots; however, since that time, considerable development has taken place, and the district is now built up with warehouses and tourist camps, so it really needs a full width pavement. To oil or pave the area in front of the General Grocery Company property, he said, would not be very costly in itself, however, if such work were undertaken, it would invite requests from the other property owners, which in fairness could not be denied, so the ultimate expense would be a considerable sum. He recommended that the company's request be denied as a matter of policy, until such time as the Commission is financially able to undertake the entire project. The Commission approved the recommendation.

The Engineer reported the cost to oil private driveways and road approaches to the Pacific Highway and the Old Oregon Trail. He estimated the cost to oil such roadways along the Pacific Highway at \$121,747, and along the Old Oregon Trail at \$55,208. He recommended approval of such oiling work on all state highways as funds are available to pay the costs involved, and when the state's oiling crews are available to do the work. He also recommended that hereafter, when contracts are awarded for oiling work, the oiling of all approach roads up to the edge of the highway right of way be included in the contracts. The Commission considered that the oiling of public and private road approaches to state highways is highly desirable from the state's standpoint and, accordingly, approved the Engineer's recommendation with respect thereto. The Engineer was thereupon authorized to oil such road approaches now existing, as soon as oiling crews are available to do the work.

The Commission adjourned at 12:00 noon, and reconvened at 1:30 p.m. in the same room with the same persons present and participating.

The Commission discussed with Messrs. James Dimitre and (name unknown) representing the Dimitre Electric Company of Portland, the low bid submitted by them at the morning session for the installation of a traffic signal system in Klamath Falls. They were informed that inspection of the bid reveals that it was not signed by any representative of the Company so, as a matter of policy, the Commission had no alternative but to disqualify it. The bid was

submitted for inspection and verification of this statement. Regrets were expressed by the Commission that the bid could not be considered.

A delegation representing the Redwood Empire Association, and headed by Mr. C. H. Demaray of Grants Pass, President, was present and requested certain revisions in the Redwood Highway at its intersection with the Pacific Highway at Grants Pass. Others in the delegation were Mr. Pete Fredrickson, County Commissioner of Josephine County, Oregon; Earl Smith, Chas. Cooley, A. J. Draws, Louis Hammer, Wm. A. Brown, and Wilford Allen, Jr., all of Grants Pass; A. R. Trombley, Portland, representing the Portland Chamber of Commerce; Art Luce, President, Cave City Chamber of Commerce; Clyde Edmondson, Manager of the Redwood Empire Association, San Francisco; and the following supervisors of the Association from California: Dewey Mean, John McGowan, Alfred Roncovieri, of San Francisco; Duane Bittenbender and Walter Severance, of Mendocino County. Mr. Demaray introduced County Commissioner Fredrickson, who presented the opening remarks on behalf of the delegation and introduced the speakers. The following improvements were requested:

Removal of the traffic island at the apex of the intersection

Filling in of the dip on the Redwood Highway leg, and paving this section full 22-ft. width with cement concrete pavement

Paint traffic stripe on center of the Redwood Highway leg, so as to make this section comparable in all respects to the Pacific Highway leg, and to provide two-way traffic

Transfer traffic signs from the present location in apex island to the next adjoining island, and install two new, large reflectorized directional markers on each side of said sign, one pointing right and bearing the words "Redwood Empire", and the other pointing left and bearing the words "Shasta Cascade"

Change the wording on the existing sign, as follows: Eliminate the name "Kerby" and substitute "San Francisco, 461 Miles"

They also asked that the following wording be added to the large sign now being maintained on the Pacific Highway at Goshen:

On the left side of the sign add "Crater Lake, Shasta Cascade", with an arrow pointing to the left, and on the right side of the sign add "Redwood Empire, Shasta Cascade", with an arrow pointing to the right.

Speaking on behalf of the proposed improvements were Messrs. Demaray, Fredrickson, Edmondson, Smith, Cooley, Allen, Hammer, Trombley, Roncovieri, Mead, McGowan, Bittenbender, Luce, and Brown. Mr. Edmondson filed with the Commission a brief in support of their oral arguments, together with photographs and map. Mr. Smith filed a petition signed by numerous residents of Grants Pass and vicinity urging such improvements.

Acting Chairman Clough thanked the delegation for its appearance, and advised that the Commission will give their request honest study and will authorize the changes if, in its best judgment, that appears the thing to do. The Commission thereupon referred the matter to the Engineer for investigation and report.

The Gresham Chamber of Commerce, represented by Messrs. E. R. Wright, A. Dewartt, F. J. Becker, Earl Abbott, E. P. Christensen, and Howard Kelley, was present in the interests of the Mount Hood Highway (Powell Valley Road), between Portland and Gresham. Mr. Wright headed the group. He urged the Commission to reconstruct this highway and particularly to eliminate sharp curvature at the following points: Metzger Corner, Lindeman Station, and at the Six Mile Poultry Farm. Speaking on behalf of this project were Messrs. Wright, Dewartt, Abbott, and Kelley. Mr. Kelley alleged that traffic has greatly increased on Powell Boulevard since the traffic island was installed at the east end of the Ross Island Bridge, and gave that as an argument in favor of the improvement of this thoroughfare. The Commission deferred a decision in this matter until Chairman Cabell is present.

At 3:00 p. m. the State Highway Engineer, at the request of the Acting Chairman, announced the following awards of contracts and sale of buildings, bids for which were taken at the morning session, such awards having been previously approved by the unanimous vote of the Commissioners present:

"Placing pier protection for swing span pier for the bridge over the Willamette River at Corvallis, on the Corvallis-Easide Highway, in Benton County. Babler Bros., Portland, submitted the low bid for this work, in the amount of \$7,025.00. J. F. Johnston, Newberg, submitted the next-low bid, in the amount of \$7,150.00. There were three higher bidders. This contract is awarded by the Commission to the low bidders, Babler Bros., at their low bid of \$7,025.00.

"Clackamas Overcrossing Section of the Cascade Secondary Highway, in Clackamas County. 0.91 mile grading and paving, and construction of two timber bridges. Roy L. Houck, Salem, submitted the low bid for this work, in the amount of \$97,016.00. Leonard & Slate, Multnomah, submitted the second-low bid, in the amount of \$97,342.20. There were six higher bidders. This contract is awarded to Roy L. Houck, the low bidder, at his bid of \$97,016.00.

"Dee-Woodworth Acres Section of the Hood River Secondary Highway, in Hood River County. 1.95 miles grading and 3.15 miles surfacing and oiling. No bids having been received for this project, it is hereby ordered readvertised.

"Josephine County Line-Central Point Section of the Pacific Highway, in Jackson County. 20.33 miles pavement widening and non-skid oiling. J. C. Compton, McMinnville, submitted the low bid for this work, in the amount of \$18,863.20. The next-low bid was submitted by Norris Bros., Burlington, Washington, in the amount of

\$19,064.45. There were two higher bidders. The Commission awards this contract to J. C. Compton, at his low bid of \$18,863.20.

"Installation of a flexible progressive traffic signal system in the City of Klamath Falls, Klamath County. The Dimitre Electric Co., Portland, submitted the low bid for this work, in the amount of \$15,474. However, inspection of the bid disclosed that it was not signed by any representative of the company, and the bid was therefore disqualified. Trowbridge & Flynn Electric Co., Medford, submitted the next-low bid, in the amount of \$15,703.00, and Bosler Electric Co., Salem, submitted the third-low bid, in the amount of \$15,999.00. There were four higher bidders. Inasmuch as the low bid of the Dimitre Electric Company was disqualified, the Commission awards this contract to Trowbridge & Flynn Electric Company, the second-low bidder, at its bid of \$15,703.00.

"Rock Creek-Benton County Line Section of the Alsea Highway, in Lincoln County. 2.4 miles grading, surfacing and bituminous macadam. Only two bids were received for this project, the low one being that of E. L. Gates, Packwood, Washington, in the amount of \$68,164.00; the other being that of C. J. Eldon, Portland, in the amount of \$93,348. The Commission refers both bids received for this work to the Engineer with power to award the contract to the low bidder E. L. Gates, when certain conditions have been fulfilled.

"Canyon Creek-Bryant Hill Section of the Santiam Highway, in Linn County. 3.33 miles grading, surfacing and bituminous macadam. Leonard and Slate, Multnomah, submitted the low bid for this work, in the amount of \$136,542.50, using tar. They did not submit a bid based on the use of asphalt. E. C. Hall Company, Eugene, submitted the second-low and only other bid, in the amount of \$149,761.00, using tar, and \$150,375, using asphalt. The Commission refers these bids to the Engineer with power to award the contract to the low bidder, Leonard & Slate, when certain conditions have been fulfilled.

"Bully Creek-Vale Section of the Vale-West Secondary Highway, in Malheur County. 3.76 miles grading, surfacing and oiling. Chester T. Lackey, Ontario, submitted the low bid, in the amount of \$37,352.60. Triangle Construction Co., Boise, Idaho, submitted the second-low bid in the amount of \$39,992.00, but qualified its bid by stating that it would not accept this project unless also awarded the contract for the Cow Hollow Creek-Adrian Junction Section of the Vale-Adrian County Road, bids for which were also received at this meeting. Tony Marrazzo submitted the third-low, and only other bid for this work, in the amount of \$40,353.10, and also qualified his bid by stating he would not accept the contract unless awarded the Cow Hollow Creek-Adrian Junction Section job. The Commission advertised that bids for both projects would be received in combination. Accordingly, the results of the bidding on the Cow Hollow Creek-Adrian Junction Section will be announced next, followed by the results of the combination bids.

"Cow Hollow Creek-Adrian Junction Section of the Vale-Adrian County Road, in Malheur County. 0.25 mile grading and 6.01 miles surfacing and oiling; also construction of a concrete bridge. Tony Marrazzo, Boise, Idaho, submitted the low bid for this work, in the amount of \$28,918.50, and the Triangle Construction Co., Boise, Idaho, submitted the second-low bid, in the amount of \$31,112.00. Both bidders qualified their bids by stating that they would not accept this contract unless also awarded the Bully Creek-Vale Section of the Vale-West Secondary Highway, in Malheur County. Chester T. Lackey, Ontario, submitted the third-low and only other bid, in the amount of \$32,353.50.

"Combination bids on the Bully Creek-Vale Section and the Cow Hollow Creek-Adrian Section, in Malheur County. Tony Marrazzo, Boise, Idaho, submitted the low combination bid, in the amount of \$69,271.60. Chester T. Lackey, Ontario, submitted the next-low combination bid, in the amount of \$69,706.10. The Triangle Construction Co., Boise, Idaho, submitted the only other combination bid, in the amount of \$71,104.00. The Commission refers all bids received for this work to the Engineer with power to award the contracts to the low bidder, Tony Marrazzo, on his low combination bid of \$69,271.60, when certain conditions have been satisfied.

"Reconstruction of Hawthorne Bridge approaches, on the Pacific Highway West, in Portland, Multnomah County. Lindstrom Bros., Portland, submitted the low bid for this work, in the amount of \$31,120.00, and George H. Buckler Co., Portland, submitted the second-low bid, in the amount of \$35,054.00. There was only one other bidder. The Commission awards this contract to the low bidders, Lindstrom Bros., at their bid of \$31,120.00.

"Sunset Camp-Davies Section of the Wolf Creek and Nehalem Highways, in Washington County. 9.53 miles surfacing and bituminous macadam and 3.15 miles oiling. Babler Bros., Portland, submitted the low bid for this work, in the amount of \$127,418.00. Norris Bros., Burlington, Washington, submitted the next low bid, in the amount of \$129,679.00. There were three higher bidders. The Commission awards the contract to Babler Bros., at their low bid of \$127,418.00."

Buildings at Glenwood:

"Building No. 8659 (former owner Mrs. Mildred Bartell Davis). Earl Bateman, Gales Creek, submitted the high bid for the purchase of this building, in the amount of \$204.00. Elmer E. Lyda, Gales Creek, submitted the second-high and only other bid, in the amount of \$50.00. The Commission accepts the bid of Earl Bateman, and sells this building to him at his high bid of \$204.00.

"Building No. 8671 (former owner Wm. F. Van Loo). Elmer E. Lyda, Gales Creek, submitted the high bid for the purchase of this

building, in the amount \$210.00. C. S. Bateman, Gales Creek, submitted the second-high bid, in the amount of \$178.00, and Earl Bateman, Gales Creek, submitted the third-high and only other bid, in the amount of \$160.00. The Commission sells this building to Elmer E. Lyda, at his high bid of \$210.00."

Messrs. Frank Morgan and Herschel Thompson, representing the Nyssa Chamber of Commerce, came before the Commission for an answer with regard to their previous request for the paving of Main Street in their town (route of the Old Oregon Trail) full width between curbs, and the installation of a storm sewer on this street. They were informed by Commissioner Clough that the Commission has approved this project both as to the paving work and the sewer construction, but the Commission is not in a position today to say just when the work will be done, as it depends entirely upon the availability of funds.

Mr. H. H. Kramer, City Manager of Milton, Oregon, was present. He asked the Commission to consider in the formulation of its next construction program the building of the Milton-Washington State Line Section of the Oregon-Washington Highway on the recently adopted permanent alignment. He was informed that the construction of this section is dependent upon when the State of Washington builds its portion in that state. The Engineer was instructed to ascertain from the Washington highway authorities when they expect to undertake this improvement.

Mr. Kramer also asked that the improvement recently completed at the south limits of Milton be extended so as to eliminate a very bad condition that now obtains where the highway is occupied by railroad tracks. He said that Division Engineer Williams is of the opinion that the state should do at least a portion of this work if the railroad company will cooperate by taking care of the portion occupied by its tracks. The Engineer was instructed by the Commission to secure a report from Mr. Williams on this subject.

The improvement of Union Street and South Main Street, in Milton, was also requested by Mr. Kramer. He gave as his understanding that the state has certain funds for expenditure in the improvement of city streets and, if such is the case, they would like very much to have these two streets, which are not on the state highway system, improved. He was informed that the Commission now has under advisement the matter of allocating a certain amount of state funds for improvements of this kind, but the studies in connection therewith have not yet been completed, and the Commission has not as yet determined a definite policy with respect thereto.

Mr. R. A. Weiser, Seaside, was present and asked the Commission to authorize the transportation of short logs, not exceeding fifteen feet in length, over the Oregon Coast Highway from a point two miles south of Cannon Beach to Astoria, during the summer months. He said that he has purchased a stand of timber south of Cannon Beach and, according to his contract, this

timber must be marketed before January 1, 1942, and in order to comply with this arrangement, he must haul logs during the restricted summer months, as well as during the winter months. He said that the logs would not exceed fifteen feet in length, and that the overall length of the equipment and load would not exceed twenty-six feet. Further, that he is operating only one truck, and would carry not more than two logs at one time. The Engineer stated that loads not over twenty-six feet in length could be transported over this highway without taking up more than one-half the traveled portion of the road and, in his estimation, Mr. Weiser's operations would cause no more hazard to other traffic than do freight trucks. After discussion, the Commission authorized the granting of a permit to Mr. Weiser, as requested, subject to the condition that the logs to be hauled would not be longer than fifteen feet and that the overall length of truck and load will not be in excess of twenty-six feet, and provided further that no more than two logs are hauled at any one time.

Mr. J. T. Ellis, of Corbett, Oregon, was present in regard to the Corbett Road, which extends from the Columbia River Highway to the Columbia River at Corbett. He particularly inquired as to the plans of the Commission for maintaining a landing slip in the river for the use of vehicular traffic when the new Columbia River Highway has been constructed at this point. He gave as his understanding that the new highway is to be built very close to the river, and that it will destroy the present landing facilities. He urged the Commission to make provision for a new landing slip. The matter was referred by the Commission to the Engineer and the Attorney for investigation and report.

The State Parks Superintendent, Mr. S. H. Boardman, was present and reported on the following park matters:

Use of federal aid funds for the purchase of wayside strips:- The Parks Superintendent reported receipt of a letter from Representative James W. Mott, the author of the bill that provides three per cent of the federal aid allotment for wayside purchases, in which Mr. Mott advises that it is the function of the State Highway Commission to select the sites and present them to the Public Roads Administration for approval. He recommended, in view of this letter, that the applications be filed for the purchase of timber strips along the Salmon River Highway and along the Pendleton-John Day Highway, between Dale and Camas Creek Junction. W. H. Lynch, District Engineer, Public Roads Administration, stated that he has not yet received instructions relative to the expenditure of federal aid funds for such purpose. After discussion, the Commission instructed the Engineer to file applications for federal aid funds for the purchase of the strips mentioned by the Parks Superintendent.

Request of Bridal Veil Pioneers Association for permission to erect a drinking fountain in Talbot State Park:- The Parks Superintendent advised that Mr. S. J. Hammel, President of this

Association, has asked the privilege of constructing a drinking fountain in this park as a memorial to Bridal Veil pioneers, and that the Association will pay the entire cost involved and will furnish a suitable plaque. He recommended approval of the request if the fountain is constructed in conformance with plans prepared by the Parks Department, and if the Parks Department is allowed to superintend construction. The Commission approved the recommendation.

Offer of H. L. Edmunds, Eugene, to donate land adjacent to the Columbia River Highway at Herman Creek for state park purposes:- The Parks Superintendent advised that Mr. Edmunds owns thirteen acres of land situate in Section 6, Township 2 North, Range 8 East, W.M., three miles east of Cascade Locks, and has offered to donate this property to the state if the state wants it. He further advised that he has investigated the area and finds that it has 1,320-ft. frontage on the highway, but there is no frontage on Herman Creek; further, that the area is principally hill land and is situate about one hundred feet above the highway, with no level land bordering the highway. He recommended against acceptance of this site, inasmuch as it does not fit into the state park picture. The Commission approved the recommendation.

Meyers property along the North Santiam Highway:- The Parks Superintendent presented the offer of Albert R. Meyers, Mehama, Oregon, to sell to the Commission for the sum of \$1,000, a twenty-acre tract of land situate in Section 13, Township 9 South, Range 1 East, being located near the fish hatchery at Mehama. He advised that he has investigated the area and, in his estimation, it is not suitable for state park purposes. In view thereof the Commission decided not to purchase the tract.

Offer of George P. Taylor of Portland to donate a park site in Klamath County:- The Parks Superintendent advised that Mr. Taylor has offered to present to the state as a gift a 120-acre tract located in Section 20, Township 39 South, Range 8 East, W.M., Klamath County. He said that this tract is located about two miles north of the Green Springs Highway, at a point about six miles west of Klamath Falls, and that he has investigated the area and found it to be unsuitable for state park purposes, particularly in view of the fact that it is cutover hill land with no water available, and no road leading to it. He recommended that the offer be declined. The Commission approved the recommendation.

Timber strips along the Tiller-Trail Secondary Highway:- The Parks Superintendent reported considerable O & C lands and county lands, as well as privately-owned land, along this highway. Commissioner Clough gave as his thought that if the state could obtain the O & C lands and the county-owned lands, where the highway passes through them, and could purchase the privately-owned

cutover lands at reasonable cost, that would be advisable. The Parks Superintendent was instructed to negotiate with the federal government and the county court with respect to the acquisition of the O & C lands and the county-owned land; also, to ascertain how much it will cost to purchase the cutover lands belonging to the private parties.

Request of Lincoln County for state cooperation in the purchase of Spruce Production Railroad right of way:- The Parks Superintendent advised that Lincoln County is purchasing a considerable portion of the old Spruce Production Railroad right of way, for which it is paying the Southern Pacific Company the sum of \$500 and has asked the state to contribute the sum of \$100 toward this expense, in view of the fact that the right of way passes through a forty-acre tract which the county deeded to the state, without charge, as a wood lot. He recommended approval of this payment, in view of the county's donation, and for the further reason that the forty-acre tract contains at least \$5,000 worth of cordwood, notwithstanding that the price to be paid would average about \$50.00 per acre, there being only two acres of the railroad right of way in the forty-acre tract received from the county. After discussion the Commission approved the recommendation, subject to the condition that the county will deed to the state that portion of the railroad right of way that lies within the borders of the above-mentioned forty-acre tract.

Letter from the Agate Beach Community Club requesting signs on the beach at Agate Beach, prohibiting speeding, et cetera:- The Parks Superintendent advised that request has been received from the Agate Beach Community Club for the erection of appropriate signs prohibiting speeding, stunt driving, and other objectionable activities, on the ocean beach at Agate Beach, as a possible safety measure. The Commission considered that the people who use this beach are entitled to protection, and thereupon instructed the Engineer to see that appropriate signs are erected at this location.

Building encroachments in Cascadia State Park:- The Parks Superintendent advised that since the Commission has acquired this park, it has been found that Reverend D. V. Poling of Corvallis, and a Mr. F. H. Pfeiffer, of Albany, are maintaining summer homes within the boundaries of the park, and these gentlemen have requested permission to continue to maintain their summer homes at this place. The Commission denied the request as a matter of policy, and to avoid the establishment of an undesirable precedent. The Attorney was instructed to notify the owners that they must vacate the premises.

Addition to Cascadia State Park:- The Parks Superintendent recommended the purchase of a narrow strip of land lying between the Santiam Highway and the Santiam River, in front of Cascadia Park. He said that the original park purchase extended only to the river,

leaving a narrow strip between the river and the highway. This strip, he said, has a frontage on the river for one-half mile, and contains about seven acres of land which the state should control as a protection to the park. He recommended purchase of the same. He also recommended the acquisition of a fifty-foot strip on the opposite side of the highway as an added protection to the park. After discussion, the Commission authorized the Attorney to secure options for both strips.

Proposed park adjacent to the Columbia River Highway, east of Shell Rock Mountain:- The Parks Superintendent reported a communication from George W. Mead, Portland, offering, in behalf of Mrs. Ruby Mead, to sell to the state for park purposes 112 acres of land situate adjacent to the Columbia River Highway about one-half mile east of Shell Rock Mountain. He was instructed by the Commission to contact Mrs. Mead and ascertain just how much she wants for this property.

Addition to Umpqua Lighthouse State Park:- The Parks Superintendent recommended the purchase of about sixty-five acres of land, consisting mostly of sand dunes, adjacent to the present park and being described as Lot 4, in the east one-half of the southwest quarter of Section 24; Lots 1 and 2 in the east one half of the northwest quarter, and the southwest quarter of the northeast quarter of Section 25, Township 22 South, Range 13 West, W.M., Douglas County. He recommended purchase of this property and the planting of the area to Holland grass, in order to stop "sand blow", which, he said, is not only detrimental to the present park but also to the highway. It was his thought that the purchase price would not exceed \$5.00 per acre. The State Highway Engineer concurred in the recommendation as a protection to the highway. After discussion, the Commission authorized the Right of Way Department to secure options on this property and ordered, if the property is purchased, that the expense be charged partly to the park budget and partly to the right of way budget.

The matter of designating the county road, which extends from the Santiam Highway to Cascadia State Park, a state secondary highway was discussed. The Attorney advised that this road lies entirely within the borders of the state park, so it would not be necessary for the Commission to designate it a secondary state highway if the county will deed it to the state, which it has agreed to do. The Commission approved the disposition of this matter in such manner, and instructed the Attorney to secure the deed.

A telegram was presented from the Waldport Chamber of Commerce, in which the Commission was urged to authorize the placing of additional large rock to enlarge the parking area adjacent to the Oregon Coast Highway, at the south limits of Waldport. The Engineer advised that the State Parks Superintendent is opposed to the placing of more rock at this place. In view of the report, the Commission deferred action in the matter until it has had an opportunity to view the premises.

The Engineer requested authority to employ six two-man crews to act as "weighmasters" in the weighing of logging trucks. He said that the log hauling business has been growing rapidly, and that it is known that a large percentage of these trucks are transporting loads weighing in excess of the legal weight limits; however, it is impossible for the State Police to apprehend all of them. It was his thought that the operations of the weighmasters, in conjunction with the State Police, would greatly reduce overloading, and would save the state many thousands of dollars in highway maintenance expense. He estimated the annual expense of the weighmaster crews and one supervisor at about \$30,000, and advised that the project has been approved by Chairman Cabell, with whom he has discussed it. After discussion, the Commission approved the request by unanimous vote.

In this connection the Engineer advised that weighmasters would not have police authority, so some provision would have to be made for penalizing operators of trucks, if they refused to allow their trucks to be weighed. During the progress of weighing, he said, the weighmasters will be stationed near the state highway scales, and appropriate signs will be maintained on the highway near the scales notifying the operators of logging trucks to stop at the scales for weighing. He suggested, in the event of refusal of any operator to allow his truck to be weighed, that the permit of such operator be cancelled. The Commission approved the suggestion.

The Commission discussed the adoption of rules and regulations relative to the issuance of permits for continuous operation of logging trucks having an overall length of load and vehicle in excess of fifty feet. After discussion, the following resolution pertaining thereto was adopted by the Commission by unanimous vote:

WHEREAS, the 1941 legislative assembly enacted Chapter 55, Oregon Laws, 1941, by which the Highway Commission is authorized to grant written permits for the continuous operation of vehicles and/or combinations of vehicles engaged in the transportation of logs, poles or piling having an overall length of load and vehicle or combination of vehicles exceeding fifty feet, but no such permit may be granted by the Commission unless and until the Commission has found that such movement will not be detrimental to the highway or destructive of the interests of the general public; and

WHEREAS, based on experience and engineering data, it is the judgment of the Commission that permits for such purpose should not be issued with respect to any state highway or section of state highway, unless it be found and determined that the design of the highway or section of highway over which it is proposed to operate any such vehicle is such as to permit the vehicle and load or combination of vehicle and load to operate at all times on the right-hand side of the center line of the traveled way without at any time or place making necessary encroachment by any part of the vehicle or

load on the opposite traffic lane, and no such permit shall be issued unless the highway or section of highway concerning which the permit is applied for affords safe passing zones at reasonable intervals; and

WHEREAS, it is the purpose of the Highway Commission to afford all privileges possible to the logging and lumber industry of the state consistent with public safety, convenience and necessity;

NOW, THEREFORE, BE IT RESOLVED BY THE HIGHWAY COMMISSION that the following rules, regulations and declaration of policy shall govern with respect to the issuance of permits for the transportation by motor vehicle of logs, poles and/or piling over primary or secondary state highways:

1. Permits for the continuous operation of vehicles or combinations of vehicles engaged in the transportation of logs, poles or piling may be issued for the movement of such commodities having an overall length of vehicle and load or combination of vehicles and load of not to exceed sixty feet; provided, however, that the geometric design of the particular highway or section of highway is such as to permit the movement of the vehicle and load or combination of vehicles and load on the right-hand side of the center line of the traveled way without encroachment by either vehicle or load at any time or place on the opposite traffic lane.
2. Permits for the continuous operation of motor vehicles engaged in the transportation of logs, poles or piling having overall length of vehicle and load or combination of vehicles and load not in excess of seventy-five feet may be granted; provided, however, the geometric design of the highway or section of highway over which such movement is to take place is such as to permit the movement and operation of vehicle and load at all times and at all places on the right-hand side of the center line of the traveled way without encroachment by either vehicle or load on the opposite traffic lane; and, provided further, that the geometric design of the highway is such as to provide safe passing zones not over 8,000 feet apart.
3. Permits may be issued for temporary isolated movements by motor vehicles engaged in the transportation of logs, poles, and/or piling having an overall length of load and vehicle or load and combination of vehicles in excess of seventy-five feet; provided, however, the highway or section of highway over which such movement is proposed to take place has a geometric design such as to permit the movement and operation of the vehicle and load, or combination of vehicle and load, at all times and at all places on the right-hand side of the center line of the traveled way, so that no part of the vehicle and load need at any time or place encroach

on the opposite traffic lane. Such permits shall be issued for a period of not to exceed thirty days and shall not be issued unless the vehicle is equipped with hand steering device on the trailer axle, which steering device shall be manned at all times and be of such character as to permit the trailer axle to approximately track the rear truck axle. Such permits shall be revocable at any time.

4. Permits may be granted for the operation of motor vehicle and load or combination of vehicles and load engaged in the transportation of logs, poles and/or piling having an overall length in excess of seventy-five feet with respect to highways or sections of highways wherein the geometric design does not permit the vehicle and load to stay on the right-hand side of the center line of the traveled way at all places; provided, however, that operations under such permits shall not exceed ten movements in any thirty-day period and shall be issued only with respect to highways or sections of highways where the traffic is light; and provided that the vehicle is equipped with hand steering device on the trailer axle, which steering device shall be manned at all times and be of such character as to permit the trailer axle to approximately track the rear truck axle; and provided that cars with flagmen operate in advance and in the rear of the logging trucks; and provided that the movement shall be subject to such special rules and regulations as the Commission may deem proper.

5. Permits issued under Sections 3 and 4 hereof shall be issued only upon application disclosing the purpose for which the logs, poles and/or piling are to be used, which application shall be supported by the affidavit of the applicant or the owner of the logs, poles and/or piling, or the consignee, declaring that such logs, poles and/or piling are to be used for the purpose stated in the application and are not, after being delivered to the point or place of destination, to be cut into shorter lengths or used for some other purpose than the purpose stated in the application. Any permit issued under sections 3 and 4 shall terminate thirty days from date of the issuance of said permit.

6. Public liability and property damage insurance in the sum of \$ for public liability, and \$ for property damage shall be required for permits issued for the operation of motor vehicles engaged in the transportation of logs, poles or piling, having an overall length in excess of sixty feet.

7. The State Highway Engineer hereby is directed to make or cause to be made an inspection of each state highway and section of state highway for the purpose of ascertaining the design and character of the same and the maximum length of vehicle or combination of vehicles and load which can, with due regard to the interests of the general public and without unnecessary damage to the highway, move thereover. The Engineer shall at the same time determine and set

the available passing zones on each such highway over which it is proposed to transport by motor vehicle logs, poles and/or piling.

8. The Engineer is further instructed to make and file in the Commission's office at Salem, Oregon, a complete report of his findings and recommendations for the use and benefit of the Commission when considering applications for permits for the transportation by motor vehicle of logs, poles and/or piling.

9. These rules and regulations and this declaration of policy shall apply to all primary and secondary state highways, or any part thereof, over which operators propose to move or transport logs, poles or piling.

10. This resolution shall be entered in the minutes and records of the Commission and shall be in full force and effect until rescinded, modified or otherwise changed by official action of the Commission.

The Commission also discussed the special regulations adopted at its meeting on December 18, 1940, governing the transportation over state highways of logs, poles or piling by motor truck. The Engineer suggested certain modifications of such regulations, which the Commission approved. The Commission thereupon adopted the following regulations covering such movements and ordered that a certified copy of the same be forwarded to the Public Utilities Commissioner, with a recommendation that they be made a part of the log hauling permits issued from his office after June 15, 1941:

SPECIAL REGULATIONS GOVERNING THE TRANSPORTATION OF
LOGS, POLES, OR PILING BY MOTOR TRUCK

Effective June 15, 1941

The following special regulations governing the transportation of logs, poles or piling by motor truck prepared by a committee representing the Oregon State Highway Commission, the Secretary of State, Department of State Police, State Industrial Accident Commission, Bureau of Labor and Public Utilities Commissioner are approved and are the recommendations made by the Oregon State Highway Commission to the Public Utilities Commissioner pursuant to the provisions of Sections 115-509 and 115-513 (O.C.L.A.), and acts amendatory thereto.

These special regulations are in addition and supplemental to the requirements of the Oregon Motor Vehicle Laws and Oregon Motor Transportation Act; also the Logging Safety Code of the Oregon State Industrial Accident Commission.

The term "logs" as used herein shall be construed to include logs, poles or piling.

A. Disposal and Reporting of Lost Logs or Log Loads

If any log be dropped from any load during its transportation over any of the highways of this state, it shall be the duty of the person, firm, or corporation hauling said logs, immediately to remove the same from the traveled portion of the roadway, and within a period of not more than 48 hours (holidays excluded) to remove the same from the right of way at his or its own expense. The repeated dumping or loss of logs upon the highway right of way, or the neglect or refusal of any log hauler to remove any log or logs so unloaded or lost in transit shall be considered as an indication of laxity in conforming to loading requirements and shall be cause for the immediate suspension or cancellation of the permit under which said log hauler is operating.

If any log or logs be dropped or lost upon the highway it shall be the duty of the log hauler to report said fact to the Highway Commission within 48 hours thereafter. Said report shall state, among other things:

1. The time the log or logs were lost.
2. The exact location.
3. The number of logs on the truck at the time of the accident.
4. The length of the respective logs.
5. The number of board feet contained on the load.
6. The speed of the truck at the time of the accident.
7. If on a curve, a full description of the curve and surrounding country.
8. What portion of the equipment broke, if any, prior to the loss of said logs.
9. The type and age of equipment, both truck and trailer and the number and size of chains or fastenings used.
10. The date of the last checkup or inspection of the equipment involved.
11. Time logs were removed from highway.

The neglect or refusal of any log hauler to render the above report within the time specified may be considered cause for the immediate suspension or cancellation of the permit under which said log hauler is operating.

The filing of a report as required by these special regulations shall not be construed as relieving the driver of any vehicle from filing an accident report as required by Section 115-316, O.C.L.A., and acts amendatory thereto.

B. Method of Loading

1. The bunks or bolsters of any truck or trailer shall be either straight or concave upward. Bunks with the ends lower than their centers will

not be permitted. Sufficient frame clearance shall be maintained to prevent "bunk binding."

2. The ends of the bunks or bolsters shall be provided with chock blocks which can be securely locked in position; and, when the vehicle is loaded and chock blocks are in position, each block shall have a height of not less than eight inches above the top of the bunk. Chock blocks shall not extend beyond the end of the bunk. Open V-type blocks shall be one inch or more from the end of the bunk and shall not be turned over. Bunk chains or cables shall have a minimum breaking strength of not less than 15,000 pounds. If chains are used, they shall be made of welded links and at least one link in every five (5) feet of chain shall be stamped with the manufacturer's mark or symbol guaranteeing that the minimum breaking strength of the chains is not less than 15,000 pounds. No chain shall be used that does not contain at least one link so stamped. Cut, cracked, excessively worn or otherwise defective links shall be removed and the chain properly repaired immediately. The use of molles or cold shuts in such chains will not be permitted. If cables are used, they shall consist of one-half-inch wire rope. The use of frayed or stranded wire rope will not be permitted.

3. The method of loading shall be such that the outer logs in any upper tier or layer shall have their centers inside of the centers of the outer logs of the next lower tier or layer so that the load is stable without the aid of ties or binders. Ties or binders shall be considered as precautionary measures to insure stability of the load while the vehicle is rounding curves or upon supersaturated or sloping surfaces. Loads shall be well balanced on the truck and trailer center plates. Not more than one-third of the weight of any log shall extend to the rear of the last point of support.

4. Loads shall be tied with not less than three binders, the rear-most of which shall be securely fastened to the bunk of the trailer. Any binder used at the bunk shall be wrapped around at least the two sides and top of the load and shall be securely fastened to the bunk. Any binder not placed at a bunk shall entirely surround the load. In case any log is of insufficient length to rest over both the front and rear bunks, one of the three binders shall be used for the purpose of securely fastening the unsupported end of such log to the remainder of the load, but in no event shall any bottom log of any load not rest securely on both bunks; provided, that in the case of one-log loads, one binder attached to the bunk of the trailer shall be sufficient.

Binders shall be so arranged that they may be released from the side of the vehicle away from the dump in unloading, but no loose end of any binder shall be permitted to swing free from the load or vehicle. All such loose ends shall be securely fastened to the load or vehicle so as to prevent their swinging free or striking any person, vehicle or object, on or adjacent to the roadway while the vehicle is in operation. For this purpose one end of the binder shall be equipped with a suitable clamp or fastening device.

5. In the case of short logs transported on solo trucks and loaded lengthwise, the following method of loading may be substituted in lieu of that set forth in paragraphs 3 and 4 above: The logs may be loaded between rigid standards attached to the bed of the truck at the bottom and tied across above

the load with cable or chain ties. There shall be a standard on each side of the load within two feet of each end of the logs, and a sufficient number of standards shall be provided so that they are spaced not more than eight feet apart on each side of the load. The standards shall be rigidly connected to the bed of the truck or shall be placed in tight-fitting sockets at least twelve inches in depth. The chain or cable tie above the load shall have a minimum breaking strength of not less than 15,000 pounds. The standards shall be of such size and dimension that when supported at each end a load of 15,000 pounds applied at the center of the standard shall not cause failure.

6. In the case of short logs loaded crosswise, the following method of loading shall be used if the truck or trailer is not provided with solid ends of a height sufficient to prevent any log in the load from rolling off: Not less than two chock blocks shall be used at each open end of the vehicle and the load shall be held with at least two binders for each row of logs. The binders shall be firmly attached to the ends of the truck or trailer. Rigid standards or stakes may be used in lieu of chock blocks but each such stake shall be either rigidly connected to the bed of the truck or trailer or shall be placed in a tight-fitting socket at least twelve inches in depth.

7. Any binder or fastening thereof required by these regulations shall have a minimum breaking strength of not less than 15,000 pounds. If chains are used as binders, they shall be made of welded links and at least one link in every five (5) feet of chain shall be stamped with the manufacturer's mark or symbol guaranteeing that the minimum breaking strength of the chain is not less than 15,000 pounds. The use of molles or cold shuts in such chains will not be permitted. Cut, cracked, excessively worn or otherwise defective links shall be removed and the chain repaired immediately. Tighteners shall be fitted with hooks which hook over the chain links and shall be used in that manner. If cables are used as binders, they shall consist of one-half-inch wire rope. The use of frayed or stranded wire rope will not be permitted. All binders and fastenings thereof shall be inspected frequently and any necessary repairs indicated by such inspection shall be made immediately.

8. Logs with large limbs, knots, bark slabs or other hazardous projections shall not be transported.

9. Braking equipment shall be maintained in good condition. Hose lines and couplings thereof of vehicles equipped with air brakes shall be immediately repaired or replaced when found defective. Sufficient slack shall be maintained in air brake hose lines to prevent uncoupling when the trailer reach is extended. A brake test shall be made before the start of any trip.

10. Trailer couplings shall be securely locked or the pin shall be keyed. Wooden reaches shall be of good, straight-grained material.

11. Trailers loaded on trucks shall be securely fastened to the truck in such manner that they will not fall, roll or slide off while in transit.

12. All bunk blocks, loose ends of binders, or other equipment shall not be permitted to swing free from loaded or unloaded vehicles.

13. Unless special permission is obtained from the State Highway Commission, the hauling of logs, poles or piling is prohibited on Saturday afternoons, Sundays, during hours of darkness, and on the following holidays: January 1st, May 30th, July 4th, Labor Day, November 11th, December 25th, also any holidays designated by the President of the United States or the Governor of the state of Oregon; also the Monday immediately following the above mentioned holidays when they fall on Sunday.

14. All axles on logging trucks and trailers shall be equipped with springs.

15. Approaches to state highways from private logging roads must be approved as to location and type of construction by the Oregon State Highway Commission before being constructed. Mud and debris must be removed from wheels of logging equipment before entering state highways.

16. All trucks carrying logs must come to a complete stop before crossing any railroad track at grade.

17. Operators of all logging trucks shall consent to the weighing of their loads on state-owned scales whenever requested by "weigh-masters" in the employ of the State Highway Commission. Signs will be erected at the scale sites requesting all logging trucks to stop at the scales. The refusal of any operator to allow his truck to be weighed shall be cause for the immediate suspension or cancellation of the permit under which he is operating.

The Engineer brought up for discussion the matter of extending the improvement of the Minam Hill Section of the Wallowa Lake Highway, in Union County. He recalled that the Commission at one time budgeted \$80,000 for this work, but transferred the money to another project which was more pressing. He suggested an allocation of approximately \$80,000 of state funds at this time, and the contracting of an additional section at the next meeting. The Commission approved the suggestion and so ordered.

Commissioner Oliver reported a request from the Grant County Court for the designation as a state secondary highway of the county road between Sumpter, Baker County, and Granite, in Grant County. He advised that the County Court has selected this road as its first choice for secondary highway designations. The Commission agreed to keep the project in mind.

The Engineer brought up for discussion a letter written by W. W. Currier, Highway Section Foreman, Grants Pass, directed to all state highway employees, suggesting the formulation of an association to be named the "Association of State Highway Employees," the purpose of which organization "would be to work through peaceful means to improve working conditions, as well as promote a better understanding by the public of the character and duties of the men who have as their responsibility the care of Oregon's fine highway system", and to "have a paid representative of our Association at all Legislative meetings armed with comprehensive and practical suggestions for the benefit of our members."

The Engineer gave as his thought that the formulation of such an organization would work to the detriment of the employees of the State Highway Department rather than to their benefit, and suggested that a letter be sent to each employee advising him of the attitude of the State Highway Commission relative to an organization of this kind. He read aloud a form of circular letter prepared for the purpose which, he said, had been approved by Chairman Cabell. The matter was discussed by the Commission at some length but a decision was deferred until the following day in order to give the Commissioners an opportunity to study the letter in the meantime. (See decision on following day).

The Engineer also brought up for discussion the matter of increasing by 10 per cent the wages of hourly rate employees, particularly referring to a petition signed by fifty employees at the Salem Shops requesting that they be paid on a monthly basis and that they be granted the same privileges that are now enjoyed by other monthly-paid employees. The Engineer advised that he has taken care of the matter by revising the schedule for hourly-paid employees. Under the new schedule, he said, the men will work an additional four hours each week (10% increase from forty hours to forty-four hours) at the same rate of pay, and will report to their respective jobs on state time instead of on their own time, as in the past. It was his thought that the new schedule would meet with the approval of the employees concerned without increasing the payroll expense. He asked the Commission to approve the new procedure. After discussion the Commission approved the revised schedule as reported.

The Commission adjourned at 6:00 p.m. to reconvene at 8:00 p.m. in the Imperial Hotel to dispose of additional routine matters.

The State Highway Commission reconvened at 8:00 p. m. in Room 415, (Imperial Room), Imperial Hotel, with the same persons present and participating.

A delegation from The Dalles, including Messrs. J. C. Davies, F. V. Galloway, and W. S. Nelson, Manager of the Chamber of Commerce, was present and discussed with the Commission the matter of providing state-owned ferry service across the Columbia River at The Dalles. Mr. Nelson headed the group. He presented arguments in favor of state-owned ferry operations at this point, which he suggested could be conducted on a toll fee basis, and urged the Commission to give the matter careful consideration. He also filed a written brief in support of the oral arguments. After discussion the Commission instructed the Engineer to make investigations as may be necessary, and report his findings to the Commission at the next meeting.

The Attorney brought up for discussion the Orris Knapp right-of-way controversy at Port Orford. He advised that the Public Roads Administration is anxious to proceed with the contracting of the Port Orford South Section, but cannot do so until the right of way, of which the Orris Knapp property is a portion, has been cleared. He also advised that certain Port Orford citizens, who are very anxious for the highway improvement, have submitted a petition stating that they would pay the cost of the right of way needed from Mr. Knapp over and above the amount of the state's offer of \$10,000. He recalled

that at a previous meeting he reported to the Commission information received from several parties to the effect that Mr. Knapp has had his property listed for sale for a couple of years at \$6,000, and requested instructions. After discussion, the Commission authorized the Attorney to withdraw the previous offer to Mr. Knapp and to make him a new offer of \$6,000, and if he refuses the same to proceed with condemnation.

The Attorney requested authority to purchase certain parcels of real property that are needed for various highway improvements. After careful study of the list submitted and the prices recommended, the Commission approved the same, and by unanimous vote adopted the following resolution authorizing such purchases:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed:

NOW, THEREFORE, BE IT RESOLVED that the several offers, or bases of settlement hereinafter enumerated be, and the same hereby are, approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered to be acquired are as follows:

<u>East Portland-Clackamas County Line Section, Pacific Highway East</u>			
9396-McPherson, G. J.	Quarry		McCallister

This is an exchange on a quarry pit, whereby the state is to convey to the Housing Authority of the County Court of Clackamas County a tract of land covered by deed from Nathan B. Harvey and the First State Bank of Milwaukie, to the State Highway Commission, in Section 25, Township 1 South, Range 1 East, W.M., Clackamas County, for the price of \$850.00. In return for this they have secured an option from G. J. McPherson to the State Highway Commission covering gravel pit and hauling road in that immediate vicinity, for the same consideration of \$850.00

The Attorney brought up for discussion the settlement for right of way needed for the Wilson River Highway across property owned by Charles Bateman, in Washington County. The Commission tentatively approved an offer of \$5,750 in condemnation for this property, in the event that a satisfactory settlement cannot otherwise be reached. The Attorney was instructed to discuss the matter further with Mr. William Hare, Hillsboro, attorney for Mr. Bateman. (This matter was reconsidered on the following day, at which time the Attorney advised that he discussed the matter with Mr. Hare, who stated his desire to inspect the premises before making a decision. The Commission thereupon confirmed its previous offer to pay \$5,750.00 for this property, and authorized the Attorney to close the deal at such figure if Mr. Hare is satisfied.)

The Commission adjourned at 10:30 p. m. to reconvene the following morning.

Portland, Oregon, May 9, 1941

The State Highway Commission reconvened at 9:00 a. m. in the auditorium of the Public Service Building. Present were:

Huron W. Clough, Commissioner
 Herman Oliver, Commissioner
 R. H. Baldock, State Highway Engineer
 H. B. Glaisyer, Secretary

Bids as follows for highway construction projects were opened and read in conformance with previously published notice, following which Commissioner Clough, Acting Chairman, announced that the award of contracts would be made at 3:00 p. m. in the same room:

County Judge Nelson B. Higgs, Harney County, was present and discussed briefly with the Commission the matter of the improvement of the City of Burns Section of the Central Oregon Highway. He was informed that it is planned to do this work with state forces as soon as there is a crew available in that vicinity.

The Commission discussed a letter from Mr. George H. Jenkins, Coos County Agriculture Agent and Secretary of the Land Use Committee of Oregon State College Extension Service, in which the Commission is requested to consider the construction of dikes and the installation of tide boxes instead of bridges at Shingle House Slough, Southport Slough, Davis Slough, and other points, when and if the Oregon Coast Highway is reconstructed between Marshfield and Coquille. He advised that in the minds of the committee members, the installation of dikes and tide boxes would make it possible to reclaim several hundred acres of land which would be excellent for agricultural use if properly drained, would increase agricultural income, and would add property to the tax rolls of Coos County. The Engineer recommended approval of this request, predicated upon the property owners involved paying the actual cost of the tide gates, and organizing a district having power to contract with the Highway Commission for the maintenance of the gates. The Commission approved his recommendation unanimously, with the understanding that the State Highway Department would assume the responsibility of securing necessary permits from the United States War Department. The Commission ordered that the matter be covered by appropriate agreement.

In this connection, the Commission also discussed a letter from Mr. Ben Flaxel, District Attorney of Coos County, in regard to the construction of a tide box at North Slough, about one mile southwest of the highway bridge over North Slough, at Hauser, so as to reclaim some 340 acres of land. Mr. Flaxel alleged that a dike and tide gate constructed at this point would be of benefit to the state highway, because it would eliminate the necessity for the existing state's tide gate and trestle, at North Slough, and would save the state considerable expense in maintaining such gate. The Engineer advised

that this matter has been investigated by Division Engineer Lytle, who ascertained that the estimated cost of the dike and gate is between \$5,000 and \$6,000, of which amount it is likely that the Dike District will ask the state to contribute from \$1,000 to \$1,500, although he is not able to get anyone to make a definite commitment in that regard. Mr. Lytle also stated that in his estimation the dike and tide gate will be of material benefit to the state because it will permit the shortening of the trestle at North Slough Bridge, which consists of twenty 19-foot spans and one 40-foot hinged span, from 420 feet to 120 feet, which trestle is now costing the state about \$1.59 per foot annually to maintain. This matter was discussed by the Commission at some length, but action thereon was deferred by the Commission pending an additional report from the Engineer to clarify a number of questions that arose.

A letter was presented from Mayor F. R. Bowersox, Monmouth, requesting the oiling or paving of Knox Street (route of the Pacific Highway West), in Monmouth, from its intersection with Main Street southerly a distance of one block to Clay Street, full width between curbs. The Engineer estimated that such improvement would cost about \$2,600, including the grading, surfacing, construction of oil mat, and a 12-inch sewer with catch basins. He recommended approval of the request. The Commission approved the recommendation, and ordered that the work be done with state forces.

The Commission discussed a petition from residents of Gold Hill and vicinity, in which request was made for the construction of lavatory facilities at Birdseye Springs State Park situate adjacent to the Pacific Highway, about twelve miles south of Grants Pass. The Commission denied the request as a matter of policy, previous experience having revealed that it is uneconomical to maintain such facilities in the roadside park areas.

The Secretary presented a letter from C. F. Lange, requesting the surfacing and oiling of the unsealed section of the Farmington Secondary Highway, in Washington County. The Engineer advised that this is a meritorious project, but would cost about \$30,000, and there are no funds in sight with which to finance it. The Commission thereupon denied the request; however, agreed to consider it in the formulation of the next construction program.

The Engineer reported that the Work Projects Administration has disapproved the proposed Tongue Point WPA Project at Astoria, because of the high WPA nonlabor cost, which amounts to \$75.59 per-man month, although indications are that a proposal that would require only \$15.00 per-man month, for WPA nonlabor cost, would be approved. Under such a setup, he said, the state would be required to pay approximately \$130,000, which in his estimation is not justified. He advised that, according to the original proposal, the state's share of the expense would be about \$60,000. He suggested that the Highway Commission withdraw its offer of cooperation under the original proposal, if the WPA will not accept the state's contribution of \$60,000, provided in the original proposal. The Commission voted unanimously not to contribute more than \$60,000 toward the cost of this work.

The Commission discussed a letter from Mr. John C. Veatch, Chairman of the State Fish Commission, in which the Highway Commission is asked to oil

the driveway and parking area at the Bonneville Fish Hatchery for the convenience of the many visitors to this place, the cost thereof to be paid with state highway funds, because the Fish Commission has no funds available. The Attorney advised that the Commission has legal authority to spend state money for this project if it so desires, in view of the fact that the property is state owned. The Engineer estimated that the work would cost about \$1500.00. The Commission approved the expenditure.

A letter was presented from the City of Central Point requesting the elimination of a dangerous curve on the Pacific Highway, at the north city limits of Central Point; also requesting the construction of a nonskid surface on the Pacific Highway, from Central Point to Gold Hill. The Engineer pointed out that the Commission has plans to construct a major line change in the Pacific Highway, in the vicinity of Central Point, which will do away with the curve mentioned by the city, and in his estimation it will be wasteful to spend money for any improvement that would ultimately be included in the major project. He recommended the request be denied. The Commission approved the recommendation. The Engineer also pointed out that the Highway Commission is now placing a nonskid surface on a portion of the Central Point-Gold Hill Section, so the city's request in that respect is at least partially under way. The Secretary was instructed to so inform the city.

Letters were presented from the Union County Court and the La Grande Commercial Club requesting the oiling of the Hunter Lane County Road, north of Island City. The Engineer advised that the Commission has already approved this project for federal aid secondary highway funds, and that request has been made of the Public Roads Administration for the approval of the same in the 1942 program. He requested authority from the Commission to advertise the project for bids to be received at the June meeting of the Commission, if federal approval has been secured. The Commission approved the request.

A resolution was presented from the Reedsport Chamber of Commerce urging the immediate construction of the Reedsport-Scottsburg Section of the Umpqua Highway, Douglas County. The Commission denied the request for immediate construction, due to lack of funds to finance it; however, instructed the Secretary to inform the Chamber of Commerce that the Commission will keep the project in mind in the formulation of future construction programs.

A letter from Frank Z. Howard, County Engineer of Klamath County, regarding the improvement of South Sixth Street, Klamath Falls, and requesting the improvement of state secondary highway No. 420 (Midland Secondary Highway), had the attention of the State Highway Commission. The Commission deferred action on the Sixth Street Project until later. The Engineer advised that the unoiled portion of the Midland Secondary Highway is 3.8 miles in length and that to surface and oil this unit would cost about \$20,000; further, that to rebuild the entire road would cost about \$65,000. He recommended approval of the \$20,000 project and suggested, as a means of financing the same, the transfer of \$15,000 of federal aid secondary highway funds from the Buck Hollow Section of the Sherars Secondary Highway, inasmuch as

the federal authorities will not approve an expenditure of federal aid secondary funds for the improvement of this road. After discussion the Commission approved the recommendation, and authorized an expenditure of state funds in the amount of \$5,000, to make up the difference.

A resolution was presented from St. Helens Aerie 2153, FOE, requesting the immediate widening and straightening of the Lower Columbia River Highway, from St. Helens to Astoria. The Commission denied the request, because it considered that the time is not propitious to undertake such improvement, and for the further reason that there are no funds available with which to finance it.

The Commission discussed and ordered filed two letters from the Eastside Commercial Club, Portland, in one of which the Commission is urged to designate and improve as a state secondary highway the Base Line Road, Portland, from Union Avenue to the Sandy River Bridge crossing, and particularly to widen the section east of the Barker Road junction; and in the other, to improve 39th Avenue, Portland, as a state highway route.

The Commission discussed and approved an expenditure of \$2,100, for oiling the rock shoulders adjacent to the highway pavement on the Redwood Highway, through the town of Cave City, Josephine County; the work to be done this summer with state oiling forces, when operating in that vicinity.

A request was presented from the Chamber of Commerce of The Dalles for the construction of a sidewalk along the Columbia River Highway, in front of the city's natatorium and chamber of commerce building, at the west limits of The Dalles. The Engineer estimated the cost at about \$700, and recommended approval of the expenditure, on account of the large volume of pedestrian and bicycle traffic which, under present conditions, is using the highway pavement going to and from these places. The Commission approved the recommendation.

The Engineer reported the cost to install a lighting system in the Arch Cape Tunnel, on the Oregon Coast Highway, Tillamook County. He estimated the cost of installing the facilities at \$17,000, and the operating cost at about \$200 per month, and recommended approval of the expenditure in the interest of providing greater safety for the traveling public. He also recommended a similar installation in the Elkton Tunnel, on the Umpqua Highway, Douglas County. The Commission approved both installations.

Reconsideration was given by the Commission to the request of the City of Corvallis for the installation of traffic signals at ten street intersections, in Corvallis, which are crossed by the Southern Pacific Company's tracks on Sixth Street, particularly a recent letter from the Corvallis City Attorney on this subject, in which he advises that several accidents have recently occurred at some of these crossings, and the city council is anxious that the traffic signals be installed, particularly at Sixth and Van Buren Streets, and at Sixth and A Streets, which are on state highway routes. The Engineer advised that only two of the ten crossings are on the state highway route, also that there are no federal railroad grade crossing funds available

to finance the installation, so if the Commission approves them, they will have to be paid for with state funds. Investigation reveals, he said, that traffic signals are not absolutely needed, and that flood lights would serve the purpose very satisfactorily. He recommended installation of flood lights at the two highway intersections, provided the railroad company will pay one-half of the cost of installing them, and the city will furnish the electricity free of cost for operating them. The Commission approved the recommendation.

The Engineer requested authority to conduct a definite location survey for the Havana-Helix railroad grade crossing, in Umatilla County. The Commission approved the request, and also authorized the Engineer to submit the matters to the Public Utilities Commissioner for a hearing.

The Engineer brought up for discussion the matter of installing a new wooden water pipe line at Scappoose, necessitated by reason of the improvement of the Columbia River Highway at such place. He said that the highway improvement will cover over one of the city's existing water mains, which is about eighteen years old, and that an agreement was reached with the city officials for replacement of this old main with new pipe, same to be installed in a location outside of the proposed pavement area, and that the city has agreed to pay 75 per cent of the cost, or about \$750.00, the state's share being estimated at \$250. The state is to pay the entire cost in the first instance, and the city is to reimburse the state later for its share, when the work has been done. After discussion, the Commission approved the arrangement, and thereupon signed an agreement with the city covering the matter.

The Engineer reported that, in accordance with authority previously granted him by the Commission, he awarded to contractor Roy L. Houck, on April 11, 1941, the contract for grading and paving the Onion Flat Section of the Pacific Highway West, in Washington County, Mr. Houck's bid being the low bid received for such work on April 4, 1941, and the conditions of the award having been satisfied. The Commission by unanimous vote confirmed the award of this contract, as reported.

The Commission discussed the matter of truck hauling of logs through the Elkton Tunnel, on the Umpqua Highway, Douglas County, and decided, in view of the fact that this tunnel is more than 1,100 feet long, is not lighted, and has curves at each end, to require the flagging of all loads of logs that are transported therethrough—one flagman to be stationed at each end of the tunnel, and each to be in communication with the other by means of a buzzer system. It shall be the duty of the flagmen to prohibit the use of the tunnel by other traffic, when the tunnel is occupied by a truck load of logs, and other traffic shall not be allowed in the tunnel until an appropriate signal has been given by the flagmen that the tunnel is free and clear of loaded logging trucks. The Commission referred this matter to the Engineer and the Secretary to work out the details. The Commission approved the requirement that all loads of logs passing through this tunnel shall be lighted with a special red lantern, on the left side, and at the rear of the load, in addition to the regular truck lights, pending formulation of the new rules and regulations.

The Engineer reported completion of the repairs on all of the bridges on the Tiller-Trail Secondary Highway No. 230, between the Douglas-Jackson County line and Trail, and recommended the lifting of the 8-ton load limit for which these bridges have heretofore been posted. The Commission approved the recommendation, and by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, on the 27th day of September 1932, at a meeting of the State Highway Commission, all members being present and participating, the Commission passed and adopted a resolution ordering a reduction of the maximum permissible load limit on certain state highway bridges, including the following, to-wit:

TILLER-TRAIL SECONDARY HIGHWAY NO. 230

All bridges from Douglas-Jackson County Line
to Trail 8 tons

and

WHEREAS, subsequent to the passage of said resolution the said above-named bridges have been repaired so that it is no longer necessary or desirable to maintain the reduced load limit set out in said resolution;

NOW, THEREFORE, BE IT RESOLVED that the action of the State Highway Commission reducing the maximum permissible load limit on the following bridges, to-wit:

TILLER-TRAIL SECONDARY HIGHWAY NO. 230

All bridges from Douglas-Jackson County Line
to Trail

be and the same hereby is rescinded and vacated as of this date, and the maximum load limit permissible on the said bridges shall hereafter be the maximum load limit provided by law.

IT IS FURTHER ORDERED that certified copies of this resolution be furnished to the county clerk of Jackson County, in which county said bridges are located, and to the Superintendent of the Department of State Police for his information.

The Secretary reported a request from the Weston Chamber of Commerce for the installation of standard service club sign racks at the entrances of state highways into Weston. He pointed out that the population of Weston is considerably less than the 700 limit established by the Commission as a basis for the installation of such racks, and that so far as is known at the present time there is only one organization in Weston that is eligible for representation on the racks.

After discussion the Commission modified its previous requirements as follows: sign racks may be installed at state highway entrances into all cities and towns having a population of 400 or more provided there are three or more eligible organizations desiring representation on the racks. No racks are to be installed containing less than three panels. The Commission removed the limit of seven as the number of panels that may be installed on any one rack, and authorized additional panels, if, in the judgment of the Engineer, they may be installed without interfering with the highway maintenance or with the general public safety. The Commission thereupon approved the request of the City of Weston, if it can meet the Commission's requirements.

The Engineer requested authority to advertise for bids the widening of the Oak Creek Bridge at Corvallis, which work is estimated to cost \$8,000. He explained that the Commission previously approved such expenditure as one item in the betterment budget for 1941 to be done with state forces, but in his estimation it would be better to have the work done by contract. The Commission concurred, and thereupon approved the request.

The Commission approved the settlement of its claim against Swift and Company, in the amount of \$87.56, for repairs to highway equipment that was damaged in a collision with a truck owned and operated by the company, and authorized the Attorney to accept payment of such sum from the company, and to sign a receipt for the same.

The Engineer reported that travel over the Cascade Secondary Highway, between Silverton and Portland, is increasing rapidly, and there have been a number of traffic accidents at road entrances. It was his thought that accidents could be avoided if this highway were designated a through highway, thereby requiring all traffic to stop before entering the same. He recommended appropriate action by the Commission to that effect. The following resolution relative thereto was adopted by the Commission by unanimous vote:

WHEREAS, that certain highway known as the Cascade Highway, and otherwise designated as Secondary State Highway No. 160, is a duly established state secondary highway; and

WHEREAS, said highway connects with the Silver Creek Falls Highway No. 163 and the Hillsboro-Silverton Highway No. 140 in Silverton and connects also with the Columbia River Highway at 82nd and Sandy Boulevard in Portland; and

WHEREAS, because of the importance of said highway and the volume of traffic which now moves thereover said highway should be, in the opinion of the Highway Commission, designated as a main-traveled or through highway;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Highway Commission, a majority being present and affirmatively voting, as follows:

1. That the Cascade Highway, otherwise designated as Secondary State Highway No. 160, from its connection with the Silver Creek Falls Highway and the Hillsboro-Silverton Highway in Silverton to its connection with the Columbia River Highway at 82nd and Sandy Boulevard in Portland, be and said highway hereby is designated and declared to be a main-traveled or through highway.

2. That the Highway Engineer be and he hereby is instructed to place along said highway at all points where roads or highways intersect the Cascade Highway appropriate signs or markers notifying the drivers of vehicles to stop before entering or crossing the said Cascade Highway. The Engineer is further instructed to place such signs or markers as nearly as practicable at the place where said cross or intersecting road or roads meet the prolongation of the nearest property line of such through highway, and the place or places where such signs are installed shall designate to the drivers of motor vehicles entering said through highway from any of said cross or intersecting roads the place where the stop shall be made.

3. This resolution shall be entered in the minutes and records of the Commission as of the ninth day of May, 1941, and a duly certified copy thereof delivered to the Public Roads Administration and a copy to the County Court of Marion County and a copy to the County Court of Clackamas County.

A letter was presented from contractor Homer G. Johnson requesting relief from payment of the full amount of the penalty assessed against him for failure to complete his contract, No 2324, for grading, surfacing and oiling the Prineville Section of the Ochoco Highway, in Crook County, within the specified time limit. Mr. Johnson states that the time limit to complete this job was unreasonably short for a job requiring so many types of construction, and such a coordination of the various steps which necessarily occasioned loss of time. The Engineer advised that the penalty, which consisted of extra engineering expense incurred by the state subsequent to the expiration date specified in the contract, amounted to \$506.19, and there is some justification for Mr. Johnson's contention that the actual increase in engineering expense was not more than 50 per cent of that assessed. He recommended a 50 per cent reduction in the amount of the penalty. The Commission approved the recommendation, and so ordered.

For similar reasons the Engineer also recommended a like reduction in the penalty, amounting to \$125.90, assessed against contractor Porter W. Yett for failure to complete, within the specified time limit, contract No. 2220, for grading and paving the Warren-Seappoose Section of the Columbia River Highway, in Columbia County. The Commission approved a 50 per cent reduction in the penalty.

Koblenzer Brothers, operators of the Oceanview Auto Camp, adjacent to the Oregon Coast Highway, midway between Gold Beach and Port Orford, came before the Commission in regard to the construction of a private roadway extending from their campground to the ocean shore line, which roadway will cross certain property which the state has under option for use as right of way for a proposed revision of the Oregon Coast Highway at this point. They stated that the state secured its option for this right of way in 1937, but has not closed it, because title was not clear; also, that they realize that their campground will be destroyed when the new highway is built, but in the meantime they want to give their patrons an opportunity to drive down to the beach if they so desire. Accordingly, they are asking the Highway Commission for permission to maintain a temporary roadway across the property on which the state has the option. The Commission questioned its authority to grant such permission over property which the state does not own. However, after considerable discussion, the Commission agreed to enter into an agreement with Koblenzer Brothers to the effect that such privilege would be granted as soon as the state has secured title to the new right of way, it being understood that Koblenzer Brothers would immediately abandon the roadway upon being advised by the Commission so to do. The Engineer was instructed to have the Attorney prepare an appropriate agreement covering the matter, in accordance with such decision.

The County Court of Linn County, represented by County Judge J.J. Barrett, County Commissioners H. A. Renninger and Claude G. Smith, and County Engineer W. W. Larsen, was present. They asked the Commission to designate, as a state secondary highway, the county road known as the Airport Road, which extends from the Pacific Highway East, north of Albany, to a connection with the Santiam Highway, east of Albany. They also asked for the oiling of the county road from Albany to Brownsville, and urged its improvement this year as a federal aid secondary highway project. A further request was for the designation, as a state secondary highway, of the county road between Mehama, in Marion County, via Lyons to Mill City. They declared this to be the county's first choice of secondary highway designations, in Linn County, and the Airport Road to be their second choice. The Court was informed that the Commission is not in position to oil the Albany-Brownsville Road this year, because it has not as yet been approved as a federal aid secondary highway. However, the Engineer was instructed to investigate the road, to ascertain what it would cost to do the work. As to the other two projects, the Engineer was instructed by the Commission to investigate them, and report whether or not they qualify for designation as state secondary highways, and to particularly investigate the matter of right of way widths and encroachments. Judge Barrett advised that all of the right of way is not full 60-foot width, but the county could acquire the necessary width by appropriate resolution. After further discussion, the Engineer was instructed to prepare the customary resolutions for the county to adopt, requesting the designations, for consideration at the next meeting. It was suggested to the county court that it take no action with respect to acquiring the extra right of way until the Commission has decided definitely whether or not to place these roads on the state secondary highway system.

Mr. H. B. Roadman, County Commissioner of Douglas County, was present and reported that the county has acquired right of way for a relocation of the North Umpqua Highway between Oak Creek and Marks Ranch so, insofar as the right of way is concerned, the state can proceed with the construction of this section as soon as it desires. He filed with the Commission a copy of the county's right-of-way resolution covering the matter.

Mr. Roadman also reported that the county has secured an option to purchase from R. T. Blakley a gravel bar in the North Umpqua River along the North Umpqua Highway, being situate particularly in the East Half (E $\frac{1}{2}$) of Section 15, Township 26 South, Range 4 West, W. M. He said that there are 12.14 acres in the gravel bar, and that the county is paying \$3,000 for the same, including right of way for a hauling road and certain right of way for the North Umpqua Highway. He asked the Commission to contribute \$1,000 of state funds toward this expense and offered in behalf of the county to give the state a 20-year lease to the use of the gravel bar, which, he said, is the only gravel bar in this vicinity. Furthermore, he said that the county will be glad to let the state use any of its gravel bars and quarry sites at any time, without cost. He filed with the Commission a certified copy of the option obtained from Mr. Blakley for the purchase of this property. The Commission deferred a decision in the matter pending advice from the Attorney as to whether or not the Commission has legal authority to spend state funds for such purpose, and pending consultation with Chairman Cabell.

Mr. Roadman advised that the county is now engaged in several right-of-way condemnation cases, and inquired whether or not it would be possible to secure the services of the Commission's Attorney to help out in the matter. The Commission approved the request, if the Attorney has sufficient time to give to this work without interfering with his regular duties.

Mr. Orris Knapp, Port Orford, and his attorney, Mr. Collier H. Buffington, Gold Beach, were present regarding right of way required from Mr. Knapp for the improvement of the Port Orford South Section of the Oregon Coast Highway, in Curry County. The highway location crosses Mr. Knapp's property, consisting of four acres of land, and passes directly through the Knapp Hotel situate thereon. Mr. Knapp stated that he originally asked \$15,000 for this property, but the Commission refused to pay more than \$10,000, so he has since reduced the price to \$12,500. Mr. Buffington suggested that perhaps the state does not need the entire four acres, and would let Mr. Knapp retain some of the property, which he might utilize for business purposes. The matter was discussed at some length, but a decision was deferred until the afternoon session. The Engineer was instructed to ascertain in the meantime whether or not the entire four-acre tract is needed for the highway improvement. (Mr. Buffington reappeared before the Commission at 1:30 p.m.)

The Engineer brought up for discussion at this time the matter of width of right of way for the proposed improvement of the Oregon Coast Highway through the town of Gold Beach. He estimated the cost of right of way 80 feet wide throughout the entire project at \$47,000, and 60-foot right of way at about \$5,000, and the cost of an 80-foot right of way south of Dean Creek and

a 60-foot right of way north of Dean Creek at \$19,000. Cost of construction on 80-foot right of way, he said, is about \$55,000, compared with \$42,000 on a 60-foot right of way. Mr. Buffington urged the Commission to adopt a permanent line through Gold Beach as soon as possible, and gave as his thought that the people of Gold Beach would be satisfied with such designation, notwithstanding that construction would be deferred for some time. He suggested that a right of way 60 feet wide would be satisfactory for many years. The matter was discussed at some length, but a decision was deferred until Chairman Cabell is present.

The County Court of Lane County, represented by County Commissioners W. J. Holland and Allen P. Wheeler, and County Engineer P. M. Morse were present. They inquired as to the Commission's plans for the construction of an overcrossing on a section of the secondary highway between Eugene and Veneta, and were informed that such project is in the program, but the Commission is not able to proceed with the work until the Public Utilities Commissioner's hearing on the railroad crossing matter has been held.

The County Court also inquired as to the Commission's plans for oiling a section of the Territorial Secondary Highway, in Lane County, and urged the oiling of the Veneta South Section, as the county's preference for the first moneys available. They were informed that when the Commission discussed this matter with the county court at a previous meeting the court was told that the Commission had budgeted \$20,000 for this highway, and it was thought at the time that the work would be in Lane County. However, subsequent investigation revealed that the money was allocated to the Benton County end of the highway, from Monroe south, and the Commission does not feel inclined to change this allocation. The Commission expects, however, to spend some money on the Lane County Section as soon as it can spare the funds.

The County Court also discussed briefly with the Commission matters pertaining to the construction of the "Route F" Highway, but no action was taken thereon.

The Commission discussed a request from Mrs. W. S. Pratt, Milwaukie, for permission to transport directly across the Pacific Highway East, in the town of Milwaukie, one load of piling having an overall length of 132 feet. The Commission authorized the movement subject to the condition that it is properly flagged to safeguard traffic, and provided insurance in the customary amounts is furnished.

The Commission adjourned at 12:00 noon, and reconvened at 1:30 p.m. in the same room with the same persons present and participating.

Mr. and Mrs. E. L. Philpott, Port Orford, came before the Commission in regard to the improvement of the Oregon Coast Highway at Port Orford. They advised that they operate a tourist camp overlooking the ocean adjacent to the existing highway, and, according to information available to them, the new highway is to be constructed on a high fill, between their camp and the ocean, and if that is true their view of the ocean will be entirely cut off.

They asked the Commission to fill in their property to a level with the new highway, except the space directly under the cabins, and in any event to fill in this property within two or three feet of the level of the highway, so that occupants of their cabins can have a clear view of the ocean. After discussion, the Engineer was instructed to make an investigation of the premises to determine how much it will cost to fill in the property and to move and re-establish the cabins. The Attorney was instructed to advise the Commission of its legal responsibility. Both reports are to be rendered as soon as possible.

Messrs. Orris Knapp and Collier H. Buffington reappeared before the Commission in regard to right of way that is needed for the Oregon Coast Highway across the Knapp property at Port Orford. The Engineer reported that a study of the plans for this improvement has been made since the morning conference and it has been ascertained that the improvement will require all but a very small parcel of Mr. Knapp's four-acre tract, such small parcel being 125 feet by 125 in dimension, and located on the north side of the highway. Mr. Knapp then stated that he would allow the state a credit of \$500, if permitted to retain this small parcel, thereby reducing his previous offer from \$11,250 to \$10,750. The matter of whether or not Mr. Knapp had previously offered his place for \$5,000 was mentioned. Mr. Knapp stated that he has never offered his property for sale for such amount, although he did offer to sell it in 1937 for \$15,000; he also said that he receives \$900 a year rental for the hotel, and that out of such sum he is required to pay taxes, insurance, et cetera, and to keep the premises in good condition. The Commission took no definite action on the matter, preferring to consult with Chairman Cabell relative thereto before rendering a decision.

A letter was presented from C. J. Eldon, contractor, Portland, who submitted a bid at the morning session for construction of the West Dairy Creek Bridge, in Washington County, in which letter Mr. Eldon states that he inadvertently entered a unit bid of \$16 per lineal foot on Item No. 4, for furnishing untreated piling, whereas he really intended to bid only \$0.16 per lineal foot, and in view thereof he asked the Commission to reconsider his bid. The Commission denied the request as a matter of policy.

The Commission discussed a letter from the City of Silverton, requesting the services of an engineer from the State Highway Department to prepare plans and specifications for a new bridge across Silver Creek, in Silverton, to replace one that recently collapsed. The Engineer estimated that the cost would not exceed \$50 and recommended approval of the request. The Commission approved the recommendation.

A request was presented from the Oregon Lumber Company for relief from its obligation to maintain a flagman on the Austin-Spur Section of the John Day Highway, where it is crossed by the company's logging trucks. The Engineer recommended approval of the request inasmuch as the sight distance at the point of crossing is long in both directions, and highway traffic for the most part is local, consisting principally of employees of the company who are very familiar with the company's operations. The Commission approved the discontinuance of the flagmen at the Austin-Spur crossing, but not at the John Day Highway crossing.

The Commission had under discussion the matter of naming the Devils Fork Bridge, on the Wilson River Highway, in Washington County. The Commission approved the naming of this bridge "Graham Bridge", in honor of Mr. Loyal M. Graham, Forest Grove, in view of Mr. Graham's efforts during the past twenty-five years in behalf of the good roads' movement in this state.

The Commission approved by unanimous vote the purchase of the following equipment through the State Board of Control, in conformance with the usual practice:

- 6 pickup trucks for use of weighmasters. Estimated total cost \$3,600.
- 1 coupe, Ford or Chevrolet type, for use of Supervisor of Weighmasters. Estimated cost \$750.
- 2 pickup trucks for use of State Parks Superintendent. Estimated total cost \$1,200.
- 1 buzz saw for use of Parks Department, in Silver Creek Falls State Park. Estimated cost \$300.
- 1 power lawn mower for use in Silver Creek Falls State Park. Estimated cost \$300.

The Commission considered and denied a request from the Petroleum Heat and Burner Company of California for permission to operate truck and trailer equipment, 52 feet overall in length, over the Pacific Highway, between the California state line and Medford.

The Secretary presented copies of vouchers prepared by the Secretary of State covering payment by him from the state highway fund of the following claims as authorized by the 1941 Legislature:

Claim of Baker County, in the amount of \$1,982.75, for repayment in connection with a certain judgment against Baker County, in favor of the Sumpter Valley Railroad Company, for damages which the company has suffered as a result of a railroad wreck, allegedly caused by failure of the state and the county to properly maintain the state highway which parallels the company's tracks.

Claim of M. L. O'Neil & Sons, contractors, Eugene, in the amount of \$9,746.13, being the amount of a bid deposit submitted in connection with state highway contract work, which bid deposit was forfeited by failure of this contractor to enter into the contract agreement covering the work.

The Commission took no action on these claims, in view of the fact that the Legislature had authorized payment of the same.

The Commission discussed a letter from Mr. W. J. Braddock, Chief Underwriter of the Truck Insurance Exchange, Portland, suggesting approval of a blanket form of insurance policy to cover movements over state highways of special equipment owned by its clients, rather than the furnishing of separate policies covering each such movement. The Attorney advised that he can see no reason why the protection required by the Commission cannot be covered by a blanket policy. After discussion, and in view of the Attorney's advice, the Commission authorized acceptance of a blanket-form insurance policy covering such movements and instructed the Attorney to prepare an appropriate form.

The Commission discussed a resolution from the Umatilla County Court requesting the designation as a state secondary highway of a short county road which extends from the Old Oregon Trail to the Pendleton Airport siding of the O.W.R.R. & N. Railroad, near the State Hospital, in Pendleton, but deferred action thereon until Chairman Cabell is present, inasmuch as designations of this kind require affirmative action by all three members of the Commission.

The Engineer requested authority for G. S. Paxson, Bridge Engineer, to attend, at state expense, a meeting of the Bridge Committee of the Western Association of State Highway Officials, which is to be held in Casper, Wyoming, June 17 to 20, inclusive. He also requested authority for Division Engineer K. D. Lytle and Assistant Construction Engineer Paul Van Scoy to inspect, at state expense, certain horizontal drain construction which is now being installed on the Redwood Highway, near Hopland, California; and authority for Division Engineer E. A. Collier and Assistant Construction Engineer Paul Van Scoy to make an inspection trip into the state of Washington, at state expense. The Commission approved the requests subject to the confirmation of Governor Charles A. Sprague.

The Commission discussed and approved a request from B. E. Maling, Inc., Hillsboro, for permission to transport peaviners, having an overall height of 13 feet 6 inches, over certain state highways on Saturday afternoons, Sundays, holidays, and during hours of darkness, as emergencies arise in connection with the harvesting of pea crops, subject to the condition that there is sufficient vertical clearance to allow such movements without endangering lives or property.

The Commission denied a request from the Oceanside Community Club for permission to use the ocean beach near Oceanside as an aircraft landing field during the celebration which is to be held on June 27 and 28, 1941, it being contrary to the Commission's established policy to permit the use of the ocean beaches for such purpose.

The Commission considered and ordered filed a resolution from St. Helens Aerie FOC, urging the Commission to take immediate steps to purchase the Longview Bridge over the Columbia River, as authorized by the 1941 Legislature; and a clipping from the Daily Journal of Commerce, Portland, announcing the execution of a new labor agreement between highway contractors and the labor union.

The Engineer discussed with the Commission the proposed improvement of the Fulton Canyon-Locust Grove Section, of the Fulton Canyon-Wasco County Road, in Sherman County. He recalled that the 1941 federal aid secondary highway program contained an item of \$15,000 for grading and surfacing this section, and that the 1942 program of such funds contains a tentative additional appropriation of \$25,000. He suggested that it would be advisable to combine the work in one contract so as to expedite completion of the improvement, and to secure the benefit of present prices. He accordingly asked the Commission to release the 1942 funds and to authorize the contracting of a project for the full amount of both allocations. The Commission approved the request.

A letter was presented from the Parkrose Chamber of Commerce reporting an accident which occurred on Sandy Boulevard at its intersection with Northeast 105th Street, involving three automobiles, which information the Commission is asked to consider in passing on the Chamber of Commerce's request for traffic signals at this location. The Commission ordered the communication filed.

The Engineer asked the Commission to authorize the preparation of plans and specifications for several projects that have been tentatively approved by the Commission in the 1941 budget, so as to avoid delays in contracting the work this fall. He mentioned particularly the oiling of the Scio-Lyons Project on the Albany-Lyons Secondary Highway, which is estimated to cost \$15,000; the Salt Creek-Farlow Ranch surfacing and oiling project on the Little Butte Secondary Highway, in Jackson County, estimated to cost \$40,000; surfacing and oiling the Athena-Cold Springs Section of the Athena-Holdman Secondary Highway, in Umatilla County; and the improvement of South Sixth Street, Klamath Falls, estimated to cost \$85,000. The Commission approved the Engineer's request, and authorized him to prepare the projects for advertising at the proper time.

At 3:00 p. m. Commissioner Oliver announced awards of contracts as follows, bids for which were taken at the morning session, the awards having previously been approved by the Commission by unanimous vote of the members present:

"Vollmer Creek and Necanicum Junction Sections of the Wolf Creek Highway, in Clatsop County. 0.95 mile grading, surfacing and bituminous macadam. Only one bid was received for this project, being that of Babler Bros., Portland, at \$33,587.50, based on the use of tar. They did not submit a bid based on the use of asphalt. The Commission has rejected this bid and has ordered the project readvertised.

"Days Creek-Wright Ranch Section of the Tiller-Trail Secondary Highway, in Douglas County. 4.30 miles grading, surfacing and oiling. Two bids were received for this project, the low one being that of E. L. Gates, Packwood, Washington, at \$47,651.15, and the other being that of E. J. Eldon, Portland, at \$49,835.05. The Commission has rejected both of these bids and has ordered the project readvertised.

"Dean Creek-Parker Creek Section of the Umpqua Highway, in Douglas County. Requires approximately 22,700 cu. yds. crushed gravel in stock piles. A. S. Wallace, Roseburg, submitted the low bid for this project in the amount of \$35,998.00, and Umpqua River Navigation, Gardiner, submitted the only other bid received, in the amount of \$43,811.00. The Commission awards this contract to A. S. Wallace at his low bid of \$35,998.00.

"Oak Creek-Marks Ranch Section of the North Umpqua County Road, in Douglas County. 2.97 miles grading, surfacing and oiling; also construction of 25-foot concrete bridge. The only bid received for this project was that of E. L. Gates, Packwood, Washington, at \$65,681.75. The Commission has rejected this bid and has ordered the project readvertised.

"Mountain Rest-Mt. Vernon and Butte Creek-Service Creek Sections of the Pendleton-John Day, Beech Creek, and John Day Highways, in Grant and Wheeler Counties. 25.63 miles oiling. Five bids were received for this project, the low one being that of J. C. Compton, McMinnville, at \$14,635.20, and the second-low being that of R. O. Dail & Warren Bros., Portland, at \$16,097.25. The Commission awards this contract to J. C. Compton at his low bid of \$14,635.20.

"Hanley Lane Section of the Frenchglen Secondary Highway, in Harney County. 8.5 miles grading, surfacing and oiling. Norris Bros., Burlington, Washington, submitted the low bid in the amount of \$74,332.00 and E. L. Rigdon, Hampton, submitted the second-low bid in the amount of \$79,643.00. There were two higher bidders. The Commission awards this contract to Norris Bros., the low bidders, at their bid of \$74,332.00.

"Eugene Overcrossing-7th Avenue Section of the Pacific Highway, in Lane County. 1.27 miles grading and paving. The Commission received two bids for this project, the low one being that of E. C. Hall Company, Eugene, at \$70,851.00, and the other bid being that of Ed Walder, Eugene, at \$95,089.10. The Commission has referred both bids to the Engineer with power to award the contract to the low bidder when certain conditions have been satisfied.

"Pendleton Airport Highway Section of the Airport Secondary Highway, in Umatilla County. 1.42 miles grading, surfacing and bituminous macadam. Three bids were received for this project, the low one being that of C. E. Oneal, Ellensburg, Washington, at \$53,885.00, and the second-low being that of J. C. Papin, Pendleton, at \$55,794.00. The Commission awards this contract to C. E. Oneal at his low bid of \$53,885.00.

"West Dairy Creek Bridge on the Wolf Creek Highway, in Washington County. Construction of 90 feet of reinforced concrete viaduct. J. F. Johnston, Newberg, submitted the low bid in the amount of \$7,982.25, and Harry I. Hamilton, Eugene, submitted the second-low

bid in the amount of \$8,644.00. There was one higher bidder. The Commission awards the contract to J. F. Johnston at his low bid of \$7,982.25."

The Assistant Attorney presented an offer from Mr. Grover Pound, Pendleton, to purchase for the sum of \$135.00, certain state-owned property in Pendleton described as a portion of Lots 10, 11 and 12, of Block M, Reservation Addition. He said that the state paid \$175.00 for these three lots, which are situate in the eastern outskirts of Pendleton, and if the property is not needed for right of way, the price offered for the same, in his estimation, is very fair. The Engineer advised that this property was purchased in order to provide a road approach to private property, in lieu of the closing of the former approach road along Point Street, which is in a deep cut; further, that not more than a 40-foot width right of way is required, so if the price offered by Mr. Pound is satisfactory, he would recommend acceptance of the same. In view of the reports, the Commission authorized the sale of the property to Mr. Pound at the amount of his offer.

The Assistant Attorney also reported a request from Mrs. Delilah Jones Jeffries, Gladstone, to lease portions of Lots 27 and 28, of Appertons Addition to Gladstone, outside of the standard right of way limits. He advised that when the state purchased the right of way for this highway, it also acquired the extra width which was intended to be used for park purposes, and the deed of conveyance so provides; also that Mrs. Jeffries wants to plant the area to lawn and flowers which would not only improve the appearance of her property, which lies adjacent thereto, but would also add to the attractiveness of the highway and reduce the fire hazard, because, under present conditions, the area has grown up to weeds. The Engineer recommended leasing the property to Mrs. Jeffries under the condition that she would allow no advertising signs to be placed thereon, and that she would not grow flowers, et cetera, for commercial purposes. After discussion the Commission approved the recommendation, subject to the conditions suggested by the Engineer, and ordered that the leasing of the property be covered by letter, rather than by formal agreement, and that it be limited to a period of one year with right of renewal. The matter was referred to the Attorney to handle.

The matter of sale of a concession at Silver Creek Falls State Park had the attention of the Commission. The Attorney presented a form of agreement covering the matter, the provisions of which he read aloud, and advised that the sale of a concession at this park has been approved by Chairman Cabell, who opposes the renewal of the lease of Roman Kintz, who is operating a soft-drink establishment at the entrance to the park, under lease from the former owner. After discussion of this matter the Commission approved the sale of this concession, and the form of agreement presented by the Attorney, except that the daily closing hour set therein was changed from 11:00 p. m. to 12:00 midnight. The Engineer was instructed to advertise this concession for bids to be received at the June meeting of the Commission.

The Attorney then advised that Mr. Kintz is operating under two leases, one of which expires in June of this year, and the other two years

hence; however, Mr. Kintz is willing to relinquish his rights if the state will pay him \$1,000. He recommended acceptance of this offer. The Commission approved the recommendation and authorized such payment.

A letter was presented from Mrs. Mary Anderson, Warren, Oregon, in which the Highway Commission was asked to move some graves in Fairview Cemetery near Scappoose. It appears that the graves are situate in a row of lots which lie between the new highway and the Southern Pacific railroad tracks and that Mrs. Anderson wants them moved to lots that she owns on the opposite side of the highway. The Attorney advised that the Commission is without obligation to do this for Mrs. Anderson because there were no graves whatsoever in the right of way that the Commission acquired for this improvement and at the time the right of way was acquired there was no reason for any discussion about the moving of the graves. In view of this report the Commission denied the request.

The Secretary presented a resolution from the City of Toledo, with respect to a portion of the old right of way of the Corvallis-Newport Highway, in Toledo, which has been abandoned by the state as no longer of value for state highway purposes. The Commission approved the resolution and ordered it filed.

The following resolution, with respect to the abandonment of the old route of the Pacific Highway, through the city of Cottage Grove, was adopted by the Commission by unanimous vote upon recommendation of the Engineer, who advised that the new highway has been constructed through this town and the old route is no longer of value for state highway purposes:

WHEREAS, the Highway Commission is authorized and directed, whenever the route of any state highway passes through the corporate limits of any incorporated city or town of this State, to select and designate the street or streets of such incorporated city or town over which the state highway shall be routed, and the Commission is further authorized to alter or change such routing when in its opinion the interests of the motoring public will be better served; and

WHEREAS, the Highway Commission has heretofore designated as streets of Cottage Grove over which to route traffic using the Pacific Highway the following streets, to wit:

Main Street from its intersection with Ninth Street to its intersection with Fifth Street and Fifth Street from its intersection with Main Street to its intersection with Quincy Avenue;

AND, WHEREAS, for the purpose of affording a more convenient, safe and serviceable highway through the town of Cottage Grove there has been constructed and is now open for public travel a highway which begins at Main Street where Main Street and Ninth Street intersect and extends thence in a southwesterly direction to a junction with the Pacific Highway at or near Quincy Avenue; and

WHEREAS, it is the judgment of the Highway Commission that the interests of the motoring public will be better served by the discontinuance of the routing of traffic over Main Street to Fifth Street and Fifth Street to Quincy Avenue, and instead of routing said traffic over the new highway.

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Highway Commission, all members being present and affirmatively voting, as follows:

1. That Main Street from its intersection with Ninth Street to its intersection with Fifth Street and Fifth Street from its intersection with Main Street to its intersection with Quincy Avenue be and the same are hereby eliminated as streets of the City of Cottage Grove over which to route state highway traffic.

2. That said streets between said termini shall thenceforth be no longer under the jurisdiction of the Highway Commission for any purposes.

3. That the blueprint marked Exhibit A, attached hereto and by this reference made a part hereof, on which blueprint the sections of streets eliminated as streets of Cottage Grove over which to route state highway traffic are shown in red, for identification purposes bears the signatures of K. D. Lytle, Division Engineer; H. G. Smith, Construction Engineer, and C. B. McCullough, Assistant State Highway Engineer and bears date of March 25, 1941.*

4. That this resolution be entered in the minutes and records of the Highway Commission and a duly certified copy thereof be delivered to the municipal authorities of the City of Cottage Grove, and a like copy to the Public Roads Administration.

The Engineer reported an offer from a Mr. J. F. Shields to purchase, at the rate of \$2.00 per M, about 200 M-FBM timber along the Wolf Creek Highway, between Wolf Creek Camp and Bear Creek, which timber has been felled by a WPA cleanup crew. He advised that unless the logs are sold, it will be necessary to cut them into fuel or burn them, in order to clear the right of way. After discussion the Commission decided to sell this timber to the person submitting the highest bid therefor. The Engineer was instructed to advertise the sale for bids to be received at the next meeting.

A letter from Camas Valley Garden Club, Camas Valley, Oregon, with respect to the improvement of Camas Mountain State Park on the Coos Bay-Roseburg Highway, in Douglas County, was referred to the State Parks Superintendent for reply.

*Map filed Right of Way Abandonment and Retention File - No. 93.

A telegram was presented from H. B. Read, Manager of the Salem Electric Cooperative Association, requesting permission to install an electric power transmission cable on the state highway bridge, between Salem and West Salem, for the transmission of electricity from the Bonneville Power Substation, near West Salem, into Salem. The Commission refused to grant permission for the installation of open wires on the bridge or on poles on the highway right of way; however, authorized the granting of a permit to the association to install the wires on the bridge if they are incased in a lead cable, and if, in the opinion of the Engineer, such type of construction is safe from the public standpoint, otherwise emphatically not. The Engineer advised that there would be no danger if the installation conforms with the National Electric Code. The Commission thereupon authorized the installation subject to such condition.

The Attorney requested authority to condemn certain parcels of real property that are needed for various highway improvements. He submitted a list of such properties with offers, as follows, that he recommended be made for each:

<u>File No.</u>	<u>Name</u>	<u>Purpose Required</u>	<u>Recommended Offer</u>
9129	Helen Allegre	R/W	\$350.00 to \$400.00
9305	Albert M. Rowe	"	20.00 to 25.00
9215	World War Veterans' State Aid Commission	"	53.00 to 60.00
8865	Sallie Kackley	"	290.25 to 300.00
4251A	F. R. Salway	"	558.00 to 575.00
6520	Libbie Maller Estate	"	1587.20+
6521 &	W. M. Rufener	"	576.50+
6522			
6523	Charles Ellis and Inez Maude Taylor	"	1211.00+
6526	Mary E. Ibach	"	1480.00+
6528	Anna H. Duyck, et vir	"	1877.50+
6529	Tongue and Bailey	"	1462.50+

After discussion the Commission approved the offers and adopted the following resolutions authorizing condemnation:

WHEREAS, the State Highway Commission is authorized to locate, relocate, construct, reconstruct, maintain, widen, straighten, and otherwise improve state highways, both primary and secondary, and said Commission is also authorized to construct shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, and snow fences, and is authorized to acquire quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, and broadcasting stations, and is further authorized to develop, construct, improve, operate, and maintain parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, and other places of attraction and scenic value; and

WHEREAS, said Highway Commission is authorized to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property, or any interest therein, necessary or deemed by the Highway Commission necessary for the accomplishment of any and all of the foregoing things; and

WHEREAS, in the judgment of the Highway Commission the several tracts or parcels of land hereinafter described are each and all necessary for the specific and particular purposes hereinafter specifically set forth;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the Commission does hereby find and declare that the several parcels of real property hereinafter described are each and all necessary for the accomplishment of the purposes hereinafter expressly and specifically set forth, which said real properties and the specific purposes for which the same are being acquired are described as follows, to wit:

Real property owned by Helen Allegre and C. F. Allegre, which property is located in the southeast quarter (SE $\frac{1}{4}$) of the southeast quarter (SE $\frac{1}{4}$) of Section 19, Township 1 North, Range 10 East, W. M., Hood River County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 1 and is further identified in the records of the Highway Commission as file R 9129, and which property is being acquired for right of way purposes in connection with the Hood River Secondary State Highway No. 281;*

Real property owned by Albert M. Rowe, which property is located in the southwest quarter of Section 10 and the northwest quarter of Section 15, Township 30 South, Range 4 West, W. M., Douglas County, Oregon, and is more particularly described on the attached sheets and designated as Parcels Nos. 2 and 3 and is further identified in the records of the Highway Commission as file R 9305, and which property is being acquired for right of way purposes in connection with the Tiller-Trail Highway;*

Real property owned by the World War Veterans' State Aid Commission, which property is located in the south half (S $\frac{1}{2}$) of the northeast quarter (NE $\frac{1}{4}$) and in the northeast quarter (NE $\frac{1}{4}$) of the southeast quarter (SE $\frac{1}{4}$) of Section 23, Township 30 South, Range 4 West, W. M., Douglas County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 4 and is further identified in the records of the Highway Commission as file R 9215, and which property is being acquired for right of way purposes in connection with the Tiller-Trail Highway;*

Real property owned by Sallie Kackley and H. V. Kackley, which property is located in the Prior F. Blair D.L.C. No. 39 in Section 36, Township 17 South, Range 4 West, W.M., Lane County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 5 and is further identified in the records of the Highway Commission as file R 8865, and which property is being acquired for right of way purposes in connection with the Pacific Highway;*

Real property owned by F. R. Salway, which property is located in Government Lot 4 of Section 5, Township 10 South, Range 11 West, W. M., in Lincoln County, Oregon, and is more particularly described on the attached sheets and designated as Parcels Nos. 6 and 7 and is further identified in the records of the Highway Commission as file R 4251A, and which property is being acquired for right of way purposes in connection with the Oregon Coast Highway.*

2. That the Commission does hereby find and declare that each of the said described parcels of real property is necessary and acquisition of the same by the State is required for the specific purposes hereinabove set forth, and the said properties are being acquired for the express and specific purposes in this resolution set forth.

3. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real properties, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of the said real properties, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property or properties, whether said properties be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

4. That I. H. Van Winkle, Attorney General of the State of Oregon, and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they are hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be

*(The detailed descriptions of the respective parcels of real property mentioned in this resolution are attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 11, under the heading "Real Property Condemnation Resolutions" and said descriptions by this reference are made a part of this minute entry to the same extent as if copied in full herein.)

any, and in the event that no satisfactory agreement or agreements can be reached, then it is hereby further resolved that the Attorney General of the State of Oregon and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they hereby are requested to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated.

5. That this resolution be entered in full in the minutes and records of this Commission.

WHEREAS, the State Highway Commission is authorized to locate, relocate, construct, reconstruct, maintain, widen, straighten, and otherwise improve state highways, both primary and secondary, and said Commission is also authorized to construct shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, and snow fences, and is authorized to acquire quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, and broadcasting stations, and is further authorized to develop, construct, improve, operate, and maintain parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, and other places of attraction and scenic value; and

WHEREAS, said Highway Commission is authorized to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property, or any interest therein, necessary or deemed by the Highway Commission necessary for the accomplishment of any and all of the foregoing things; and

WHEREAS, that certain highway known and designated as State Highway No. 4', and otherwise known as the Wolf Creek Highway, is a duly designated and adopted state highway; and

WHEREAS, the Highway Commission has heretofore, by resolution duly adopted and entered in the minutes of the Commission, declared said highway to be a highway of major importance and did further find and declare that in connection with the acquisition of real properties for rights of way for said highway there should be acquired also all rights of access from the abutting property to said highway, to which said resolution reference is now made; and

WHEREAS, the Libbie M. Maller Estate is the owner of the following described real property, to wit:

Southwest quarter of the Southeast quarter of Section 29, Township 2 North, Range 3 West, W. M., Washington County, Oregon.

and

WHEREAS, it is the judgment of the Highway Commission that the real property hereinafter described, which is a part or portion of the above described real property, is necessary and needed for right of way and other highway purposes in connection with the construction and maintenance of the said Wolf Creek Highway;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. The Commission does hereby find and declare that the real property hereinafter described, and which real property is a part or portion of the above described real property, is necessary and is needed in connection with the construction and maintenance of the Wolf Creek Highway, which said real property is described as follows, to wit:

A parcel of land lying in the Southwest quarter (SW $\frac{1}{4}$) of the Southeast quarter (SE $\frac{1}{4}$) of Section 29, Township 2 North, Range 3 West, W.M., Washington County, Oregon, and being a portion of the following described property: that tract of land which was conveyed by that certain Will to Libbie M. Maller recorded in Probate No. 2574 of the Probate Records of Washington County, Oregon; the said parcel being all that portion of the foregoing described property included in a strip of land 140 feet in width, 70 feet on each side of the center line of the Wolf Creek Highway as said highway has been located over and across or adjacent to the said property; the location of the said strip of land (in so far as it encroaches upon said property) being determined by the said center line from Station 2302+23.2 to Station 2317+96.6 which portion of center line is described as follows:

Beginning at a point which is Engineer's center line Station 2302+23.2 opposite and 70 feet distant from which point the northeasterly line of the said strip of land intersects the west line of said property; said point being 1638.1 feet south and 37.6 feet west of the center of Section 29, Township 2 North, Range 3 West, W.M.; thence South 51° 48' East a distance of 1356.5 feet; thence along the arc of a spiral curve left (the long chord of which spiral bears South 51° 59' 45" East 216.9 feet) a distance of 216.9 feet to Engineer's Station 2317+96.6 opposite and 70 feet distant from which station the northeasterly line of the said strip of land intersects a line 60 feet distant north of and parallel to the south line of said Section 29, containing 4.58 acres.

2. The Commission does hereby further find and declare that the last above described parcel of real property is needed and required and the appropriation and acquisition of the same is sought under these proceedings for right of way and other highway purposes in connection with the construction, improvement, and maintenance of the said Wolf Creek Highway.

3. The Commission does further find and declare that, in addition to the acquisition of the said last described tract of real property for the purposes herein stated, it is likewise necessary that there be acquired all right of access from the remaining property of the said Libbie M. Maller Estate, except access at approximately engineer's station 2302+75 where there is an existing county road, at engineer's station 2318+00 where there is an existing county road, a farm crossing at a point to be mutually agreed upon by the owners and the State Highway Commission at the most feasible and practicable location, and also a seven-foot stockpass at the most feasible and practicable place to be agreed upon by the owners and the State, which said remaining real property abuts upon or joins the real property last above described and will when said highway is constructed abut upon said highway.

4. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real property, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of the said real property, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property, whether said property be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

5. That I. H. Van Winkle, Attorney General of the State of Oregon, and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they are hereby requested, authorized and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement can be reached, then it is hereby further resolved that the Attorney General of the State of Oregon and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission be and they hereby are requested to commence and prosecute to a final determination such suit or action as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated, together with all rights of access from adjoining or abutting property to said highway, except as provided herein.

6. That this resolution be entered in full in the minutes and records of this Commission

WHEREAS, the State Highway Commission is authorized to locate, relocate, construct, reconstruct, maintain, widen, straighten, and otherwise improve state highways, both primary and secondary, and said Commission is also authorized to construct shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, and snow fences, and is authorized to acquire quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, and broadcasting stations, and is further authorized to develop, construct, improve, operate, and maintain parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, and other places of attraction and scenic value; and

WHEREAS, said Highway Commission is authorized to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property, or any interest therein, necessary or deemed by the Highway Commission necessary for the accomplishment of any and all of the foregoing things; and

WHEREAS, that certain highway known and designated as State Highway No. 47, and otherwise known as the Wolf Creek Highway, is a duly designated and adopted state highway; and

WHEREAS, the Highway Commission has heretofore, by resolution duly adopted and entered in the minutes of the Commission, declared said highway to be a highway of major importance and did further find and declare that in connection with the acquisition of real properties for rights of way for said highway there should be acquired also all rights of access from the abutting property to said highway, to which said resolution reference is now made; and

WHEREAS, Stella C. Armentrout and B. W. Armentrout are the owners and W. M. Rufener is the contract purchaser of the following described real property, to wit:

Beginning at a point in the County Road 9.25 chains west from the northeast corner of Section 32, Township 2 North, Range 3 West, Willamette Meridian, in Washington County, Oregon, thence west 10.75 chains to the northeast corner of a 40 acre tract of land now owned by Wade Armentrout; thence south on his east line 19.74 chains; thence south 48° west 8.52 chains; thence north 47° 45' West 18.24 chains; thence north 12.65 chains to the northwest corner of said 40 acre tract in the county road; thence west 1.25 chains; thence south 40.65 chains to the south line of the north half of said Section 32; thence north 89° 17' East 31.75 chains; thence north 40 chains to the place of

beginning, containing 88 acres. Also it being part of Section 32 in Township 2 North of Range 3 West of the Willamette Meridian and commencing at the quarter section corner between said Section 32 and Section 29 in said Township and Range and running thence south 12.65 chains; thence south $47^{\circ} 45'$ East 18.24 chains; thence north 48° East 8.52 chains; thence North 19.74 chains; thence west 20.09 chains to the place of beginning, containing 40 acres of land be the same more or less,

and

WHEREAS, it is the judgment of the Highway Commission that the real property hereinafter described, which is a part or portion of the above described real property, is necessary and needed for right of way and other highway purposes in connection with the construction and maintenance of the said Wolf Creek Highway;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. The Commission does hereby find and declare that the real property hereinafter described, and which real property is a part or portion of the above described real property, is necessary and is needed in connection with the construction and maintenance of the Wolf Creek Highway, which said real property is described as follows, to wit:

A parcel of land lying in the north half ($N\frac{1}{2}$) of the northeast quarter ($NE\frac{1}{4}$) of Section 32, Township 2 North, Range 3 West, W. M., Washington County, Oregon; the said parcel being all that portion of the foregoing described property included in a strip of land 140 feet in width, 70 feet on each side of the center line of the Wolf Creek Highway as said highway has been located over and across or adjacent to the said property; the location of the said strip of land (in so far as it encroaches upon said property) being determined by the said center line from Station 2318+10 to Station 2328+30.2, which portion of center line is described as follows:

Beginning at a point which is Engineer's center line Station 2318+10, opposite and 70 feet distant from which point the southwesterly line of the said strip of land intersects a line which is parallel to and 60 feet distant south of the north line of said Section 32; said point being 2.7 feet south and 122.5 feet west of the northeast corner of the northwest quarter ($NW\frac{1}{4}$) of the northeast quarter ($NE\frac{1}{4}$) of Section 32, Township 2 North, Range 3 West,

W.M.; thence along the arc of a spiral curve left (the long chord of which spiral bears South $53^{\circ} 04' 15''$ East 169.68 feet) a distance of 169.7 feet; thence along the arc of a 5729.58 foot radius curve left (the long chord of which curve bears South $56^{\circ} 51'$ East 609.74 feet) a distance of 610.0 feet; thence along the arc of a spiral curve left (the long chord of which spiral bears South $60^{\circ} 51' 40''$ East 240.5 feet) a distance of 240.5 feet to Engineer's Station 2328+30.2, opposite and 70 feet distant from which station the southwesterly line of the said strip of land intersects the east line of said property; containing 2.86 acres of land.

2. The Commission does hereby further find and declare that the last above described parcel of real property is needed and required and the appropriation and acquisition of the same is sought under these proceedings for right of way and other highway purposes in connection with the construction, improvement, and maintenance of the said Wolf Creek Highway.

3. The Commission does further find and declare that, in addition to the acquisition of the said last described tract of real property for the purposes herein stated, it is likewise necessary that there be acquired all right of access from the remaining property of the said owners and the contract purchaser, except access at Engineer's station 2318+00 where there is an existing county road, which said remaining real property abuts upon or joins the real property last above described and will, when said highway is constructed, abut upon said highway.

4. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real property, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of the said real property, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property, whether said property be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

5. That I. H. Van Winkle, Attorney General of the State of Oregon, and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they are hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement can be reached, then it is hereby further resolved that the Attorney General of the

State of Oregon and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they hereby are requested to commence and prosecute to a final determination such suit or action as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated, together with all rights of access from adjoining or abutting property to said highway, except as provided herein.

6. That this resolution be entered in full in the minutes and records of this commission.

WHEREAS, the State Highway Commission is authorized to locate, relocate, construct, reconstruct, maintain, widen, straighten, and otherwise improve state highways, both primary and secondary, and said Commission is also authorized to construct shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, and snow fences, and is authorized to acquire quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, and broadcasting stations, and is further authorized to develop, construct, improve, operate, and maintain parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, and other places of attraction and scenic value; and

WHEREAS, said Highway Commission is authorized to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property, or any interest therein, necessary or deemed by the Highway Commission necessary for the accomplishment of any and all of the foregoing things; and

WHEREAS, that certain highway known and designated as State Highway No. 47, and otherwise known as the Wolf Creek Highway, is a duly designated and adopted state highway; and

WHEREAS, the Highway Commission has heretofore, by resolution duly adopted and entered in the minutes of the Commission, declared said highway to be a highway of major importance and did further find and declare that in connection with the acquisition of real properties for rights of way for said highway there should be acquired also all rights of access from the abutting property to said highway, to which said resolution reference is now made; and

WHEREAS, Charles Ellis Taylor and Inez Maude Taylor are the owners of the following described real property, to wit:

All the following bounded and described real property, situated in the County of Washington, and State of Oregon; being part of Section 33, Township 2 North, Range 3 West, Willamette Meridian, and bounded as follows: Beginning at

the quarter section corner on the west boundary of said section 33, running thence East 14.80 chains to western boundary of the J. L. Northrop donation claim, thence South 1° 24' East 32.22 chains to a stone the northeast corner of a tract of land heretofore conveyed to Geo. Armentrout, thence west 15.31 chains to the western boundary of aforesaid Section 33, thence north on section line 32.12 chains to place of beginning containing 48.37 acres, and also, beginning at the northeast corner of Section 32, Township 2 North, Range 3 West, Willamette Meridian, Washington County, Oregon, thence east 19.99 chains to a stake in the county road on the north line of Section 33, thence south 12.39 chains to a stake on the north line of the Donation Land Claim of John L. Northrup; thence on the north line of said claim 6.37 chains to the northwest corner of the same; thence south 2° 30' east on the west line of said claim 27.61 chains to a stake; thence south 89° 17' west 24.05 chains to a stake; thence north 40 chains to the county road on the north line of section 32; thence east 9.25 chains to the place of beginning, containing 101.31 acres.

and

WHEREAS, it is the judgment of the Highway Commission that the real property hereinafter described, which is a part or portion of the above described real property, is necessary and needed for right of way and other highway purposes in connection with the construction and maintenance of the said Wolf Creek Highway;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. The Commission does hereby find and declare that the real property hereinafter described, and which real property is a part or portion of the above described real property, is necessary and is needed in connection with the construction and maintenance of the Wolf Creek Highway, which said real property is described as follows, to wit:

A parcel of land lying in the East half ($E\frac{1}{2}$) of the Northeast quarter ($NE\frac{1}{4}$) of the Northeast quarter ($NE\frac{1}{4}$) of Section 32 and the West half ($W\frac{1}{2}$) of the Northwest quarter ($NW\frac{1}{4}$) of Section 33, Township 2 North, Range 3 West, W.M., Washington County, Oregon, and being a portion of the following described property: that tract of land which was conveyed by that certain deed to Charles Ellis Taylor and Inez M. Taylor, recorded in Book 159, Page 656 of Washington County Record of Deeds, the said parcel being all that

portion of the foregoing described property included in a strip of land 140 feet in width 70 feet on each side of the center line of the Wolf Creek Highway as said highway has been located over and across or adjacent to the said property; the location of the said strip of land (in so far as it encroaches upon said property) being determined by the said center line from Station 2327+57 to Station 2345+78, which portion of center line is described as follows:

Beginning at a point which is Engineer's center line Station 2327+57 opposite and 70 feet distant from which point the northeasterly line of the said strip of land intersects the west line of said property; said point being 305.5 feet north and 1545.4 feet west of the northwest corner of the John L. Northrup D.L.C. #44 in Township 2 North, Range 3 West, W. M.; thence along the arc of a spiral curve left (the long chord of which spiral bears South 61° 40' 30" East 232.7 feet) a distance of 232.7 feet; thence South 61° 54' East a distance of 1588.3 feet to Engineer's Station 2345+78; opposite and 70 feet distant from which station the southerly line of the said strip of land intersects the west line of the J. L. Northrup D.L.C. #44.

The parcel of land to which this description applies contains 5.61 acres.

2. The Commission does hereby further find and declare that the last above described parcel of real property is needed and required and the appropriation and acquisition of the same is sought under these proceedings for right of way and other highway purposes in connection with the construction, improvement, and maintenance of the said Wolf Creek Highway.

3. The Commission does further find and declare that, in addition to the acquisition of the said last described tract of real property for the purposes herein stated, it is likewise necessary that there be acquired all right of access from the remaining property of the Charles Ellis Taylor and Inez Maude Taylor, except right of access at approximately state highway engineer's station 2333+50, and a seven-foot stockpass beneath the surface of the highway at approximately engineer's station 2343+00, which said remaining real property abuts upon or joins the real property last above described and will, when said highway is constructed, abut upon said highway.

4. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and

acquisition of said real property, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of the said real property, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property, whether said property be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

5. That I. H. Van Winkle, Attorney General of the State of Oregon, and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they are hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel of land with respect to the compensation to be paid for the taking of the same and the damage, if any there be, and in the event that no satisfactory agreement can be reached, then it is hereby further resolved that the Attorney General of the State of Oregon and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they hereby are requested to commence and prosecute to a final determination such suit or action as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated, together with all rights of access from adjoining or abutting property to said highway, except as provided herein.

6. That this resolution be entered in full in the minutes and records of this Commission.

WHEREAS, the State Highway Commission is authorized to locate, relocate, construct, reconstruct, maintain, widen, straighten, and otherwise improve state highways, both primary and secondary, and said Commission is also authorized to construct shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, and snow fences, and is authorized to acquire quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, and broadcasting stations, and is further authorized to develop, construct, improve, operate, and maintain parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, and other places of attraction and scenic value; and

WHEREAS, said Highway Commission is authorized to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property, or any interest therein, necessary or deemed by the Highway Commission necessary for the accomplishment of any and all of the foregoing things; and

WHEREAS, that certain highway known and designated as State Highway No. 47, and otherwise known as the Wolf Creek Highway, is a duly designated and adopted state highway; and

WHEREAS, the Highway Commission has heretofore, by resolution duly adopted and entered in the minutes of the Commission, declared said highway to be a highway of major importance and did further find and declare that in connection with the acquisition of real properties for rights of way for said highway there should be acquired also all rights of access from the abutting property to said highway, to which said resolution reference is now made; and

WHEREAS, Mary E. Ibach, et al, are the owners of the following described real property, to wit:

Commencing at the northwest corner of the original Donation Land Claim of John L. Northrup and wife in Section 33, Township 2 North, Range 3 West, of the Willamette Meridian, Washington County, Oregon, and running thence south on west line of said claim 40 chains, thence east and parallel with north line of said claim 25 chains, thence north 40 chains to the north boundary line of said claim, thence west on said boundary line 25 chains to the place of beginning, containing 100 acres.

and

WHEREAS, it is the judgment of the Highway Commission that the real property hereinafter described, which is a part or portion of the above described real property, is necessary and needed for right of way and other highway purposes in connection with the construction and maintenance of the said Wolf Creek Highway;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. The Commission does hereby find and declare that the real property hereinafter described, and which real property is a part or portion of the above described real property, is necessary and is needed in connection with the construction and maintenance of the Wolf Creek Highway, which said real property is described as follows, to wit:

A parcel of land lying in the J. L. Northrup D.L.C. No. 44 in Section 33, Township 2 North, Range 3 West, W. M., Washington County, Oregon, and being a portion of the following described property: that tract of land which was conveyed by that certain will to Mary E. Ibach, et al, recorded in Probate No. 3948 of the Probate Records of Washington County, Oregon; the said parcel being all that portion of the foregoing described property included in a strip of land 140 feet in width, 70 feet on each side of

the center line of the Wolf Creek Highway as said highway has been located over and across or adjacent to the said property; the location of the said strip of land (in so far as it encroaches upon said property) being determined by the said center line from Station 2344+98 to Station 2364+69.3 which portion of center line is described as follows:

Beginning at a point which is Engineer's center line Station 2344+98 opposite and 70 feet distant from which point the northerly line of the said strip of land intersects the west line of the J. L. Northrup D.L.C.; said point being 510 feet south and 20 feet west of the northwest corner of said Northrup D.L.C. No. 44, Township 2 North, Range 3 West, W.M.; thence South 61° 53' East a distance of 1971.3 feet to Station 2364+69.3 opposite and 70 feet distant from which station the southerly line of said strip of land intersects the east line of the said property.

The parcel of land to which this description applies contains 6.08 acres, of which 0.08 acre lies within the existing county road right of way, title to which hereby is acknowledged to be in the public, and 6.00 acres lie outside of the existing right of way.

2. The Commission does hereby further find and declare that the last above described parcel of real property is needed and required and the appropriation and acquisition of the same is sought under these proceedings for right of way and other highway purposes in connection with the construction, improvement, and maintenance of the said Wolf Creek Highway.

3. The Commission does further find and declare that, in addition to the acquisition of the said last described tract of real property for the purposes herein stated, it is likewise necessary that there be acquired all right of access from the remaining property of the said Mary E. Ibach, et al, except access at approximately state highway engineer's station 2352+00, and a seven-foot stockpass beneath the surface of the highway at engineer's station 2348+00, which said remaining real property abuts upon or joins the real property last above described and will, when said highway is constructed, abut upon said highway.

4. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real property, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate description of the said real property, which said descriptions shall be available

for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property, whether said property be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

5. That I. H. Van Winkle, Attorney General of the State of Oregon, and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they are hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement can be reached, then it is hereby further resolved that the Attorney General of the State of Oregon and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they hereby are requested to commence and prosecute to a final determination such suit or action as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated, together with all rights of access from adjoining or abutting property to said highway, except as provided herein.

6. That this resolution be entered in full in the minutes and records of this Commission.

WHEREAS, the State Highway Commission is authorized to locate, relocate, construct, reconstruct, maintain, widen, straighten, and otherwise improve state highways, both primary and secondary, and said Commission is also authorized to construct shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, and snow fences, and is authorized to acquire quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, and broadcasting stations, and is further authorized to develop, construct, improve, operate, and maintain parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, and other places of attraction and scenic value; and

WHEREAS, said Highway Commission is authorized to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property, or any interest therein, necessary or deemed by the Highway Commission necessary for the accomplishment of any and all of the foregoing things; and

WHEREAS, that certain highway known and designated as State Highway No. 47, and otherwise known as the Wolf Creek Highway, is a duly designated and adopted state highway; and

WHEREAS, the Highway Commission has heretofore, by resolution duly adopted and entered in the minutes of the Commission,

declared said highway to be a highway of major importance and did further find and declare that in connection with the acquisition of real properties for rights of way for said highway there should be acquired also all rights of access from the abutting property to said highway, to which said resolution reference is now made; and

WHEREAS, Emil H. Duyck and Anna H. Duyck are the owners of the following described real property, to wit:

Beginning at a point on the east line of the said John Northrup D.L.C. No.44, which beginning points bears South 0° 40' West 891.6 feet from the most easterly north-east corner of said claim, and running thence South 0° 40' West along the east line of said claim a distance of 754.7 feet to a stone at angular corner on east boundary line of said Northrup claim; thence continuing along the east boundary of said Northrup claim South 13° 45' West a distance of 1528.6 feet to the southeast corner of Henry Duyck's land in said claim, thence South 89° 58' West along the south boundary of said Duyck land a distance of 1506.0 feet to an iron pipe at the southwest corner of said Duyck land, thence North along west boundary of said Duyck land a distance of 2310.0 feet to a point in the center of County Road No. 60, thence South 87° 52' East along center of said road and along said center line extended, a distance of 1879.4 feet to the place of beginning, containing 91.67 acres.

and

WHEREAS, it is the judgment of the Highway Commission that the real property hereinafter described, which is a part or portion of the above described real property, is necessary and needed for right of way and other highway purposes in connection with the construction and maintenance of the said Wolf Creek Highway;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. The Commission does hereby find and declare that the real property hereinafter described, and which real property is a part or portion of the above described real property, is necessary and is needed in connection with the construction and maintenance of the Wolf Creek Highway, which said real property is described as follows, to wit:

A parcel of land lying in the northeast quarter ($NE\frac{1}{4}$) of the southeast quarter ($SE\frac{1}{4}$) of Section 33 and in the west half ($W\frac{1}{2}$) of the southwest quarter ($SW\frac{1}{4}$) of Section 34, Township 2 North, Range 3 West, W.M., Washington

County, Oregon, and being a portion of the following described property: that tract of land which was conveyed by that certain deed to Anna H. Duyck and Emil H. Duyck, recorded in Book 149, Page 406 of Washington County Record of Deeds; the said parcel being all that portion of the foregoing described property included in a strip of land 140 feet in width, 70 feet on each side of the center line of the Wolf Creek Highway as said highway has been located over and across or adjacent to the said property; the location of the said strip of land (in so far as it encroaches upon said property) being determined by the said center line from Station 2385+92.8 to Station 2405+22 which portion of center line is described as follows:

Beginning at a point which is Engineer's center line Station 2385+92.8 opposite and 70 feet distant from which point the northeasterly line of the said strip of land intersects the west line of said property; said point being 13 feet north and 1904 feet west of the northwest corner of the John Harrison D.L.C. No. 37 in Township 2 North, Range 3 West, W.M.; thence South 61° 53' East a distance of 1929.2 feet to Engineer's Station 2405+22 opposite and 70 feet distant from which station the southerly line of the said strip of land intersects the east line of the John L. Northrup D.L.C. No. 44.

The parcel of land to which this description applies contains 6.02 acres.

2. The Commission does hereby further find and declare that the last above described parcel of real property is needed and required and the appropriation and acquisition of the same is sought under these proceedings for right of way and other highway purposes in connection with the construction, improvement, and maintenance of the said Wolf Creek Highway.

3. The Commission does further find and declare that, in addition to the acquisition of the said last described tract of real property for the purposes herein stated, it is likewise necessary that there be acquired all right of access from the remaining property of the said Emil H. Duyck and Anna H. Duyck, except access at approximately state highway engineer's station 2389+00, a seven-foot stockpass beneath the surface of the highway at the most feasible and convenient location, and also access at highway engineer's station 2386+30 where there is now a lane or public highway, which said remaining real property abuts upon or joins the real property last above described and will, when said highway is constructed, abut upon said highway.

4. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys

necessary in connection with the determination, description, and acquisition of said real property, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of the said real property, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property, whether said property be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

5. That I. H. Van Winkle, Attorney General of the State of Oregon, and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they are hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement can be reached, then it is hereby further resolved that the Attorney General of the State of Oregon and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they hereby are requested to commence and prosecute to a final determination such suit or action as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated, together with all rights of access from adjoining or abutting property to said highway, except as provided herein.

6. That this resolution be entered in full in the minutes and records of this Commission.

WHEREAS, the State Highway Commission is authorized to locate, relocate, construct, reconstruct, maintain, widen, straighten, and otherwise improve state highways, both primary and secondary, and said Commission is also authorized to construct shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, and snow fences, and is authorized to acquire quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, and broadcasting stations, and is further authorized to develop, construct, improve, operate, and maintain parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, and other places of attraction and scenic value; and

WHEREAS, said Highway Commission is authorized to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property, or any interest therein, necessary or deemed by the Highway Commission necessary for the accomplishment of any and all of the foregoing things; and

WHEREAS, that certain highway known and designated as State Highway No. 47, and otherwise known as the Wolf Creek Highway, is a duly designated and adopted state highway; and

WHEREAS, the Highway Commission has heretofore, by resolution duly adopted and entered in the minutes of the Commission, declared said highway to be a highway of major importance and did further find and declare that in connection with the acquisition of real properties for rights of way for said highway there should be acquired also all rights of access from the abutting property to said highway, to which said resolution reference is now made; and

WHEREAS, Edmund Burke Tongue, Jr. and Robert S. Tongue, et al, are the owners of the following described real property, to wit:

Commencing at the northeast corner of the Donation Land Claim of John and Mary Harrison in Section 35, Township 2 North, Range 3 West; running thence South $12^{\circ} 30'$ West 22.85 chains; thence North $77^{\circ} 30'$ West 70 chains; thence North $12^{\circ} 30'$ East 22.85 chains; thence South $77^{\circ} 30'$ East 70 chains to the place of beginning, containing 160 acres of land in the County of Washington, State of Oregon.

and

WHEREAS, it is the judgment of the Highway Commission that the real property hereinafter described, which is a part or portion of the above described real property, is necessary and needed for right of way and other highway purposes in connection with the construction and maintenance of the said Wolf Creek Highway;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. The Commission does hereby find and declare that the real property hereinafter described, and which real property is a part or portion of the above described real property, is necessary and is needed in connection with the construction and maintenance of the Wolf Creek Highway, which said real property is described as follows, to wit:

A parcel of land lying in the south half ($S\frac{1}{2}$) of the southwest quarter ($SW\frac{1}{4}$) and in the southwest quarter ($SW\frac{1}{4}$) of the southeast quarter ($SE\frac{1}{4}$) of Section 34, Township 2 North, Range 3 West, W. M., Washington County, Oregon, and being a portion of the following described property: that tract of land which was conveyed by that certain deed to Edmund Burke Tongue, Jr., and Robert S. Tongue recorded in

Book 179, Page 683, of Washington County Record of Deeds; the said parcel being all that portion of the foregoing described property included in a strip of land 140 feet in width, 70 feet on each side of the center line of the Wolf Creek Highway as said highway has been located over and across or adjacent to the said property; the location of the said strip of land (in so far as it encroaches upon said property) being determined by the said center line from Station 2404+86.2 to Station 2430+92.6, which portion of center line is described as follows:

Beginning at a point which is Engineer's center line Station 2404+86.2 opposite and 70 feet distant from which point the northeasterly line of the said strip of land intersects the west line of the J. Harrison D.L.C.No. 37; said point being 879 feet south and 234 feet west of the northwest corner of the said D.L.C. in Township 2 North, Range 3 West, W. M.; thence South 61° 53' East a distance of 2606.4 feet to Engineer's Station 2430+92.6, opposite and 70 feet distant from which station the northeasterly line of the said strip of land intersects the south line of said property.

The parcel of land to which this description applies contains 7.48 acres.

2. The Commission does hereby further find and declare that the last above described parcel of real property is needed and required and the appropriation and acquisition of the same is sought under these proceedings for right of way and other highway purposes in connection with the construction, improvement, and maintenance of the said Wolf Creek Highway.

3. The Commission does further find and declare that, in addition to the acquisition of the said last described tract of real property for the purposes herein stated, it is likewise necessary that there be acquired all right of access from the remaining property of the said owners, except access at approximately Engineer's Station 2418+00, which said remaining real property abuts upon or joins the real property last above described and will when said highway is constructed abut upon said highway.

4. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real property, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of the said real property, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete

the acquisition of said property, whether said property be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

5. That I. H. Van Winkle, Attorney General of the State of Oregon, and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they are hereby requested, authorized and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement can be reached, then it is hereby further resolved that the Attorney General of the State of Oregon and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission be and they hereby are requested to commence and prosecute to a final determination such suit or action as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated, together with all rights of access from adjoining or abutting property to said highway, except as provided herein.

6. That this resolution be entered in full in the minutes and records of this Commission

The Attorney reported receipt of a claim from Mr. H. D. Ritchey, owner of the Depoe Bay Service Station, for damages by reason of improvement of the Oregon Coast Highway at Depoe Bay. It appears that additional right of way was purchased from Mr. Ritchey and during negotiations he was informed that the grade of the highway would be only two feet below the level of the adjacent property; however, it now appears that the highway is six feet below, which is detrimental to Mr. Ritchey's business. The Attorney gave as his thought that Mr. Ritchey's claim is a legitimate one and suggested an adjustment. The Commission authorized the Attorney to negotiate a settlement.

The Attorney requested instructions relative to the payment of an irrigation assessment on the highway department's shop property at Klamath Falls, amounting to \$14.00. He advised that this is an original construction assessment and the Commission can pay it if it so desires. It was his thought that this is a state obligation, and recommended that the amount be paid. The Commission approved the recommendation.

Reconsideration was given by the Commission to the matter of replying to the circular letter sent to all state highway department employees by Mr. W. W. Currier, Maintenance Section Foreman, in which letter the suggestion was made that all such employees should form an association for their benefit. After discussion the Commission approved the following letter relative thereto

and instructed the Engineer to send a copy of the same to each employe of the State Highway Department; also, to discuss this matter with Mr. Currier personally:

The State Highway Commission has read and taken note of the letter recently sent you by an employe of the Maintenance Division of the State Highway Department with relation to the formation of a state employes' organization. The object of the organization, as we understand it, would be to seek to better the condition of the maintenance employes of the State Highway Department.

The State Highway Commission has directed me to advise you of the position of the State Highway Commission with relation to an organization of this kind.

The State Highway Commission has no objection to its employes joining any organization they elect to join, provided such organization is in no way subversive or inimical to the public interest, and further provided that employes do not individually or as an organization take an active part in politics. Activity in politics by State Highway Department employes is prohibited by the Federal Hatch Act and by the regulations of the State Highway Commission.

Employes are cautioned against forming an organization which has as its objective the maintenance of a lobby before the legislature, because, in the opinion of the State Highway Commission, this would be a violation of its prohibition against political activities. The Commission will not tolerate the introduction of any activity, which is deemed political in nature, into the organization of the State Highway Department. Employes should remember that for years the State Highway Department has been a nonpolitical organization which, in a large measure, is responsible for the long tenure in office of the employes.

The hiring, promotion and retention of the regular employes of the State Highway Department are controlled through the application of an honest merit system, which is a further protection to the employe who seeks to rise in the organization through the merits of his own work. Every attempt is made to keep this merit system functioning on an efficient and equitable basis. The Commission, as in the past, will employ, promote and discharge on the basis of merit and without dictation from any group.

The Commission discussed and ordered filed a letter signed by sixty residents of Port Orford in which they state their willingness to jointly subscribe to a fund to pay for new right of way for the Oregon Coast Highway across the Orris Knapp property at Port Orford, over and above the \$10,000 which the Commission has heretofore offered Mr. Knapp for this property, such offer being made so as to avoid postponement of the Port Orford South improvement.

The Engineer presented a list of surveys that he has ordered since the last meeting of the Commission, and asked the Commission to confirm them and the amounts allocated for each. After due consideration the Commission authorized and instructed the Engineer to make such location surveys on various sections of the highways of this state, which said sections of highways, together with their identifying survey numbers and the amounts authorized and allocated for such survey expenditures are as follows:

Right of Way - - 3-1430 - Milwaukie Section, Pacific Highway East, Clackamas County. 1st authorization - \$50

Plans - - - - - 6-1424 - China Creek Slide Section, Oregon Coast Highway, Coos County. 1st authorization - \$300

Plans - - - - - 8-1415 - Gold Beach Section, Oregon Coast Highway, Curry County. 1st authorization - \$600

Quarry - - - - - 9-1426 - Bend-Chemult Section, The Dalles-California Highway, Deschutes County. 3d authorization - \$1400
Total to date \$2800

Plans - - - - - 210-1432 - Oak Creek-Marks Ranch Section, North Umpqua County Road, in Douglas County. 1st authorization - \$125

Plans - - - - - 114-1419 - Odell Section, Odell Secondary Highway #282, Hood River County. 1st authorization - \$1500

Plans - - - - - 15-1428 - Ashland Plaza Section, Pacific Highway, Jackson County. 1st authorization - \$350

Plans - - - - - 18-1454 - Link River Section, The Dalles-California Highway, Klamath County. 1st authorization - \$100

Location - - - - 18-1455 - Pelican City-Henley Section, Klamath Falls-Malin Highway, Klamath Co. 1st authorization - \$9000

Quarry - - - - - 21-1447 - Lincoln County Section, Alsea, Oregon Coast & Newport Hwys, Lincoln Co. 1st authorization - \$200

Quarry - - - - - 121-1448 - Lincoln County Section, Siletz & Eddyville-Blodgett Secon. Hwys., Lincoln Co. 1st authorization - \$200

Right of Way - 21-1449 - Depoe Bay Section, Oregon Coast Highway, Lincoln County. 1st authorization - \$50

Plans - - - - - 21-1441 - Scott Creek-Benton County Line Section, Alsea Highway, Lincoln Co. 2nd authorization - \$850
Total to date \$6500.

Right of Way - 22-1434 - Albany Section, Pacific Highway East, Linn County. 1st authorization - \$350

Location - - - 23-1425 - Baker County Line-Ontario Section, Old Oregon Trail,
Malheur County. 1st authorization - \$13,000

Plans - - - - 23-1426 - Nyssa Section, Old Oregon Trail, Malheur County.
1st authorization - \$600

Right of Way - 124-1440 - Detroit-Marion Creek Section, North Santiam Highway,
Marion County. 1st authorization - \$500

Plans - - - - 26-1449 - Front Avenue Section, Pacific Highway West, Multno-
mah County. 1st authorization - \$500

Plans - - - - 130-1432 - Helix Junction-Athena Section, Athena-Holdman Second-
ary Hwy., Umatilla Co. 1st authorization - \$900

Location - - - 230-1433 - Pendleton Air Base Section, Pendleton Air Base Road,
Umatilla County. 1st authorization - \$200

Plans - - - - 230-1434 - Ordnance Depot Grade Separation, Boardman-Stanfield
Highway, Umatilla County. 1st authorization - \$400

Plans - - - - 230-1433 - Pendleton Air Base Section, Pendleton Air Base Road,
Umatilla County. 2nd authorization - \$750
Total to date \$950.

Plans - - - - 133-1429 - Antelope-Clarno Section, Shaniko-Fossil Secondary
Hwy., Wasco County. 1st authorization - \$250

Marking Non- - 5803-702 General. - Nine Highways. 1st authorization - \$2000
Passing Line

The Commission had under discussion a letter from contractors Leonard & Slate requesting an extension of time, from November 15, 1940, to March 4, 1941, within which to complete their contract No. 2328, for construction of the Middleton-Newberg Roadside Improvement Project on the Pacific Highway West, in Washington and Yamhill Counties. They attributed their failure to complete the project within the specified time limit to difficulties encountered by a subcontractor in obtaining planting material. The Engineer advised that this contract was awarded on June 13, 1940, and called for completion by November 15, 1940; however, on account of drought, it was impossible to plant evergreens until October 24, 1940. It was his thought that all of the work should have been completed by December 1, 1940, and in view thereof he recommended that the extension of time requested be granted subject to the condition that Leonard & Slate reimburse the state for extra engineering expense incurred in connection with this job subsequent to December 1, 1940. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation.

The Engineer reported that contracts Nos. 2328, 2340, 2358, 2386, 2417 and 2425, for the construction of state highway projects, have been completed according to the requirements of the contracts or modifications thereof, and that said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and was adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts and said jobs are now ready for acceptance:

Contract No. 2328, with Leonard & Slate, for roadside improvement on the Middleton-Newberg Section of the Pacific Highway West, in Washington and Yamhill Counties. Completed March 4, 1941.

Contract No. 2340, with United Contracting Company, for grading and paving the Corvallis-Lincoln School Section of the Pacific Highway West, in Benton County. Completed April 21, 1941.

Contract No. 2358, with Leonard & Slate, for grading and bridges on the Keating Road-Ruckles Creek Section of the Baker-Homestead Highway, in Baker County. Completed April 28, 1941.

Contract No. 2386, with E. L. Gates, for roadside improvement on the Cottage Grove Section of the Pacific Highway, in Lane County. Completed April 30, 1941.

Contract No. 2417, with E. L. Gates, for roadside improvement on the Klamath Agency-Modoc Point Section of The Dalles-California Highway, in Klamath County. Completed March 29, 1941.

Contract No. 2425, with M. L. O'Neil & Son, for furnishing 8,900 cu. yds. crushed materials in stock piles on the Florence Section of the Oregon Coast and Siuslaw Highways, in Lane County. Completed April 9, 1941.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

The Commission considered and signed agreements, et cetera, as follows:

Agreement with Douglas County providing for maintenance by the county of a section of the North Umpqua Highway, from a point 4.1 miles northeast of Dixonville to a point approximately 4 miles west of Glide, after construction of the same by the state as a federal aid secondary highway, being designated as Oregon Project PAS 14-D(1).

Agreement with Morrow County providing for the oiling of an 0.8 mile section of the Ione-Gooseberry Road, work to be done by the state, cost to be paid by the county.

Agreement with Nettie E. Baker providing for the leasing of a maintenance headquarters site at Dufur, Wasco County.

Agreement with the O.W.R. & N. Company and the Union Pacific Railroad Company covering the construction of an overcrossing structure on the Boardman-Stanfield Highway, at Stanfield.

Agreement with the United States Department of Interior, Taylor Grazing Administration, covering construction of a pipe line and concrete troughs on the Baker-Homestead Highway, Baker County, to eliminate stock pass.

Agreement with the Portland General Electric Company covering the furnishing of electric service at Silver Creek Falls State Park.

Agreement with James W. Ford, Jr., extending the lease of a C.C.C. headquarters at Honeyman State Park, Lane County.

Agreement with the City of Scappoose providing for the construction of a new wooden water pipe line necessitated by improvement of the Columbia River Highway at Scappoose.

Agreement with Portland General Electric Company covering the sale of a small parcel of land which the state is purchasing from the company. Right of way file R-9029.

Agreement (extension rider) with the O.W.R. & N. Company and the Union Pacific Railroad Company renewing the lease of an oil storage location at Island City.

Agreement with the City of Klamath Falls providing for the installation and financing of a city traffic signal system.

Agreement with the United States of America covering the crossing of the Stanfield-Boardman Highway over an irrigation feed canal in Umatilla County.

Agreement with the Tum-A-Lum Lumber Company for lease of a maintenance headquarters site in Hermiston.

Agreement with Huber Ray and Ralph Adams, Jr., covering the truck hauling of logs across state property adjacent to the Salmon River Highway.

Agreement with Willard Ross covering the truck hauling of logs across state property adjacent to the Salmon River Highway, Tillamook County.

Agreement with the Southern Pacific Company covering storage site at Central Point.

Agreement with the Public Roads Administration and the United States Forest Service covering reconstruction, grading, surfacing and bridge construction on the Wapinitia Highway, as a forest highway project, being Oregon Forest Highway Project 26-C(5). (Signed May 8, 1941)

Bargain and sale deed conveying unto Josephine County 0.53 acre of land situate in Tract 1, Block 1, Del Rogue Tracts, south of Grants Pass. Right of way file No. 7097.

Bargain and sale deed conveying unto Ruby R. Bowman one acre of land situate in the SE $\frac{1}{4}$ of the SE $\frac{1}{4}$ of Section 13, Township 9 South, Range 44 East, W. M., Baker County. Right of way file 7421.

Bargain and sale deed conveying unto Leslie Watters 9,084 sq. ft. of land situate in Lots 9, 10 and 11 of Block 2, Georgetown Addition to St. Helens, Columbia County. Right of way file 8736.

Bargain and sale deed conveying unto Alfred M. Peterson and wife ten acres of land situate in the SE $\frac{1}{4}$ of the NW $\frac{1}{4}$ of the SW $\frac{1}{4}$ of Section 14, Township 8 South, Range 1 East, W. M., Marion County. Right of way file 1926.

Bargain and sale deed conveying unto T. L. Kuhns 9,219 sq. ft. of land situate in Block 22, Long and Landess Addition to Cottage Grove. Right of way transaction No. 5694.

There being no further business to come before the Commission at this time the meeting was adjourned at 4:45 p. m.

State Highway Engineer

Secretary

Commissioner

Commissioner

Portland, Oregon, May 22, 1941

The State Highway Commission met in regular session at 9:00 a. m. in the auditorium of the Public Service Building. Present were:

Henry F. Cabell, Chairman
Huron W. Clough, Commissioner
R. H. Baldock, State Highway Engineer
H. B. Glaisyer, Secretary

Commissioner Oliver was excused from attending this meeting.

Bids, as follows, for highway construction projects were opened and read in conformance with previously-published notice, following which Chairman Cabell announced that awards would be made at 3:00 p. m. in the same room:

OREGON COAST HIGHWAY
ASTORIA (ASTOR STREET-BOND STREET) SECTION
GRADING AND PAVING

United Contracting Co.	\$26,931.00
Warren Northwest, Inc.	28,388.00
Parker-Schram Co.	28,721.50
Porter W. Yett	29,166.00

WOLF CREEK HIGHWAY
VOLLER CREEK AND MECANICUM JUNCTION SECTIONS
GRADING, SURFACING & BIT. MACADAM

	Using Asphalt	Using Tar
Porter W. Yett	- - -	\$32,652.50
Babler Bros.	- - -	34,080.00
E. L. Rigdon	- - -	35,889.50

TILLER-TRAIL SECONDARY HIGHWAY
DAYS CREEK-WRIGHT RANCH SECTION - GRADING, SURFACING & OILING

E. L. Rigdon	\$46,549.75
C. J. Eldon	47,360.35
Clifford A. Dunn	47,433.10
E. L. Gates	48,928.25
A. Milne	52,214.00

NORTH UMPQUA COUNTY ROAD
OAK CREEK-MARKS RANCH SECTION - GRADING, SURFACING, OILING & BRIDGE

E. L. Rigdon	\$65,442.50
O. C. Yocom	65,681.75
Clifford A. Dunn	68,979.00
A. Milne	69,297.00

HOOD RIVER SECONDARY HIGHWAY
DEE-WOODWORTH ACRES SECTION - GRADING, SURFACING AND OILING

Porter W. Yett	\$51,836.00
C. J. Eldon	53,755.00
Parker-Schram Co.	63,603.00

SANTIAM HIGHWAY
CRABTREE CORNER-LEBANON SECTION - GRADE WIDENING AND PAVING

Warren Northwest, Inc.	\$69,336.00
Parker-Schram Co.	74,697.00
Porter W. Yett	86,305.00
United Contracting Co.	89,564.75

PACIFIC HIGHWAY WEST
FRONT AVENUE (WASHINGTON STREET-CLAY STREET) SECTION
GRADING AND PAVING

Edlefsen-Weygardt Co.	\$223,790.80
Porter W. Yett	241,740.50
Parker-Schram Co.	249,625.10

HARBOR DRIVE - CITY OF PORTLAND
MORRISON STREET BRIDGE - APPROACHES & RETAINING WALLS

L. H. Hoffman	\$78,005.00
Gilpin Construction Co.	79,019.00
Parker-Schram Co.	89,805.00
Geo. H. Buckler Co.	94,155.00

BOARDMAN-STANFIELD HIGHWAY
UMATILLA RIVER OVERCROSSING AND OTHER STRUCTURES NEAR STANFIELD

C. J. Montag & Sons	\$61,627.50
Birkemeier & Saremal	61,755.00
C. J. Eldon	62,717.00
Henry L. Horn	66,532.00
L. H. Hoffman	80,282.00

The Engineer discussed with the Commission the matter of the removal of car tracks along Front Street in Portland, particularly a letter from A. J. Witchel, Chief Engineer of the S. P. & S. Railroad Company, requesting permission to remove and salvage the rails and agreeing to do the work in accordance with the wishes of the State Highway Department and with the least inconvenience to the state's contractor. The Engineer advised that the removal of the rails would necessitate the cutting of the pavement, which is of the Belgium block type, and gave as his understanding that the Railroad Company wants the privilege of salvaging the rails, but wants the state to pay the cost of

replacing the pavement. He estimated that it would cost about \$7,000 to re-establish the pavement; however, recommended that the request be granted, provided the Railroad Company will assume this expense which, he says, is an obligation that the Railroad Company assumed in securing its franchise from the City of Portland.

Mr. Wm. A. Bowes, Commissioner of Public Works, Portland, was present, and advised that the federal government is interested in the salvaging of the rails in connection with its defense program. After discussion the Commission approved the Engineer's suggestion that the railroad company be allowed to salvage the rails, if it will pay the cost of replacing the pavement in a satisfactory manner, not later than July 10, 1941, so as not to interfere with the operations of the State's contractor on the Front Avenue project. Commissioner Bowes agreed to notify the Railroad Company of the action taken.

The Engineer reported a request from Harney County Court for an additional state contribution in connection with the construction of the Rome-Princeton Secondary Highway No. 442, near Follyfarm. He said that C.C.C. forces had been constructing this road, and it was intended to build a twenty-mile section thereof; however, they had completed only eight miles when the work was closed down, leaving a twelve-mile section on which the County desires to continue operations. In connection with this work, he said, the County is furnishing two tractors and has asked the State to pay for the gasoline for the operation of one of them, which the County estimates will not exceed \$500. He recommended approval of the County's request. The Commission approved the recommendation.

The Engineer also brought up for discussion the matter of the proposed improvement of South Sixth Street, Klamath Falls. He advised that the people of Klamath Falls are demanding pavement wide enough for four lanes of traffic which will require the widening of the right of way and the purchase of considerable expensive property, whereas the improvement as planned provided for only three lanes of traffic on the present 60-ft. right of way. He suggested that these people be told that the Commission will consider their request for four lanes of traffic if they will secure options from the property owners for all of the extra right of way needed, such options to be on the Highway Department's standard option form and provided further they will also furnish the Commission with bona fide bids from house movers for the removal of buildings from the new right of way. This matter was discussed in detail at considerable length, but no definite decision was reached. The Engineer was instructed and authorized to make further investigation, and to submit estimates of cost to construct the project on a 60-ft. right of way throughout the entire length of the proposed improvement and on an 80-ft. width right of way, and to present the same to the Commission for consideration at the meeting on June 12.

Mr. F. P. Ryan, City Recorder of Ontario, Oregon, was present and presented petitions signed by numerous property owners of that town, requesting the improvement of First Street, Ontario, as a state highway route. In

the discussion of this matter the question arose whether or not the majority of the property owners approve the rerouting of the highway along First Street. It was decided to hold a public hearing in Ontario some time in July to ascertain the attitude of the people in regard thereto. A definite date for the hearing is to be set later.

Mr. Don T. Meldrum, Head of the Land Division, U. S. Engineer's Office, Portland, was present in regard to securing a small tract of state-owned land adjacent to the Old Oregon Trail in front of the new Pendleton Air Base, on which to establish a radio station. He said that unfortunately the site that they originally selected is bisected by the new state highway which extends from the Old Oregon Trail to the army cantonment area, so they revised their plans and will now require only that portion of the original site that lies east of the new highway, and have eliminated from such area 1.31 acres immediately adjoining the Old Oregon Trail, as it was understood that the State wanted to retain this small tract. He further advised that, according to the government's agreement with the City of Pendleton, the city is to furnish the land needed for this radio site, so any arrangement for the sale of the tract would have to be consummated with the city. After discussion, the Commission authorized the sale of the property to the city, provided the city will pay a fair sum for the same. The Assistant Attorney was instructed to contact the city officials relative thereto. The Commission approved his suggestion that a price of \$100 per acre be paid for the land, and that the city also assume the payment of any damage that might be demanded by the present tenant. The final decision in the matter is to be rendered when the Attorney's report has been filed.

Mr. Paul B. Rynning, County Engineer of Jackson County, came before the Commission in behalf of Jackson County Court relative to the improvement of the Crater Lake Highway for a distance of seven miles north of Medford, where it passes through the site of a proposed U. S. Army cantonment. He exhibited a map showing the proposed cantonment area and needed highway improvements, and advised that request has been made that the highway improvements be completed within the next four months, so as not to interfere with construction of the cantonment facilities, which will get underway about that time. The matter was discussed at considerable length, but a decision was deferred pending personal inspection of the premises by members of the Commission and the engineering staff on the following Saturday, when they will be in that vicinity.

Mr. Wm. P. Ellis, Attorney for the Pierce Auto Freight Lines, was present and requested authority for his client to transport over the Pacific Highway, between the California State Line and Medford, as a temporary expedient, loads weighing in excess of the statutory weight limits. The Commission denied the request in view of the action taken by the 1941 Legislature on this subject.

The Engineer brought up for discussion the request of Clackamas County Court for the designation, as state secondary highways, of the county roads known as Canby-Marquam Road and Molalla-North Fork Road. He estimated

the cost to reconstruct the Canby-Marquam Road, which is eight miles in length, to modern standards, at \$250,000, and to repair the existing road at \$35,000. He also estimated the annual maintenance cost at \$17,750. To construct the Molalla-North Fork Road, which is 7.6 miles in length, he estimated would cost about \$260,000, whereas, the cost to repair the existing road is estimated at \$58,000, and annual maintenance expense at \$20,500. In this connection he also reported on the cost to maintain the county road in the city of Canby over which truck hauling of logs is being carried on. He estimated the expense of putting the present road in good condition at \$2,400, and the annual maintenance expense at \$1,500, as compared with an estimated cost of \$25,000 to rebuild the road on new alignment, including cost of right of way, as has been suggested by the County Court and the Canby city officials. He recommended the designation of the Canby-Marquam Road as a state secondary highway, and approval of an expenditure of \$35,000 this year, to put the existing road in good condition. He also recommended the expenditure of about \$2,000 to repair the existing road in the town of Canby, however, recommended against the placing of the Molalla-North Fork Road on the secondary highway system because, in his estimation, there is only a 1.9 mile section of this road between Molalla and the North Fork Bridge that meets secondary highway requirements. After discussion, the Commission approved the Engineer's recommendation, subject to confirmation by Commissioner Oliver, the work involved to be done with state forces. Resolutions covering this matter are to be adopted by the Commission at its first meeting, when all three Commissioners are present.

The Commission discussed briefly the Engineer's report on the matter of establishing free ferry service across the Columbia River at The Dalles, but deferred action thereon until its meeting on June 12.

The Engineer reported the cost to recondition and stabilize streets, other than state highway routes, in various cities throughout the State, over which general trucking is being carried on. He estimated such cost in 111 incorporated cities and towns at \$256,199. He suggested the adoption of a state-wide policy in such matter before making any commitments thereto. The suggestion was approved by the Commission, which instructed the Engineer and the Attorney to submit a recommendation as to such policy at the June 12 meeting of the Commission, such recommendation to include a list of the streets in the various cities and towns over which logging operations are being carried on. The Engineer was instructed to inform the City Council of Albany of the action taken, and to also notify Mr. Herman Kehrli, Executive Secretary of the League of Oregon Cities, of the intentions of the Commission in this regard.

Chairman Cabell brought up for discussion the complaint of Frank Golse, with respect to settlement for right of way required for the Lower Columbia River Highway, in Columbia County. The Assistant Attorney advised that Mr. Golse is a hard man to please; that the Highway Department has done everything and more than it promised to do in connection with this settlement, except the grading of a small area which is occupied by Mr. Golse's fruit stand and which cannot be done until the fruit stand is moved. He

further advised that Mr. Golse refuses to move the stand notwithstanding that he has been ordered to do so by Division Engineer E. A. Collier.

Chairman Cabell stated that he believed that the whole trouble lies in the fact that Mr. Golse is dissatisfied with the original settlement and wants more money for his land and believes that he has been treated unfairly. He suggested paying Mr. Golse an additional sum of \$50.00 to close the matter, and to let Mr. Golse perform the work involved. The suggestion was approved and it was so ordered.

The Commission adjourned at 12:30 p. m. and reconvened at 2:00 p. m. in the same room with the same persons present and participating.

A delegation from Klamath Falls, representing the Klamath Falls Chamber of Commerce, was present and discussed with the Commission the proposed improvement of South Sixth Street, Klamath Falls, present route of the Klamath Falls-Lakeview Highway. Mr. H. P. Bosworth, President of the Chamber of Commerce, headed the group, which included Earl Reynolds, Secretary of the Chamber; T. B. Waters, Chairman of the Highways Committee; Senator E. A. Cornett; A. D. Collier; Nelson Reed; and E. A. Thomas, City Engineer. They urged the Commission to improve this street for four lanes of traffic rather than for three lanes of traffic, as has been proposed. Mr. Bosworth said that whereas the present right of way is only 60 feet wide, many of the buildings situate adjacent thereto have been set back ten feet on each side, so that really the right of way is equivalent to 80 feet in width and, if the Commission should now decide to construct only a three-lane highway on the present right of way, he is convinced that the owners of these buildings will move their buildings forward and there would be no opportunity in the future to acquire the full 80-ft. right of way, except at excessive expense. The people of Klamath Falls, he said, feel that a three-lane highway will not make for safety; furthermore, it will force development to the south and east and will adversely affect all of the property along South Sixth Street. He also said that the owners of property along this street have agreed to relinquish a ten-foot strip along the front of their properties to facilitate the improvement on a four-traffic-lane basis. He referred to certain documents previously delivered to Mr. C.W. Parker, State Right-of-Way Agent. Mr. Bosworth also said that they would be satisfied with the limiting of four traffic lanes to the section south of the railroad viaduct.

The State Highway Engineer pointed out that the existing viaduct forms a bottleneck for a four-lane highway and that to widen this viaduct would be a costly undertaking; furthermore, the approaches to the viaduct are on a seven per cent grade, which becomes very slippery and dangerous for travel, when wet or frosty. He recalled that the Commission has made studies of a bypass route which, in his estimation, would greatly surpass a four-lane improvement on South Sixth Street, and, if such bypass route were constructed, it would relieve the congestion on South Sixth Street and would render the improvement of such street of minor importance. This is a major problem, he added, and full information in regard to the situation is not yet available, but he has been instructed by the Commission to report at the next meeting, on

the cost of the alternate improvements, one of which contemplates the construction of a three-lane highway south of the railroad viaduct, the widening of the viaduct, and the improvement of a two-lane highway from the viaduct to Market Street; and also to report the cost to construct an entirely new highway along the proposed bypass route. It was his thought that the improvement of South Sixth Street should not end at the viaduct, because of the bottleneck situation, but should extend to a convenient point north of the viaduct, and his report will cover the full distance, so the Commission will have the benefit of this information and a complete picture of the problem, when it makes its decision.

Mr. Bosworth advised that the right of way, from the viaduct to a point known as Washburn Way, will be donated by the property owners. Mr. Collier advised that the right-of-way agreements which the property owners have filed were prepared by competent lawyers and, in his estimation, are binding; furthermore, the signatures are bona fide.

Chairman Cabell advised that if this project were to extend to the south side of the viaduct, the Commission's problem would be comparatively simple; however, the presence of the viaduct complicates the situation and the question arises how much money the State should spend in remodeling the viaduct, if it also constructs the proposed new route, in view of the fact that South Sixth Street must be considered a city street, and its improvement would have to be on that basis. He pointed out that South Sixth Street is not a federal aid route, so there is a question whether or not federal aid grade crossing money could be used to finance the remodeling of the viaduct. He also stated that if everyone were in agreement with respect to the improvement of South Sixth Street as a three-lane highway, then the Commission would be in a position to proceed with its improvement.

Senator Cornett alleged that the viaduct is not an immediate problem because the worst condition exists beyond East Main Street, which is south of the viaduct and where a large volume of traffic turns off to go to the business district of Klamath Falls. He also said that the city would assume the responsibility of securing the additional right of way needed for a four-lane highway on South Sixth Street.

This matter was discussed at further length in considerable detail, during which it was brought out by the State Highway Engineer that it would not be possible in any event to contract the improvement before the end of the year, because of the work involved in completing the investigations and surveys, acquiring right of way, and in preparing plans and specifications. It was mutually agreed that the City of Klamath Falls will assume the responsibility of securing right of way options, such options to be taken on standard forms furnished by the State Highway Department. The Engineer was authorized and instructed to make a complete economic study of the alternate routes and to furnish the city with option forms and right-of-way descriptions as soon as possible.

The statement was made by one of the members of the delegation that they would be willing to wait a while for the improvement of South Sixth Street

if the Commission would assure them that it would build a four-lane street, and inquiry was made whether or not the Commission will proceed with the construction of a three-lane highway at once if the Commission finds it is not feasible to construct a four-lane highway. Chairman Cabell replied that the Commission hopes to be able to contract the improvement some time this fall, but there is nothing definite about it and, of course, the Commission is not in a position at this time to state whether it will be a three-lane or a four-lane improvement. He gave as his opinion, however, that the construction of a permanent highway on the proposed bypass route would be undertaken much sooner if the South Sixth Street improvement were constructed for three lanes of traffic. This concluded the conference with respect to this project.

Mr. Bosworth inquired as to the plans of the Commission for additional improvements on The Dalles-California Highway, and gave as his understanding that the Commission intends to place two jobs under contract this year, as follows: Reconstruction between Graham Marsh and Algoma, and between Terminal City and the foot of Algoma Hill. He urged the Commission to contract these projects at an early date, so as to insure their completion this year.

The Engineer advised that the projects are scheduled for contracting at the June meeting of the Commission, but whether or not the Commission will be in a position to take bids for them at that time depends upon the outcome of negotiations with the Railroad Company with respect to encroachments on its property. Mr. Bosworth inquired whether or not the Commission would object to the city consulting with the Railroad Company with respect thereto, and was assured by the Commission that such action on the city's part would be satisfactory.

Mr. Lloyd R. Crosby, General Manager of the Consolidated Timber Company, Portland, was present and requested authority from the Commission to conduct certain log hauling operations along the closed section of the Wilson River Highway, west of the summit of the Coast Range. He said that the Company has salvaged a large quantity of logs from highway right of way clearing operations and they would like to transport these logs to market at Tillamook before the highway is opened for general public use. Further, that it would take about four weeks to do the hauling. He also said that there is no highway work under way at the point where the logs are situated, and that they would immediately cease log hauling operations when the State's oiling contractor commences the work under his contract. The Engineer recommended approval of this request provided there are no objections on the part of Mr. E. J. Griffith, Administrator of the W.P.A. and, provided further, that the log hauling operations cease when the State's contractor starts his oiling work. The Commission approved the recommendation, and instructed the Engineer to contact the W.P.A. office immediately in regard thereto.

Mr. H. D. Farmer, Senior Highway Engineer, Public Roads Administration, was present and discussed with the Commission the matter of maintenance of the North Santiam Highway, between Detroit and the Santiam Highway junction. He said that the Forest Highway budget for the fiscal year 1941 contained

provision for maintenance and betterment of forest highway sections during the maintenance period for which the Public Roads Administration is obligated under cooperative agreements, and that under such provision it is planned to reseal a portion of an existing bituminous surface on the two-mile section of the North Santiam Highway, which is estimated to cost about \$1,000. This work, he said, would ordinarily be done as a "day labor" project by the Forest Service; however, it now appears to be to the best interests of all concerned if the State will perform the work with one of its oiling crews when working in that vicinity, due to the fact that the section is isolated, and the work could be performed by the State at less expense than it could be done under the original arrangement. He inquired whether or not the Commission would authorize the State's oiling crew to do this work if the Government would pay the cost involved. After discussion, the Commission approved such an arrangement, and thereupon signed a memorandum agreement with the District Engineer of the Public Roads Administration covering the matter.

The Commission discussed with W. H. Lynch, District Engineer, Public Roads Administration, matters pertaining to several forest highway projects. Others present and participating in the discussion were H. D. Farmer and T.M. Davis, Senior Highway Engineers; and R. L. Kellogg, Highway Engineer, representing the Public Roads Administration; and James Frankland, Regional Engineer, representing the U. S. Forest Service. Mr. Lynch advised that at a recent contract letting of forest highway projects, bids were taken for the reconditioning of the section of the Willamette Highway in the vicinity of Odell Lake, for which the sum of \$85,000 of forest highway funds has been budgeted; however, inspection of the bids received reveals that the job will cost about \$20,000 more than the amount provided, in view of which, if the job is to proceed as planned, it will be necessary to provide additional funds. He suggested, as an alternate proposition, the decreasing of the mileage of the project a sufficient amount so that the work could be done at a cost not to exceed the amount now available. He also suggested, if the Commission prefers that the work proceed as planned, the transfer of \$20,000 from the Port Orford South Forest Highway project which, according to present indications, cannot go forward this year on account of right-of-way difficulties. He agreed to recommend the construction of the Port Orford South project in next year's program if such sum is taken away from this project now. Mr. Frankland said that he would concur in the recommendation. After considerable discussion it was agreed by all that it would be advisable to reduce the length of the Willamette Highway project to five miles, and to re-advertise on such basis for bids to be received at a future time.

Mr. Lynch also reported that at such contract letting bids were also received for the construction of the Fox Valley Section of the Pendleton-John Day Highway, in Grant County, the low bid being \$10,000 in excess of the funds provided for this job. He suggested the transfer of some of the money from the Port Orford South project to make up this difference because it would not be practicable to cut down the length of this work. In the discussion of this matter the question arose whether or not "choke stone" base should have been called for in the specifications, it appearing that bids were taken on a different specification. The State Highway Engineer suggested that it

would be advisable to rewrite the specifications in that regard and require such class of material to be furnished notwithstanding that it would increase the cost of the project about \$20,000. It was his thought that a road built on such specification would provide a much better job, and materially decrease the annual maintenance cost, which is a state obligation, and that the additional construction expense is fully justified. After discussion, the suggestion was approved by all concerned, and it was mutually agreed to transfer the \$20,000 needed from the Port Orford South project.

The matter of constructing a bridge on the Tiller-Trail Secondary Highway, near its junction with the Crater Lake Highway, was discussed. Commissioner Clough recalled that provision was made in a previous forest highway program for this bridge, which is estimated to cost \$35,000, but the item was subsequently deleted from the list because of the limited amount of funds available, and the need for the money on more important work. However, it was agreed at the time that the bridge would be constructed in an early program. He suggested that it would be advisable, in view of the fact that the Port Orford South project cannot proceed, that the \$35,000 needed for the bridge be secured from such project. The suggestion was approved by all concerned, and it was so ordered.

The question of where to spend the \$105,000 remaining in the Port Orford South allocation was then discussed, and it was suggested that such moneys should be transferred to the Wapinitia-Warm Springs Forest Highway project, which is estimated to cost \$120,000, and the contracting of which, it was agreed at a previous meeting, should be postponed until this fall or next spring on account of Congressional reduction in the Forest Highway appropriation. After considerable discussion it was agreed by all that the \$105,000 should be held intact to finance the improvement of some section of the Oregon Coast Highway, and that the Wapinitia-Warm Springs project should be advanced in the construction program.

At 3:00 p. m. Chairman Cabell announced the following awards of contracts, for which bids were taken at the morning session, such awards having been previously approved by the Commission by unanimous vote:

"Astoria (Astor Street-Bond Street) Section of the Oregon Coast Highway, in Clatsop County. 0.18 mile grading and 0.40 mile paving. United Contracting Co., Portland, submitted the low bid for this work, in the amount of \$26,931.00. Warren Northwest, Inc., Portland, was second-low with its bid of \$28,388.00. There were two higher bids. The Commission refers all bids to the Engineer with power to award the contract to the low bidder, United Contracting Co., when certain conditions have been fulfilled.

"Vollmer Creek and Necanicum Junction Sections of the Wolf Creek Highway, in Clatsop County. 0.95 mile grading, surfacing and bituminous macadam. Porter W. Yett, Portland, submitted the low bid for this work, in the amount of \$32,652.50, based on the use of tar. He did not submit a bid based on the use of asphalt. Babler Bros., Portland, submitted the next-low bid, in the amount of \$34,080.00, based on the

use of tar. No bid was submitted by them based on the use of asphalt. There was one higher bidder. The Commission awards this contract to Porter W. Yett, at his low bid of \$32,652.50, based on the use of tar.

"Days Creek-Wright Ranch Section of the Tiller-Trail Secondary Highway, in Douglas County. 4.30 miles grading, surfacing and oiling. E. L. Rigdon, Hampton, submitted the low bid for this project, in the amount of \$46,549.75. The second-low bid was submitted by C. J. Eldon, Portland, in the amount of \$47,360.35. There were three higher bidders. The Commission awards the contract to the low bidder, E. L. Rigdon, at his bid of \$46,549.75.

"Oak Creek-Marks Ranch Section of the North Umpqua County Road, in Douglas County. 2.97 miles grading, surfacing and oiling, and construction of a bridge. E. L. Rigdon, Hampton, submitted the low bid for this work, in the amount of \$65,442.50. O. C. Yocom, Willamina, submitted the second-low bid, in the amount of \$65,681.75. There were two higher bidders. The Commission awards this contract to E. L. Rigdon, at his low bid of \$65,442.50.

"Dee-Woodworth Acres Section of the Hood River Secondary Highway, in Hood River County. 1.95 miles grading and 3.15 miles surfacing and oiling. Porter W. Yett, Portland, submitted the low bid for this work, in the amount of \$51,836.00. C. J. Eldon, Portland, was next low, with his bid of \$53,755.00. There was one higher bidder. The Commission rejects all bids for this project, and it is hereby ordered readvertised.

"Crabtree Corner-Lebanon Section of the Santiam Highway, in Linn County. 3.17 miles grade widening and paving. Warren Northwest, Inc., Portland, submitted the low bid for this work, in the amount of \$69,336.00. Parker-Schram Co., Portland, submitted the second-low bid, in the amount of \$74,697.00. There were two higher bidders. The Commission awards this contract to the low bidder, Warren Northwest, Inc., at its bid of \$69,336.00.

"Front Avenue (Washington Street-Clay Street) Section of the Pacific Highway West, in Multnomah County. 0.50 mile grading and paving. Edlefsen-Weygandt Co., Portland, submitted the low bid for this project, in the amount of \$223,790.80. Porter W. Yett, Portland, submitted the next-low bid, in the amount of \$241,740.50. There was only one other bidder. The Commission awards the contract to Edlefsen-Weygandt Co., the low bidder, at its bid of \$223,790.80.

"Morrison Street Bridge approaches and retaining walls on Harbor Drive in the City of Portland, in Multnomah County. L. H. Hoffman, Portland, submitted the low bid for the work, in the amount of \$78,005.00. Gilpin Construction Co., Portland, submitted the next-

low bid, in the amount of \$79,019.00. There were two higher bidders. The Commission rejects all bids and hereby orders the project readvertised.

"Umatilla River Overcrossing and other structures near Stanfield, on the Boardman-Stanfield Highway, in Umatilla County. C. J. Montag & Sons, Portland, submitted the low bid, in the amount of \$61,627.50, and Birkensier & Saremal, Portland, submitted the second-low bid, in the amount of \$61,755.00. There were three higher bidders. The Commission refers all bids to the Engineer with power to award the contract to the low bidders, C. J. Montag & Sons, when certain conditions have been fulfilled."

The County Court of Clackamas County, represented by County Judge E. L. Pope and County Commissioners C. W. Kruse and George G. Randall, and County Engineer D. T. Meldrum, was present in regard to the designation as state secondary highways of the Canby-Marquam County Road and the Molalla-North Fork County Road. They inquired as to what decision the Commission has reached with respect to such designations, and also with respect to the improvement of the county road in the town of Canby over which log hauling traffic is being carried on. Chairman Cabell advised that the Commission has approved the expenditure of about \$2,000 for the improvement of the present road through Canby and has agreed to designate as a state secondary highway an 8-mile section of the Canby-Marquam Road south from Canby to a junction with the Woodburn-Mount Hood Loop Secondary Highway, and such designation will be made at the first meeting when all three Commissioners are present, that being a legal requirement. Furthermore, the Commission has authorized an expenditure of \$35,000 of state funds to repair this 8-mile section, the work to be done this year with state forces. However, the Commission does not feel that it is justified in so designating the Molalla-North Fork Road, and has gone on record as being opposed to such designation. Chairman Cabell also mentioned that the decision of the Commission to designate the Canby-Marquam Road a state secondary highway is conditioned upon the county clearing the right of way of all encroachments including fences, buildings, et cetera, within the borders of the right of way, which, it is understood, is 60 feet wide. Judge Pope asked the Commission for a letter demanding the removal of such encroachments which, he said, would be helpful to the Court in meeting the Commission's requirements. The Commission approved the request and instructed the Engineer to forward such letter.

County Commissioner Kruse suggested that the Commission might see its way clear to designate a short section of the Molalla-North Fork Road between Molalla and a place known as Dickey Bridge, 1.9 miles in length, as a state secondary highway. However, the Commission declined to do this.

Mayor Roy L. Kinsman and Councilman Raymond Crowder, of Arlington, came before the Commission and asked for the construction of a road $1\frac{1}{2}$ miles long, leading from Arlington to the U. S. Army Airport, which is to be used in

connection with the Army's ammunition dump south of Arlington. The request was denied, it appearing to the Commission that this road is not for the use of the general motoring public and it being contrary to the policy of the Commission to expend state funds for the construction or improvement of roads that are not to be used, at least partially, by such general motoring public. It was the thought of the Commission that the road requested is for defense purposes, so the Federal Government should build it at Government expense.

Messrs. Ralph P. Schindler, City Recorder, and C. L. Willey, City Engineer, of Corvallis, came before the Commission in regard to the improvement of North 9th Street (Pacific Highway West) in the north city limits of Corvallis, and the widening of Third Street (Pacific Highway West), from Adams Street to the Mary's River Bridge. The Engineer estimated the cost to construct both projects at about \$50,000, and suggested that both jobs be done under one contract, when funds are available to finance the work. He pointed out, however, that the proposed improvement north of Mary's River Bridge involves the removal of some trees. Mr. Schindler advised that the City of Corvallis will assume the responsibility of securing the consent of the property owners for the removal of the trees.

Chairman Cabell advised that the Corvallis North improvement has considerable merit and is badly needed. He gave assurance that the North 9th Street project would go forward as soon as the Commission is able to finance it, and perhaps also the widening work requested north of the bridge, although the Commission is not in a position at the present time to make a definite commitment with respect to such work. The Engineer was thereupon authorized by the Commission to make surveys as may be necessary in connection with both projects and to prepare plans and specifications for each, so they will be ready when the Commission sees its way clear to advertise the work for bids.

Mr. Schindler then asked the Commission to authorize transportation of twelve logs, sixty feet long, over the Alsea Highway, from a point on the west side of Alsea summit to Corvallis. He said there would be four loads, and that the logs are to be used in connection with the construction of a bridge at Corvallis. He also said that the city's request for this privilege was presented to the Salem office of the Commission, but was denied because the loads could not be transported over Alsea Mountain without taking up more than half the road. After discussion, the Commission authorized the granting of such permit under the condition that the party doing the hauling will furnish customary insurance in the amount of \$50,000/100,000 public liability, and \$10,000 property damage, and will move the logs under the protection of three flagmen, one to proceed in advance of the movement, one to follow in the rear of the movement, and the third to ride the truck so as to guard against the side-swiping of other traffic.

The Engineer requested authority to purchase the following equipment:

- 1 Electrically-operated pump, 25-gallon per minute capacity.
Estimated cost \$605.00

1 Diesel power plant for Santiam Headquarters. Estimated cost \$1,895.00

1 Concrete vibrator for Bridge Department, at estimated cost of \$443.00, together with 1 three-beam platform wheelbarrow scales. Estimated to cost \$165.00

3 Concrete carts. Estimated cost \$44.00 each.

The Commission approved the request, and ordered that this equipment be purchased through the State Purchasing Agent, in accordance with the usual practice.

The Commission discussed the advisability of sending Miss Irene Payne to Walla Walla, Washington, during the period May 21 to May 24, inclusive, as a representative of the Travel and Information Department, at a travel show which is to be conducted at that place. The Engineer estimated the expense involved at \$30.00 and recommended approval. The Commission approved the recommendation subject to further approval by Governor Sprague.

The Commission also approved, upon recommendation of the Engineer, an out-of-state travel authorization for Landscape Engineer George Otten to attend a meeting of District No. 1, Public Roads Administration Roadside Improvement Committee, which is to be held in Spokane, Washington, during the early part of June, provided Governor Sprague also approves the expense.

The matter of designating certain representatives of the State Highway Department to attend the meeting of the Western Association of State Highway Officials, in Casper, Wyoming, from June 17 to 20, inclusive, was discussed. It was decided that all members of the Commission and the State Highway Engineer should attend this meeting, provided Governor Charles A. Sprague will approve out-of-state travel and the expense involved.

The Engineer brought up for discussion the matter of investigating prospective bridge sites along the Columbia River, as has been authorized by the 1940 Legislature. He estimated the cost of such investigations at \$50,000, and inquired whether or not the Commission desired to go to this expense which, he said, would be paid 50 per cent by the Washington Highway Department inasmuch as this is to be a joint investigation by both departments. The Commission approved the expenditure for this purpose provided the State of Washington will pay one-half the cost involved.

The Secretary presented a letter from Loyal M. Graham, Forest Grove, expressing appreciation for naming the Devils Fork Bridge, on the Wilson River Highway, in Washington County, "Graham Bridge" in his honor. The Commission was glad to be able to pay tribute to Mr. Graham in this manner, in view of the service that he has rendered the State of Oregon in connection with the good roads movement.

The Commission considered and ordered filed, for future consideration, a petition from residents of the town of Timber and vicinity requesting

continued state maintenance of the county road between Glenwood and Sunset Camp, after the Wolf Creek Highway has been completed and opened to general public use.

A telegram was presented from Stuart C. Hawley, Manager of the Texaco Travel Bureau, requesting assistance from the Commission in securing a federal appropriation of \$75,000 for use of the U. S. Travel Bureau, it being Mr. Hawley's opinion that the appropriation will not be authorized unless extreme pressure is brought to bear on Congress. The Commission referred this matter to the Engineer to discuss with Harold B. Say, Director of the Travel and Information Department. He was authorized to ask the Oregon delegation in Congress to vote for the appropriation, if he considers that advisable, after consultation with Mr. Say.

The Commission discussed a request from the Oregon Lumber Company for permission to transport logs across the John Day Highway and the Austin Spur Section of such highway, on Saturday afternoons, Sundays, and holidays, which is not allowed under the present rules of the Commission. The Commission granted the request upon recommendation of the Engineer.

The Engineer reported that, in accordance with authority previously granted him by the Commission, he has awarded contracts as follows, the conditions of the awards in each instance having been satisfied:

Grading Miner Creek-Spencer Creek Section of the Oregon Coast Highway, in Lincoln County. Bids taken April 4. Contract awarded May 12, 1941, to Berke Bros., low bidders.

Grading, surfacing and bituminous macadam on the Canyon Creek-Bryant Hill Section of Santiam Highway, in Linn County. Bids taken May 8. Contract awarded May 12 to Leonard & Slate, the low bidders.

Eugene Overcrossing-7th Avenue Section of the Pacific Highway, in Lane County. Bids taken May 9. Contract awarded May 21, 1941, to E. C. Hall Company, low bidders.

Rock Creek-Benton County Line Section of Alsea Highway, in Lincoln County. Bids taken May 8. Contract awarded May 21, 1941, to E. L. Gates, low bidder

Bully Creek-Vale Section of Vale-West Secondary Highway, in Malheur County. Bids taken May 8. Contract awarded May 21, 1941, to Tony Marrazzo, who submitted the low combination bid for this job and for the Cow Hollow Creek-Adrian Junction Section of the Vale-Adrian County Road

Cow Hollow Creek-Adrian Junction Section of the Vale-Adrian County Road, in Malheur County. Bids taken May 8. Contract awarded to Tony Marrazzo, low bidder, on May 21, on the basis of his combination bid for this job and the Bully Creek-Vale Section.

The Commission confirmed the awards as reported.

The matter of permitting the Detroit Power Company to maintain a power line along the North Santiam Highway, between the towns of Detroit and Idanha, had the attention of the Commission. The Secretary advised that the Company has already secured a franchise from the Marion County Court authorizing such construction, which franchise was issued by the Court after the filing of the application for the designation of this road as a state secondary highway. The Commission considered that it has no authority or jurisdiction in the matter in view of the fact that the road is still a county road under the jurisdiction of the County Court.

The Engineer requested authority to advertise for bids for the construction of a 75-ft. concrete viaduct across the East Fork of Dairy Creek, on the Wolf Creek Highway, in Washington County, which structure is estimated to cost \$8,000. He said that the W.P.A. grading schedule calls for the construction of an embankment in the vicinity of this creek, and it is quite necessary that the viaduct be constructed this summer; otherwise, the grading work would have to be postponed until next year. The Commission approved the request.

A petition signed by 340 residents of Powers and vicinity asking for the graveling and oiling of that portion of the Myrtle Point-Powers Secondary Highway north from the town of Powers to the crossing of the South Fork of the Coquille River, a distance of about 1.3 miles, had the attention of the Commission. The Engineer estimated that such work would cost about \$2,500. He pointed out, however, that the Commission plans to let a contract this fall for the oiling of the entire remaining unoled portion of this highway, and suggested that the improvement now requested be deferred until the oiling of the remaining section is contracted. The Commission approved the suggestion and so ordered.

A letter was presented from Richard Shore Smith, President of the First National Bank of Eugene, requesting the elimination of two sharp curves on the Springfield-Creswell Secondary Highway No. 322, near a place known as Natron. The Engineer advised that this matter has been investigated by Division Engineer Lytle, who advises that the elimination of these curves involves a 0.2 mile revision in the highway, and who estimates the cost of the work at \$6,000, including the expense of right of way. Mr. Lytle points out, he said, that this highway contains other curves that should be eliminated, and recommends, if any revision is made, that the entire section be reconstructed, which would cost about \$27,000. The Commission decided to defer this project for the time being.

The Assistant Attorney reported the status of the right of way budget, stating that of the \$600,000 budgeted for expenditure in 1941, there has been obligated \$338,500; and, that of the \$800,000 budgeted for the purchase of right of way along Front Avenue, in Portland, \$479,000 has been obligated. The Commission approved the report.

The Attorney requested authority to purchase certain parcels of real property that are needed for various highway improvements throughout the state. He submitted a list of such properties and offers that he recommended be paid

for each. After careful consideration the Commission approved the request and, by unanimous vote, adopted the following resolution in regard thereto:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed:

NOW, THEREFORE, BE IT RESOLVED that the several offers, or bases of settlement hereinafter enumerated be, and the same hereby are, approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

The Attorney also requested authority to condemn certain parcels of property that are needed for right of way and for which he has been unable to reach satisfactory settlements. He submitted a list of such properties, together with the amounts that he recommended be offered in condemnation, as follows:

<u>File No.</u>	<u>Name</u>	<u>Purpose Required</u>	<u>Recommended Offer</u>
2561-A	Orris Knapp	R/W	\$7,500.00
9286	Pacific Livestock Company	Gravel Pit	125.00
9336	Kenneth D. Dills	R/W	15.00
9347	Letitia J. Doughty	R/W	5.00
5861	Morris Wise (Nathan Wise, Trustee)	R/W	550.00

After careful consideration the Commission approved the offers and, by unanimous vote, adopted the following resolution authorizing the Attorney to proceed with condemnation:

WHEREAS, the State Highway Commission is authorized to locate, relocate, construct, reconstruct, maintain, widen, straighten, and otherwise improve state highways, both primary and secondary, and said Commission is also authorized to construct shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, and snow fences, and is authorized to acquire quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, and broadcasting stations, and is further authorized to develop, construct, improve, operate, and maintain parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, and other places of attraction and scenic value; and

WHEREAS, said Highway Commission is authorized to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property, or any interest therein, necessary

or deemed by the Highway Commission necessary for the accomplishment of any and all of the foregoing things; and

WHEREAS, in the judgment of the Highway Commission the several tracts or parcels of land hereinafter described are each and all necessary for the specific and particular purposes hereinafter specifically set forth;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the Commission does hereby find and declare that the several parcels of real property hereinafter described are each and all necessary for the accomplishment of the purposes hereinafter expressly and specifically set forth, which said real properties and the specific purposes for which the same are being acquired are described as follows, to wit:

Real property owned by Pacific Live Stock Company, which property is located in the northeast quarter (NE $\frac{1}{4}$) of Section 16, Township 23 South, Range 31 East, W. M., Harney County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 1 and is further identified in the records of the Highway Commission as file R 9286, and which property is being acquired for the purpose of securing roadbuilding materials therefrom for use in connection with the improvement of the Burns-Crane Highway;*

Real property owned by Kenneth D. Dills, which property is located in the Hiram Miday D.L.C. No. 40 in Section 35, Township 34 South, Range 6 West, W.M., Josephine County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 2 and is further identified in the records of the Highway Commission as file R 9334, and which property is being acquired for right of way purposes in connection with the Pacific Highway;*

Real property owned by Letitia J. Doughty, which property is located in the northwest quarter of the northwest quarter of Section 2, Township 35 South, Range 6 West, W. M., Josephine County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 3 and is further identified in the records of the Highway Commission as file R 9347, and which property is being acquired for right of way purposes in connection with the Pacific Highway;*

Real property owned by Nathan Wise, et al., which property is located in Lot 1, Block 11, McClures Astoria,

in the City of Astoria, Clatsop County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 4 and is further identified in the records of the Highway Commission as file R 5861, and which property is being acquired for right of way purposes in connection with the Oregon Coast Highway;*

Real property owned by Orris Knapp, which property is located in Government Lot 1 of Section 4 and in Lot 3 and the south 20 feet of Lot 4 of Block BB of Port Orford in Section 4, all in Township 33 South, Range 15 West, W. M., Curry County, Oregon, which property is more particularly described on the attached sheets and designated as Parcels Nos. 5 and 6 and is further identified in the records of the Highway Commission as file R 2561A, and which property is being acquired for right of way purposes in connection with the Oregon Coast Highway.*

2. That the Commission does hereby find and declare that each of the said described parcels of real property is necessary and acquisition of the same by the State is required for the specific purposes hereinabove set forth, and the said properties are being acquired for the express and specific purposes in this resolution set forth.

3. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real properties, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of the said real properties, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property or properties, whether said properties be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

4. That I. H. Van Winkle, Attorney General of the State of Oregon, and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they are hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement or agreements can be reached, then it is hereby further resolved that the Attorney General of the State of Oregon and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they hereby are requested to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary

and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated.

5. That this resolution be entered in full in the minutes and records of this Commission.

*(The detailed descriptions of the respective parcels of real property mentioned in this resolution are attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 12, under the heading "Real Property Condemnation Resolutions", and said descriptions by this reference are made a part of this minute entry to the same extent as if copied in full herein.)

The controversy with Mr. Chas. S. Bateman with respect to right of way needed for the Wilson River Highway across Mr. Bateman's property, in Washington County, was brought up for discussion by the Attorney. He recalled that the Commission previously authorized him to offer Mr. Bateman \$5,750 for this right of way, but Mr. Bateman has not as yet seen fit to accept the same. He was instructed by the Commission to again contact Mr. Wm. J. Hare, Hillsboro, Mr. Bateman's Attorney, and if he is unable to reach a satisfactory agreement as to the price to be paid for this property, to proceed with condemnation.

The Attorney reported receipt of a deed from Linn County conveying unto the state the right of way included in the county road which extends from the Santiam Highway to Cascadia State Park, which road is about 600 feet in length. The Commission accepted the deed, it being in conformance with previous understanding with the County Court.

The Commission discussed briefly with the Attorney matters pertaining to the Orris Knapp right-of-way controversy at Port Orford. However, no action was taken by the Commission in the matter, due to the fact that it has been decided to postpone construction of the Port Orford South project for the time being.

The Attorney brought up for discussion the resolution adopted by the Commission at its meeting on April 4, 1941, relative to the purchase of right of way and rights of access on the Wolf Creek Highway. He said that when this resolution was presented he understood that a right of way 200 feet wide was to be acquired, and that the resolution so states, and he has used the resolution in connection with certain cases in Court. However, he is now advised that the full 200-ft. right of way is not needed. He requested authority from the Commission to revise the resolution accordingly. The Commission approved the request.

Reconsideration was given by the Commission to the matter of acquiring right of way that is needed for the Stanfield-Boardman Highway across

property owned by W. P. Smith, et al, and in connection with which controversy has arisen with respect to the value of a duck lake. The Attorney recalled that Mr. Smith at one time offered to sell his entire holdings, consisting of 160 acres, including the duck lake, for the sum of \$4,000. He also said that the property has been appraised by the Assistant Attorney at \$3,008.20, and by Mr. Landon, right-of-way buyer, at \$2,645.60, although the value of the duck lake was not considered in either of these appraisals. Mr. Smith's demand, he said, amounts to \$2,600 for the right of way alone, including damages for ruining the duck lake. He recommended, in view of the circumstances, the acquisition of the entire 160-acre tract at \$4,000. The Commission approved the recommendation.

The Secretary presented a letter from the Honorable Earl Snell, Secretary of State, returning to the Commission unapproved, a voucher covering payment to Joseph Puzanowski Parker, et al, in the amount of \$78.58, representing interest allowed by the Trial Court in the condemnation case for the acquisition of right of way from Mr. Parker, et al. Mr. Snell called attention to an apparent conflict in the Commission's statement accompanying the voucher and advised that he cannot approve the voucher unless the claim bears the unqualified approval of the Commission. The Commission referred the matter to the Attorney to iron out the difficulty.

A letter was presented from the Port of Siuslaw, Florence, Oregon, relative to the planting of Holland grass on sand dunes south of the Siuslaw River at Florence. It was alleged that the sand dunes in their present condition are a menace not only to the Siuslaw River but also to the state parks, and the highway in this vicinity, and it was proposed that a soil conservation district be organized to combat this nuisance, and that the Highway Commission assist in the matter. The Engineer advised that this matter was investigated by Division Engineer K. D. Lytle, who reports that the sand on the south bank of the river, a short distance west of the highway bridge, is drifting into the river and is interfering with navigation. Further, that the dune is estimated to cover about six square miles and, while no details are available as to how much it would cost to plant the area, judging from the experience of the Highway Department elsewhere, it would cost about \$40,000. He said that Mr. Lytle recommended against the expenditure as does also Mr. Bishop, Maintenance Engineer, in which recommendations he concurs. The Commission approved the recommendation.

A letter was presented from J. H. Irvine, Secretary of the Lebanon Strawberry Fair Committee, requesting authority to detour traffic from Main Street (route of the Santiam Highway) during the progress of their Strawberry Festival, which is to be held in the early part of June. The Engineer recommended approval of the request subject to the condition that suitable detours are provided, and that flagmen are maintained to direct traffic. The Commission approved the recommendation.

The Attorney requested instructions relative to the selection of a date upon which the insurance policy that the State is to give to the railroad companies, in connection with the use of the Steel Bridge, in Portland, as a

state highway, shall become effective. The Engineer advised that the responsibility of the State would not commence until the traffic ramps at the ends of the bridge have been constructed, which will probably not be for a year or more. In view thereof the Commission decided to defer the setting of such effective date until later. The Secretary was instructed to again bring the matter up for discussion in January of 1942.

The Commission discussed the matter of joining with the Diking District of Coos County in the cost of constructing certain dikes and tidegates adjacent to the Oregon Coast Highway at North Slough, which matter was discussed briefly by the Commission at the previous meeting. The Attorney advised that the Commission has legal authority to cooperate financially with the District if it so desires. After discussion, the Commission indicated that it would join with the District in this matter if a suitable agreement can be reached, and accordingly instructed the Attorney to draw up a form of contract with the district covering the matter, for approval by the Commission at the next meeting.

The Engineer discussed with the Commission matters pertaining to the Federal Aid Secondary Highway Program. He advised that overruns and additions in the 1940 Federal Aid Secondary Program have taken up all of the Federal funds available in such program, so it will not be possible to finance the Wright's Point-Narrows project in Harney County and the Woodburn-Rock Creek project in Marion County, which are included in such program, but for which federal approval has not yet been obtained. He recommended, in view of the circumstances, that these projects be eliminated from the program for the time being and be placed in some other program for either state or federal funds. The Commission approved the recommendation subject to the condition that these projects will be given priority status in the next program.

The Engineer also recommended the transfer of the Kimberly East project from the 1940 Federal Aid Secondary Highway Program to the 1941 Federal Aid Secondary Highway Program, and the combination of this project with another project on the Kimberly East Section that is already included in such 1941 program. The Commission approved the recommendation.

The Engineer pointed out that the 1941 and 1942 Federal Secondary Highway programs tentatively approved by the Commission contain three projects that are not eligible for federal moneys because they were not included in the Federal Aid Secondary Highway System heretofore submitted to the Public Roads Administration for approval, such projects being as follows: Buck Hollow Section of the Shearers Secondary Highway, in Sherman County; Scio-Lyons Section of the Albany-Lyons Secondary Highway, in Linn County; Athena-Cold Springs Section of the Athena-Cold Springs Secondary Highway, in Umatilla County. He suggested that the Scio-Lyons project be dropped entirely from any program and that the other two projects be included in the program for state funds for construction next year. The Commission approved the suggestion and so ordered.

The Commission discussed and, upon recommendation of the Attorney, signed the following letter with respect to a controversy with the City of Scappoose involving sidewalk construction in front of property owned by Mr. I. G. Wikstrom:

Honorable Milton J. Butler,
Mayor of Scappoose,
Scappoose, Oregon.

Dear Sir:

There is pending between the Highway Commission and the City Council of the City of Scappoose a controversy which involves property owned by Mr. I. G. Wikstrom. It appears that a sidewalk was constructed by the City in front of Mr. Wikstrom's property, the cost of which improvement was made a lien against the property, but which lien has not yet been satisfied.

The Highway Commission in connection with the further improvement of the Columbia River Highway in Scappoose, and particularly that portion of the highway upon which the said Wikstrom property abuts, has found it necessary to take up and remove said sidewalk and in its stead construct another sidewalk to serve the said Wikstrom property. The City does not want to be in a position of losing the effect and value of its lien against the said property, and the purpose of this letter is to advise and insure the City Council of the City of Scappoose that if and in the event the City, after pursuing its full legal remedy and rights to recover on said lien, fails, and such failure is legally chargeable to the action of the Highway Commission in removing and destroying the public improvement or sidewalk which is the basis of said lien, then the Highway Commission will reimburse the City in the amount of loss sustained by reason of the removal or destruction of said sidewalk.

It is expressly understood, however, that the State shall not be liable to the City until the City has exhausted its full and complete legal remedy against the said real property, and I. G. Wikstrom as owner of the same, or his heirs, executors, administrators and/or assigns.

Yours very truly,

OREGON STATE HIGHWAY COMMISSION

The Engineer reported that Contracts Nos. 2395 and 2397, for the furnishing of crushed materials in stock piles have been completed according to the requirements of the contracts or modifications thereof, and that said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts and that said jobs are now ready for acceptance:

Contract No. 2395, with A. S. Wallace, for furnishing 7,000 cubic yards of crushed gravel in stock piles on the Millican-Brothers Section of the Central Oregon Highway, in Deschutes County. Completed April 22, 1941.

Contract No. 2397, with Babler Bros., for furnishing 10,300 cubic yards of crushed rock in stock piles on the Seaside-Wheeler Section of the Oregon Coast, Wolf Creek and Necanicum Highways, in Clatsop and Tillamook Counties. Completed May 9, 1941.

THEREFORE, BE IT RESOLVED, that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

The Commission considered and signed agreements, et cetera, as follows:

Letter form of agreement correcting erroneous reference in Clackamas Overcrossing agreement with Southern Pacific Company

Agreement with J. H. Chambers granting to Mr. Chambers the right to construct and maintain a spur railroad track over certain property in Cottage Grove

Agreement with J. W. and J. R. Hillstrom relative to the removal of the old bridge over Coalbank Slough near Marshfield upon completion of new structure under state contract

Agreement with the State Board of Higher Education relative to radio broadcasting programs, from June 10 to September 10, 1941

Agreement with Morrow County relative to Patterson Ferry Road which extends from the Columbia River Highway to the Columbia River

Agreement with T. W. Panter and Tidewater Associated Oil Company with reference to the T. W. Panter Service Station property at Bandon

Quitclaim deed conveying unto T. W. Panter and wife a portion of the old Oregon Coast Highway right of way at Bandon, Right of Way Transaction No. 5358

Agreement with Public Roads Administration relative to special maintenance work on the North Santiam Highway

Joint letter with W. H. Lynch, District Engineer, Public Roads Administration, relative to the allocation of 1942 Federal Lands Highway Funds

There being no further business to come before the Commission at this time, the meeting was adjourned at 6:30 p. m.

Commissioner

Portland, Oregon, June 12, 1941

The State Highway Commission met in regular session at 9:00 a. m. in the auditorium of the Public Service Building. Present were:

Henry F. Cabell, Chairman
Herman Oliver, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

Commissioner Clough was excused.

Bids, as follows, for highway construction work, sale of down timber on the Wolf Creek Highway, restaurant property at Bandon, and concession privileges at Silver Creek Falls Park, were opened and read in conformance with previously published notice, following which Chairman Cabell announced that awards would be made at 3:00 p. m. in the same room:

---------------	----------

The matter of conducting a public drawing to select the several insurance companies that should participate in the official bond of the State Highway Engineer during the coming year, starting June 15, 1941, had the attention of the Commission. The Commission decided that it would dispense with the drawing this year and would renew the bond in the same companies that had this business last year, notwithstanding a previous decision to conduct the drawing. It was also decided that a public drawing should be made next year, a month or two before the termination of the existing bond, to determine which companies should have the bond for the year starting June 15, 1942. All bonding companies that are authorized to do business in the State of Oregon are to be included in the drawing and ten companies are to be selected,

but it will be left with the management of each company to determine which of its agents shall share in the premium commission.

The Commission had under discussion the appointment of an additional member to the Advisory Board on Publicity Matters, and decided that it would be advisable to place on this board Mr. E. B. Aldrich, former State Highway Commissioner, who is particularly interested in the proper establishment and operation of this department, and on whose judgement the Commission heretofore largely relied in connection with publicity activities. Mr. Aldrich's appointment to this board was approved by the unanimous vote of the Commission.

The Engineer requested authority for Chief Locating Engineer Hollis W. Libby to attend, at state expense, the National Congress on Surveying and Mapping, which is to be held in Washington, D. C., June 16, 17 and 18, 1941. He estimated the expense involved at approximately \$350.00. The Commission approved the request subject to confirmation by Governor Charles A. Sprague.

The Engineer discussed with the Commission the matter of revising the classification for engineering positions and the salary schedules for each such position. He advised that many employees of the department have received offers of employment commanding salaries considerably in excess of those which they are now receiving and, in his estimation, in order to hold the present engineering organization, it will be necessary to increase their rates of pay. He submitted the following classifications for such employees and recommended approval of the same:

STANDARD CLASSIFICATIONS
ENGINEERING POSITIONS

June 1, 1941

Major Classification	Salary Range	Positions	Number Employed	Salary
Classification 6	\$550-700	Chief Engineer	1	\$600
Classification 5	450-550	Assistant Chief Engineer	1	500

		Stakemen	5	100
		Flagman	5	100
		Axemen	2	100

After due consideration, the Commission approved the new classifications by unanimous vote, and thereupon authorized the Engineer to revise the salaries of the persons affected, in accordance therewith, provided authority for such changes is granted by Governor Sprague.

The Commission also discussed the matter of providing a 10 per cent wage increase for hourly paid men, but deferred action on such matter until some time this fall.

The County Court of Marion County, represented by County Judge Grant Murphy, and Commissioners Jim Smith and Ralph Girod, and County Engineer W. C. Hubbs, was present. Judge Murphy gave as his understanding that the Highway Commission has under contemplation the designation as a state secondary highway of the county road between Mehama and Mill City. He pointed out that a short section of each end of this road lies within the borders of Marion County and advised that Marion County Court is desirous of having these two short sections placed on the secondary highway system along with the Linn County section. He was informed by Chairman Cabell that the Commission expects to take over this road as a state secondary highway as soon as right-of-way matters have been clarified and when all three members of the Commission are present, the latter being a legal requirement.

*Filed in Special Matters File - No. 3

JUN 12 1941

The County Court also asked the Commission to extend the improvement of the Salem-Silverton County Road from Middle Grove to Central Howell. They urged such improvement for 1941 construction, and guaranteed the right of way required therefor. Judge Murphy also asked the Commission to authorize a survey for the balance of this road from Central Howell to Silverton and that this portion of the road also be constructed as soon as possible.

The Engineer advised that the Commission has 40,000 budgeted for the Middle Grove-Central Howell Section, and contemplates the contracting of the work some time this fall, or sooner, if possible. He also stated that an additional sum of \$45,000 has been budgeted for 1942 construction on this road. The Court suggested the combining of both projects and construction this year. The Commission took the matter under advisement, however, authorized the Engineer to complete the survey to Silverton and report the results thereof to the Commission, when a definite decision will be rendered with respect to the entire proposed improvement.

Judge Murphy inquired as to the plans of the Commission relative to taking over as a state secondary highway a section of the North Santiam Highway between Detroit and the South Santiam Highway junction, and was informed that the Commission intends to so designate this road when standard width right of way throughout has been furnished and has been cleared of encroachments.

The County Court of Tillamook County, represented by County Judge Harland M. Woods and County Commissioners E. H. Lindsey and E. G. Anderson, was present and asked the Commission to authorize one of the state bridge crews to repair a steel bridge over the Nehalem River on County Market Road No. 9. Judge Woods advised that the county has no bridge crew capable of doing the work but the county is willing to pay the cost involved if the Commission will let one of the state crews do the work for the county. He estimated the cost of the work at \$700.00. The Commission approved the request, whereupon the county court presented its certified check in the amount of \$700.00 as advance payment. An agreement covering the matter was thereupon signed by all parties.

The county court then discussed with the Commission the matter of repairs to the Trask River Bridge on the Fairview-Clements Corner County Road, which road, except for the bridge work, is being improved by the state as a federal aid secondary highway project. The Engineer advised that inspection of the bids received by the Commission today for this work reveals that the bridge work, which the county is required to finance, is going to cost about \$7,000 rather than the estimated amount of \$6,000. He pointed out that the county court at a previous meeting of the Highway Commission agreed to assign \$6,000 of the county's share of the 1942 gasoline tax funds to pay this expense, and inquired if the county is willing to increase the amount of its contribution to \$7,000, in view of the bids received. After discussion, the county court agreed to pay the increased amount, one-half of which is to be paid out of the June 15, 1942 apportionment of gasoline tax monies by the Secretary of State, and the balance out of the December apportionment of such funds. An agreement covering the matter and assigning to the state such amount of the gasoline tax funds belonging to the county was thereupon signed by all parties.

JUN 12 1941

Mr. W. H. Lynch, District Engineer, Public Roads Administration, was present and brought up for discussion bids recently received by him for the construction of the Wapinitia Forest Highway project. He advised that inspection of the bids reveals that the low one is considerably in excess of the amount budgeted for the work and suggested, unless the Commission considers it advisable to provide state funds to make up the difference, that this project be deferred and that the moneys provided therefor be reallocated for the construction of another section of the Warm Springs Highway. He recommended approval of the Warm Springs improvement. The State Highway Engineer concurred and, in this connection presented a letter from Major General George A. White, Commanding Officer, Headquarters 41st Division, A.P.O., recommending improvement of the Warm Springs Highway as a road of important military significance. After discussion, the Commission approved the Engineer's recommendation and so ordered.

Mr. Walter Ransom, Eugene, came before the Commission in behalf of the Eugene Chamber of Commerce and discussed briefly matters pertaining to the "Route F" Highway which extends from Eugene to the Coast. He advised that the Lane County Court plans to budget a definite amount of money for next year's use in connection with this project and is willing to turn this money over to the state for expenditure on a 25 per cent county - 75 per cent state basis, because the county feels that it can secure more for its money in this manner than it can by doing the work as a W.P.A. project. Grading work on this highway, he said, will be completed up to each end of the tunnel by July 1st, and the county would like at least some contribution from the state within the next two years. Chairman Cabell pointed out that the tunnel construction is quite expensive, and that the outlook for future cooperation on this road is not very promising, particularly in view of the fact that the Commission contemplates spending a large sum of money for the improvement of the Pacific Highway between Eugene and Springfield, so the Commission is not in a position at this time to give the Eugene people any encouragement, either in connection with the tunnel construction or any other work on the "Route F" Highway.

The Commission adjourned at 11:40 a. m. and reconvened at 1:30 p.m. in the same room with the same persons present and participating.

The County Court of Clatsop County, represented by County Judge Guy Boyington and County Commissioner James Elliott, was present and discussed with the Commission matters pertaining to the proposed construction of the Warrenton Section of the Fort Stevens County Road, involving a crossing of the S.P. & S. Railroad wye tracks at grade, in Warrenton. Mr. Clifford A. Barlow, Warrenton City Manager and Police Judge, was also present and entered into the discussion. Judge Boyington advised that the county has acquired all of the right of way needed for this improvement so, as far as the county is concerned, the project can proceed as soon as the Public Utilities Commissioner has handed down his order with respect to the railroad grade crossing. The Engineer advised that surveys for the improvement are completed and that the project could be advertised for bids were it not for the fact that the order of the Public Utilities Commissioner has not yet been made with respect to the

grade crossing mentioned by Judge Boyington. He further advised that the Public Utilities Commissioner at one time held a hearing on this subject, but the Highway Commission was not notified, so was not represented at such hearing, and that it was brought out at the hearing that it would be possible to better the alignment of the highway at this crossing. He gave as his thought that the volume of traffic that uses the road does not justify the expense of bettering the alignment, and suggested that the Public Utilities Commissioner be asked to hold another hearing on the subject when arguments could be presented for the approval of the present proposed route. After considerable discussion the Commission approved the suggestion and authorized the Engineer to advertise the project for bids to be received as soon as the grade crossing matter has been clarified. It was agreed that Judge Boyington would ask the Public Utilities Commissioner for the new hearing.

Mr. C. L. Brown, Manager of the Salem headquarters of the Union Oil Company, was present in regard to the 16-ft. setback line ordered by the City Council of Eugene along Sixth Street, route of the Pacific Highway in Eugene. He said that the Union Oil Company operates a service station at the intersection of Sixth Street with Willamette Street, in which they have a large investment; that the company has occupied this property for ten years and is now desirous of further developing it but cannot do so as they would like, because of the city's ordinance requiring improvements to be set back sixteen feet from the property line. He asked the Commission to approve the rescinding of the city's ordinance, so as to allow the company the use of the entire area up to the property line. The Engineer advised that under the new arrangement Sixth Street is to be a one-way street for northbound highway traffic, southbound highway traffic being required to use Seventh Street, which is also a one-way street. He gave as his thought that it would be unwise for the city to cancel the setback ordinance because the setting back of the buildings, et cetera, would enhance the attractiveness of the street and, in addition, there is a possibility that conditions will change at some future time which would require the widening of the street and, in that event, considerable advantage would be gained and expense saved if no buildings were in the way of the improvement.

Mr. Brown made an urgent plea on behalf of the company following which the Engineer suggested that the Union Oil Company be allowed to use the area up to a distance of eleven feet from the curb line until such time as the area is needed for highway purposes, provided, however, that the company will move its facilities back to the sixteen-foot setback line at its own cost and expense when asked to do so. Such arrangement was acceptable to Mr. Brown and was also approved by the Commission by unanimous vote. The Engineer was instructed to inform the Eugene City Council of the attitude of the Highway Commission with respect thereto, and to suggest that, if the city approves such arrangement, the matter be covered by appropriate written agreement.

A delegation from Deschutes County, including the Deschutes County Court, represented by County Judge C. L. Allen, County Commissioners E. E. Varco, and Ole Grubb, H. H. DeArmond, H. A. Lynch, Don Peoples, and McKinley Stockman, Manager of the Oromite Company, came before the Commission in the

interests of the Terrebonne-Lower Bridge County Road. Judge Allen recalled that at a previous meeting the Highway Commission signified that it would construct an oil surface on this road as a federal aid secondary highway project if the county would acquire the right of way and grade and rock surface the road, which is seven miles in length, and would contribute the sum of \$5,000 in cash as cooperation on the oiling work; however, the county now finds that it is not able to handle the work because it does not have the equipment, and for the further reason that they are behind in their schedule of county road jobs for this year, so they would appreciate it if the Highway Commission would take charge of the entire improvement. The county, he said, would pay its share of the cost to the Commission in cash, but they would like to have the work done this year. This matter was discussed at considerable length and the following decision was reached: The Highway Commission will waive the requirement that the county contribute \$5,000 in cash, and will contract the surfacing and the oiling of the road when the county completes the grading work. In the event that the county is unable to complete the grading of the entire seven-mile section this year, then the Highway Commission will surface and oil that portion thereof that is graded by the county, provided the graded section is of sufficient length (not less than three miles) to justify the award of a contract for surfacing and oiling. It was agreed that if the county completes its grading work early enough this year so that a good oiling job can be done, then the Commission will perform the oiling work this year.

Judge Allen also asked the Commission to authorize the state's oiling crew, that will be working in the vicinity of Bend soon, to oil the Shevlin Park Road, three miles in length, which extends from the city limits to the park. He said that the county has already graded and graveled this section, and it is all ready for the oil; also, that the county will pay the cost involved. The Commission approved the request subject to the condition that it will not interfere with the state's oiling program, and provided the county will assign to the state a sufficient amount of its share of the gasoline tax fund to pay the costs. This was agreeable to the county court. The Engineer was thereupon instructed to prepare an appropriate form of agreement covering the matter.

Judge Allen also asked for the oiling of a three and a quarter mile section of the Tumalo-Deschutes Secondary Highway out of Tumalo, and a three and four-tenths mile section of the Tumalo-Cline Falls Secondary State Highway. The Engineer estimated the cost of the first project at \$17,000, and the cost of the second project at \$16,000. He recommended approval of the work and that it be contracted some time this fall. The Commission took the matter under advisement for consideration when the next construction budget is prepared.

Mr. Peoples inquired when the Commission plans to make its inspection trip over the Warm Springs Highway, and was informed that no definite time has been set for such inspection, but there is a possibility that it will be some time in July. The Secretary was instructed to notify Mr. Peoples when a definite date has been set for such trip.

Mr. Peoples also asked for a map showing the status of improvement on this highway. The Engineer was instructed to see that such map is furnished him.

Messrs. W. H. Lynch, District Engineer, and H. D. Farmer, Senior Highway Engineer, Public Roads Administration, again appeared before the Commission in regard to the improvement of the Timberline Road, which extends from the Mount Hood Highway to Timberline Lodge. Mr. Lynch advised that bids have been taken for the construction of another section of this road, but it appears that the cost of construction is going to exceed the amount of federal funds that have been budgeted to finance it. The overrun, he said, amounts to about \$12,000; also, that there are federal funds in the amount of about \$4,000 to apply thereto, leaving a deficit of \$8,000, which he asked the Commission to contribute from the State Highway Fund. The Commission approved the request, and thereupon signed an agreement with the Public Roads Administration covering the matter.

The Commission at this time discussed the bids that were received at the morning session. Particular attention was given to the projects on which only one bid was submitted. The question arose whether or not the Commission should deviate from its present policy, which prohibits the award of a contract upon the submission of only one bid. It was the decision of the Commission that it would accept bids in such category in connection with projects included in this day's letting, provided the bid does not exceed the Engineer's estimate by more than ten per cent, but hereafter single bids received for any one project will not be acceptable unless they do not exceed the Engineer's estimate by more than five per cent. If more than one bid is received for any project then the low bid for such project will be considered acceptable if it does not exceed the Engineer's estimate by more than ten per cent. The Commission adopted such procedure as its general policy to be followed hereafter at all future contract lettings.

At 3:00 p. m. Chairman Cabell announced the following awards of contracts, et cetera, bids for which were received at the morning session, such awards having been previously approved by the Commission by unanimous vote:

"Woodburn-Rock Creek Section of the Woodburn-Sandy Secondary Highway, in Clackamas and Marion Counties. 5.1 mile surfacing and oiling. E. H. Itschner, Molalla, submitted the low bid for this work, in the amount of \$20,452.00. Babler Bros., Portland, submitted the second-low and only other bid, in the amount of \$22,202.00. The Commission awards this contract to E. H. Itschner, at his low bid of \$20,452.00.

"Maintenance building at Condon, in Gilliam County. Viesko & Hannaman, Salem, submitted the low bid for this work, in the amount of \$9,888.00. Gregoire & Kinch, Portland, submitted the second-low bid, in the amount of \$9,988.00. There were two higher bidders. The Commission awards this contract to the low bidders, Viesko & Hannaman, at their bid of \$9,888.00

"Rock Creek Section of the John Day Highway, in Grant County. Construction of an 80-foot reinforced concrete viaduct and .046 mile of highway roadbed. Averill & Corbin, Portland, submitted the low bid for this project, in the amount of \$12,550.50, and A. Milne, Portland, submitted the only other bid, in the amount of \$15,669.50. The Commission awards this contract to Averill & Corbin, at their low bid of \$12,550.50.

"Dee-Woodworth Acres Section of the Hood River Secondary Highway, in Hood River County. 1.95 miles grading and 3.15 miles surfacing and oiling. Rogers Construction Co., Dayton, Washington, submitted the low bid for this work, in the amount of \$51,858.50, and Porter W. Yett, Portland, submitted the only other bid, in the amount of \$53,223.00. The Commission awards this contract to the Rogers Construction Co., at its low bid of \$51,858.50.

"Grave Creek-Jumpoff Joe Creek Section of the Pacific Highway, in Josephine County. 4.70 miles grading. Frank Pene-packer, Portland, submitted the low bid for this work, in the amount of \$313,317.00. McNutt Bros., Eugene, submitted the next-low bid, in the amount of \$330,313.00. There were four higher bidders. The Commission refers all bids received for this work to the Engineer with power to award the contract to the low bidder when certain conditions have been fulfilled.

"Warner Summit-and Creek Section of the Warner Secondary Highway, in Lake County. 2.84 miles grading and 6.91 miles surfacing. Only two bids were received for this work, the low bid being that of the Rogers Construction Co., Dayton, Washington, in the amount of \$51,963.50, and the second-low being that of Clifford A. Dunn, Klamath Falls, in the amount of \$62,814.00. The Commission rejects the bids for this project, and orders the work readvertised.

"Morrison Street Bridge approaches and retaining walls on Harbor Drive, in the City of Portland, Multnomah County. L. H. Hoffman, Portland, submitted the only bid for this project, in the amount of \$87,265.00. The Commission rejects this bid and hereby orders the project readvertised.

"Trask River-Peltz Corner Section of the Fairview-Clements Corner and Long Prairie County Roads, in Tillamook County. 3.75 miles grading, surfacing and bituminous macadam, and construction of two bridges. Only one bid was received for this work, being that of C. J. Eldon, Portland, in the amount of \$73,356.00. The Commission awards this contract to C. J. Eldon, at his bid of \$73,356.00.

"Pendleton-Adams Section of Oregon-Washington Highway, in Umatilla County. 11.3 miles roadside improvement. M. E. Myers & Son, Echo, submitted the low bid for this work, in the amount of

\$11,952.75. The only other bid submitted was that of E. L. Gates, Packwood, Washington, in the amount of \$12,159.90. The Commission awards this contract to M. E. Myers & Son, at their low bid of \$11,952.75.

"Boswell Ranch-Follett Ranch Section of the Wallowa Lake Highway in Union County. 2.78 miles grading, surfacing and oiling. Leonard & Slate, Multnomah, submitted the low bid for this work in the amount of \$86,611.00. E. L. Gates, Packwood, Washington, submitted the second-low bid in the amount of \$88,854.50. There were two higher bidders. The Commission awards this contract to Leonard & Slate, at their low bid of \$86,611.00.

Concession privileges at Silver Creek Falls State Park:

"The Commission received only one bid for this concession, being that of Frank H. Chatas, Salem. However, this bid could not be considered, due to the fact that it was not submitted in accordance with the specifications, therefore is rejected.

Restaurant Property at Bandon:

"Building No. 7857-A (Known as the Koffee Kup Cafe). Ilo H. Heaton, Coquille submitted the only bid received for the purchase of this building, in the amount of \$151.10. The Commission rejects this bid.

Down Timber on Wolf Creek Highway:

"The only bid received for the purchase of this down timber was that of J. T. Shields, Timber, in the amount of \$410.00. The Commission accepts the bid of J. T. Shields, and sells this timber to him at his bid of \$410.00."

Mr. A. W. McPherson, representing the Bonneville Power Administration, and Mr. John A. Brix, contract logger, came before the Commission in regard to the maintenance of a log dump on state property in the Columbia River at Corbett, Multnomah County. Mr. McPherson stated that the Bonneville Power Administration is building a high tension power line through the timber south of the Columbia River Highway in the vicinity of Bonneville, and that Mr. Brix has a contract to do the clearing, which involves the cutting of the timber and the hauling of the logs to the Columbia River. This power line, he said, is an important one and is to supply the aluminum plant at Vancouver. Furthermore, construction of the line must be completed by August 15. He gave as his understanding that the State Highway Commission objects to the maintenance of the log dump at Corbett, which is the only place along the river where Mr. Brix can dump the logs. He explained that the dump would consist of a small wharf built on a row of piling and dolphins, which would be installed near

the low water line along a section about 300 feet in length. He also said that arrangements have already been made with all other state and federal departments concerned for permits, but they evidently overlooked the State Highway Department, so they are now appearing before the Commission to ask this privilege as a temporary proposition.

Mr. Brix assured the Commission that the arrangement would not be permanent inasmuch as it is simply for this one operation. He said that he expected to complete the log hauling part of the work by December 1, 1941, and asked the privilege of maintaining the dump at Corbett until that time. The Engineer pointed out that there are possibilities that the Commission will place under contract before December 1 the construction of another section of the new Columbia River Highway at Corbett and, in that event, the log dump would undoubtedly interfere with the highway contractors' operations. After considerable discussion the Engineer suggested that Mr. Brix be allowed to maintain the log dump until November 1st, with the privilege of remaining there a longer period of time in the event highway construction operations are not then under way. The Commission approved the suggestion.

The Commission also authorized the granting of a permit to transport the logs over the Columbia River Highway from its junction with the Brower Road to the road that leads to Corbett Station, subject to the condition that flagmen be maintained on the highway where the loads enter and leave the highway and further provided that the logs will be cut in lengths not in excess of 40 feet.

Mr. Ryder L. Cormany, Portland, was present and asked the Commission to designate as a state highway a short road which extends northerly from the Wilson River Highway, near Glenwood, toward the town of Timber. Mr. Cormany advised that the road in question is an old private logging road but was discontinued as such about fifteen years ago. Since that time, he said, a number of people have built homes adjacent to it and are using it as a public road, although it has never been dedicated as such. He also said that there is an old bridge on this road near its junction with the Wilson River Highway, that is badly in need of repair and he is fearful that if an accident should occur on this bridge he would be held responsible and liable, and that his primary object in coming before the Commission is for relief from this responsibility. He was informed that this road does not meet the requirements of a state highway so the Commission cannot place it on the state highway system. However, suggestion was made that the County Court of Washington County might take it over as a county road in view of the fact that it serves a number of families. Mr. Cormany said that he would act on this suggestion, however, he asked the Commission to intercede with the county court in his behalf. The Commission denied the request as a matter of policy.

The Engineer asked the Commission to adopt a policy covering the issuance of temporary permits for operation over state highways of vehicles that exceed the weight and dimension limits specified by statute. He particularly referred to permits for the transportation of RD-8 Caterpillar tractors and similar equipment used by highway contractors. He submitted a list of regulations covering such movements, as follows, which the Commission approved:

POLICY GOVERNING ISSUANCE OF TEMPORARY PERMITS FOR THE OPERATION
OF VEHICLES EXCEEDING LEGAL HEIGHTS AND DIMENSIONS

1. Individual axle loads may exceed 18,000 pounds but shall not exceed 19,000 pounds.
2. The gross weight of any group of axles spaced eighteen (18) feet or less apart shall not exceed that determined by the formula $715 \times (L+40)$, provided that the gross weight of any individual axle in such group shall not exceed 19,000 pounds. (This is equivalent to the gross weight provided by the formula $650 \times (L+40)$ plus ten (10) per cent.)
3. The gross weight of any vehicle or combination of vehicles having an overall wheel base of more than eighteen (18) feet shall not exceed that determined by the formula $750 \times (L+40)$, except that when "L" is less than 45 feet the formula $775 \times (L+40)$ may be used.
4. The tire width of any individual wheel or axle shall be sufficient to provide one inch of tire width (manufacturer's rating) for each 600 pounds of the gross weight of such wheel or axle.
5. The maximum height of any vehicle and load shall not exceed fifteen (15) feet, where the overhead clearance permits such height.
6. The maximum width of vehicle and load shall not exceed twelve (12) feet and the maximum length of vehicle and load, involving an overwidth, shall not exceed sixty (60) feet.
7. (Incorporate rules concerning logs heretofore adopted by the Commission on May 8, 1941.)
8. Any application to move any vehicle or combination of vehicles and loads exceeding the weights and dimensions set forth in the above rules must receive the consideration of the State Highway Commission.

The Commission authorized the issuance of permits under such regulations covering isolated movements only. Requests for permits that do not come within the scope of such regulations shall be referred to the Commission for instructions.

Chairman Cabell reported a gasoline advertisement encroachment on the right of way of the Pacific Highway West (Barbur Boulevard) near the intersection of Northwest 19th Avenue and 30th Street, Portland, said advertisement consisting of an old automobile. He said that this detracts greatly from the appearance of the highway, and in his estimation, should be destroyed. The

Engineer was thereupon instructed to ascertain the exact location of the sign and to pass the information on to the Attorney who was instructed to order the sign taken down if the Commission has control over it.

The Engineer requested authority to purchase one hydraulic floor jack, costing \$50.00, for use at the Portland Division Headquarters in greasing trucks, changing tires, et cetera. The Commission approved the request and ordered that the jack be purchased through the State Purchasing Agent.

The Engineer reported on the complaint of A. B. Quine, Manager of the Cornucopia Gold Mines, with respect to the condition of the Halfway-Cornucopia Secondary State Highway, in Baker County. He recommended an expenditure of about \$9,000 for the improvement of this road by sloping, constructing culverts and some surfacing, the work to be done this fall with state forces, when they are available. The Commission approved the recommendation.

The Engineer also reported the cost to construct a light mat oil surface on the newly resurfaced section of the Santiam Highway between Foster and Cascadia. He estimated the cost of such work at \$10,000 and recommended approval of the expenditure, the work to be done with state forces. The Commission approved the recommendation.

The matter of recoiling the Santiam Highway between Detroit and the South Santiam Highway junction was brought up for discussion by the Engineer. He advised that the present oiled surface is very thin and will not stand up under the traffic that uses the road, in fact the present surface is simply a series of patches from one end to the other and should be recoiled throughout its entire length. He pointed out that the Commission intends to designate this road as a state secondary highway as soon as the counties clear the right of way of encroachments, which it is expected will be done shortly, and recommended, in view thereof, and for the further reason that the road must be oiled next year at the latest, an expenditure of about \$12,000 to provide suitable oiling rock for the purpose. The Commission approved the recommendation and authorized the Engineer to advertise the project for bids to be received early this fall.

The Engineer reported briefly on matters pertaining to the proposed improvement of South Six Street, Klamath Falls, the route of the Klamath Falls-Lakeview Highway. The Commission ordered a full report on this matter for the next meeting.

The State Parks Superintendent, Mr. S. H. Boardman, was present and reported on the following park matters:

Parks Department financial statement:- The Parks Superintendent submitted a written report showing amounts budgeted for expenditure in 1941 for betterment and maintenance of parks, including a statement of expenditures made for acquisition of park areas up to June 1, 1941, totalling \$44,790.94. The report also included a list of authorized obligations totalling \$47,930.00. The Commission approved the report and ordered it filed.

Petition from Columbia Grange regarding the designating of the county road through Talbot State Park a state secondary highway:- The Parks Superintendent advised that this is the only roadway entrance into the state park and, in his estimation, it would be a fine thing if it were rocked and oiled and if a parking place for automobiles could be provided adjacent thereto. The Commission referred the matter to the Parks Superintendent for further investigation and report.

Addition to wayside park on Mount Hood Highway:- The Parks Superintendent recommended the purchase of a 20-acre tract described as the South half (S $\frac{1}{2}$) of Lot 16, Section 3, Township 1 North, Range 10 East, W. H., Hood River County, at \$160.00. He advised that the tract is owned by Hood River County, which acquired it for the amount of the taxes, that it adjoins a wayside parking area that the Commission is now buying and is needed for the proper future development of the park. The Commission authorized the purchase of this tract.

Petition to operate store and Post Office in Cascadia State Park:- The Parks Superintendent presented a petition from citizens of Cascadia requesting that a location be made available to persons now operating Cascadia store, for the purpose of erecting a building on the park premises to contain a store, Post Office and telephone switchboard, as an accommodation to the general public. The Commission denied the request as a matter of policy.

Status of C.C.C. camps in state parks:- The Parks Superintendent reported the termination on June 1st of two C.C.C. camps located at Woahink Lake and Saddle Mountain, leaving only two camps in operation, one being at Silver Creek Falls State Park and the other at Short Sand Beach State Park, although a spike camp of about thirty men from the Short Sand Beach Camp has been transferred to the Saddle Mountain Camp to continue road construction in this area. He further reported that he has heard a rumor to the effect that the camp at Woahink Lake is to be used as a "conscientious objectors" camp, although he has no definite information to that effect. The Commission approved the report but ordered that full reports on each camp be sent to each Commissioner for further study.

Proposed park adjacent to the Oregon Coast Highway at the California State Line:- The Parks Superintendent reported receipt of a letter from California interests reviving a plan for the establishment of a joint state park at this location. He said that the area contains about 160 acres and can be purchased from the owner, Mr. W. L. Crissey of Brookings, for \$10,000. The Commission confirmed its previous decision in the matter not to acquire this property at the present time because funds for park purposes are limited and, in the opinion of the Commission, there are other locations of more importance. The Commission agreed to reconsider the matter on its merits in the event the California interests push it.

Acquisition of government-owned property at Tillamook Head, in Clatsop County:- The Parks Superintendent requested authority to acquire from the Federal Government 109.39 acres of land at this location which, he said, can be purchased at \$1.25 per acre, or a total of \$136.74. He recalled that the Commission petitioned the government for this area a couple of years ago under

the Recreational Act and that the government has offered to sell it at the rate of \$1.25 per acre. The area, he added, consists of two separate tracts, one described as Lots 2, 3 & 4, in Section 31, Township 6 North, Range 10 West, W. M., and the other as Lot 2 in Section 1, Township 5 North, Range 11 West, W. M. The Commission authorized purchase of both areas.

Proposed park at Big Tree, in Clatsop County:- The Parks Superintendent reported that he inspected this proposed park in company with a committee of interested Seaside residents and finds that it is located in the southwest quarter of Section 7, Township 5 North, Range 9 W., W.M., about three miles south of Cannon Beach Junction; further, that to reach this site one is required to travel about five miles over a logging road. He estimated that it would cost about \$30,000 to build a suitable road to the tree, including construction of a bridge over the Necanicum River, and that it would require an additional expenditure of about \$10,000 to provide a caretaker and living quarters for him. He recommended against the project. The Commission voted unanimously not to acquire the property in view of the expense involved.

Removal of timber from Cape Arago State Park:- The Parks Superintendent recommended execution of an agreement with the County Court of Coos County and the prior owners of Cape Arago Park relative to removal of timber from this area. He explained that when the state acquired the tract provision was made in the deed that the timber should not be removed; however, since that time a forest fire ravaged a part of the tract, destroying some of the timber, and it was thought advisable at that time to sell the burned timber to a prospective purchaser, which was done, and the proceeds were deposited in the state highway fund. Recently, he said, complaint has been filed on the grounds that the state violated the provisions of the original agreement so, in order to clarify the situation, it was thought best to enter into a supplemental agreement with the parties interested, providing for the sale of the timber. He presented an agreement covering the matter which the Commission approved and signed.

Proposed wayside area near Crawfordsville, in Linn County:- The Parks Superintendent submitted a request from Mr. C. P. Bishop, Salem, for the establishment of a wayside park adjacent to the Halsey-Sweet Home Secondary Highway and the Calapooya River, about three miles east of Crawfordsville. Mr. Bishop, he said, is very interested in this area for sentimental reasons, it being near his boyhood home. He exhibited a map showing plans for the development of the tract and gave as his thought that the cost to develop the area in accordance with the plans would not exceed \$500.00. It was the opinion of the Commission that wayside park areas should be located along main arteries of travel, rather than along secondary routes, and in view thereof the Commission decided not to purchase the area.

Timber strips along the Tiller-Trail Secondary Highway, in Douglas County:- The Parks Superintendent reported that he has contacted the Government officials relative to the preservation of wayside timbered strips through the O & C lands along the Tiller-Trail Highway and has been assured fullest cooperation; also, that he has secured from County Judge D. N. Busenbark of

Douglas County an offer of fullest cooperation possible in the matter of preserving the timber standing on the property owned by the county. The Commission approved the report.

Mr. J. R. Evans, representing the Evergreen Ski Club of Baker, Oregon, and Mr. George Calderwood, Director of the Baker Junior Chamber of Commerce, and Mr. Ward Erwin, Chairman of the Oregon Winter Sports Association, Portland, was present and presented an urgent plea for snow removal operations during the winter months on the roads leading to the Anthony Lakes recreational area. They advised that neither Baker County nor the U. S. Forest Service has equipment to handle such work and it is too big a problem for local citizens to finance. He estimated the annual expense as being about \$2,000. Mr. Erwin presented a letter from Mr. F. V. Horton, Assistant District Forester, in regard to the subject, together with other material bearing on the project. He asked the privilege of their club members to confer with the Commission with regard thereto in an endeavor to work out a satisfactory solution. He urged the Commission to give favorable consideration to this request, alleging that from personal inspection of all of the skiing grounds in the northwest, the Anthony Lakes area is the best natural skiing grounds of all, not excepting Sun Valley, in Idaho.

The Engineer advised that the roads leading to the Anthony Lakes area are not all state highways, and that considerable of the road mileage is too crooked and narrow to accommodate the Highway Department's snow fighting equipment. Chairman Cabell advised that the Commission is reluctant to spend state money for such purposes on a deadend road and, while Anthony Lakes district may be outstanding, there are other areas throughout the state in the same category as far as roads are concerned. The Commission wants to treat all alike, he added, and in an endeavor to do so has under consideration the preparation of a formula or yardstick by which each can be measured. The Commission is of the opinion, he said, that expenditures for purposes of this kind must be considered from the standpoint of motorists use, and if it is determined that the snow removal costs are excessive from the automobile traffic standpoint then, of course, the Commission would not feel justified in going to the expense. However, the Commission will be glad to confer with the members of the Evergreen Ski Club some time when it is in the vicinity of Baker. Mr. Evans inquired whether or not it would be possible for the Commission to hear a delegation when the Commission holds its public hearing in Ontario. The Secretary was instructed to inform Mr. Updegraff, President of the Evergreen Ski Club, when the plans for this trip have been effected.

The Commission adjourned at 5:30 p. m. to reconvene on the following morning in the same room.

Portland, Oregon, June 13, 1941

The State Highway Commission reconvened at 9:00 a. m. in the auditorium of the Public Service Building with all Commissioners present and participating. Also present were R. H. Baldock, State Highway Engineer; J. M. Devers,

Attorney, and H. B. Glaisyer, Secretary. Bids, as follows for highway construction projects were opened and read in conformance with previously published notice following which Chairman Cabell announced that the award of contracts would be made at 2:00 p. m. in the same room:

CORVALLIS-NEWPORT HIGHWAY
OAK CREEK BRIDGE WIDENING PROJECT

C. W. Reeve	\$9,991.00
Babler Bros.	10,364.00
Birkemeier & Sarenal	11,090.00
Barham Bros.	11,191.00

OREGON COAST HIGHWAY
GEARHART-SEASIDE SECTION - OILED ROCK FOOTPATH

Jed Wilson	\$7,865.00
J. C. Compton	8,768.00
C. H. Grimstad & T. Vanderveldt	9,263.00
River Bend Sand & Gravel Co.	9,341.60
Sam Orino	9,446.00
O. C. Yocom	9,550.00
United Contracting Co.	9,719.00
Hanson Bros.	10,976.25
Fuckenberg Construction Co.	12,045.00

THE DALLES-CALIFORNIA HIGHWAY
ALGOMA-TERMINAL CITY SECTION
GRADING, TOPPING, SURFACING & BITUMINOUS MACADAM

Frank Penepacker & Clifford A. Dunn	\$172,016.00
Colonial Construction Co.	172,524.00

OREGON COAST HIGHWAY
MINER CREEK-SPENCER CREEK SECTION - SPENCER CREEK BRIDGE

Harry I. Hamilton	\$22,830.00
C. J. Eldon	23,591.00
Frank Watt Construction Co.	24,516.00
Barham Bros.	25,064.00
Birkemeier & Sarenal	26,010.00
Tom Lillebo	27,344.00

FULTON CANYON-WASCO COUNTY ROAD
FULTON CANYON-LOCUST GROVE SECTION - GRADING, SURFACING & OILING

O. C. Yocom	\$50,394.00
Leonard & Slate	52,707.00

STARKEY SECONDARY HIGHWAY
MEADOW BROOK SECTION - GRADING AND TOPPING

E. L. Gates	\$31,460.50
Triangle Construction Co.	32,378.00
Vernie Jarl	35,979.50
Leonard & Slate	37,978.00
J. C. Papin	38,970.00

SUMMERSVILLE-ISLAND CITY ROAD
WEST RANCH-ISLAND CITY SECTION - SURFACING AND OILING

Norris Bros.	\$48,251.50
J. C. Compton	50,086.00

The Commission, by unanimous vote, approved the minutes of the meetings held on December 3, 4 and 5, December 17 and 18, 1940, and January 10, 1941.

The Engineer brought up for discussion the proposed widening of the Oswego Highway through the town of Oswego. He said that a traffic problem has arisen which makes it very desirable to provide a turn-around on the east side of the highway at its intersection with "B" Street, but in order to provide such turn-around it will be necessary to encroach upon the Southern Pacific Company's station grounds. He exhibited a map showing the proposed encroachment. The utilization of the encroachment, he said, would necessitate certain revisions in the facilities of the railroad company, which he estimated would cost about \$1,090.00, and he gave as his thought that the state should pay this expense in view of the fact that it is for the benefit of the general public.

In this connection the Engineer pointed out that the railroad company owns the strip of land between the highway and the railroad tracks. It was his thought that it would be advantageous to the highway from the aesthetic standpoint if the railroad company could be induced to retain ownership of such property, particularly in view of the fact that the proposed highway improvement includes a considerable expenditure for landscaping purposes and beautification. He read aloud a letter dated June 11, 1941, and directed to Mr. E. L. King, Superintendent of the Southern Pacific Company, with respect to the entire matter. After discussion the Commission approved the improvement as outlined by the Engineer, including the expenditure of \$1,090.00 needed to revise the railroad facilities. The Engineer was instructed to secure, if possible, an agreement with the Southern Pacific Company to the effect that the company will not dispose of any of its property lying between the highway and the railroad track.

The Assistant Attorney reported the status of the right of way budget. He advised that of the general budget for this purpose, amounting to \$600,000, \$364,000 has been obligated to date, and, of the \$800,000 provided

for acquisition of right of way for Front Avenue, in Portland, \$480,000 has been obligated to date. The Commission approved the report.

The Attorney requested authority to acquire certain parcels of real property that are needed for various highway improvements throughout the state. He submitted a list of such properties together with the prices that he recommended be paid for each. After careful consideration of each item the Commission approved the request and thereupon adopted, by unanimous vote, the following resolution with respect thereto:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as herein-after more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed:

NOW, THEREFORE, BE IT RESOLVED that the several offers, or bases of settlement hereinafter enumerated be, and the same hereby are, approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

The Commission gave special consideration to the items contained in the above resolution with respect to right of way needed for the proposed revision of the Columbia River Highway at Tongue Point, Clatsop County. It was pointed out that federal approval has not as yet been secured for the proposed highway improvement at this place, and in view thereof, the Commission instructed the Attorney not to close the options secured for such right of way until this project has been cleared from all standpoints. It was understood that the amounts contained in the resolution with respect to such properties are satisfactory.

The Attorney also requested authority to institute condemnation proceedings to acquire certain parcels of real property that are needed for various highway improvements and concerning which he has been unable to reach satisfactory settlements. He presented a list of such properties together with offers that he recommended be made in condemnation, as follows:

<u>File No.</u>	<u>Name</u>	<u>Purpose Required</u>	<u>Recommended Offer</u>
3872	Anos Smith	Right of Way	\$500.00
9342	R. V. Plumridge	" " "	10.00
9346	Charles R. Cooley	" " "	40.00
9453	H. C. Wyatt	" " "	260.00
9188	Manna Johnson	" " "	50.00
9187	William B. Lund	" " "	1300.00

After careful consideration of each of the items the Commission approved the offers recommended, and thereupon adopted the following resolution authorizing the Attorney to proceed with condemnation:

WHEREAS, the State Highway Commission is authorized to locate, relocate, construct, reconstruct, maintain, widen, straighten, and otherwise improve state highways, both primary and secondary, and said Commission is also authorized to construct shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, and snow fences, and is authorized to acquire quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, and broadcasting stations, and is further authorized to develop, construct, improve, operate, and maintain parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, and other places of attraction and scenic value; and

WHEREAS, said Highway Commission is authorized to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property, or any interest therein, necessary or deemed by the Highway Commission necessary for the accomplishment of any and all of the foregoing things; and

WHEREAS, in the judgment of the Highway Commission the several tracts or parcels of land hereinafter described are each and all necessary for the specific and particular purposes hereinafter specifically set forth;

NOW, THEREFORE, BE IT AID IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the Commission does hereby find and declare that the several parcels of real property hereinafter described are each and all necessary for the accomplishment of the purposes hereinafter expressly and specifically set forth, which said real properties and the specific purposes for which the same are being acquired are described as follows, to wit:

Real property owned by William B. Lund and Freda Lund, which property is located in Lots 10, 11, 12, 13, 14, and 15, Block 8, Van Dusen's Astoria. Clatsop County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 1 and is further identified in the records of the Highway Commission as file R 9187, and which property is being acquired for right of way purposes in connection with the Columbia River Highway;*

Real property owned by Manne Johnson, which property is located in Lot 6, Block 10, Van Dusen's Astoria, Clatsop County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 2 and is further identified in the records of the Highway Commission as file R 9188, and which property is being acquired for right of way purposes in connection with the Columbia River Highway;*

Real property owned by H. C. Wyatt and Maude Wyatt, which property is located in the Chas. Johnson D.L.C. No. 40 in Section 3, Township 12 South, Range 5 West, W.M., Benton County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 3 and is further identified in the records of the Highway Commission as file R 9453, and which property is being acquired for right of way purposes in connection with the Newport-Corvallis Highway;*

Real property owned by Amos Smith and Charles F. Smith, which property is located in Lots 3 and 5 ($S\frac{1}{2}$ of NW $\frac{1}{4}$) of Section 11, Township 34 South, Range 6 West, W. M., in Government Lot 6 (NW $\frac{1}{4}$ of SW $\frac{1}{4}$) of Section 11, Township 34 South, Range 6 West, W.M., and in Government Lot 3 (SE $\frac{1}{4}$ of NW $\frac{1}{4}$) of Section 11, Township 34 South, Range 6 West, W.M., all in Josephine County, Oregon, and is more particularly described on the attached sheets and designated as Parcels Nos. 4, 5, 6, and 7 and is further identified in the records of the Highway Commission as file R 8872, and which property is being acquired for right of way purposes in connection with the Pacific Highway;*

Real property owned by Charles R. Colley, which property is located in the west half (W $\frac{1}{2}$) of the northwest quarter (NW $\frac{1}{4}$) of Section 2, Township 35 South, Range 6 West, W.M., Josephine County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 8 and is further identified in the records of the Highway Commission as file R 9346, and which property is being acquired for right of way purposes in connection with the Pacific Highway;*

Real property owned by Robert V. Plumridge, which property is located in the northwest quarter (NW $\frac{1}{4}$) of the northwest quarter (NW $\frac{1}{4}$) of Section 2, Township 35 South, Range 6 West, W.M., Josephine County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 9 and is further identified in the records of the Highway Commission as file R 9342, and which property is being acquired for right of way purposes in connection with the Pacific Highway.*

2. That the Commission does hereby find and declare that each of the said described parcels of real property is necessary and acquisition of the same by the State is required for the specific purposes hereinabove set forth, and the said properties are being acquired for the express and specific purposes in this resolution set forth.

3. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real properties, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of the said real properties, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property or properties, whether said properties be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

4. That I. H. Van Winkle, Attorney General of the State of Oregon, and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they are hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement or agreements can be reached, then it is hereby further resolved that the Attorney General of the State of Oregon and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they hereby are requested to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated.

5. That this resolution be entered in full in the minutes and records of this Commission.

*(The detailed descriptions of the respective parcels of real property mentioned in this resolution are attached to the original resolution on file in the office of the State Highway Commission, Salem,

being Resolution No. 13, under the heading "Real Property Condemnation Resolutions" and said descriptions by this reference are made a part of this minute entry to the same extent as if copied in full herein.)

The Attorney brought up for discussion the controversy with the Southern Pacific Company relative to right of way, and other items in dispute, needed for re-establishing the railroad company's tracks between Eugene and Springfield, necessitated by improvement of the Pacific Highway between these points. This matter was discussed at considerable length and, as a result, the Commission decided to accede to the railroad company's demand with respect to the right of way and to limit its discussions with the company to other controversial items.

The Commission discussed briefly, but deferred until the next meeting, a decision with respect to right of way needed for the improvement of The Dalles-California Highway (Klamath Falls-Weed Highway) south of Klamath Falls, involving property owned by Mrs. Hecker who has plans to subdivide this property but wants the layout to conform to the permanent highway improvement.

The Engineer reported that the contractor on the Front Avenue Project in Portland (Edlefsen-Weygandt Company) has been collecting rentals from tenants of property that has been acquired as right of way for this improvement and it is his understanding that approximately \$2,000 has already been collected. He gave as his thought that this is contrary to the original plan and, in any event, if rentals are to be charged, the amounts collected should be paid over either to the city or the state. The Commission decided to secure from the contractor the moneys collected by him for this purpose and to reimburse those from whom it was secured. The Attorney was instructed to write the contractor stating that the Highway Commission is holding him accountable for all moneys collected as rentals and that in the future, when something of this nature arises, he is to take it up with the Commission before putting it into effect. The Engineer was instructed to secure the moneys from the contractor and pay it over to the parties from whom it was collected. He was also instructed to notify the tenants to vacate the premises at once.

The adoption of a policy with respect to payment for segments of right of way which were apparently not paid for by the counties in the first instance had the attention of the Commission. The Engineer advised that there is an increasing number of instances wherein the county either failed or neglected to pay for right of way and the owners are now trying to collect. In most cases, he said, the statute of limitations has expired and the question arises whether these claims should be investigated, notwithstanding the statute of limitations. He said that the payment of state funds in every instance would involve an expenditure of a large sum of money. He suggested payment of the claims with state funds as they arise, provided the amounts are small, and that in cases where the amounts involved are large they be referred to the Commission for special instructions. The Commission approved the suggestion and so ordered.

The Attorney reported that he has been endeavoring for some time to secure removal from the right of way of the Oregon Coast Highway near the bridge at Waldport a building owned by Frank H. Hilton, Portland, but, up to the present time his endeavors have been without effect, although, in a recent letter Mr. Hilton advises that he expects to have the building moved within 30 days. He requested instructions. The Commission decided to take no action unless Mr. Hilton fails to remove the building by the time he has promised to move it.

The matter of leasing the moorage rights in the Willamette River in front of state-owned property in Oregon City was discussed. The Attorney advised that the Crown Zellerbach Company wishes to lease these rights and is willing to pay for this privilege the amount specified in the proposal they submitted to the Commission some time ago for such privilege, which proposal the Commission rejected as being too low. The Attorney was instructed to inform the Crown Zellerbach Company that the Commission is willing to lease the rights at this point if the company will pay for the same the amount heretofore determined by the Commission as the value of the rights. In the event the company refuses to pay such sum, then they are to be ordered to discontinue the mooring of their logging rafts at this point, if investigation reveals that they are now using the state's property without permission. The Attorney was further instructed to investigate and secure information as to how much rental is being paid for similar moorage rights in Oregon City. The Engineer was instructed to investigate whether the state property is now being used by the company in connection with its operations.

The Attorney brought up for discussion the controversy relative to the Matt property in Klamath Falls. This property, he said, is a small triangular tract situate at the junction of The Dalles-California Highway and the Green Springs Highway near the west city limits of Klamath Falls, and was acquired by the county for right of way for the highway improvement. The grantors, he said, allege that the county has not lived up to the provisions of the deed of conveyance, and are claiming ownership to the portion that was not actually used as highway right of way. He said that he inspected the deeds and, according to his interpretation, the grantors really have no reversionary rights. However, if the state does not absolutely need all of the land, it might be advisable to deed back to the original grantors such portion as is not needed for highway purposes. The Commission referred the matter to the Engineer for investigation and report.

The Commission considered and approved a resolution from the County Court of Jefferson County with respect to the use of the section of the old state secondary highway between Madras and Prineville in the vicinity of Lamonta, which section has been abandoned by the state as a state highway because of reconstruction of the highway on other alignment. According to the resolution, the county elects to let the property revert to the adjoining and abutting property owners.

The Commission also considered and approved a resolution from the County Court of Sherman County wherein certain portions of the Grant-Rufus Section of the old Columbia River Highway are abandoned and allowed to revert

to the adjoining and abutting property owners, such portions heretofore having been abandoned by the State Highway Commission for state highway purposes on account of reconstruction of the highway on other alignment.

The Commission approved and signed a revised statement directed to the Secretary of State relative to payment of the interest charge, in the amount of \$78.58, arising out of the right-of-way condemnation case, Oregon State Highway Commission vs. Joseph P. Parker, et al. The Secretary was instructed to attach such revised statement to the voucher and resubmit it to the Secretary of State for payment.

The Engineer discussed with the Commission the controversy with Ivan Phipps, Attorney, Portland, relative to the use of a portion of the right of way of the Denver Avenue approach to the Interstate Bridge, in connection with a service station business that he proposes to establish on adjacent private property. The Engineer advised that Mr. Phipps alleges that the deed conveying rights with respect to the right of way contains a provision that gives him certain rights in the use of the property. He pointed out that it is contrary to the policy of the Highway Commission to allow encroachments on highway rights of way and, in this particular instance, he advised that the extra width right of way will be needed for the widening of the highway pavement at some future time. He recommended that Mr. Phipps be not allowed to use any portion of the right of way, and that, if investigation of the deed given by Mr. Phipps to Multnomah County really contains a provision such as he alleges, the Attorney be authorized and instructed to secure the invalidation of such rights by condemnation, if necessary. The Commission approved the recommendation and instructed the Attorney to write Mr. Phipps in accordance therewith.

The Attorney brought up for discussion the claim of Paul Gilbaugh for damages to his property situate adjacent to the Mt. Hood Highway, by reason of the construction thereon of certain cables, concrete work, et cetera, as an aid to flood prevention. He said that Mr. Gilbaugh states that such flood control devices were placed on his property without his consent and are in a location that prevents access to a stream nearby. Furthermore, should it be necessary to repair such devices, the State's employees would have trespassed upon Mr. Gilbaugh's property. Mr. Gilbaugh, he said, wants the devices removed so he can have access to the stream, although he has stated a willingness to sell the property to the state, if the Commission prefers to settle in that manner. The matter was discussed briefly, but action thereon was held pending an additional report from the Attorney as to the amount of the damages that Mr. Gilbaugh is seeking.

Reconsideration was given by the Commission to the request of Douglas County Court for a contribution of \$1,000 of state funds to apply on the purchase price of a gravel bar located in the North Umpqua River adjacent to the North Umpqua Highway (County road) which is being constructed by the state as a federal aid secondary highway. It was recalled that County Commissioner H. B. Roadman appeared before the Commission at its meeting on May 9, with respect to this matter and advised that the county has an option to purchase

the property for \$3,000; that this is the only gravel bar in this vicinity suitable for road-building purposes and that material must be secured from this bar for the further improvement of the North Umpqua Highway, and it was for that reason that the county is asking the state to assume a portion of the expense involved. A letter was presented from the county court, dated June 10, 1941, advising that the county court will execute a deed of conveyance to the state for an undivided one-half interest in and to this property, which is known as the Blakley Gravel Bar, if the State Highway Commission will pay the county the sum of \$1,000. The Engineer recommended acceptance of the county's offer. The Commission approved the recommendation.

The Attorney reported receipt of a letter from Mr. L. H. Mills, Portland, representative of the Miami Corporation, from whom the Commission is buying timber strips along the Salmon River Highway, in which letter Mr. Mills states that the Miami Corporation: " * * * is willing to extend the date of payment for the highway strip north of the road until August 1, 1941, providing you will forward a certified copy of the resolution from the Highway Commission at its next meeting in a form which would constitute a firm commitment." It was the opinion of the Commission that such request is reasonable and is in line with previous understanding with the Miami Corporation. The Commission thereupon adopted the following resolution with respect thereto, by unanimous vote:

WHEREAS, the State Highway Commission has conducted negotiations with the Miami Corporation looking toward the acquisition of some timbered areas along the Salmon River Highway; and

WHEREAS, in connection with said negotiations a cruise of the timber was made jointly by the Highway Commission and the owners of the property, as a result of which cruise it was determined that there is standing on said real property the following species of timber in the amounts herein set out:

5,421 M. feet of Fir
287 M. feet of Spruce
60 M. feet of Cedar
478 M. feet of Hemlock

AND, WHEREAS, it has been agreed by the owners and the Highway Commission that the purchase price of said timber shall be fixed at \$23,550, which sum is computed at the rate of \$4.00 per thousand for Fir, Spruce and Cedar, and \$1.00 per thousand for Hemlock; and

WHEREAS, by act of Congress the Federal Government is authorized, in cooperation with the State of Oregon, to use federal funds for the purpose of purchasing timbered areas such as the areas under negotiation between the Highway Commission and the Miami Corporation; and

WHEREAS, the Highway Commission has petitioned the Federal Government to employ federal funds in the purchase of the said tracts and timber owned by the Miami Corporation, and should the Federal Government refuse so to do, then it is the purpose of the Highway Commission to acquire the said property and pay for the same out of state highway funds;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED that the Federal Government be asked to purchase and pay for out of federal funds the wayside strips of timber owned by the Miami Corporation and located in Sections 15 and 16, Township 6 South, Range 9 West, W. M., Tillamook County, Oregon, and in Sections 20, 21 and 29, Township 6 South, Range 9 West, W. M., Lincoln County, Oregon, which are the timber strips under negotiation between the State of Oregon and said corporation.

That in the event the Federal Government refuses or fails to purchase said timber strips on or before August 1, 1941, then and in such event the said strips shall be purchased by the State with state highway funds and the consideration paid therefor shall be the sum of \$23,550.

That this resolution be entered in the minutes and records of the Commission and the Secretary be instructed to deliver a certified copy thereof to L. H. Mills, as the representative of the Miami Corporation, at his office at 1226 American Bank Building, Portland, Oregon.

The Commission discussed the matter of right-of-way width for the Oregon Coast Highway through the town of Gold Beach. The Attorney estimated that an 80-ft. right of way would cost about \$47,000; a 60-ft. right of way \$4,300; and that a combination 80-ft. right of way south of Dean Creek, narrowing to 60-ft. right of way north of Dean Creek, would cost about \$19,000. The Engineer gave as his thought that the adoption of the latter plan, costing \$19,000, would not be satisfactory to the people of Gold Beach, and would cause confusion and trouble. He suggested either an 80-ft. right of way or a 60-ft. right of way throughout the entire length of the project, and preferably a 60-ft. right of way in view of the cost involved, if that meets with the approval of the local citizens. After discussion the Commission authorized the Engineer to proceed with construction of this project on a 60-ft. right of way if the people of Gold Beach will be satisfied with such improvement. The Attorney was instructed to ascertain from the people of Gold Beach their attitude with respect to the right-of-way width. He was also instructed to arrange, if possible, for the removal of the pole line from the highway through this town, although the highway improvement is not to be considered contingent upon the removal of the poles.

The Attorney reported briefly on the right-of-way situation at Port Orford, advising that it is his intention to go to Port Orford in the near future to arrange for a jury in the Orris Knapp condemnation case.

Reconsideration was given by the Commission to the matter of abandoning a short section of the Oregon Coast Highway (old route) at Nelscott, in front of property owned by Ben Hur Lampman. In the discussion of this matter it was brought out that the old right of way is needed for state highway purposes, particularly for the parking of automobiles off the traveled roadway and for the future widening of the highway. It was also brought out that Mr. Lampman's property has not been damaged, neither has his means of ingress to and egress from his property been interfered with by reason of the reconstruction of the highway at this point. On the other hand, it appears that Mr. Lampman's property has been benefited by the highway improvement. In view of the circumstances, the Commission decided to retain ownership of the tract in question for continued use of the general public. The Attorney was instructed by the Commission to direct a letter to Mr. Lampman informing him of the action taken. However, such letter is to be submitted to Chairman Cabell before it is mailed.

The question whether to permit certain parties to maintain small dwellings on the right of way of the Wolf Creek Highway in the vicinity of Sunset Camp had the attention of the Commission. It appears that the parties occupying the buildings are employed in a logging camp nearby and that they are maintaining their buildings on the highway as a temporary proposition until the logging operations are completed, which is estimated will be sometime in September. The Commission questioned the advisability of allowing the buildings to remain on the highway until such time because of the possibility that the logging operations will not be completed then, and for the further reason that at such time of the year it would be more difficult to cause their removal and, in any event, it is strictly contrary to the policy of the Commission to allow encroachments such as this on highway rights of way. The matter was discussed at considerable length and it was the final decision of the Commission that the buildings should be removed as soon as possible, although a reasonable length of time is to be allowed the owners to make new arrangements.

The Attorney reported a communication from the State Parks Superintendent inquiring as to what legal authority the State Highway Commission possesses to evict from state parks people who are maintaining camps in such parks contrary to the established rules and regulations pertaining to park matters, and particularly referring to a Mrs. Violet McNeal who has established a camp in the new state park at The Cove, Jefferson County. It appears that Mrs. McNeal was notified that she could not maintain her camp in this park more than ten days, however, she has overstayed the allotted time and refuses to vacate the premises alleging that she is ill and that she is living at this place under doctor's orders. The Attorney advised that the Commission has legal authority to evict Mrs. McNeal if it so desires. After discussion, the Commission voted unanimously to allow Mrs. McNeal to continue her camp on the state's property if she will submit to examination by a doctor appointed by the State Highway Department and provided the doctor considers it

inadvisable that she be moved. Otherwise, she is to be notified to vacate the premises at once. The matter was referred to the State Parks Superintendent to handle, it being understood that the services of the doctor will be paid with state highway funds.

The Commission discussed a request from Mr. Warren Burch, Rickreall, for permission to rent the tillable portion of a state-owned stock pile site near Rickreall, Polk County, for which privilege Mr. Burch offers to pay \$5.00 per year. In the discussion it was pointed out that heretofore Mr. Burch has rented this property from the former owner at the rate of \$6.00 per year. The Commission voted unanimously to allow Mr. Burch to occupy this property if he will pay \$6.00 for the current season, and provided he will keep the premises cleaned of grass and weeds. The matter is to be covered by appropriate letter rather than by agreement.

The Attorney reported a request from Mrs. Nora Mae Branson Moe for additional compensation arising out of a right-of-way settlement made with her in 1937 on the Sheridan-McMinville Section of the Salmon River Highway, in Yamhill County. He explained that when the original settlement was made with Mrs. Moe she was given to understand by the right-of-way agent that two large trees growing on the property that the state is acquiring would not be disturbed and for that reason she made no charge for the trees; further, that the highway is now under construction in front of Mrs. Moe's premises and it appears that the trees are to be removed in connection with the construction of a detour for highway traffic, and Mrs. Moe is of the opinion that she is entitled to additional compensation therefor. One of the trees, he said, is a maple 18 inches in diameter, and the other is a large walnut tree about 25 years old. The Commission instructed the Attorney to investigate the records carefully and determine whether any allowance was made Mrs. Moe for the trees in the original settlement. He was authorized to pay Mrs. Moe \$50.00 for the two trees in the event the records show such allowance was not made. In this connection the Commission decided, as a matter of future policy, to purchase outright all trees and other things that are occupying property that the Commission is purchasing. It was thought that such procedure would obviate the necessity of reopening right-of-way settlements such as this.

The Attorney brought up for consideration the question of deductions on final settlements from property owners and allowances to be made to house movers where the house mover submitting the lowest quotation is not given the moving work. He pointed out that, owing to the frequency of such instances, house movers are very reluctant to make the expenditures necessary for the inspection of work and submission of price quotations unless there is more certainty that the low bidder will secure the work or at least be given a reasonable allowance to compensate him for his expense. It was suggested by Mr. Cabell that the Commission set a flat minimum sum to pay to the low bidder in such instances and the Commission fixed this minimum sum at \$15.00. The question of making a uniform deduction of ten per cent of the amount of the low bid in settlement with the property owners, if the low bidder is not given the work, was discussed and it was tentatively given approval. The matter was referred back to the Legal Department with instructions to work out a

sliding schedule of the percentage of deductions to be made and also a sliding schedule of compensation to be made to low bidders under the circumstances discussed.

The Commission adjourned at 12:20 p. m. and reconvened at 2:00 p. m. in the same room with the same persons present and participating.

Chairman Cabell announced the following awards of contracts for which bids were received at the morning session, such awards having been previously approved by the Commission by unanimous vote:

"Oak Creek Bridge Widening Project on the Corvallis-Newport Highway, in Benton County. Widen bridge and construct approximately 0.17 mile roadbed. C. W. Reeve, Salem, submitted the low bid for this work, in the amount of \$9,991.00. Babler Bros., Portland, submitted the next-low bid, in the amount of \$10,364.00. There were two higher bidders. The Commission awards this contract to C. W. Reeve, at his low bid of \$9,991.00.

"Gearhart-Seaside Section of the Oregon Coast Highway, in Clatsop County. 2.15 miles of oiled rock footpath. Jed Wilson, Seaside, submitted the low bid for this project, in the amount of \$7,865.00. The second-low bid, in the amount of \$8,768.00, was submitted by J. C. Compton, McMinnville. There were seven higher bidders. The Commission awards this contract to Jed Wilson, at his low bid of \$7,865.00.

"Algoma-Terminal City Section of The Dalles-California Highway, in Klamath County. 1.48 miles grading, 4.39 miles roadbed topping, 5.03 miles surfacing and 4.38 miles bituminous macadam. There were only two bids received for this work, that of Frank Penspacker and Clifford A. Dunn, Portland, being the low one, in the amount of \$172,016.00, and the other being that of Colonial Construction Co., Spokane, Washington, in the amount of \$172,524.00. The Commission refers both bids received for this work to the Engineer with power to award the contract to the low bidder when certain conditions have been fulfilled.

"Spencer Creek Bridge on the Miner Creek-Spencer Creek Section of the Oregon Coast Highway, in Lincoln County. Construction of 182-ft. reinforced concrete viaduct. Harry I. Hamilton, Eugene, submitted the low bid for this work in the amount of \$22,830.00. C. J. Eldon, Portland, submitted the next low bid, in the amount of \$23,591.00. There were four higher bidders. The Commission awards this contract to Harry I. Hamilton, at his low bid of \$22,830.00.

"Fulton Canyon-Locust Grove Section of the Fulton Canyon-Wasco County Road, in Sherman County. 4.25 miles grading and 6.29 miles surfacing and oiling. O. C. Yocom, Willamina, submitted the low bid for this work, in the amount of \$50,394.00. Leonard & Slate, Multnomah, submitted the only other bid, in the amount of \$52,707.00. The Commission refers both bids received for this work to the

Engineer with power to award the contract to the low bidder when certain conditions have been fulfilled.

"Meadow Brook Section of the Starkey Secondary Highway, in Union County. 2.22 miles grading and topping. E. L. Gates, Packwood, Washington, submitted the low bid for this work in the amount of \$31,460.50. Triangle Construction Co., Boise, Idaho, was next-low, with a bid of \$32,378.00. There were three higher bidders. The Commission rejects all bids for this work, and orders the project readvertised.

"West Ranch-Island City Section of the Summerville-Island City Road, in Union County. 7.79 miles surfacing and oiling. Norris Bros., Burlington, Washington, submitted the low bid for this work, in the amount of \$48,251.50, and J. C. Compton, McMinnville, submitted the next-low and only other bid, in the amount of \$50,086.00. The Commission awards this contract to Norris Bros. at their low bid of \$48,251.50."

The Commission reconsidered and approved a resolution adopted at its meeting on May 8, 1941, with respect to the granting of permits for the continuous operation of vehicles engaged in the transportation of logs, poles, or piling over state highways, involving an overall length in excess of 50 feet.

In this connection the Commission discussed the advisability of reducing the amount of public liability and property damage insurance that is to be furnished by logging operators in connection with the transportation of overlength loads. Action thereon was deferred until the next meeting. The Secretary was instructed to secure additional information for consideration at that time.

The question whether or not to permit night hauling of logs on state highways was discussed by the Commission. The Engineer recommended the granting of permits for log hauling during the hours of darkness, starting at 6:00 a. m. and ending at 8:00 p. m. on the same day, provided the hauling equipment and loads are properly lighted, in accordance with statutory requirements. The Commission approved the recommendation unanimously, it being understood that such action does not prohibit the truck hauling of logs on state highways before 6:00 a. m. or after 8:00 p. m. if daylight prevails at such times, it being the intention of the Commission to extend the period during which log hauling may be carried on rather than to restrict it.

The Secretary presented a resolution from the Clackamas County Court requesting the selection and designation as a state secondary highway of the county road known as Market Road No. 10 which extends southerly from the town of Canby to a junction with State Secondary Highway No. 161 west of Molalla, a total distance of approximately 8.1 miles. The Commission considered this

request in accordance with previous understanding with the county and thereupon approved the same. The following resolution adopting the said road as a state secondary highway was adopted by the Commission by unanimous vote:

WHEREAS, under the provisions of Chapter 248, Laws of 1931; Chapter 196, Laws of 1935; and Chapter 529, Laws of 1939; the State Highway Commission, by mutual agreement with the respective county courts of the several counties of the State, is authorized and empowered to select, locate, and designate a system of secondary state highways, which highways shall be selected from the market roads or other county roads, or available locations or routes of the several counties; and

WHEREAS, the State Highway Commission, by mutual agreement with the Clackamas County Court of the State of Oregon, has selected the road or highway hereinafter named, and it is the purpose of the Commission to officially and regularly designate and adopt said highway as a highway to constitute, together with other highways heretofore adopted and/or which may hereafter from time to time be added, the system of secondary state highways under the provisions of said acts;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission, all members being present and affirmatively voting and participating, as follows:

1. That the following described market road, county road, highway route, or location of a highway in Clackamas County be and the said market road, county road, highway, location, or route, hereby is selected, designated, established, adopted and approved as a secondary state highway and shall be and hereby is designated as a part of the secondary state highway system, to wit:

Canby-Marquam Secondary State Highway No. 170:

Beginning at Canby; thence southerly via Market Road No. 10 to a junction with State Secondary Highway No. 161, west of Molalla, a distance of approximately 8.1 miles.

2. That the said highway shall be and hereby is qualified for improvement under the provisions of said Chapter 248, Oregon Laws of 1931; Chapter 196, Oregon Laws of 1935; and Chapter 529, Oregon Laws of 1939; and amendments thereof.

A resolution was also presented from the County Court of Umatilla County requesting the designation as a state secondary highway of a short section of county road extending from the Old Oregon Trail to the Pendleton airport siding near the State Hospital at Pendleton, said road being 0.175

miles in length. The Commission considered such request to be in conformance with previous understanding with the county court and thereupon approved the same. The following resolution placing this road on the state secondary highway system was thereupon adopted by the Commission by unanimous vote:

WHEREAS, under the provisions of Chapter 248, Laws of 1931; Chapter 196, Laws of 1935; and Chapter 529, Laws of 1939; the State Highway Commission, by mutual agreement with the respective county courts of the several counties of the State, is authorized and empowered to select, locate, and designate a system of secondary state highways, which highways shall be selected from the market roads or other county roads, or available locations or routes of the several counties; and

WHEREAS, the State Highway Commission, by mutual agreement with the Umatilla County Court of the State of Oregon, has selected the road or highway hereinafter named, and it is the purpose of the Commission to officially and regularly designate and adopt said highway as a highway to constitute, together with other highways heretofore adopted and/or which may hereafter from time to time be added, the system of secondary state highways under the provisions of said acts;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission, all members being present and affirmatively voting and participating, as follows:

1. That the following described market road, county road, highway, route, or location of a highway in Umatilla County be and the said market road, county road, highway, location, or route, hereby is selected, designated, established, adopted and approved as a secondary state highway and shall be and hereby is designated as a part of the secondary state highway system, to wit:

A Section of the Airport Secondary Highway No. 336.

Beginning at a point on the Old Oregon Trail Highway west of Pendleton at Highway Engineer's Station 1282+00; thence extending in a southeasterly direction 925 ft. to a point adjacent to the Union Pacific R. R. and being 0.175 miles in length.

2. That the said highway shall be and hereby is qualified for improvement under the provisions of said Chapter 248, Oregon Laws of 1931; Chapter 196, Oregon Laws of 1935; and Chapter 529, Oregon Laws of 1939; and amendments thereof.

The matter of designating as a state secondary highway the county road known as the Albany Airport Road, which extends from the Pacific Highway East, at a point north of Albany, to a connection with the Santiam Highway, east of Albany, 1.05 miles in length, was discussed by the Commission. In this connection the Secretary presented a resolution from the County Court of Linn County requesting the selection and designation of such road as a state secondary highway. The Commission approved the request and thereupon, by unanimous vote, adopted the following resolution designating such road a state secondary highway:

WHEREAS, under the provisions of Chapter 248, Laws of 1931; Chapter 196, Laws of 1935; and Chapter 529, Laws of 1939; the State Highway Commission, by mutual agreement with the respective county courts of the several counties of the State, is authorized and empowered to select, locate, and designate a system of secondary state highways, which highways shall be selected from the market roads or other county roads, or available locations or routes of the several counties; and

WHEREAS, the State Highway Commission, by mutual agreement with the Linn County Court of the State of Oregon, has selected the road or highway hereinafter named, and it is the purpose of the Commission to officially and regularly designate and adopt said highway as a highway to constitute, together with other highways heretofore adopted and/or which may hereafter from time to time be added, the system of secondary state highways under the provisions of said acts;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission, all members being present and affirmatively voting and participating, as follows:

1. That the following described market road, county road, highway, route, or location of a highway in Linn County be and the said market road, county road, highway, location, or route, hereby is selected, designated, established, adopted and approved as a secondary state highway and shall be and hereby is designated as a part of the secondary state highway system, to wit:

Albany Airport Secondary Highway No. 214

Beginning at the junction of the Pacific Highway (East) with the Albany Airport Road; thence southerly to the junction of the Santiam Highway with the Albany Airport Road; a distance of approximately 1.05 miles.

2. That the said highway shall be and hereby is qualified for improvement under the provisions of said Chapter 248, Oregon Laws of 1931; Chapter 196, Oregon Laws of 1935; and Chapter 529, Oregon Laws of 1939; and amendments thereof.

Consideration was given by the Commission to the designation as a state secondary highway of the county road which extends from the town of Mehana, in Marion County, through Lyons in Linn County to Mill City. In this connection the Secretary presented resolutions from the Marion County Court and from the Linn County Court requesting such designations. The Commission indicated favorable consideration of this request, however, deferred definite action on the matter until such time as it has been assured of a right of way 60 feet wide and free of all encroachments. The Engineer advised that the right of way in Marion County complies with the Commission's requirements as to width and encroachment; however, this is not the case on the Linn County section of the road, although the county court has agreed to furnish the proper right of way and has executed an agreement to that effect. The agreement was thereupon submitted to the Commission and was signed by all members.

The Commission discussed the matter of designating as a state secondary highway that portion of the North Santiam county road extending from the town of Detroit southerly to a junction with the Santiam Highway, in Linn and Marion Counties. Resolutions from the Linn and Marion County Courts requesting such designation were presented by the Secretary. The Commission indicated that it would approve such designations when it is assured of standard width right of way free and clear of all encumbrances. Final action on this matter was deferred pending receipt of such assurances.

The Engineer reported a request from citizens of Woodburn, Mount Angel and Silverton for the rerouting of the Hillsboro-Silverton State Secondary Highway easterly from its junction with the Pacific Highway East, in Woodburn. He explained that the present highway enters the Pacific Highway from the west along Young Street, but leaves it one block south of Young Street, causing a jog in the alignment, and extends thence northeasterly to Mount Angel and Silverton; further, that the change contemplated provides for a direct crossing of the Pacific Highway along an extension of Young Street to a connection with the present secondary highway, a distance of about 500 feet. The Commission appeared favorably inclined to approve the change but deferred action on the matter pending a report from the Engineer as to whether the Young Street extension has been dedicated as a roadway for general public use and how much it will cost to improve the road to proper standards.

The Engineer requested authority to purchase two portable boilers estimated to cost \$2,000 each, for use in connection with the unloading of asphalt from railroad cars. He explained that it takes about eight days to secure delivery of a carload of asphalt this year and, as a consequence, the asphalt becomes quite hard and cannot be removed from the railroad cars without heating. The Commission questioned whether it is the state's obligation to provide for the heating of the asphalt. The Engineer was instructed to contact the railroad officials and ascertain if it would not be possible to secure earlier deliveries of asphalt which might obviate the necessity for heating. He was authorized to purchase the two boilers, as requested, in the event that appears absolutely necessary after consultation with the railroad officials.

The Commission discussed an opinion from the Attorney relative to its authority to contribute state funds toward the cost of constructing a

dike and tidegate at North Slough, Coos County, as has previously been requested by local interests through their attorney, Ben C. Flaxel of North Bend. According to this opinion the Highway Commission has authority to use state highway funds for such purpose if it so desires, notwithstanding that the dike and tidegate are located at some distance from the highway. However, he pointed out that there are possibilities of conditions arising that would make it inadvisable for the Commission to join with the Diking District in this proposed project. He referred particularly to the maintenance of the dike and advised that if the Diking District failed to provide such maintenance then the Highway Commission would be compelled to maintain the dike for the sake of the highway and if for any reason the dike failed, damaging private property, the Commission might be placed in an embarrassing position and liability might be fastened on the Commission which could result in considerable expense. The Commission discussed this matter at considerable length, giving careful consideration to it from all standpoints, and concluded that the benefits accruing to the highway do not justify the expense involved. The request was thereupon denied.

The Engineer brought up for discussion the improvement of the Main Street Section of the Oregon-Washington Highway in the town of Milton. He said that the portion of this street that is occupied by railroad tracks of the Walla Walla Valley Traction Company is in poor condition and should be repaired; further, that the Traction Company has stated its willingness to join in the improvement by installing new ties, ballast, and construction of a guard rail throughout the length of Main Street, at its own cost and expense, if the State Highway Department will pay for the paving work which is estimated to cost about \$5,000. He questioned the advisability of such expenditure because in his estimation the company no doubt is obligated to keep the pavement in satisfactory condition under the provisions of its franchise with the city; however, he pointed out that the company is a small one and is apparently operating without profit. Furthermore, the damage to the pavement is caused more by heavy truck hauling than by railroad traffic, trains operating very infrequently over this line. He also pointed out that the Highway Department is now maintaining all of the street except the railroad portion which extends 18 inches beyond the ends of the ties. The Commission appeared favorably inclined to assume the maintenance of the balance of the street in the event the Traction Company cannot be made to do so under the provisions of its franchise. However, decision in the matter was deferred pending a report from the Engineer as to the provisions of the franchise.

The Engineer reported the cost to improve a short section of the state highway in the town of Independence, as has been requested by the City Council, particularly the repaving of about 800 feet along Main Street and Monmouth Street which is on the highway route, and about 200 feet on Main Street beyond Monmouth Street which is not on the highway route. He estimated the cost of such improvement at \$8,700 of which amount approximately \$1,120 represents the cost of improving Main Street outside the limits of the highway. The Commission approved the expenditure unanimously subject to the condition that the City of Independence will pay the costs of the improvement beyond the limits of the highway route.

The Engineer reported briefly on the proposed establishment of free ferry service across the Columbia River at The Dalles and, in this connection, read aloud a report from Assistant State Highway Engineer C. B. McCullough dated May 17, 1941, on this subject. He advised that he concurs in the report. (See letter for details.) He also advised that he has discussed this matter with engineers of the Washington Highway Department who state that they are not interested in providing free ferry service across the Columbia River at any point. He pointed out that the highway departments of the States of Washington and Oregon are now making investigations of possible bridge sites along the Columbia River between Astoria and Umatilla and gave as his thought that the ferry matter is so closely related thereto that it could not be decided until the report on the bridge matter has been considered. The Commission concurred in the Engineer's viewpoint and deferred further consideration in the matter until it considers the report on the bridge situation. The Secretary was instructed to so reply to inquiries received on this subject.

The Commission discussed the adoption of a policy with respect to the maintenance of city streets not on state highway routes, over which streets the truck hauling of logs is being carried on. Final action on this matter was deferred pending additional information from the Engineer. However, the Commission authorized the Engineer to maintain certain streets in the cities of Albany and Canby that are in this category. Such work is to be covered by appropriate agreements between the cities and the state.

The Engineer requested authority to advertise for bids for a new bridge over Millport Slough on the Oregon Coast Highway about one-half mile south of the Siletz River crossing. He explained that the existing bridge is an old structure in a bad state of repair, particularly the underwater portion which has been severely damaged by marine bores, in fact the bridge gave way a short time ago and traffic is now being taken care of by a temporary structure pending repairs. He estimated the cost of the new structure at \$20,000 and recommended the expenditure as an emergency proposition. The Commission approved the request.

A letter was presented from Frank Z. Howard, County Engineer of Klamath County, transmitting a copy of a telegram from the Honorable Rufus C. Holman, State Senator, advising that the Senate Appropriations Committee has allowed an item of \$150,000 of federal funds for the improvement of the Sprague River County Road with the understanding that such amount would be matched with state funds. Mr. Howard advised that a delegation from Klamath County wishes to confer with the State Highway Commission on this subject in view of Senator Holman's report. The Commission stated its willingness to confer with the delegation but deferred making a definite statement as to the project until full information concerning the federal appropriation has been obtained.

The Commission discussed briefly and ordered filed a resolution from Oretown Grange, Cloverdale, requesting construction of the Little Nes-tucca Secondary Highway between Dolph and the Lawrence Yach Ranch.

The Engineer reported the need of repairs to a small bridge on the Jewell-Elsie County Road, Clatsop County, which road is being used as a temporary state highway detour and is being maintained by the state. He estimated the cost of the repairs at \$2,500 and advised that the 1941 maintenance budget provides for this work. However, what is really needed, he said, is the realignment of the highway which would cost about \$10,000. He inquired whether to provide for the major improvement or simply to take care of the bridge work. The Commission decided that inasmuch as the bridge is on a county road it would not be justified in spending state funds for the major improvement and, accordingly, limited the expenditure to the previously authorized amount of \$2,500.

The Engineer also reported the necessity to repair the Stillwell Bridge over the Trask River on the Netarts Secondary Highway, in Tillamook County. He advised that this bridge is now posted for a 10-ton load limit, investigations showing that the approach spans to the bridge are very badly decayed. He estimated the cost of repairs at \$3,250 and an entirely new structure at \$46,000 and advised that it will still be necessary to maintain the reduced load limit if the work is limited to repairs only. The Commission decided not to build a new structure at this time but to limit its expenditures to repair work only and so ordered. The expenditure of \$3,250 for this work was thereupon approved.

A letter was presented from Cecil M. Sly, President, Weston Chamber of Commerce, requesting the construction of a standard oil surface on the Weston-Algin Secondary State Highway between Camp McDougall and the E. E. Tucker farm. The Commission denied the request for immediate construction on account of lack of funds to finance the same. The Engineer was instructed to bear this project in mind for consideration in the formulation of the next construction program and to maintain the section in the best manner possible until the Commission can see its way clear to construct a standard improvement.

A letter was presented from Mr. O. V. Badley, Chairman, Board of County Commissioners of Multnomah County, inquiring as to when the Commission contemplates calling for bids for the surfacing of Skyline Boulevard northerly from the end of the project now under construction by contractor Homer G. Johnson. The Engineer advised that the tentative federal aid secondary highway budget now contains an item of \$35,000 for the continuation of such work and that it is contemplated that bids will be called for the work some time this fall in the event the Commission approves the project. He recommended such approval at this time so that plans could go forward for the work. The Commission approved the recommendation and so ordered.

Petitions were presented from numerous property owners of Portland requesting the installation of a highway lighting system on Union Avenue (route of the Pacific Highway East) in Portland, similar to the lighting system on Interstate Avenue. It was pointed out in the discussion of this matter that when the lighting system on Interstate Avenue was installed the Commission made a promise to the Public Roads Administration that it would extend such lighting system to the Interstate Bridge at some future date. The Commission

considered that it could not very well disregard such promise by advancing the Union Avenue lighting system. The Engineer was thereupon instructed to work up the final plans for completion of the lighting system on Interstate and Denver Avenues, the route of the Pacific Highway West, it being understood that the Union Avenue lighting project will be given priority over others in the consideration of next year's lighting program.

The Attorney requested instructions relative to the controversy with the California-Oregon Power Company arising out of a break in the Power Company's dam at the outlet of Upper Klamath Lake, in Klamath County, resulting in serious damage to adjacent private property and to The Dalles-California Highway near Algoma. He advised that, in accordance with the Commission's instructions, he presented the state's claim for reimbursement for the highway damage but to date has received no remittance from the company so it now appears necessary to pursue action in court to recover the amount of the state's loss. He pointed out that certain farmers in this vicinity who were damaged by the flood waters have joined in an action against the company, which action is now pending in court, and inquired whether or not he should start suit against the company now or wait for the outcome of this case. He was instructed by the Commission to await the outcome of the farmers' suit provided that by so doing the state's case will not be affected by the statute of limitations. He was also instructed to confer with the attorney in the pending actions and report progress to the Commission.

A letter was presented from the Portland General Electric Company requesting a reduction in the amount of the rental paid by the company for the privilege of maintaining its power facilities on the Interstate Bridge, from \$75.00 per month to \$50.00 per month. The Engineer advised that when the rental agreement was entered into with the company in 1927 the company considered that the use of the bridge was worth \$75.00 per month and in his estimation, if such was the case then, it certainly should be worth that much to the company at the present time because the company undoubtedly is carrying a much heavier load over its lines than it did fourteen years ago. He recommended that the request be denied. The Commission approved the recommendation.

The Commission considered a request from James C. Iler, Forest Supervisor, Malheur National Forest, John Day, for a list of equipment such as truck and trailer units, tractors, bulldozers, et cetera, that can be made available for the use of the Forest Service during the fire season for the suppression of forest fires. The Engineer advised that he did not believe there would be any equipment available for fighting forest fires inasmuch as all of it is needed to carry on routine maintenance work. However, the Highway Department has always cooperated in emergencies such as the fire at Bandon and other catastrophies of that nature and could do so again if an emergency arose. After discussion, the Commission decided to send Mr. Iler a list of the equipment that might be available in such an emergency. The matter was referred to the Engineer to handle.

The Commission discussed a letter from the South Umpqua Telephone Company with regard to moving some telephone poles on the Tiller-Trail Second-

ary Highway to accommodate a highway improvement. They gave as their understanding that thirty-nine telephone poles are required to be moved at the present time; however, pointed out that if the highway work is extended there will be about eighty-three more poles to move, some of which are located on the highway and others on adjacent private property. They suggested that it would be advisable to move all of the poles at this time and that the state pay the company \$5.00 per pole for moving the sixty poles that are not on the present highway. Division Engineer K. D. Lytle, who was present, advised that the thirty-nine poles mentioned by the company are on the present highway and that he has asked the company to move them inasmuch as that is the company's obligation under its franchise. Further, such poles are the only ones now in the way of the highway construction and there is no urgent need for moving the others. It appeared to him that the reason the company wants to move the other poles now is simply to secure financial assistance from the state to help defray the cost. The Commission deferred a decision in the matter pending further investigation and report by the Engineer as to whether any advantage or benefit would result by securing the removal of the one hundred and twenty-two poles at this time.

The Commission discussed its claim against Mr. Charles Rohkonen, Astoria, in the amount of \$68.51, being the value of an asphalt kettle which was damaged when Mr. Rohkonen drove his car into it on March 1, 1941. The Attorney advised that he billed Mr. Rohkonen for this expense and in reply thereto received a letter from Mr. Rohkonen's attorney, Mr. A. W. Norblad, Astoria, stating that Mr. Rohkonen is financially embarrassed, having recently been put to unusual expense due to serious illness to the members of his family, and he is unable to pay the claim. Furthermore, on account of this illness which is of long standing, he has been unable to afford insurance for his automobile, and for such reasons asks to be relieved of payment of the claim. The Attorney advised that under the circumstances the Commission has recourse only against Mr. Rohkonen personally, inasmuch as he does not carry insurance, and there is a question whether the Commission could recover if the matter were taken to court. The Engineer advised that, as a result of the accident, the asphalt heater is a total loss and to replace the same would cost about \$500.00. \$68.51 he added does not represent the cost of repairs but is simply the value of the heater as carried on the highway department's books at the present time and, while it was valued at only \$68.51, it was performing at the time of the accident work that is required of heaters costing \$500.00. The Commission deferred a decision in this matter pending a report from the Attorney as to whether Mr. Rohkonen is judgment proof.

The question of granting continuous permits for the operation of combines, pea dusters, and similar farm equipment, having dimensions in excess of those permitted by statute, was discussed by the Commission. The Secretary advised that the present procedure is to issue permits for each individual movement of such equipment; however, the procedure does not seem to be working out very satisfactorily because of the many moves that have to be made and the haste that is required in moving from one field to another, involving the use of state highways. The width of the equipment, he said, rarely exceeds ten feet although the overall width of combines is as much as twelve feet, depending

on the model of the machine. He suggested the granting of 30-day permits subject to the customary conditions which would eliminate delays in securing individual permits and would help the farmers out greatly in the proper care and harvesting of their crops. He pointed out that the law now authorizes farmers to move farm equipment over public roads between fields owned by them, without permit, but it is not considered that such privilege applies where the movements are made for commercial purposes, such as those under discussion, although the necessity for the movements are the same in each case. After discussion, the Commission authorized the granting of 30-day permits covering movements of this kind. The Attorney was instructed to prepare an appropriate form for use in connection therewith.

A letter was presented from Donald M. Graham, Prineville, attorney for the Ochoco Lumber Company, requesting, on behalf of the company, permission to transport logs on the Ochoco Highway from a point approximately twenty miles east of Prineville to Prineville, on Saturday afternoons commencing June 14, and ending July 5, so as to insure a sufficient supply of logs to provide continuous operation of the sawmill at Prineville, there being an under supply at the present time on account of heavy rains that have occurred in this vicinity, handicapping the hauling of logs from the woods. The Engineer recommended approval of the request, except on Saturday, July 5, which is a holiday weekend. The Commission approved the recommendation.

In this connection the Secretary reported a telephone conversation with Mr. Graham in which request was made for permission to truck haul logs over this same section of highway on Sunday, June 15, as an accommodation to the United States Forest Service which has a supply of logs available for market but is unable to secure log-hauling equipment to move them on week days. The Commission denied the request.

The Engineer reported an offer from a Mr. I. A. Johnson, Fossil, Oregon, to purchase for the sum of \$54.00, three old steel vats formerly used as dipping vats for treating bridge timbers but now stored on the highway department premises at Spray, Oregon. He said that the vats are of no value for state highway use and have not been used for many years. He recommended acceptance of Mr. Johnson's offer. The Commission approved the recommendation.

The Commission discussed briefly and ordered filed a letter from E. J. Griffith, State Administrator, Work Projects Administration, transmitting a copy of correspondence between the Tillamook Chamber of Commerce and his office relative to the construction of the 12-mile connecting link between the Wilson River Highway and the Wolf Creek Highway, in Washington County.

The Commission deferred for future consideration a resolution from the Eugene City Council requesting the designation as a state secondary highway of 11th Avenue, Eugene, from its junction with Frankland Avenue to the west city limits.

The Attorney reported receipt of a communication from F. M. Franciscovich, attorney for the City of Gearhart, requesting the erection of signs on the beach at Gearhart prohibiting vehicular traffic and horseback riding on the beach because they feel that the use of the beach for such purposes creates an undue hazard to bathers. He advised that the Commission has authority to prohibit the use of the beach for such purpose if it so desires. After discussion, the Commission approved the request subject to the condition that the city authorities really desire to prohibit the use of the beach area for such purposes. The Engineer was instructed to prepare the wording for appropriate signs and to discuss such wording and prospective sign locations with Mr. Franciscovich.

The Secretary presented a letter from Bahler Bros., contractors, requesting relief from the provisions contained in highway contracts which reads as follows: "The contractor shall accept the terms of the Workmen's Compensation Act of the State of Oregon and shall carry on his work under the provisions of the Law." They asserted that their employees are able to receive exactly the same benefits under private insurance as they now receive under the state insurance, without the necessity of deducting one cent per day from their wages; furthermore, there are certain advantages to a contractor in carrying private insurance. In the discussion of this matter it was brought out that the same concession has been requested by other contractors and there are possibilities that contractors will combine in asking the Commission to change its specifications in this regard. The Commission deferred action in the matter until a future meeting.

The Commission considered and ordered filed a petition signed by numerous property owners and residents of Riverside and vicinity, forwarded by the Riverside and Dunthorpe Improvement Association of Portland, requesting the beautification of the district traversed by the Oswego Highway on the west side of the Willamette River, particularly between the Sellwood Bridge, Portland, and Oswego; also, requesting the removal of the Southern Pacific Company's tracks from this district.

A letter from Charles H. Reynolds, President of the Oregon Trail Association, relative to the allocation of funds for the construction of the new road to the Pendleton Airport, had the attention of the Commission. Mr. Reynolds expressed his approval of the state cooperating with the federal government in projects of this nature but gave as his thought that such allocations should not be charged against any particular district but should be paid from some federal source. The Commission decided that such matter should be given due consideration in the allocation of future funds.

A letter from Mr. Reynolds, transmitting maps showing projects on the Old Oregon Trail and Columbia River Highway recommended by the Oregon Trail Association for construction, also had the attention of the Commission. The Commission ordered the communication filed for consideration in the formulation of future construction programs.

The Secretary presented a resolution from the State Highway Commission of South Dakota, and a letter from Mr. Brady Gentry, Chairman of the Texas

State Highway Commission, both of which communications protest any increase by Congress in the existing tax on gasoline. The Commission ordered them filed.

A letter was presented from the Honorable Earl Snell, Secretary of State, advising that he has received numerous complaints during recent months concerning the inconvenience that applicants for motor vehicle licenses are subjected to in localities where private scales are not available to weigh their equipment, and advising that under the provisions of the Oregon Motor Vehicle Act applicants for such licenses must furnish the Secretary of State, for the purpose of enabling him to compute the fee to be paid, a certificate of weight of such vehicle. He gave as his understanding that the Highway Commission has installed scales at many places throughout the State and suggested that, as a convenience for truck owners, the Commission allow the use of such scales to ascertain the weight of their equipment, which would necessitate modification of the Highway Commission's policy pertaining to the use of the scales. The Engineer advised that he anticipates that the weighing crews which were recently authorized by the Commission will start operating in the near future and he pointed out the possibilities of effecting some sort of an arrangement for the weighing of privately-owned trucks by these crews. In view thereof, he suggested that the Commission defer a definite decision on Mr. Snell's request until the weighmasters have had an opportunity to function. The Commission approved the suggestion.

The Commission discussed briefly and ordered filed a letter from the Ry'East Climbers, of Portland, in which the Commission was requested to undertake the immediate improvement of the North Santiam Highway between Mill City and Detroit, in Marion County.

The Commission discussed the adoption of a roadside improvement program for the fiscal year 1942 Federal funds, totalling \$29,000. The Engineer submitted a list of eligible projects from which the Commission, by unanimous vote, selected the following for such program:

<u>Divisions Nos. 1 & 2:</u>	
<u>Project</u>	<u>Estimated Cost</u>
Tigard Section	\$ 2,000
St. Helens-Multnomah County Line	4,000
<u>Division No. 3</u>	
Rice Hill-Turkey	
Hill-Chenoweth Park Sections	6,000
North Marshfield-Marshfield-Bunker Hill Sections	4,000
<u>Division No. 4</u>	
Warm Springs Cutoff from River to Madras	1,000
Redmond	2,500
<u>Division No. 5</u>	
South Entrance to Milton,	
Pendleton-Walla Walla Highway	2,000
John Day to Austin	7,500
	\$ 29,000

The Engineer reported on the cost to improve a 3.2-mile section of the Siletz Secondary Highway near Kernville so as to facilitate logging operations that are underway in that vicinity. He advised that the 5-mile section of this road, beginning at its junction with the Oregon Coast Highway, is now oiled and request has been made for the improvement of an additional 3.2-mile section. He recommended the improvement to minimum highway standards for contracting some time this fall. The Commission approved the recommendation. The Engineer was thereupon authorized to make surveys as may be necessary and to prepare plans for the improvement.

The Commission considered the following requests for extensions of time within which to complete highway construction projects:

Dimitre Electric Company, contract No. 2418, for electrical work on the Interstate Bridge between Portland and Vancouver, Washington, requested an extension of time, from May 15 to June 30, 1941 within which to complete this project. They alleged that their failure to complete the project within the specified time limit was due to delays in receiving certain electrical equipment from the State. The Engineer advised that the contract provided for the State to furnish certain electrical equipment and, on account of national defense priorities, delivery of this equipment was delayed, resulting in the overrunning of the time limit specified in the contract. He recommended, in view of the fact that the contractor was not responsible for the delay that the extension requested be granted, without penalty. The Commission approved the recommendation.

R. I. Stuart & Sons, contract No. 2364, for furnishing crushed gravel, in stock piles, for the Pacific Highway and the Sams Valley Secondary Highway near Gold Hill, in Jackson County, requested an additional extension of time of 16 days, from March 2 to March 18, 1941, within which to complete this job. They alleged that their failure to complete the project within the specified time limit was due to shortage of rock and a large amount of dirt and sand overburden in the gravel pit. The Engineer advised that this contract was awarded on August 28, 1940, and provided for the completion of the work by January 31, 1941. Further, that he knows of no good reason why the job should not have been completed within the specified time. He recommended that the extension of time requested be granted but that the contractor be charged for the extra engineering expense incurred by the State subsequent to the specified date of completion. The Commission approved the recommendation.

The Engineer reported that contracts Nos. 2356, 2364, 2375, 2421, 2426, and 2427, for the construction of state highway projects, have been completed according to the requirements of the contracts or modifications thereof, and that said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and was adopted by the unanimous vote of the Commission:

WHEREAS, The Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts and said jobs are now ready for acceptance:

Contract No. 2356, with Babler Bros., for grading, surfacing and oiling on the Eightmile-Dry Creek Section of the Wasco Heppner Secondary Highway in Morrow County. Completed May 20, 1941

Contract No. 2364, with R. I. Stuart & Sons, for furnishing 15,100 cubic yards of crushed gravel in stock piles on the Gold Hill Section of the Pacific Highway and Sams Valley Secondary Highway in Jackson County. Completed March 18, 1941

Contract No. 2375, with Roy L. Houck, for grading, surfacing and bituminous macadam on the Blalock-Lang Canyon Section of the Columbia River Highway, in Gilliam County. Completed May 27, 1941

Contract No. 2421, with A. Milne, for construction of two reinforced concrete siphons on the Boardman-Stanfield Section of the Old Oregon Trail, in Morrow County. Completed April 11, 1941

Contract No. 2426, with E. L. Gates, for grading and bridge construction on the Lake Creek-Hanley Ranch Section of the Little Butte Secondary Highway, in Jackson County. Completed May 31, 1941

Contract No. 2427, with Babler Bros., for grading, surfacing and oiling on the Bend-Forest Boundary Section of the Century Drive Secondary Highway, in Deschutes County. Completed May 7, 1941

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

- - - - -

The Commission set Thursday and Friday, July 17 and 18, 1941, as the date for its next regular meeting for receiving bids for highway construction work. The Secretary was instructed to make the usual arrangements to hold this meeting in the auditorium of the Public Service Building, Portland.

The Commission considered and signed agreements, et cetera, as fol-

Project agreement with the Public Roads Administration covering the Front Avenue project in Portland, particularly the section between Washington Street and Clay Street

Joint letter with W. H. Lynch, District Engineer, Public Roads Administration, and Lyle F. Watts, Regional Forester, directed to the Chief of the Forest Service and the Commissioner of Public Roads, Washington, D. C., recommending certain revisions in the 1941 Oregon Forest Highway Program, and particularly Oregon Coast Highway Project SM 10-D1, E, and Pendleton-John Day Highway Project 34-A3, B3.

Agreement with Tillamook County providing for repairs to the bridge over the Nehalem River on the county road between Mohler and Foss

Agreement with Cape Arago Park Commission, Coos County, L. J. Simpson, and Lela G. Simpson, with respect to the removal of timber from Cape Arago State Park

Agreement with Tillamook County providing for the maintenance of the Fairview School Corner-Eberhardt Corner Section of the Fairview-Clemens Corner County Road, after construction of the same as a Federal Aid Secondary Highway Project, being Project FAS 35-B (1)

Agreement with Tillamook County providing for the maintenance of the Peltz Corner-Eberhardt Corner Section of the Long Prairie County Road after improvement of the same by the State as a Federal Aid Secondary Highway Project, being Project FAS 84-A (1)

Agreement with L. E. Bierce providing for the construction and maintenance of a logging road across state-owned property adjacent to the Salmon River Highway

Agreement with Linn County Court whereby the County agrees to acquire 60-ft. width right of way for the county road between Mehama and Mill City before this road is designated a state secondary highway by the State Highway Commission

Letter directed to the Bureau of Reclamation, Bend, Oregon, authorizing construction of a power transmission pole line across the new state park at The Cove, in Jefferson County

Agreement with W. W. Harris providing for the construction and maintenance of a logging road across state property adjacent to the Salmon River Highway, in Tillamook County

Agreement with the Board of Park Commissioners of the City of Pendleton relative to the maintenance of the triangular area that is to be landscaped at the intersection of the Old Oregon Trail and the Oregon-Washington Highway just east of Pendleton

(Agreements, etc. cont.)

Agreement with Union County providing for the maintenance of the Island City-West Ranch Section of the Island City-Summersville County Road after improvement of the same by the State as a Federal Aid Secondary Highway Project, being Project FAS 75-A (1)

Agreement with Midway Lumber Company providing for the construction and maintenance of a logging road across state property adjacent to the Salmon River Highway, in Tillamook County

Agreement with the City of Seaside providing for the installation of a new water pipe line at the Volmer Creek revision of the Oregon Coast Highway, in Clatsop County

Agreement with Tillamook County providing for the payment of the County's share of the cost of reconstructing the approaches to the Trask River Bridge on the Fairview-Clemens Corner County Road. By this agreement the County assigns to the State \$7,000 of its share of the 1942 gasoline tax funds

Agreement with Bonneville Power Administration providing for the construction of a power line across the Lower Columbia River Highway near the St. Johns Bridge, Portland

Agreement with the Bonneville Power Administration providing for construction of a power pole line across the right of way of State Secondary Highway No. 336 (Pendleton Airport Highway) in Umatilla County

Transmission Line Easement conveying unto the United States of America the right to construct a power transmission line over and across a small triangular tract of state-owned land situate in Lot 1, Section 21, Township 2 North, Range 7 East, W. M., Multnomah County

Guy and Anchor Easement granting unto the United States of America the right to maintain a guy and anchor on state-owned property adjacent to the Upper Columbia River Highway in Lot 4 of Section 3, Township 2 North, Range 9 East, W. M., Hood River County

Bargain and Sale Deed conveying unto Sven Lonberg and wife and Henry S. Lonberg and wife 2,608 square feet of land situate in Lot 4, Block 11, McClures Addition to Astoria. Right of Way Transaction No. 5862

Bargain and Sale Deed conveying unto F. W. Southwick and wife 2,006 square feet of land situate in Government Lot 7 of Section 20, Township 36 South, Range 5 West, W. M., Josephine County. Right of Way Transaction No. 7213

- - - - -

There being no further business to come before the Commission at this time the meeting was adjourned at 5:30 p. m.

James H. Baldock
State Highway Engineer
H. B. Glaisyer
Secretary

Henry F. Cabell
Chairman
Huron W. Clough
Commissioner
Herbert Oliver
Commissioner

Portland, Oregon, July 16, 1941

The State Highway Commission met in regular session at 8:00 p. m. in Room 415 of the Imperial Hotel. Present were:

Henry F. Cabell, Chairman
Huron W. Clough, Commissioner
R. H. Baldock, State Highway Engineer
J. H. Devers, Attorney
H. B. Glaisyer, Secretary

Commissioner Oliver was excused from attending this meeting.

The Commission conferred with a committee representing the Portland Chamber of Commerce and the Oregon Trail Association relative to construction of the new Columbia Gorge Highway between Portland and The Dalles. Mr. Charles Reynolds, President of the Oregon Trail Association, headed this group which included the following: Russell Colwell, Vice-president, First National Bank, Portland; Ray Conroy, Manager of the Oregon State Motor Association; F. B. Drinker, Manager, Lloyd's Corporation, Inc.; Walter Holman of Holman & Lutz, Inc.; Ronald Callvert of the Oregonian; Sam Jackson, Associate Publisher, Oregon Journal; A. L. Mills, Jr., Vice-president, United States National Bank of Portland; James H. Polhemus, President, Portland General Electric Company; and Frank T. Warren, Portland General Electric Company. Mr. Polhemus was chairman of the Portland committee. He recited the history of this project and urged the Commission to build the new highway up the Columbia Gorge at the earliest possible time and offered the services of his committee in every way possible to expedite the improvement. He particularly urged the construction of the Portland-Bonneville Section as the first project.

Chairman Cabell advised that in the opinion of the Highway Commission this is a very meritorious project; however, there is a question as to whether

or not it has the approval of the general public. He explained that the Highway Commission is reluctant to undertake any project that does not have general public approval and in this particular instance the Commission feels that there should be strong public sentiment in favor of the project before it definitely commits an expenditure of public funds to finance it, it being a costly undertaking.

The Engineer advised that economically the project would realize about 300 per cent on the investment involved. In other words, the project would pay for itself in ten years with three per cent money. He added that construction of the Portland-Bridal Veil Section would require more funds than the Commission has available. He suggested that it would be advisable to secure a special appropriation of federal funds, referring to the bill now before Congress which provides for funds for improvement of the highways on the strategic military highway system, and suggested the committee contact the Oregon delegation in Congress to secure such federal allotment. He estimated the cost to construct the highway to Bridal Veil at \$2,500,000, including work already completed or under contract, and \$4,500,000 to extend the improvement as far as Cascade Locks.

Mr. Colwell stated that the committee is in accord that this highway should be built. He suggested, if the project could not be financed otherwise, that it might be possible to pay for it on the toll basis. He concurred in Mr. Polhemus's suggestion that the Portland-Bonneville Section be completed first and that such improvement be undertaken within the next two or three years.

Mr. Callvert suggested the sale of bonds for this improvement and also to pay for reconstructing the Pacific Highway between Seaside and Grants Pass. In this connection Chairman Cabell advised that the consensus of opinion of the members of the Legislature is against the sale of additional bonds to finance highway improvements. The Commission also feels that bonds should not be sold simply to speed up the highway program.

Commissioner Clough pointed out the fact that the cost of highway improvements is steadily increasing. He suggested if such costs continue to increase it might be advisable to curtail expenditures and concentrate on paying off outstanding highway bonds until conditions improve when the matter of sale of additional bonds could then be given consideration.

This matter was discussed at considerable length from various standpoints, including need for the improvement and method of financing the same. Mr. Polhemus advised that the Port of Portland owns certain dredging equipment and suggested that it might be possible to make this equipment available to highway contractors in connection with this improvement. He estimated that it would cost about \$35,000 per month to dredge 1,000,000 yards of material. The Engineer was instructed to look into the possibilities of securing this equipment.

Mr. Colwell suggested as a means of financing the project the formation of a highway district, including all of the counties affected by the

highway, and the sale of district bonds with the understanding that the state would reimburse the districts in yearly installments. Chairman Cabell remarked that the suggestion sounds good but the Commission would want to study it thoroughly before acting on it.

Mr. Conway advised that the State Motor Association has always stood for no tolls, no bonds, and no increased debt for highway purposes and he did not believe that the Association would wish to deviate from such policy now. He approved the use of the Port of Portland dredging equipment if it can be obtained. He pointed out that in all probability the government tax on automobiles next year will be increased considerably and in view thereof it is the intention of the Motor Association to do what it can to lower the state tax on automobiles.

Chairman Cabell advised that there is now a bill before Congress which provides special funds for highway improvements and if this bill becomes a law Oregon will receive approximately \$1,600,000 which will probably have to be matched by \$400,000 of state funds. He pointed out that there are many candidates throughout the state for this money, and the prospects of spending more than \$350,000 per year on the Columbia Gorge improvement is not very good because of the many obligations which the Highway Commission now has.

Messrs. Hills and Holman also spoke briefly in behalf of the improvement. In conclusion Mr. Reynolds inquired if the Commission could give them any hope that the construction of the first unit between Portland and Bridal Veil will be completed within the next two years. He was informed by Chairman Cabell that the Commission cannot make a definite statement at this time, but if the Commission secures additional funds from the federal government and can spend this money in the Columbia Gorge without adverse criticism from people in other parts of the state the Commission will do all that it can to speed up the improvement. The conference was concluded at 9:30 p. m.

At the conclusion of this conference Mr. Reynolds discussed with the Commission other projects involving improvement of the Old Oregon Trail heretofore recommended by the Oregon Trail Association.

The Commission discussed the setting of a date for its inspection of the Warm Springs Highway and its public hearing in the town of Ontario with respect to the rerouting of the Old Oregon Trail along West First Street in that town. It was decided to make such inspection trip on Wednesday, July 23, and to hold the hearing in Ontario on the following day, July 24. The Secretary was instructed to notify the persons interested.

The Engineer discussed with the Commission matters pertaining to the maintenance of city streets that are not on state highway routes, particularly those over which log hauling operations are being carried on resulting in serious damage to the highway surface. The Commission deferred definite action on this matter for the time being.

Ben Titus, Acting Director of the Travel and Information Department,

was present and requested instructions relative to the administration of a bill passed by the 1941 Legislature authorizing an appropriation of 15,000 of state funds for expenditure in connection with the Oregon Trail Centennial Celebration which is to be conducted in 1943. He explained that the bill provides for a committee of five members to advise on the matter and also provides that the State Highway Commission shall administer the funds; further, that Governor Sprague has appointed on this committee Messrs. Phil Parrish, Portland; Roy Raley, Pendleton; Leo Adler, Baker; Kenneth L. Hicks, The Dalles; and Roy Meyers, Oregon City; Mr. Parrish being designated as Chairman. Mr. Parrish, he said, wishes to attend at state expense the meeting of the Pioneer Trail Association which is to be held in Denver, Colorado, on August 15 and 16, 1941, it being his thought that much good could be accomplished at such meeting in arousing enthusiasm for the Centennial; furthermore, he has requested authority for Mr. Walter Heachen to make a 30-day trip at state expense among the various cities and towns along the route of the Old Oregon Trail in the interests of the Centennial, which would mean the furnishing of a state car and the paying of Mr. Heachen's expenses. He inquired as to the wishes of the Commission in this regard. The matter was discussed at some length but a definite decision was deferred in order to give the members of the Commission an opportunity to study the legal features involved. (The Commission reconsidered this matter on the following day at which time the Commission approved Mr. Parrish's trip to Denver at state expense but deferred action on his request for Mr. Heachen's trip until the entire matter has been discussed with Governor Sprague. It was decided that Chairman Cabell would discuss the matter with the Governor in behalf of the Commission. It was also decided that the Centennial Commission should be invited to meet with the members of the Highway Commission at its next regular meeting for discussion in an endeavor to arrive at a clear understanding with respect to the responsibilities of each party with respect to the administering of the law, inasmuch as the Commission considers that the law places the responsibility in the hands of the State Highway Commission.)

The Commission adjourned at 10:45 p. m. to reconvene on the following morning in the auditorium of the Public Service Building.

Portland, Oregon, July 17, 1941

The State Highway Commission reconvened in regular session at 9:00 a. m. in the auditorium of the Public Service Building. Present were:

Henry F. Cabell, Chairman
Huron C. Clough, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

Commissioner Oliver was excused from attending the meeting.

Bids as follows for highway construction projects were opened and read in conformance with previously published notice, following which Chairman Cabell announced that the award of contracts would be made at 3:00 p. m. in the same room:

TERRITORIAL SECONDARY HIGHWAY
MONROE-LANE COUNTY LINE SECTION
GRADING, SURFACING AND OILING

	<u>Using Asphalt</u>	<u>Using Tar</u>
E. L. Gates	\$43,469.50	\$43,727.50
Coos Bay Dredging Company	- - -	55,813.05

FORT STEVENS COUNTY ROAD
WARRENTON-SKIPAWON SECTION - GRADING AND PAVING

Porter W. Yett	\$34,496.50
----------------	-------------

WOLF CREEK HIGHWAY
BRIDGE OVER NORTH FORK NECANICUM RIVER

Frank Watt Construction Company	\$16,826.00
Babler Bros.	17,151.00
Lindstrom Bros.	17,976.50
C. J. Eldon	19,202.20
Barham Bros.	19,591.00

KIMBERLY-LONG CREEK SECONDARY HIGHWAY
KIMBERLY-SIMAS SCHOOL SECTION - GRADING AND SURFACING

E. L. Gates	\$47,915.00
Leonard & Slate	49,633.00

FRENCHGLEN SECONDARY HIGHWAY
NORTH UNIT, WRIGHTS POINT-NARROWS SECTION
GRADING AND TOPPING

Norris Bros.	\$31,492.00
--------------	-------------

WARNER SECONDARY HIGHWAY
WARNER SUMMIT-MUD CREEK SECTION - GRADING AND SURFACING

Rogers Construction Company	\$52,961.00
-----------------------------	-------------

EUGENE-SWISSHOME SECONDARY HIGHWAY
FISHER ROAD-OAK HILL SECTION - GRADING, SURFACING AND OILING

No Bids Received On This Project

OREGON COAST HIGHWAY
BRIDGE OVER MILLPORT SLOUGH NEAR KERNVILLE

C. J. Eldon	\$22,954.00
J. P. Johnston	23,454.00
Harry I. Hamilton	24,484.00
Babler Bros.	25,886.00
R. G. Barnes	26,287.00
Barham Bros.	27,379.00

NORTH SANTIAM SECONDARY HIGHWAY
DETROIT-SOUTH SANTIAM JUNCTION ROCK PRODUCTION PROJECT

A. O. Ekstrom	\$35,500.00
Salem Supply Company	37,547.50

PACIFIC HIGHWAY WEST
FRONT AVENUE, PORTLAND (CLAY STREET-SHERIDAN STREET) SECTION
GRADING, PAVING AND TWO SUBWAY STRUCTURES

Edlefsen-Weygandt Company	\$244,940.00
Porter W. Yett	291,827.10
C. J. Montag & Sons	302,000.00

INDEPENDENCE SECONDARY HIGHWAY
INDEPENDENCE (B STREET-MONMOUTH STREET) SECTION - PAVING

The United Contracting Company	\$9,930.50
Warren Northwest, Inc.	10,356.50

STARKEY SECONDARY HIGHWAY
MEADOW BROOK SECTION - GRADING AND TOPPING

E. L. Gates	\$30,920.50
Vernie Jarl	33,569.00
Triangle Construction Company	35,612.00
Leonard & Slate	37,978.00

WOLF CREEK HIGHWAY
BRIDGE OVER EAST DAIRY CREEK NEAR NORTH PLAINS

Frank Watt Construction Company	\$8,933.00
Joelson & Amens	9,200.00
Norris & Philpott	9,222.00
R. G. Barnes	10,153.00
C. J. Eldon	10,370.20
O. N. Pierce	10,448.00

County Judge Nelson B. Higgs, Harney County, was present in the interests of the Rome-Princeton Secondary State Highway. He asked the Commission to allocate state funds to this project so work can be carried on during the winter months, in view of the fact that CCC forces heretofore engaged on the project have been called off and the county is unable to continue the improvement alone. Chairman Cabell advised that the Commission is committed to this project but is not in position today to state whether or not it is able to take over construction this year; however, the Commission will bear the project in mind.

The Assistant Attorney, Mr. J. T. DeSouza, reported the status of the 1941 right of way budget as follows: amount budgeted for expenditure in 1941 for general real property purchases \$600,000; amount obligated for general real property \$391,000; amount budgeted for purchase of right of way along Front Avenue, Portland, \$800,000; amount obligated to date for such purchases \$430,000. The Commission approved the report.

The Attorney requested authority to purchase certain parcels of real property that are needed for various highway improvements throughout the state. He presented a list of such properties together with prices that he recommended be paid for each. After careful consideration of each item, the Commission approved the request and by unanimous vote adopted the following resolution with respect thereto:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed:

NOW, THEREFORE, BE IT RESOLVED that the several offers, or bases of settlement hereinafter enumerated be, and the same hereby are, approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

The Attorney also requested authority to condemn certain parcels of real property for which he has been unable to reach satisfactory settlements. He presented a list of such properties together with amounts that he

recommended be offered in condemnation, as follows:

<u>File No.</u>	<u>Name</u>	<u>Purpose Required</u>	<u>Recommended Offer</u>
8811	Ruby Petteys Estate	R/W	\$20.00
8919	Vern W. Matthews, et ux	R/W	1600.00
3809 & 8734	Edward O. Lessard	R/W and Maint. Site	2000.00

After careful consideration of each item, the Commission approved the several offers and authorized the Attorney to proceed with condemnation. The following resolution in regard thereto was adopted by the Commission by unanimous vote:

WHEREAS, the State Highway Commission is authorized to locate, relocate, construct, reconstruct, maintain, widen, straighten, and otherwise improve state highways, both primary and secondary, and said Commission is also authorized to construct shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, and snow fences, and is authorized to acquire quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, and broadcasting stations, and is further authorized to develop, construct, improve, operate, and maintain parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, and other places of attraction and scenic value; and

WHEREAS, said Highway Commission is authorized to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property, or any interest therein, necessary or deemed by the Highway Commission necessary for the accomplishment of any and all of the foregoing things; and

WHEREAS, in the judgment of the Highway Commission the several tracts or parcels of land hereinafter described are each and all necessary for the specific and particular purposes hereinafter specifically set forth;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the Commission does hereby find and declare that the several parcels of real property hereinafter described are each and all necessary for the accomplishment of the purposes hereinafter expressly and specifically set forth, which said real properties and the specific purposes for which the same are being acquired are described as follows, to wit:

Real property owned by Edward O. Lessard, which property is located in Government Lots 1 and 2 (NW $\frac{1}{4}$) of Section 4; in Lot 6, Block 4, Georgetown, situated in Section 4; in

Lot 5, Block 4, Georgetown; and in Lot 5, Block 5, Georgetown, all in Township 4 North, Range 1 West, W. M., in Columbia County, Oregon, and is more particularly described on the attached sheets and designated as Parcels Nos. 1, 2, 3, 4, 5, and 6 and is further identified in the records of the Highway Commission as file R 8734, Parcels Nos. 1 and 2 being acquired for right of way purposes and Parcels Nos. 3, 4, 5, and 6 being acquired for maintenance site purposes in connection with the Columbia River Highway;*

Real property owned by Vern W. Mathews and Rhoda Mae Mathews, which property is located in the southeast quarter (SE $\frac{1}{4}$) of Section 19 and in the southwest quarter (SW $\frac{1}{4}$) of Section 20 and in the northeast quarter (NE $\frac{1}{4}$) of Section 30 and in the northwest quarter (NW $\frac{1}{4}$) of Section 29, Township 18 South, Range 2 West, W. M., Lane County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 7 and is further identified in the records of the Highway Commission as file R 8919, and which property is being acquired for right of way purposes in connection with the Willamette Highway;*

Real property owned by the Ruby B. Petseys Estate, which property is located in the southwest quarter (SW $\frac{1}{4}$) of the northwest quarter (NW $\frac{1}{4}$) of Section 1, Township 4 South, Range 14 East, W. M., Sherman County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 8 and is further identified in the records of the Highway Commission as file R 8811, and which property is being acquired for right of way purposes in connection with the Sherars Bridge Highway No. 290.*

2. That the Commission does hereby find and declare that each of the said described parcels of real property is necessary and acquisition of the same by the State is required for the specific purposes hereinabove set forth, and the said properties are being acquired for the express and specific purposes in this resolution set forth.

3. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real properties, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of the said real properties, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the

acquisition of said property or properties, whether said properties be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

4. That J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and he is hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement or agreements can be reached, then it is hereby further resolved that J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and he hereby is requested to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated.

5. That this resolution be entered in full in the minutes and records of this Commission.

*(The detailed descriptions of the respective parcels of real property mentioned in this resolution are attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 14, under the heading "Real Property Condemnation Resolutions", and said descriptions by this reference are made a part of this minute entry to the same extent as if copied in full herein.)

The Attorney asked the Commission to adopt a resolution as a substitute for a resolution heretofore adopted on the 9th day of May, 1941, in which the Commission authorized him to condemn right of way across property owned by Mary E. Itach, et al. Since the adoption of said resolution, he said, a decree in partition has been made by the circuit court of the State of Oregon for Washington County by which title to a portion of the property described in said original resolution has been vested in certain persons and title to another portion of said property vested in other persons and it so happens that one Catherine Fowles is now the owner of a portion of this property that is needed for the Wolf Creek Highway Improvement and in order to condemn the property it will be necessary to institute new proceedings, requiring a new resolution by the Highway Commission. The Commission approved the request and thereupon by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, the State Highway Commission is authorized to locate, relocate, construct, reconstruct, maintain, widen, straighten, and otherwise improve state highways, both primary and secondary, and said Commission is also authorized to construct shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, and snow fences, and is authorized to acquire quarry sites, gravel pits,

storage sites, stockpile sites, weighing stations, and broadcasting stations, and is further authorized to develop, construct, improve, operate, and maintain parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, and other places of attraction and scenic value; and

WHEREAS, said Highway Commission is authorized to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property, or any interest therein, necessary or deemed by the Highway Commission necessary for the accomplishment of any and all of the foregoing things; and

WHEREAS, that certain highway known and designated as State Highway No. 47, and otherwise known as the Wolf Creek Highway, is a duly designated and adopted state highway; and

WHEREAS, the Highway Commission has heretofore, by resolution duly adopted and entered in the minutes of the Commission, declared said highway to be a highway of major importance and did further find and declare that in connection with the acquisition of real properties for rights of way for said highway there should be acquired also all rights of access from the abutting property to said highway, to which said resolution reference is not made; and

WHEREAS, the Highway Commission duly and regularly adopted a resolution and made the same a part of its minutes of the meeting of May 9, 1941, in which resolution there was described certain real property claimed to be owned by Mary E. Ibach, et al; and

WHEREAS, since the adoption of said resolution a decree in partition has been made by the Circuit Court of the State of Oregon for Washington County, Partition Suit No. 11721, by which title to a portion of the property described in said original resolution has been vested in certain persons and title to another portion of said property vested in other persons; and

WHEREAS, to meet said new situation with respect to title it is necessary that this resolution be adopted; and

WHEREAS, Catherine Fowles, et al are the owners of the following described real property, to wit:

Beginning at the northwest corner (a stone) of the J. L. Northrup D. L. C. No. 44 in Section 33, Township 2 North, Range 3 West, W. M., in Washington County, Oregon, and running thence South $1^{\circ} 24'$ East along the west line of said D. L. C. 1314.0 feet to an iron pipe; thence South $87^{\circ} 47' 30''$ East parallel with the north line of said D. L. C. 1651.6 feet to a point on the east line of said Ibach

property in the center of the County Road, from which point an iron pipe bears North $87^{\circ} 47' 30''$ West 20.0 feet; thence along the east line of said Ibach property North $1^{\circ} 21'$ West in the center of said county road 1314.0 feet to an iron pipe and stone on the north line of said D. L. C.; thence North $87^{\circ} 47' 30''$ West along the north line of said D. L. C. 1652.7 feet to the place of beginning, containing 49.74 acres.

WHEREAS, it is the judgment of the Highway Commission that the real property hereinafter described, which is a part or portion of the above described real property, is necessary and needed for right of way and other highway purposes in connection with the construction and maintenance of the said Wolf Creek Highway;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. The Commission does hereby find and declare that the real property hereinafter described, and which real property is a part or portion of the above described real property, is necessary and is needed in connection with the construction and maintenance of the Wolf Creek Highway, which said real property is described as follows, to wit:

A parcel of land lying in the J. L. Northrup D. L. C. #44 in Section 33, Township 2 North, Range 3 West, T. N., Washington County, Oregon, the said parcel being all that portion of the foregoing described property included in a strip of land 140 feet in width, 70 feet on each side of the center line of the Wolf Creek Highway as said highway has been located over and across or adjacent to the said property; the location of the said strip of land (in so far as it encroaches upon said property) being determined by the said center line from Station 2344+98 to Station 2364+29.8 which portion of center line is described as follows:

Beginning at a point which is Engineer's center line Station 2344+98 opposite and 70 feet distant from which point the northerly line of the said strip of land intersects the west line of the J. L. Northrup D. L. C.; said point being 510 feet south and 20 feet west of the northwest corner of said Northrup D. L. C. #44, in Township 2 North, Range 3 West, T. N.; thence South $61^{\circ} 53'$ East a distance of 1931.8 feet to station 2364+29.8, at which station said highway center line intersects the center line of the county road, said road center line also being the easterly line of the owners' property.

The parcel of land to which this description applies contains 5.74 acres.

2. The Commission does hereby further find and declare that the last above described parcel of real property is needed and required and the appropriation and acquisition of the same is sought under these proceedings for right of way and other highway purposes in connection with the construction, improvement, and maintenance of the said Wolf Creek Highway.

3. The Commission does further find and declare that, in addition to the acquisition of the said last described tract of real property for the purposes herein stated, it is likewise necessary that there be acquired all right of access from the remaining property of the said Catherine Fowles, et al, except access at approximately state highway engineer's station 2352+00, and a seven-foot stockpass beneath the surface of the highway at engineer's station 2348+00, which said remaining real property abuts upon or joins the real property last above described and will, when said highway is constructed, abut upon said highway.

4. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real property, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of the said real property, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property, whether said property be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

5. That I. H. Van Winkle, Attorney General of the State of Oregon, and J. H. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they are hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement can be reached, then it is hereby further resolved that the Attorney General of the State of Oregon and J. H. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they hereby are requested to commence and prosecute to a final determination such suit or action as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated, together with all rights of access from adjoining or abutting property to said highway, except as provided herein.

6. That this resolution be entered in full in the minutes

and records of this Commission, and the resolution relative to property claimed to be owned by Mary E. Ibach et al heretofore adopted on the ninth day of May, 1941, be and the same hereby is rescinded.

Chairman Cabell brought up for discussion the matter of acquiring right of way for the Wolf Creek Highway WPA Project near a place known as Vadis. The Attorney advised that he is now working on this project and expects by July 25 to have all of the right of way acquired or under condemnation so that construction work can then proceed without delay. He requested authority from the Commission to condemn the properties involved, in the event that he is unable to negotiate satisfactory settlements. After discussion the Commission approved the filing of the condemnation proceedings, if necessary, on the following properties along the Davies-Gardner Section of the Wolf Creek Highway, it being left with Chairman Cabell to decide later the offers that are to be made for each in condemnation:

File 6531	Christian Anderson Estate
File 6532	Charles E. Davis
File 6533	Frank A. Denneman
File 3428	U. S. Government (Resettlement)
File 6534	Rose Utecht
File 6535	Patrick Davis
File 6536	Fred Cusick
File 6537	Wm. J. Staples
File 6538	H. G. McCarthy
File 6539	Martha Mast

The Assistant Attorney brought up for discussion the matter of acquiring right of way for the proposed highway improvement at Tongue Point near Astoria, particularly such right of way across property owned by Mrs. W. E. Blackstock. He advised that Mrs. Blackstock knows about the proposed highway improvement and is making arrangements to acquire other property in lieu thereof, in fact she has already secured an option to secure this other property but would like to know definitely about the proposed highway improvement before she closes the deal. He valued the Blackstock property at \$1,900 and requested instructions whether or not to purchase it at this time. The Commission decided not to purchase this property now on account of uncertainties that exist with respect to the funds that are to be used to finance the highway construction work and instructed the Attorney to so inform Mrs. Blackstock.

Dr. C. A. Howard, President, Oregon College of Education, Monmouth, and Mr. Charles D. Byrne, Secretary of the Board of Higher Education, were present in regard to the rerouting of the Pacific Highway West through the town of Monmouth so as to eliminate the necessity for highway traffic to pass directly in front of the campus. Dr. Howard advised that the present highway divides the campus, some of the school buildings being located on one side of the highway and others on the opposite side, which creates a very unsatisfactory and dangerous condition for students who are obliged to cross the highway. He gave figures to show the volume of highway traffic that passes the campus daily and predicted that it will greatly increase when the federal government

establishes it. Army cantonment between Monmouth and Corvallis, which cantonment, he understands, will extend to within three miles of Monmouth. He advised that he has received definite information that the government intends to construct the cantonment at such location. He suggested that it might be possible to reroute the highway along Knox Street although he said he is not attempting in any way to dictate to the Highway Commission where the highway should be placed.

Chairman Cabell gave as his understanding that there is still some question as to whether or not the army cantonment will be located south of Monmouth and even if it is located at such place, there is a question whether or not the highway will have to be changed to accommodate it. The Highway Commission, he said, intends to give this matter very careful study and promises that no definite action will be taken either one way or the other until further consulting Dr. Howard.

A delegation from Klamath County, headed by Mr. Earl Reynolds, Manager of the Klamath County Chamber of Commerce, and including the following: County Judge U. E. Reeder; County Commissioners E. E. Benner and John R. Reber; County Engineer Frank Z. Howard; B. G. Courtright, Superintendent of the Klamath Indian Reservation; H. J. Doolittle, District Road Engineer of the United States Indian Service, Spokane; Boyd Jackson, Klamath Tribal Council; and G. C. Lorenz, representing the Crater Lake Lumber Company, appeared before the Commission in the interest of the Sprague River County Road. Mr. Courtright advised that Congress has passed a bill appropriating certain funds for highway improvements within the boundaries of Indian Reservations and in this bill provision was made for expenditure of \$150,000 for the improvement of the Sprague River Road, provided such fund is matched by a like amount of state money. He inquired whether or not the State Highway Commission is willing to provide the match money and urged investigations as may be necessary. Mr. Doolittle advised that surveys for the road improvement have already been made and approved by the Public Roads Administration, particularly between the towns of Chiloquin and Sprague River. The federal government, he said, is willing to meet the Highway Commission on any reasonable proposition that may be presented to provide for construction along the adopted survey.

In the discussion the question arose whether or not the federal appropriation is absolutely contingent upon the state putting up the match money. This could not be answered because of lack of a copy of the bill providing for the appropriation. Chairman Cabell advised that the Commission must know definitely about this feature and how the money must be spent before it can make a decision. Engineer Howard suggested, if the Highway Commission will assume the responsibility to construct the 22-mile section between the towns of Chiloquin and Sprague River, Klamath County will improve the remaining section between Sprague River and the junction of the Klamath Falls-Lakeview Highway. After further discussion the Commission authorized and instructed the Engineer to make full investigation of this entire matter, including both engineering features and federal requirements as to the money-matching features.

Engineer Howard then asked the Commission to construct an oiled surface on two county market roads entering the town of Chiloquin. He said that all they are asking for is the oiling of short sections of each of these roads and advised that Klamath County will pay all of the costs involved. The Commission approved the request subject to the condition that there is sufficient oil rock available that can be spared for the purpose and that a highway oiling crew is available to do the work. The matter was referred to the Engineer to handle the details.

The County Court of Marion County, represented by County Judge Grant Murphy and County Commissioner Ralph Girod, was present in regard to the designation of the North Santiam Highway as a state secondary highway between Detroit and the South Santiam Highway Junction. The Court was assured by Chairman Cabell that the Commission is favorably inclined to so designate this road and will do so as soon as the right of way has been cleared of all encroachments and when all three Commissioners are present, which is a legal requirement.

Judge Murphy also brought up for discussion matters pertaining to the further improvement of the Salem-Silverton County Road. He said that for the most part the right of way needed for this improvement has been acquired; however, the county is having difficulty with several of the owners and indications are that it is going to be necessary to condemn some of the property, which the county will do as soon as the state is ready to proceed with construction. In other words, the county will clarify all right of way matters as soon as it is ordered to do so by the state. Commissioner Girod urged the Commission to contract additional work on this road some time this fall. It was explained to the court that the surveys are not yet completed, so the Commission is not in position today to make any definite commitment, but will again discuss the matter with the court when the surveys are done and the results thereof studied.

The Commission by unanimous vote adopted the following resolution abandoning a short section of the old right of way of the Oregon Coast Highway in the town of Brookings, which section is no longer of value from the state highway standpoint in view of the fact that the highway has been relocated on another alignment:

WHEREAS, in order to afford and make possible a better alignment and a more serviceable, safe and convenient highway for the traveling public, the Commission found it necessary to relocate and realign the section of the Oregon Coast Highway within the boundaries of the Town of Brookings in Curry County; and

WHEREAS, by reason of said relocation and realignment, and the reconstruction of said section of said highway, there was eliminated and made unnecessary as a part of the right of way of the reconstructed highway a section or area of the old right of way which said section or area is more specifically defined and described hereinafter in this resolution; and

THEREAS, it is the judgment and the opinion of the Commission that there should be reflected in the minutes and records of the Commission the Commission's purpose and plan to abandon, as a part of the right of way of the Oregon Coast Highway, the section or area hereinafter described and which was formerly incorporated as a part of the right of way of said highway in Brookings;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and affirmatively voting, as follows:

1. That the fragment or parcel of land confined within the area hereinafter described, which said fragment of land was formerly within the limits of the right of way of the Oregon Coast Highway in Brookings, but which is now without the limits of the right of way of said highway as relocated and reconstructed, be and said fragment or parcel of land hereby is abandoned as a part of the right of way of said Oregon Coast Highway. The parcel or fragment of land abandoned and dismissed as a part of the right of way of said highway is, so far as control and supervision of the same by this Commission is concerned, left to revert to the adjoining and abutting property owners or to the control and supervision of the County Court of Curry County. The fragment or parcel of land affected by this resolution is described as follows, to-wit:

That certain portion of Chetco Avenue, lying between Blocks 3 and 4 of Brookings, Oregon, being described as follows:

Beginning at a point on the south line of said Block 4; said point being 40 feet distant southwesterly from (when measured at right angles to) the relocated center line of the Oregon Coast Highway; said point also being 34 feet easterly from the southwest corner of said Block 4; thence northwesterly along the said south line a distance of 34 feet to the southwest corner of said Block 4; thence southwesterly along the easterly side line of Pacific Avenue, 63.6 feet to the northwest corner of said Block 3; thence southeasterly along the northerly line of said block 384 feet to the west line of the 10 foot alley through Block 3; thence northeasterly along the extension of said west line of the alley, a distance of 7.2 feet, to a point which is 40 feet distant southwesterly from (when measured at right angles to) the relocated center line of said highway; thence northwesterly parallel to and 40 feet distant from said relocated center line to the point of beginning.

Said parcel of land, which by this resolution is abandoned as a part of the right of way of said highway, is in addition to the above de-

scription more particularly ascertained and determined by reference to a map or blue print marked "Exhibit A", attached hereto and by this reference made a part hereof, which said exhibit for identification purposes bears the signatures of K. D. Lytle, Division Engineer, H. C. Smith, Construction Engineer, and C. B. McCullough, Assistant State Highway Engineer, and is dated July 9, 1942, upon which map or exhibit the said above described parcel of land is shown shaded in red.*

2. That this resolution be entered into the minutes and records of the Commission and a certified copy thereof delivered to the County Court of Curry County, together with a copy of said exhibit or map, for such action as said County Court may deem proper; a like certified copy with map attached delivered to the Public Roads Administration, and a like certified copy of resolution delivered to Collier H. Buffington, as attorney for the adjoining property owners.

The Secretary presented a resolution from the Port Orford Chamber of Commerce urging the Highway Commission to make prompt and immediate settlement of the controversy relating to the right of way that is needed for the improvement of the Oregon Coast Highway across the Orris Knapp property in Port Orford so that construction work can proceed this summer rather than in 1942. In this connection the Commission discussed its previous offer of \$10,000 to Mr. Knapp for his property and decided to renew said offer; however, indicated that it might pay \$10,500 if that is absolutely necessary. No action was taken by the Commission on the resolution.

The Attorney reported on his investigation of the controversy between the County Court of Klamath County and certain property owners with respect to ownership of a small parcel of land at the intersection of The Delles-California Highway and the Green Springs Highway, just out of Klamath Falls. He recalled that the Klamath County Court mentioned this controversy when it appeared before the Commission at a previous meeting at which time it was explained that the deed by which the county acquired the property contained a provision that the portion that was not utilized for highway purposes should revert to the original property owners, and the Commission was advised at that time that such property owners are now endeavoring to establish their rights to such portion. The Attorney advised that he has examined the county's deed and in his opinion the former owners do not have the rights under this provision that they think they have and are not entitled to any of this property unless the Highway Commission, which is now the title owner, wants to relinquish it. The Commission decided unanimously to retain title to the entire area.

The Attorney brought up for discussion the claim of Mr. J. W. Hughey for damages to his property at Nyssa, resulting from change in grade of the highway at this place. He advised that he has investigated this claim and those of others in the same vicinity and is of the opinion that the state is liable. He recommended settlement of the claims on the following basis: payment to J. W. Hughey for damage to Lots 19 and 20, Block 149, Wards Addition, \$700, Mr.

*Map filed Right of Way Abandonment and Retention File - No. 94.

Hughey to extend, at his own cost and expense, a certain cross drain at the corner of his property; Dwight Seward for damage to Lots 17 and 18, Block 149, Wards Addition, \$280.95; H. H. Kinross for damage to Lots 11, 12, 13, 14, 15, and 16, Block 149, Wards Addition, \$443.50. The Engineer concurred in the recommendation. The settlements recommended were approved by the Commission by unanimous vote.

The Engineer reported that, in conformance with previous instructions from the Commission, Division Engineer Lytle and C. T. Parker, Chief of Way Agent, interviewed a number of citizens of Gold Beach to ascertain the sentiment of the people of this community regarding the improvement of the Oregon Coast Highway on a 60-foot and on an 80-foot width right of way, and their report is to the effect that most of the people prefer an 80-foot right of way in preference to the 60-foot right of way because they feel that if the Commission decides on an 80-foot width right of way now, it will settle for all time to come the question of the permanent location for the highway. However, there was no definite opposition to the improvement on the 60-foot width right of way. In view of this report the Commission voted unanimously to reconstruct the highway on 60-foot right of way and authorized the Engineer to advertise the project for bids to be received some time this fall. The Commission also ordered that provision be made in the specifications for removal of utility poles.

The Engineer requested authority to acquire additional land to provide an 80-foot right of way for the Oregon Coast Highway between Camp Clatsop and West Lake in Clatsop County. He explained that the City of Warrenton is arranging for the installation of a large water main along the east side of the highway between these points, and, if the city is permitted the use of the existing right of way, it will place the main too close to the center of the traveled roadway because the right of way at this location is only 40 feet wide, being 20 feet on each side of the center line. He pointed out that the present right of way is now 80 feet wide north and south of this section, and eventually it will be necessary to widen the entire strip. He gave as his thought that it would be highly desirable to provide a uniform width of 80 feet throughout the entire length at this time, not only to accommodate the City of Warrenton pipe-line construction, but to accommodate the highway when it is rebuilt in the not distant future. The section involved, he said, is approximately 4,000 feet long. The Commission approved the request and authorized the right of way department to secure options for the property.

The Attorney requested instructions relative to accepting bids from house movers who either are not able to or will not furnish performance bonds in favor of the owners of the houses that are to be moved. He advised that the practice heretofore followed is to guarantee the property owners that such bond will be furnished; however, one of the house-moving contractors, whose headquarters are in Eugene, refused absolutely to furnish such bond. He recommended that in such cases the proposal of such house mover be not accepted or considered. The Commission approved the recommendation and ordered that such procedure be followed hereafter as the established policy.

The Attorney also brought up for discussion the question of making deductions from the amounts to be allowed property owners and the compensation to be made to house movers in instances where the property owner does not give the house-moving work to the low bidder for the same. He recommended the following plan for the handling of cases of this kind:

Scale of Deductions on Amounts to be Paid to Property Owners

10 per cent of the amount bid on the first \$2000.00.

On bids in excess of \$2000.00, \$200.00 plus 5 per cent of the amount in excess of \$2000.00.

Scale of Allowances to be Made to House Movers

\$0.00 to \$2000.00, five per cent of the amount bid, with a fixed minimum of \$15.00.

\$2000.00 to \$3000.00, \$100.00 plus 4 per cent of the amount of the bid in excess of \$2000.00.

\$3000.00 to \$5000.00, \$140.00 plus 3 per cent of the amount of the bid in excess of \$3000.00.

\$5000.00 and over, \$200.00 plus 2 per cent of the amount of the bid in excess of \$5000.00, with a fixed maximum of \$300.00.

After discussion the Commission approved the recommendation by unanimous vote.

The Attorney reported on the status of payments by contractors Edlefsen-Meygandt of rentals collected by them on the Front Avenue Project, Portland. He advised that investigation convinces him that the contractors acted in entire good faith in collecting these rentals inasmuch as they took this feature into consideration when making their bid for the job. However, the contractor has agreed to turn the amounts collected over to the City of Portland as a credit to the city's Front Avenue Project fund. The Commission approved the report; however, instructed the Attorney to secure a letter from the City of Portland, in order to clear the Commission's records, giving assurance that the contractors have turned over to the city all such rentals.

The Commission deferred for the time being consideration of right of way matters in Klamath Falls involving subdivision of property owned by Mrs. Hecker.

The Attorney reported on the damage claim of Mr. Paul Gilbaugh involving his property at Rhododendron. He advised that about twenty years ago the federal government, in connection with a forest highway project, installed a breakwater, consisting of concrete blocks and cables, along the shore line

of Zig Zag River just above the Mt. Hood Highway, as a protection to the highway. However, it appears that no authority was secured from Mr. Gilbaugh, who owns the property fronting on the river at this point, to install such break-water and Mr. Gilbaugh is now seeking damages although he is willing to sell his property to the state if the Commission prefers to handle the matter in that manner. Mr. Gilbaugh, he said, will sell his lot fronting on the river for \$150; otherwise, he wants the cables which connect the concrete blocks cut so as to allow him access to the river from his property. The Attorney also advised that this matter has been presented to the Public Road Administration and it is the wish of that department that the state reach a satisfactory settlement with Mr. Gilbaugh.

In the discussion the question arose whether or not Mr. Gilbaugh actually owns the property along the river front and whether or not the state would be liable for damages to other properties if it acknowledged damage to Mr. Gilbaugh's property. The Commission decided not to settle with Mr. Gilbaugh unless he can prove that he owns this frontage. The Attorney was instructed to discuss the matter again with Mr. Gilbaugh.

The Commission had under discussion the advisability of disposing of a portion of the land that was acquired from a Mr. Vaughn adjacent to the Tiller-Trail Secondary Highway, about one-half mile from Trail, for use in connection with a forest highway project at that place. The Attorney advised that Mr. Vaughn refused to sell only the land needed for the highway right of way and insisted upon the state acquiring his entire holdings; further, that the state purchased the entire farm from Mr. Vaughn notwithstanding that it was not all needed for the highway improvement, and the question of selling a portion of this property comes up at the present time because of an offer that has been received to purchase the same. The Engineer advised that the suggestion has been made by Division Engineer Lytle that the upland portion of this property be sold but that the lowland along Trail Creek be retained. The Commission deferred definite action on the matter pending investigation by the Engineer and the Attorney.

The Attorney requested instructions relative to the sale of certain state-owned property lying between the old highway right of way and the new highway right of way at Agate Beach. He said that, in connection with the acquisition of right of way for the new highway at this point, the Commission purchased at one place all of the land lying between the new highway location and the old highway and he has been informed that certain citizens or residents of Agate Beach wish to acquire this area or a portion of it on which to construct a community hall, although other citizens are opposing that proposed use and urge that the area be retained by the state for landscaping and other like purposes. He recommended that the Commission do not sell this property and that the Commission dedicate the entire area for highway and other public purposes, and if some of those purposes involve landscaping work, that the Landscape Engineer be authorized and instructed to develop the same. After discussion the Commission decided not to sell the property and so ordered.

The Commission by unanimous vote adopted the following resolution

abandoning a short section of the Oregon Coast Highway (old route) in the SE $\frac{1}{4}$ of the NE $\frac{1}{4}$ of Section 22, T. 7 S., R. 11 W., Lincoln County, fronting on the Charles P. Nelson property at Nelscott, the Engineer having recommended such abandonment because the property is not needed for general highway purposes:

WHEREAS, in order to afford a better alignment and a more satisfactory, safe and convenient highway for the traveling public the Commission found it necessary to relocate a portion of the Oregon Coast Highway in Lincoln County; and

THEREAS, by reason of said relocation and reconstruction of said section of highway there was eliminated and made unnecessary as a part of the permanent highway a certain section, which section is more specifically defined and described hereinafter in this resolution; and

THEREAS, it is the judgment and opinion of the Commission that there should be recorded in the minutes and records of the Commission its purpose and plan to abandon as a part of the said highway the fragment or portion of right of way heretofore designated and which was heretofore included within the area of the right of way of said highway as formerly located but which is now without the regular limits of said highway as relocated.

NOW, THEREFORE, the premises being in general as above stated, it hereby is resolved by this Commission, all members being present and affirmatively voting as follows:

1. That the fragment of land confined within the area hereinafter described, which fragment or parcel of real property was formerly within the limits of the right of way of the Oregon Coast Highway in the vicinity of Nelscott but is no longer a part of the right of way of said highway as the same has been relocated and constructed be and said parcel of real property is abandoned as a part of the right of way of said highway, and said parcel of land is, so far as control and supervision by this Commission is concerned, eliminated and left to revert to the adjoining and abutting property owners. The fragment or parcel of land affected by this resolution is defined and described as follows, to wit:

A parcel of land lying in the Southeast quarter (SE $\frac{1}{4}$) of the Northeast quarter (NE $\frac{1}{4}$) of Section 22, Township 7, South, Range 11 West, T. 7 S., R. 11 W., Lincoln County, Oregon; the said parcel being all that certain portion of the old abandoned sixty foot right of way lying westerly of a line 40 feet distant westerly from and parallel to the reconstructed center line of the Oregon Coast Highway, the beginning and ending points of said parcel of land, with reference to the Engineer's Stations of the said reconstructed center line being Station 979+57 on the northerly end and Station 988+35 on the southerly end, containing 0.80 acre, more or less.

The location of said abandoned right of way may be more definitely and particularly ascertained and determined by reference to a map or blueprint marked Exhibit A attached hereto and by this reference made a part hereof, which said exhibit for identification purposes bears the signatures of F. D. Eason, Division Engineer, H. G. Smith, Construction Engineer, and C. B. McCullough, Assistant State Highway Engineer, and is dated April 11, 1941, upon which map or exhibit is reflected the above described parcel of land by showing the same shaded in red.*

2. In the event there remains any physical connection between any portion of said abandoned right of way or highway and the present highway, and by reason of such physical connection traffic from the existing highway may enter or use the said abandoned right of way or highway to the possible damage or injury of such traffic by reason of any unsafe condition existing with respect to said old or abandoned road, then the State Highway Engineer is hereby authorized and directed to erect such barricade or other safeguards as may be necessary to protect and safeguard traffic using and employing said newly located, constructed and dedicated section of said highway.

3. That the resolution heretofore adopted by this Commission on the seventh day of January, 1936, which resolution preserved for public purposes the above described parcel of land along with other parcels, is by this resolution amended and modified in so far as said prior resolution affects the real property herein described.

4. That this resolution be entered in the minutes and records of the Commission and a certified copy thereof delivered to Charles P. Nelson of Nelscott, Oregon, for such use and purpose as it may serve.

The Assistant Attorney brought up for discussion the claim of Henry J. Henze, St. Helens, for compensation for the loss of business during the time that his store building was being moved to accommodate the highway improvement at this place. He gave as his opinion that Mr. Henze's claim is fully justified because he actually was unable to transact any business whatsoever during the four-day period in which the building was being moved, and Mr. Henze estimates that his loss is \$10.00 per day or a total of \$40.00. He recommended payment of such sum to Mr. Henze as settlement in full for the claim. The Commission approved the recommendation and authorized settlement with Mr. Henze on such basis.

The Commission adjourned at 12:30 p. m. and reconvened at 2:00 p. m. in the same room with the same persons present and participating.

*Map filed Right of Way Abandonment and Retention File - No. 95.

The Engineer presented the claim of the S.P.&S. Railroad Company for \$44.79 representing the cost of repairing a valve in an asphalt tank car which, it is alleged, was damaged by highway department employees in emptying the car. The Engineer advised that the valve was defective in the first instance and in order to empty the car it was necessary for the employees to make use of a blow torch to loosen the congealed asphalt around the valve, which is standard practice. He admitted an error in using the blow torch on a defective valve and advised that hereafter, if the valve on any tank car is found to be defective, such condition will be reported to the railroad company and the asphalt will not be unloaded from the car unless the railroad company will assume the responsibility for any damage that may occur to the car as a result of the unloading. He recommended payment of the claim in this particular instance in view of the fact that the railroad company was not notified of the defective valve. The Commission approved the recommendation and likewise the procedure to be followed hereafter as outlined by the Engineer. The Engineer was instructed to so inform the railroad company by letter.

A delegation from Columbia, Washington and Yanhill Counties was present in regard to the designation and construction of a state highway from the town of Rainier on the Lower Columbia River Highway to a connection with the Wolf Creek Highway north of Forest Grove, and also requesting the improvement of state highways from this point to Corvallis in order to facilitate the movement of troops from the proposed army cantonment near Corvallis to Fort Lewis in the State of Washington. Mr. J. W. Nichols, Vernonia, headed the group which included the following: T. M. Crawford, Vernonia; Wm. Pringle, Sr., and J. H. Miller, County Commissioners of Columbia County; W. E. Proctor, representing the Rainier Commercial Club; County Judge H. D. Kerkman of Washington County, and Jud Greenman, Vernonia. Chairman Cabell advised that this is a very costly undertaking and the Commission is not in position at the present time to make any definite statement in regard thereto. Mr. Proctor suggested that, if the Commission could not see its way clear to provide for the entire improvement, it take over and improve as a primary state highway, the section from Apiary to a connection with the Nehalem Secondary Highway near Vernonia. He said that this portion has already been built by WPA forces and is in very good condition although it needs a little widening at certain points. He estimated that it would cost about \$30,000 to bring it up to state highway standards. He added that Columbia County is now reconstructing the road between Apiary and the Columbia River Highway junction.

Chairman Cabell advised the status of the Highway Commission's funds and gave as his thought that it would be inadvisable to designate this road a state highway now while the Commission has no idea when it would have funds with which to improve it. The policy of the Commission for a long time, he said, has been not to add new highways to the highway system until the roads now on such system are improved.

The Engineer advised that the section between the Nehalem Highway and Apiary, which has been constructed in recent years, contains a crushed rock surface with fairly good alignment and grade. However, the 7.6 mile section from Apiary to the section already oiled on Rainier Hill is not in such

good condition, the alignment and grade being poor and there being a number of sharp vertical curves. He estimated the cost to oil the entire section, 21 miles in length, and to rebuild the Rainier Hill Section at approximately \$140,000.

Chairman Cabell gave as his understanding that there are two problems under consideration, first the designation and improvement as a primary state highway of the entire route between Rainier and Corvallis and the other the designation and improvement of a short section at the north end, particularly between Rainier and the junction with the Nehalem Highway near Vernonia. The first of these projects, he explained, would be very costly and is far distant because the Commission cannot finance it; however, the second or smaller project is more within the limits to which the Highway Commission could go and the Commission will give the matter careful study.

Mr. Nichols also asked the Commission to designate and approve as a state secondary highway the county road which extends from Sunset Camp on the Wolf Creek Highway to a place known as Treharne on the Nehalem Secondary Highway. The Commission took no action on the matter.

Mr. R. W. Williams, vice-president of the Werner Timber Company, Taft, Oregon, was present in regard to the further improvement of the Siletz Secondary State Highway, particularly the northerly section between milepost 6 and milepost 9. He said that if the Highway Commission will improve this section the Werner Timber Company will contribute toward the cost thereof the sum of \$5,000 which amount represents the estimated cost to construct a log boom in the Siletz River, which the company will have to build if the highway is not improved. He urged the improvement of the road even on a low standard basis so as to facilitate the marketing of timber and to obviate the necessity of an expenditure for the log boom which he said might be damaged during high water periods. The Engineer estimated the cost of constructing such section, which is 3.8 miles in length, at \$115,000. The Commission appeared favorably inclined toward the project but deferred a definite decision until its Eastern Oregon trip during the following week when all three Commissioners are present. Mr. Williams agreed to confirm his oral offer in writing.

Mr. Williams also asked that this road be posted for a 20-miles per hour speed limit as a safeguard for traffic. The Commission approved the request subject to the condition that it has legal authority to so post the road and referred the matter to the Engineer and the Attorney to handle. It was the order of the Commission that a standard form be prepared covering the matter of reducing the speed limits on state highways.

At 3:00 p. m. Chairman Cabell announced the following awards of contracts for which bids were received at the morning session, such awards having previously been approved by unanimous vote:

Monroe-Lane County Line Section of the Territorial Secondary Highway in Benton County. 2.09 miles grading, surfacing and oiling. E. L. Gates, Packwood, Washington, submitted the low bid for this work, in the amount of \$43,469.50, using asphalt, and in the amount

of \$43,727.50, using tar. Coos Bay Dredging Co., Marshfield, submitted the only other bid for this work, in the amount of \$55,813.05, using tar. They did not submit a bid based on the use of asphalt. The Commission awards this contract to E. L. Gates, at his low bid of \$43,469.50, using asphalt.

"Warrenton-Skipanon Section of the Fort Stevens County Road, in Clatsop County. 0.52 mile grading and paving. Porter W. Yett, Portland, submitted the only bid for this work, in the amount of \$34,496.50. The Commission awards this contract to Porter W. Yett, at his bid of \$34,496.50.

"Bridge over North Fork Necanicum River at milepost 7.12 on the Wolf Creek Highway, in Clatsop County. 101-ft. reinforced concrete viaduct. Frank Watt Construction Co., Portland, submitted the low bid for this work, in the amount of \$16,826.00. Bahler Bros., Portland, submitted the next-low bid, in the amount of \$17,151.00. There were three higher bidders. The Commission awards this bid to Frank Watt Construction Company at its low bid of \$16,826.00.

"Kimberly-Simas School Section of the Kimberly-Long Creek Secondary Highway, in Grant County. 5.39 miles grading and surfacing. E. L. Gates, Packwood, Washington, submitted the low bid for this work, in the amount of \$47,915.00. Leonard & Slate, Multnomah, submitted the next-low and only other bid for this project, in the amount of \$49,633.00. The Commission awards this contract to E. L. Gates, at his low bid of \$47,915.00.

"North Unit, Wrights Point-Narrows Section of the Frenchglen Secondary Highway, in Harney County. 5.40 miles grading and topping. Morris Bros., Seattle, Washington, submitted the only bid for this work, in the amount of \$31,492.00. The Commission rejects this bid, and orders the project readvertised.

"Warner Summit-Mud Creek Section of the Warner Secondary Highway, in Lake County. 2.84 miles grading and 6.91 miles surfacing. Rogers Construction Co., Dayton, Washington, submitted the only bid for this project, in the amount of \$52,961.00. The Commission awards this contract to Rogers Construction Co., at their bid of \$52,961.00.

"Fisher Road-Oak Hill Section of the Eugene-Swisshome Secondary Highway, in Lane County. 1.26 miles grading, surfacing and oiling. No bids were received for this project.

"Bridge over Millport Slough near Kernville on the Oregon Coast Highway, in Lincoln County. 210-ft. composite pile trestle. C. J. Eldon, Portland, Oregon, submitted the low bid for this work, in the amount of \$22,954.00. J. F. Johnston, Newberg, submitted the second-low bid, in the amount of \$23,454.00. There were four higher bidders.

The Commission awards this contract to C. J. Eldon at his low bid of \$22,954.00.

"Detroit-South Santiam Junction Rock Production Project on the North Santiam Secondary Highway, in Linn and Marion Counties. A. O. Ekstrom, Portland, submitted the low bid for this project, in the amount of \$35,500.00. There was only one other bid for this work, being that of the Salem Supply Company, Salem, in the amount of \$37,547.50. The Commission refers these bids to the Engineer with power to award the contract to the low bidder when certain conditions have been satisfied.

"Front Avenue, Portland (Clay St.-Sheridan St.) Section of the Pacific Highway West, in Multnomah County. 0.44 mile grading and paving and construct two subways. Edlefsen-Weygandt Co., Portland, submitted the low bid for this work, in the amount of \$244,940.00. Porter W. Yett, Portland, was second-low, with a bid of \$291,327.10. There was only one other bid received. The Commission awards this contract to Edlefsen-Weygandt Co., at its low bid of \$244,940.00.

"Independence (B Street-Monmouth Street) Section of the Independence Secondary Highway, in Polk County. 0.17 mile paving. The United Contracting Company, Portland, submitted the low bid for this project, in the amount of \$9,930.50. Warren Northwest, Inc., Portland, submitted the only other bid, in the amount of \$10,356.50. The Commission awards this contract to The United Contracting Company, at its low bid of \$9,930.50.

"Meadow Brook Section of the Starkey Secondary Highway, in Union County. 2.22 miles grading and topping. E. L. Gates, Packwood, Washington, submitted the low bid for this work, in the amount of \$30,920.50. Vernie Jarl, Gresham, submitted the next-low bid, in the amount of \$33,569.00. There were two higher bidders. The Commission awards this contract to E. L. Gates, at his low bid of \$30,920.50.

"Bridge over East Dairy Creek near North Plains on the Wolf Creek Highway, in Washington County. 100-ft. reinforced concrete viaduct. Frank Watt Construction Company, Portland, submitted the low bid for this work, in the amount of \$8,933.00. The second-low bid was submitted by Joelson & Amens, The Dalles, in the amount of \$9,200.00. There were four higher bidders. The Commission awards this contract to Frank Watt Construction Co., at its low bid of \$8,933.00.

A delegation from Lane County consisting of residents along the Territorial Secondary Highway and including Messrs. T. H. Johnson, Maurice Johnson, Paul E. Baker and Ash Bailey came before the Commission and asked for the oiling of the Territorial Secondary Highway between Elmira and a place known as Wiper Station, approximately eight miles north of Elmira. Mr. T. H. Johnson headed the group. They alleged that the roadbed is now in perfect condi-

tion to receive an oil treatment and submitted figures showing the results of a traffic count taken during the 12-hour period from 6:00 a. m. to 6:00 p. m. on June 28, June 30 and July 9 as 159 cars, 150 cars and 190 cars, respectively. They gave as their thought that the volume of traffic that uses the road justified the expense of the oiling work. Chairman Cabell advised that the Commission has it in mind to construct additional improvements on the Territorial Secondary Highway but has not decided as yet the particular section to do and would be glad to have their ideas on such; further, that the Commission will be pleased to consider their project along with two or three others for the moneys that the Commission has available for expenditure on this highway, but the Commission is not in position to make any further statements in regard thereto at this time.

Mayor J. A. Withers, Solo, came before the Commission and asked for repairs to the main street in this town, which he said is being broken up badly by log hauling traffic. He advised that the city is financially unable to do the work and if the State Highway Department will not assume the obligation, the street will simply have to stay in disrepair. He was informed by Chairman Cabell that the Commission recognizes that it has a responsibility to maintain certain city streets that are being broken up by log hauling traffic, and, accordingly, is endeavoring to work out a formula to apply to each individual case. The Engineer advised that the conditions in Solo have been investigated by Division Engineer Eason who estimates that it will cost about \$2,800 to repair the damage already done and about \$175 per year for maintenance. He suggested that the Commission authorize an expenditure to do such patching work as is necessary at this time and an additional expenditure to maintain the street until the first of next year. The Commission approved the suggestion and ordered that the matter be covered by written agreement between the city and the state.

Mayor Withers also asked the Commission to oil the shoulders full width between curbs along a two-block section of the Santiam Highway where the city is installing a storm sewer. The Commission took no definite action on this matter; however, instructed the Engineer to secure an estimate of cost to do this extra work, the idea being that the Commission might authorize the work done if the city will pay the costs involved.

A delegation from Wasco and Sherman Counties came before the Commission in regard to several secondary state highway improvements. County Judge George A. Potter, Sherman County, headed the group which included County Commissioner J. H. Wilson of Sherman County; County Judge J. B. Kirk and County Commissioner Mace Fulton of Wasco County; and County Engineer Christ Pauerso of Wasco County. Judge Potter asked for the improvement of the Sherars Bridge Secondary State Highway easterly from the Wasco County line, a distance of about two and one-quarter miles. The Engineer advised that this project was approved by the Commission at one time for federal aid secondary highway funds and the sum of \$15,000 was budgeted for the same; however, the project was not approved by the Public Roads Administration so the money was reallocated to another project, and the improvement is now scheduled to be done next year as a state-financed project. In view of the circumstances the Commission approved

the project for next year's construction, the work to be paid for with state funds. The Engineer was authorized to contract the work this winter.

Judge Kirk requested the improvement of the Wasco County portion of this road. He was informed by Chairman Cabell that this project has never been included in any state highway construction program so the Commission is not in position to state today definitely whether or not it will approve it; however, it will be given due consideration in the formulation of the next program.

The Wasco County Court then asked for the surfacing and oiling of the Chenoweth Creek County Road from the end of the section heretofore completed to the junction with the Brown Creek Road, a distance of about one-half mile. Request was also made for the oiling of the Fifteennmile Creek Road, beginning at the end of the section that was oiled last year and extending to a place known as Fairbanks, a distance of about four and one-quarter miles. A third project requested was the oiling of the Hill Creek County Road for a distance of about eight miles southwest of The Dalles when the county has completed certain grading and bridge-construction work.

The County Court was informed that the Hill Creek Road is not on the federal aid secondary highway system, but the Commission will consider the improvement of the same when the county grading and bridge work is finished. Judge Kirk stated that, while they would like to have the Fifteennmile Creek Road completed, he did not believe it advisable for the state to do any work on this road until investigation has been made of the Kuykendal Hill Road. He asked the Commission to make a traffic count of two or three weeks' duration on the Fifteennmile Creek Road and on the Kuykendal Hill Road which will help the county considerably in determining which road should be improved. He said the county would pay the cost of such count. The Commission approved the request and instructed the Engineer to provide the county with a man to perform this function. The Commission informed the county court that it would take under advisement for construction in next year's construction program its request for the Chenoweth Creek road and the Fifteennmile Creek Road improvement which, in the mind of the Commission, should be constructed under one contract.

The County Court then asked the Commission for authority to secure surfacing rock from the state's quarry located at a place known as Craigs Point, west of The Dalles, the material to be used in connection with certain county road construction. The Commission approved the request.

Mr. Paul Farrens, Associate Counsel for the Southern Pacific Company, conferred in regard to matters pertaining to construction of a railroad grade separation structure on the Eugene-Swisshome Secondary State Highway. He gave as his understanding that the Commission's plans for this structure provide for only one railroad track, whereas the railroad company has plans for double-tracking at this location, particularly if the United States Army Cantonment is located in this district, and would like to have provision made in the plans for the structure to take care of the additional track. He further stated that the railroad company is making no charge for the highway right of way

across its holdings, and in view thereof the company officials believe that their request that provision be made for the double track is reasonable and justified.

The Engineer advised that the double-track feature was considered in the design of the structure but was disregarded because indications were that the second track would not be built for a long time, and he wanted to avoid the extra expense as long as possible. He suggested that no change be made in the plans at the present time and pointed out that when necessary to make such provision it could be easily done by extending the original structure about 50 feet. After considerable discussion it was decided that the Highway Commission should enter into a written agreement with the railroad company providing that the Commission will recommend to the Public Roads Administration an expenditure of federal funds to finance the second track when that becomes necessary, and the Highway Commission will pay the cost of extending the original structure at that time if the federal funds are available with which to finance the work.

Mr. J. Driskell, Brookings, and his Attorney, Mr. Collier H. Buffington, Gold Beach, were present and discussed with the Commission Mr. Driskell's claim for damages arising out of the reconstruction of the Oregon Coast Highway in front of his hotel property in Brookings. Mr. Buffington presented the case. He alleged that before the highway was reconstructed Mr. Driskell's hotel was on a level with the highway; whereas, it is now about six feet below the highway grade, the highway being reconstructed on a fill at this point, and Mr. Driskell has been seriously damaged thereby. He further stated that Mr. Driskell has owned this property since 1915; that he had rights at that time to the center of the street and in his estimation still has such rights, notwithstanding that the town was replatted in 1920, because he did not concur in the replatting. He further advised that, because of the highway improvement, Mr. Driskell has been forced to abandon his store business and has taken other losses and has been put to considerable expense in revising his facilities. He asked the Commission to raise Mr. Driskell's hotel to a level with the highway and to reimburse him for expenses incurred to date, totaling \$2,255.40. If the Commission prefers, he added, Mr. Driskell will arrange for the raising of the hotel building himself if the Commission will pay for the work.

He also asked the Commission to reset a certain fire hydrant at the Mill Street intersection which is at the corner of Mr. Driskell's property. He exhibited pictures showing existing conditions.

The Commission's Attorney advised that the Commission is not legally liable in this case because no land was taken from Mr. Driskell for the highway improvement. Chairman Cabell advised that the money that the Highway Commission spends is public money and must be spent in conformance with legal requirements; also that it is his understanding of the law that where there is "no taking of land" the Highway Commission is under no obligation to pay damages. Mr. Buffington contended that there was a "taking of land", particularly in a certain alley. He suggested that the question of legality be decided either by an agreement of facts or by a declaratory judgment. Commissioner Clough stated his preference for a decision by the court, inasmuch as the Commission must have ample justification for payment of any claim. After further

discussion it was agreed that a strict court ruling in the matter should be obtained. The Commission referred the matter to its Attorney to secure such ruling.

Mr. Buffington also brought up for discussion the Orris Knapp right of way matter at Port Orford. He said that the people of Port Orford are quite concerned about a rumor to the effect that if a satisfactory settlement with Mr. Knapp cannot be reached, the highway will be rerouted to bypass the town of Port Orford, to which location the people are very much opposed. In view of the circumstances, he said, Mr. Knapp is now willing to reduce his price to \$10,500, which is only \$500 more than the Commission's original offer. He also said that this is Mr. Knapp's final figure and that he will not submit to any further compromise. The Commission took the offer under advisement for discussion when all three Commissioners are present on their trip to Eastern Oregon the following week.

A delegation from the Portlanoose Chamber of Commerce consisting of Messrs. A. E. Papineau, Chairman of the Highway Committee, Harry Pearce, Chairman of School District No. 3, and Harry Cosgrove, conferred with the Commission in regard to the following matters: (1) Investigation of traffic conditions at the intersection of Sandy Boulevard with 89th Avenue, N. E. Columbia Boulevard, and 105th Avenue. They requested the installation of stop and go signals at such points and recalled that the Commission at one time told them that the matter would be investigated. The Engineer advised that the traffic engineer's report on this project is not as yet ready to present to the Commission. (2) Widening of Sandy Boulevard for four lanes of traffic between the Portland city limits at 82nd Avenue and 122nd Avenue. The Engineer advised that his report on this subject has been prepared and that he expects to present it to the Commission on the following day. (See ahead for report on next day.) (3) Construction of concrete curbs and sidewalks along Sandy Boulevard. The delegation was informed that this matter has not been decided by the Commission but will be given consideration. (4) Oiling of the shoulders adjacent to the present pavement between 32nd Avenue and 122nd Avenue, if the Commission cannot see its way clear to do the widening work this year. The Commission took no action on this matter.

Messrs. W. H. Lynch, District Engineer, and H. D. Farmer, Senior Highway Engineer, of the Public Roads Administration, were present and discussed with the Commission the bids received by Mr. Lynch for the construction of the Cascade Lakes Forest Highway Project west of Bend. Mr. Lynch advised that the low bid received is about \$2,500 in excess of the amount budgeted for the work, so it would not be possible to award the contract unless the Highway Commission would agree to contribute the extra amount needed, which would make the state's contribution toward the project \$42,500. The Commission agreed to assume this extra expense and thereupon signed an agreement with Mr. Lynch covering the matter.

Mr. Lynch then brought up for discussion the matter of revising the 1941 forest highway program in view of the \$1,000,000 decrease in the federal appropriation. He pointed out that prices are increasing and that the cost

of projects are overrunning the estimates, and based on the new conditions, the Port Orford Project on the Oregon Coast Highway is now estimated to cost \$170,000 compared to an original estimated cost of \$139,000. He suggested that it might be advisable, in view of the desirability of this project and the fact that the right of way situation is nearly clarified, to reinstate this project in the program which would mean transferring \$70,000 of forest highway funds from some other project that could be postponed for the time being. After discussion the Commission approved the suggestion, and it was decided to secure the \$70,000, needed, from the proposed Wapinitia Highway improvement for which \$115,000 had previously been approved in the 1941 forest highway program. It was also decided to transfer \$35,000 from the amount remaining in the Wapinitia Highway Project to finance a 7-mile clearing project on the Warm Springs Highway in view of the fact that this highway is a part of the strategic highway system.

The Klamath Falls-Lakeview Forest Highway Project was also considered in the previous discussion. The members of the Commission expressed their preference to retain this project in the current program because of the poor condition of the existing road and the Commission's statement to the people of the local community to the effect that the work would be done at the earliest possible time. Mr. Lynch advised that the remaining section is 5.2 miles in length and to grade, surface and construct a bituminous macadam surface thereon would cost \$190,000, of which \$100,000 is available in the forest highway program. After discussion the Commission considered it advisable to complete this section and thereupon authorized an expenditure of state funds in the amount of \$90,000 to take up the deficiency. It was understood that the above arrangements would not be effective unless and until approved by Commissioner Oliver.

Mr. Lynch then asked the Commission to set a date for a conference among the Highway Commission, Public Roads Administration, and United States Forest Service to provide a program for the 1942 forest highway funds. The Commission decided to hold a special meeting for such purpose on Thursday, August 14, 1941, in Portland. It was also decided to receive bids at that time for such projects as could be prepared, in the meantime, for contracting, including the reconstruction of the Middle Unit of the Crabtree Corner-Lebanon Section of the Santiam Highway, in Linn County, consisting of 3.2 miles grade widening and paving.

The Commission adjourned at 5:45 p. m. to reconvene on the following morning in the same room.

Portland, Oregon, July 18, 1941

The State Highway Commission reconvened at 9:00 a. m. in the auditorium of the Public Service Building with the same persons present and participating.

Mr. Tom Gilchrist, Albany, and his attorney, Mr. Edward W. Sox, appeared before the Commission in regard to access to the highway from Mr. Gilchrist's property which is located on the east side of the Pacific Highway East

near the Santiam Highway junction in Albany. Mr. Sox was spokesman. He said that Mr. Gilchrist sold to the state a strip of land across the front of his property which land he understood was to be used as right of way for a connection between the Pacific Highway and the Santiam Highway and that the plan of the highway improvement that was shown to him at the time so indicated and he was led to believe that the connection would be constructed at the same time that the new Pacific Highway in Albany was built; however, the connection was not built, and he now understands that the Commission does not intend to build it for a number of years. Mr. Gilchrist, he said, is negotiating a lease for his property but will not be able to close the deal unless the Highway Commission will allow the use of a portion of the right of way for business purposes, the property line being about 30 feet distant from the Pacific Highway at this point. Mr. Gilchrist's property, he added, is business, income-bearing property and the use of the 30-foot strip is vital to the proper use of the same.

The Engineer advised that the plans for the highway improvement were not changed, that it was not intended to construct the connection referred to by Mr. Sox at the same time that the new Pacific Highway was built, and that the only reason the right of way for the connection was acquired was to have it available at such time as the Commission deemed it advisable to construct the connection. He pointed out that it is strictly contrary to the established policy of the Commission to allow the use of any portion of highway right of way for private purposes and recommended to the Commission that it adhere to such policy in the present instance. He suggested, however, that Mr. Gilchrist's problem could be solved by constructing a driveway with entrance and exit features permitting access to the highway from Mr. Gilchrist's premises and that such driveway be graveled and oiled and outlined with curbs and with appropriate landscaping between the driveway and the highway, such arrangement to be in effect until the Highway Commission needs the use of the property and to be covered by written agreement between the parties concerned. After considerable discussion the Commission tentatively approved the Engineer's suggestion and instructed him to prepare an appropriate plan in conformity therewith and submit the same to Mr. Gilchrist for his approval and to discuss with his prospective tenants.

The Honorable Carl Francis, Mayor of Dayton, Oregon, and Mr. Floyd Willert, Chairman of the Highway Committee of the Dayton Chamber of Commerce, appeared before the Commission in regard to the Amity-Dayton Secondary Highway. They asked for the general improvement of this road, including elimination of curves and widening and the elimination of the railroad grade crossing near Dayton where accidents frequently occur. They declared that this road carries an enormous volume of traffic and the people of the upper Willamette Valley toward Corvallis are particularly anxious to have the road rebuilt to modern standards, because it will not only provide for greater traffic safety, but will also reduce the driving time considerably between Corvallis and Portland. Chairman Cabell advised that the Commission appreciates that the Amity-Dayton Highway will afford a shorter route to Portland than is available via the present highway through McMinnville and ultimately will carry much more traffic than it does today; however the Commission has received many requests for similar highway improvements throughout the state and in order

to treat these requests fairly must take them up in the order of their priority. He expressed regrets that the Commission would not be able to lend any encouragement to the reconstruction of this road in the near future.

Messrs. Amedee Smith and Jay Bowerman, Portland, came before the Commission in regard to the Juanita Starr property situate between Horsetail Falls and Dodson, Multnomah County, a portion of which property is needed as right of way for the new Columbia Gorge Highway. Mr. Smith was spokesman. He asked the Commission to revise its plans for the highway so that it would not be necessary to take Mrs. Starr's Columbia River frontage. He gave as his thought that the change could be made very easily without adversely affecting the highway alignment or increasing the cost of construction. The Engineer advised that the adopted location has been given careful consideration and was selected because it appeared best from all standpoints, including the crossing of the railroad. Mr. Smith disputed the Engineer's judgment in the matter. A lengthy discussion followed which was concluded by a statement from Chairman Cabell in effect that the Highway Commission is being urged to alter its plans that have been given very careful study by the Engineer, and to insert an extra kink in the highway simply to preserve a prospective industrial site for individual gain. He also said that the Commission will consider the arguments presented although in his opinion it would be inadvisable to make any change in the approved plans.

The Engineer presented a request from Salem Lodge No. 4 A.F. & A.M. to place signs on certain state highways in the vicinity of Salem, directing members of the lodge to a special meeting which is to be held in the Eola Hills district, eleven miles west of Salem on August 9, 1941. He advised that according to the Attorney the Commission has legal authority to grant such request if it so desires. The Commission approved the request.

The Engineer reported the result of investigations by Division Engineer K. D. Lytle in regard to the request of the South Umpqua Telephone Company for the moving of some of its poles on the Tiller-Trail Highway to accommodate the improvement of the Deer Creek-Wrights Ranch Section. He read aloud Mr. Lytle's report on this subject (See letter dated June 30, 1941, directed to H. G. Smith, Construction Engineer) in which Mr. Lytle recommends payment to the company of \$3.00 per pole for moving 45 poles which are located 20 feet or more from the centerline of the old road and \$5.00 for each of 7 poles that are needed to suspend wires that are now fastened to trees. The Engineer advised that he concurs in the recommendation. After discussion the Commission approved the recommendation unanimously subject to the condition that the arrangement shall not extend beyond the limits of the present highway contract.

A supplemental report was rendered by the Engineer on the matter of maintaining that portion of the state highway in Milton that is occupied by the car tracks of the Talla Talla Traction Company. He recalled that the Commission, at a previous meeting ordered an investigation of the railroad company's franchise to ascertain whether or not the company is obligated to pay the cost of the paving work. He read aloud a report from Division Engineer Williams who advises that the company's franchise provides that the company shall maintain this pavement. However, in his opinion it is rather an unfair burden on the company because it operates trains over the track only at infrequent intervals and because most of the breakage

of the pavement is caused by heavy truck hauling. Mr. Williams recommends he said, that the Highway Commission cooperate with the company in the reconstruction of this street on the following basis: the railroad company to install new ties, ballast, and place a guardrail throughout the length of Main Street; the state to pave the area with three-inch plant mix pavement at an estimated total cost of \$4,900. The Commission approved the arrangement subject to the condition that the city of Milton will take necessary action to relieve the company from its franchise obligation. The Commission ordered the matter covered by written agreement with the city.

The Engineer presented a blueprint graph showing general maintenance expenditures on the primary highway system during 1941 to date. He called attention to the fact that the expenditures are slightly overrunning the amounts budgeted for this purpose and explained that this is accounted for by the general increase in traffic volume and log hauling. He also presented a graph showing maintenance expenditures on the secondary highway system, showing that expenditures this year to date are considerably less than the amounts budgeted for such purpose. The Commission approved the reports and ordered them filed.

The Engineer presented a report on the alternate routes available as a connection between the Wolf Creek Highway and the McHalem Secondary Highway, including the Elsie-Jewell route heretofore under consideration. The matter was discussed briefly but definite action was deferred until the Eastern Oregon trip when all Commissioners are present.

A delegation from McMinnville, headed by Honorable Eugene Marsh and including Mayor R. H. Windishar, County Judge Wm. O. Powell and County Commissioners Harry F. Williams and Thomas Grenfell, H. H. McGuire, Earl Shrock, H. H. Hammond, E. V. Blair, L. H. Langaman, C. B. Hansard, L. J. Crabtree, H. A. Cramer, Fred W. Hutchcroft, Gardner Carey, Chas. B. Odell, W. E. Weyth, Jack B. Bladine, Bob Gohlmer and Steve Shenck came before the Commission in regard to the designation of Third Street (Main Street) as a state secondary highway and designation as a state secondary highway of the old west side Pacific Highway route which extends along Lafayette Avenue to a connection with the present highway north of McMinnville. Mr. Marsh recalled that the Highway Commission abandoned these two sections as a part of the state highway system when it rebuilt the highway north of McMinnville along an extension of Baker Street and the city and the county at that time accepted responsibility for the maintenance of these sections. However, the Lafayette Avenue road is in bad state of repairs, and the county does not have funds with which to finance improvements, hence their request that this road be placed on the state secondary system and that the state assume the maintenance responsibility. Mr. Marsh also recalled that when the McMinnville delegation appeared before the Commission some time ago and requested that the McMinnville-Dayton Secondary Highway (Three Mile Lane) be extended and routed along Third Street, the Commission decided that it would be inadvisable to so designate this street until it is known definitely whether or not Third Street is the proper street route, as there was some thought that one of the streets south of Third Street might be more suitable. He asked the Commission to take action on the matter at this time because the street is in need of repair.

Judge Powell confirmed Mr. Marsh's statement with respect to the old highway along Lafayette Avenue. He said that the county does not have the equipment available to properly maintain the road which is in very bad condition and would appreciate the state assuming this responsibility. He urged the Commission to place the road on the state secondary highway system. He also asked the Commission to place Third Street on such system for state maintenance. Mayor Windishar also spoke in behalf of such designations.

Chairman Cabell gave as his thought that it is proper to route secondary state highways into business districts of cities and towns because they are primarily farm to market roads and are used mostly by people who live near by and who particularly want to reach the business district. He further stated that the Commission is in accord that the two designations requested by the delegation should be made; however, in order to meet the legal requirements the request should come from the county by formal resolutions and action must be taken by the Commission when all three members are present, so as to meet the legal requirements. He added that if Yamhill County Court will present such formal resolutions the Commission will be pleased to consider them on its trip into eastern Oregon next week, when it is expected that the three Commissioners will be together. Commissioner Clough approved Chairman Cabell's remarks. The Engineer was thereupon authorized and instructed to take over the maintenance of both sections immediately and to place them in good state of repair.

Mr. Marsh also asked the Commission to widen the Baker Street Section of the Pacific Highway West, south of Third Street, particularly at the bridge near the hospital and Linfield College, near the south city limits. Mayor Windishar suggested a possible rerouting back of the hospital. After discussion the Commission instructed the Engineer to make a complete survey of the project and report his findings to the Commission, including estimate of cost to do the work. He was instructed to contact Mayor Windishar relative to the possible line at the back of the hospital so that this feature might be included in the report.

Mr. E. H. Lindsey, County Commissioner of Tillamook County, came before the Commission in behalf of the Tillamook County Court with respect to the Wilson River Highway WPA Project. He said that the court is very much concerned about the progress that is being made on this highway and is fearful that the highway will not be available for general public use this fall as planned because, according to Superintendent McIntyre, there is a shortage of WPA labor. He asked the Highway Commission to do what it can to assist in securing more labor for this job. Chairman Cabell advised that he plans to inspect this highway on the following Monday, to secure first-hand information and assured Mr. Lindsey that the Commission will do what it can to expedite the work.

Mr. Lindsey then brought up for discussion the matter of constructing the connecting link between the Wilson River Highway and the Wolf Creek Highway, east of Glenwood. Chairman Cabell advised that the Commission has no statement to make concerning this project except that it wants to study the traffic conditions on the present constructed routes before it makes a commitment with respect to the connection between the two highways.

The Engineer reported on the cost to reconstruct Sandy Boulevard, Portland, between 82nd Avenue and 108th Avenue for four lanes of traffic as has been requested by the Parkrose Chamber of Commerce. He estimated the cost of paving between these points at \$40,000, and oiling work between 108th Avenue and 122nd Avenue at approximately \$3,500. He recommended the improvement for construction in 1942 and requested authority to make a detailed survey of the project at this time. The Commission tentatively approved the plans as outlined and definitely authorized the survey as requested.

Mrs. John Thomson, Nyssa, was present and registered a complaint for damages to her property at Nyssa which she says has been rendered valueless by reason of the new highway construction at such place. She explained that she conducts a service station and camp ground adjacent to the highway and previously enjoyed good business, but the new highway has been constructed several feet above the old road in front of her premises and as a result this business is lost to her and unless something is done to correct the situation she will lose some \$15,000 that she has invested in the property. She demanded the restoration of her property to its former condition or the payment of damages to cover her losses.

The Attorney advised that no land was taken from Mrs. Thomson for the highway improvement; furthermore, the improvement did not involve any change in the established grade line, so unless there are other extenuating circumstances that he is not aware of the Commission has no liability in the matter. The matter was referred by the Commission to the Attorney to make further investigation.

A delegation from Roseburg headed by Mr. M. L. Hallmark, attorney, and including the following men who are engaged in log hauling: Nobel Standley, R. A. Briggs, Charles Barrows, and R. A. Jeub, representative of the Smith Wood-Products Company of Coquille, was present and asked the Commission to modify its requirement with respect to log hauling on the Coos Bay-Roseburg Highway so as to permit such operations during hours of darkness, starting at midnight and ending at sundown. Mr. Collier H. Buffington, attorney, Gold Beach, was also present in behalf of the loggers of his district and entered into the discussion. Mr. Hallmark was spokesman. He said that Messrs. Briggs, Barrows and Standley deliver their logs to the Smith Wood-Products Company at Coquille, that the company has large orders to fill for defense purposes as well as for other purposes and in order to avoid closing down the mill they must utilize every hour of available time and even under the best conditions they have difficulty in supplying the mill with the logs that it requires. Further, that due to the fact that the hauling roads in the woods are practically impassable during the winter season it is necessary for them to extend their efforts during the summer season; otherwise the mill will have to discontinue operation during the winter months. He declared that an emergency exists due to unusual and adverse weather conditions which prevailed during the early part of the summer which prevented operations in the woods, and as a consequence the mill is having a hard time to keep in operation. If these men, he said, were allowed to haul logs over the state highway during certain hours of darkness it would help out tremendously and would assure the continued operation of the mill. He urged favorable consideration of the request.

Mr. Jeub confirmed Mr. Hallmark's remarks and added that unless the supply of logs to the mill is augmented somehow the mill will have to close down within sixty days. He pointed out that there is a serious shortage of logs and also of trucks, in fact it is absolutely impossible to obtain new trucks within a reasonable length of time. His company, he said, would be very glad to purchase the trucks if they were obtainable, but inquiry reveals that that is impossible. He also urged the Commission to authorize the hauling of logs between midnight and dusk. Mr. Jeub also offered objections to the weighing of all logging trucks at state scales. It was his thought that such procedure is unnecessary and only serves to delay delivery of logs. Mr. Standley asked the Commission to authorize Saturday afternoon hauling of logs as well as during the period of darkness.

Mr. Buffington stated that he represents the Port Orford Lumber Company which is experiencing the same difficulty as the Smith Wood-Products Company of Coquille, and it would like very much to have the privilege of night hauling of logs extended to their operations. He alleged that the safest time for traveling on the highway is between midnight and daybreak, and gave as his thought that the granting of this privilege would not endanger or inconvenience other highway traffic; however, the discontinuance of operations at dusk should be very strictly observed. He questioned the advisability of authorizing the hauling of logs on Saturday afternoons except in emergency cases.

Mr. Hallmark suggested that if the Commission could not see its way clear to grant this request as a continuous operation it might do so as a temporary proposition for the current season only. He assured the Commission that the loggers would obey the laws and rules in all respects.

Chairman Cabell concluded the discussion by stating that the Commission would give this matter very careful consideration and would make a decision as soon as possible, in fact would endeavor to reach a decision on its trip into eastern Oregon the following week when all Commissioners will be present.

Mr. Earl Reynolds, Manager of the Klamath County Chamber of Commerce, who was an interested spectator, urged similar privileges for the loggers of Klamath County. The Secretary was instructed to inform all interested parties when the Commission has made its decision.

Mr. A. W. Bryant, Portland, came before the Commission in regard to purchasing some state-owned land lying between the Pacific Highway East (Water Street Route) and the Willamette River in Oregon City, more particularly near the end of Fifth Street. He said that this is an ideal service station site and that that is the purpose for which he intends to use it. He was informed that the Commission is reluctant to sell any property that it has once purchased, and particularly property situate such as that desired by Mr. Bryant, which was acquired in order to preserve the unobstructed view of the Willamette River at this point. However, if the Commission, after studying the situation and inspecting the site, should change its opinion as to this particular tract, the probabilities are that the Commission would advertise it for sale and would accept the offer of the highest bidder, if the offer compares

favorably with the appraised value of the property. The Commission agreed to inspect the property the next time it is in that vicinity.

Messrs. Howard Merriam, President of the Pacific Highway Association, Fred Brenne, Secretary of the Eugene Chamber of Commerce, and Earl Reynolds, Manager of the Klamath County Chamber of Commerce, were present. Mr. Merriam presented a letter from the Cascade Lakes Protective Association, Klamath County Chamber of Commerce, and the Eugene Chamber of Commerce unanimously endorsing the strategic military highway bill now before Congress, and expressing confidence in the Oregon State Highway Commission and the Public Roads Administration in the allocation and expenditure of the funds therein provided. The Commission accepted the letter with thanks.

Paul B. Rynning, County Engineer of Jackson County, appeared before the Commission in behalf of the Jackson County Court and the Jackson County Chamber of Commerce in regard to the closing of a portion of the Sams Valley Secondary State Highway to public use as a temporary proposition in order to accommodate the proposed Medford army cantonment. The State Highway Engineer advised that according to information received from Captain Theron W. Bean, Instructing Quartermaster for the War Department, the training of the men at this cantonment includes target practice with long-range guns which will fire across a section of this road between milepost 9.41 and milepost 14.91; that the target practice and maneuvers will be carried on continuously for six days each week, and that 15,000 men will be constantly crossing the highway with war equipment. Furthermore, unless this section of the road is closed for travel, the plans for the establishment of a cantonment at this place would have to be abandoned. He recommended the temporary closing of the Sams Valley Road within the limits of the cantonment, provided local citizens affected do not object, and provided further that the United States Army will provide funds with which to finance the construction of an adequate bypass connecting the Pacific Highway with the Crater Lake Highway along the south boundary of the cantonment area, and provided further that when the cantonment is discontinued the army will pay for the reconditioning of the Sams Valley Road and will permit it to be restored to general public use. After discussion the Commission approved the closing of this road as a temporary, emergency proposition under the conditions recommended by the Engineer. The Engineer was thereupon instructed to contact the county courts of Jackson and Josephine Counties relative thereto and to write Captain Bean outlining the Commission's action, such letter, however, is not to be mailed to Captain Bean until it has been approved by the Commission.

The Commission adjourned at 12:30 p. m. and reconvened at 2:00 p.m. in the same room with the same persons present and participating.

Messrs. Paul Farrens and Alfred Hampson, counsels for the Southern Pacific Company, and Mr. George Fair, engineer for the company, came before the Commission in regard to controversial items in the agreement between the company and the state covering the reconstruction of the Pacific Highway East between Eugene and Springfield which involves relocation of the railroad. Mr. Farrens was principal spokesman for the company. The following matters were discussed: replacement of ties, right of way adjustment, and provision for

right of way for a proposed second track which matter is not covered in the agreement. Mr. Farrens contended that the state should pay for the replacement of all ties with new ones, alleging that ties once used and removed are of no further value for railroad purposes. He agreed, however, that in cases where untreated ties are now being used the state's obligation should be limited to replacement with similar ties and if the railroad company installed treated ties then it should pay the cost of treating them. Mr. Farrens also asked the Commission to eliminate from the agreement condition No. 12, which provides that the difference between the reasonable cash market value of the real property to be conveyed by the railroad company to the state and the reasonable cash market value of the property that the state is conveying to the railroad company shall be given consideration in the closing of the agreement and the settlement of accounts between the railroad and the state. He said that the Commission previously agreed to such elimination of this paragraph, but it is still in the agreement that has been submitted to him for acceptance. The Commission accepted the previous oral arrangement and authorized the elimination of this paragraph.

Mr. Hampsen brought up the question of right of way for double tracking 5,800 feet of railroad, stating that provision is made in the agreement for only 3,300 feet, so it will be necessary to reach an understanding with respect to the 2,500-foot balance because the company has plans to construct a double track soon, probably this year. Mr. Farrens explained that all that the company wants is sufficient land to accommodate a roadbed for the double track.

Chairman Cabell stated that the Highway Commission is willing to give the railroad company facilities equivalent to what it now possesses, but does not feel that it should do more. Mr. Farrens said that is all the railroad company is asking. However, the building of a double track in a new location will necessitate the construction of a 33,000 cubic yard fill which would not have been necessary were the railroad tracks not to be moved.

This matter was discussed at length and the following arrangement was tentatively approved by all parties concerned: the state shall reimburse the railroad company for the entire cost of new treated ties to take the place of treated and/or cedar ties now in place, and for the entire cost of new untreated ties to take the place of untreated fir ties now in place; paragraph No. 12 of the original agreement shall be eliminated; and the state shall furnish the company a right of way on the new railroad location of sufficient width, et cetera, to accommodate two railroad tracks. The Attorney was instructed by the Commission to rewrite the original agreement in conformance with this decision. Chairman Cabell stated that the arrangement would be final unless the railroad company was advised to the contrary after he has consulted further with Commissioner Clough and the Attorney; however, in any event, paragraph No. 12 shall be eliminated from the agreement form.

The Engineer reported a telephone conversation with Mr. E. J. Griffith, State Administrator, Work Projects Administration, to the effect that

the Works Projects Administration officials in Washington, D. C., have approved the reconstruction of the Columbia River Highway at Tongue Point on the basis of the original plan which requires a minimum expenditure by the state. In view of this report the Commission authorized the Attorney to close the options for the right of way needed for this improvement.

The Attorney brought up for discussion the Juanita Starr right of way controversy, having to do with the acquisition of right of way for the proposed new highway up the Columbia River Gorge. He asked the Commission to approve the amount of an offer to be used in condemnation. The Commission authorized an offer of \$11,000 for this purpose.

The Engineer reported that in conformance with authority previously granted him by the Commission he has awarded the following contracts, the conditions of the awards having been satisfied:

Grading and paving of Astoria (Astor Street-Bond Street) Section of the Oregon Coast Highway, in Clatsop County. Bids taken May 22; contract awarded June 16, 1941, to The United Contracting Company, low bidder.

Umatilla River Overcrossing and other structures near Stanfield on the Boardman-Stanfield Highway, in Umatilla County. Bids taken May 22; contract awarded June 18, 1941, to C. J. Montag & Sons, low bidders.

Grading, surfacing and oiling the Fulton Canyon-Locust Grove Section of the Fulton Canyon-Wasco County Road, in Sherman County. Bids taken June 13; contract awarded June 25, 1941, to O. C. Yocom, low bidder.

Grading of the Grave Creek-Jumpoff Joe Creek Section of the Pacific Highway, in Josephine County. Bids taken June 12; contract awarded July 2, 1941, to Frank Pensacker, low bidder.

The Commission confirmed the awards of the contracts as reported by the Engineer.

The Engineer requested authority to purchase the following equipment:

3 light-type Buick cars for use of Maintenance Engineer Bishop, Division Engineer Eason and Parks Superintendent Boardman. Three old cars to be traded in as part purchase price. Estimated total cash outlay \$2,800.

2 light-type automobiles for use of employees of Traffic Department. Estimated total cost \$1,800.

Laboratory equipment, as follows, same to be installed in the new laboratory building at Salem:

2 Sections of Schwartz cabinets - \$188
 1 Efectometer - \$265
 1 4½ kilo torsion balance - \$85
 1 Analytical balance - \$250
 1 Adjustable stool - \$10.50
 1 De Khotinsky oven - \$200
 1 Centrifuge No. 2 Comp. \$285
 1 Torsion balance - \$65
 1 Oven - \$85
 1 Hevi-duty electric hot plate, 12x12 - \$30
 1 Oven cup flash tester - \$30
 1 Torsion balance \$65
 1 Small electric oven for hot stuffs - \$100
 2 2-burner gas plates - \$10
 1 Concrete Mixer - \$750
 1 large dial scale - \$300

1 Model 92 mimeograph machine. Estimated cost \$630.00.

The Commission approved the request by unanimous vote.

The Engineer reported that the Weston-Elgin Secondary State Highway, on which there has been a reduced load limit for the past several months, is now in condition to carry legal weight loads. He recommended the lifting of the reduced load limit. The Commission approved the recommendation and by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, on the 28th day of February, 1941, at a meeting of the Oregon State Highway Commission, all members being present and participating, the Commission passed and adopted a resolution reducing the maximum load limit on the

WESTON-ELGIN SECONDARY STATE HIGHWAY from Weston, in Umatilla County, to Elgin, in Union County,

and

WHEREAS, subsequent to the passage of said resolution, conditions have changed so that it is no longer necessary or desirable; and the Commission hereby finds that it is no longer necessary or desirable to maintain the reduced load limit set out in said resolution on the said above-named highway;

NOW, THEREFORE, BE IT RESOLVED that the action of the State Highway Commission, reducing the maximum permissible load limit on the

WESTON-ELGIN SECONDARY STATE HIGHWAY from Weston, in Umatilla County, to Elgin, in Union County,

be and the same hereby is rescinded and cancelled as of this date, and

the maximum load limit permissible on the said section of said highway hereafter shall be the maximum load limit provided by law.

IT IS HEREBY ORDERED that certified copies of this resolution be furnished the county clerks of Umatilla and Union Counties, in which counties said section of said highway is located, and the Superintendent of the Department of State Police for his information.

The Engineer brought up for discussion the matter of revamping the approaches to the Enagren Ferry on the Coos River Secondary Highway so as to accommodate loads weighing in excess of ten tons which is the present limit. He recalled that a Mr. Youst, who is the owner and operator of a saw mill on the Coos River Secondary Highway above this ferry, appeared before the Commission some time ago and asked the Commission to modify its ten-ton ruling so as to permit him to haul loads of lumber weighing in excess of such weight limit, inasmuch as under present conditions he is not able to haul a pay load. The Engineer stated that this matter has been investigated and it has been found that the ferry can accommodate fifteen-ton loads without over-stress, provided the approaches on each side of the river were extended about twelve feet, which would cost about \$600, such amount being in addition to the \$2,000 heretofore approved by the Commission to pay the cost of renewing stringers and the deck on both approaches. Mr. Andrew Stambuck, he said, who holds the present contract for operating the ferry, has stated his willingness to handle loads up to fifteen tons, twenty hours each day for the sum of \$250 per month, but he wants the highway department to furnish loadometers for him to check the weight of the loads. He pointed out that the present ferry contract expires on October 1, 1941, and suggested that it would be advisable, if the Commission decides to make the necessary improvements, to accommodate loads weighing fifteen tons, to readvertise the ferry operation for bids on that basis rather than to renew Mr. Stambuck's contract and enter into a supplemental agreement with him to provide this extra service. The Commission, after discussion, approved the Engineer's suggestion and authorized him to advertise the ferry operation for bids to be received at the September meeting. It also authorized him to make the necessary alterations of the ferry approaches to accommodate fifteen-ton loads, which are estimated to cost \$600.00

The Attorney brought up for discussion matters pertaining to the purchase of timber strips along the Pendleton-John Day Highway. He particularly requested authority to employ a cruiser to cruise the timber standing thereon in order to comply with the federal requirements, in view of the fact that it is proposed to use federal aid funds to purchase them. The Commission approved the request.

The Attorney also brought up for discussion the matter of acquiring a small parcel of land at the northwest corner of the intersection of Union Avenue and East Couch Street in Portland and a small parcel at the southwest corner of the intersection of Union Avenue and East Ankeny Street, which parcels are needed in order to ease off the corners in connection with the proposed plan for routing south-bound Union Avenue traffic along East Third Avenue

between East Couch and East Ankeny Streets. He said that the plan provides for taking 1200 square feet of private property at the Couch Street intersection for which the owners are asking \$1.25 per square foot; however, they are also asking an additional amount of \$2,000 for damages, making a total of \$3,500, but they expect the Highway Commission to recompense the tenant for damages that he may suffer by reason of the taking of this land. He gave as his thought that \$2,500 was a fair amount to pay for this parcel.

In regard to the property at the Ankeny Street intersection he pointed out that this property is now occupied by a brick building, and advised that the owner is asking \$10,000 for the entire property, which consists of a quarter of a block. He gave as his thought that this figure is fair and reasonable, particularly in view of the possibilities of selling or renting the area that is not needed for the highway improvement. Chairman Cabell stated that in his opinion the Commission should have assurance from the City of Portland that the proposed routing of traffic will be a permanent thing, in order to justify the expense involved. Commissioner Clough concurred and the Engineer was thereupon instructed to discuss the matter with City Commissioner Bowes and City Traffic Engineer Fowler, and City Engineer Ben Morrow and report to the Commission. The Attorney was instructed to negotiate further for both parcels and to have both parcels appraised by an expert appraiser. The Commission approved an offer of \$2,500 for the parcel at the Couch Street intersection, but set no definite amount as an offer for the other parcel.

The Secretary presented a "notice of public hearing" from the United States Army Engineers to the effect that a public hearing is to be held in Astoria on Wednesday, July 16, 1941, to consider plans for a proposed bridge across the Columbia River at this point. The Commission took no action.

A letter was presented from the Nyssa Chamber of Commerce inviting the members of the Commission and staff to a function in Nyssa on July 24 celebrating completion of the Nyssa underpass and the new Union Pacific Depot at that place. The Commission accepted the invitation with thanks.

The Secretary also presented a letter from the management of the Loggers Carnival, Seaside, inviting the Commission and staff to a carnival which is to be held in Seaside on August 9 and 10, 1941. The members of the Commission expressed regrets that they could not attend this function in view of other engagements.

The Commission discussed a letter from the City of Drain requesting state aid in the design of a bridge over Pass Creek in the city of Drain. The Engineer advised that the expense involved would be nominal. The Commission approved the request.

Consideration was given by the Commission to the request of Babler Bros., contractors, asking for relief from the provision in state highway contracts which requires acceptance of the terms of the Oregon Workmen's Compensation Act. Action on this matter was deferred by the Commission pending consultation with Governor Sprague. The matter was referred to Chairman Cabell to discuss with the Governor.

The Commission discussed a letter from Senator F. M. Franciscovich, Astoria, suggesting a modification in the Commission's rules and regulations covering log hauling on state highways so as to relieve logging trucks from coming to a dead stop before crossing railroad tracks. The Engineer was instructed to inform Senator Franciscovich that the Highway Commission does not agree with him in this matter but will be glad to discuss it with him at a convenient time.

The State Parks Superintendent, Mr. S. H. Boardman, was present and discussed with the Commission the matter of the purchase of timber strips along the Salmon River Highway from the Miami Corporation. He recalled that the Commission previously approved the purchase of these strips with federal aid funds and that the Miami Corporation consented to defer logging operations until it was known definitely whether or not federal funds would be available for this purpose. The Miami Corporation, he said, is quite anxious to close the deal if the Commission still wants the timber; otherwise they want to cut the timber, in fact the time limit set by the company for closing the transaction is about to expire. The Engineer advised that he has as yet received no definite information with respect to the federal funds, although it has been requested several times. After discussion and in view of the circumstances the Commission by unanimous vote authorized the use of state funds for this purpose.

The Commission considered the setting of a date for its next regular meeting for receiving bids and decided to hold such meeting on Thursday and Friday, September 4 and 5, 1941, in Portland. The Commission confirmed its previous action scheduling a special meeting in Portland on Thursday, August 14, 1941, to receive bids for such projects as might be ready at that time. The Secretary was instructed to make the usual arrangements for the use of the auditorium of the Public Service Building for such meetings.

The Commission considered and signed agreements, et cetera, as follows:

Agreement with the Gales Creek & Wilson River Railroad Company pertaining to the overcrossing of the Wilson River Highway near Glenwood.

Agreement with Charles S. and Rosa M. Bateman covering acquisition of property from the Batemans in Washington County, for right of way.

Agreement with Ernest D. and Zoa E. Wade covering lease of property in Elkton, Douglas County, for maintenance headquarters.

Agreement with Deschutes County setting forth the things to be done by the county and the Highway Commission in connection with construction of the Terrebonne-Lower Bridge Road.

Agreement with Deschutes County regarding the oiling of the Shevlin Park Road, out of Bend, in Deschutes County.

Agreement with Elmer C. Manning relating to exchange of lands under the Taylor Grazing Act, in Klamath County.

Petition from Portland Mortgage Company for vacation of portion of Southwest Government Street in Newport.

Rental Agreement covering lease of the Woshink Lake CCC camp site to the U. S. Government.

Agreement with Southern Pacific Company relative to Blodgett Overcrossing.

Agreement with Lexington Lodge No. 168, I.O.O.F., covering lease of maintenance headquarters site in Lexington, Morrow County.

Agreement with the City of Seaside granting the city an easement for a pipe line upon the revised location of the Wolf Creek Highway at Vollmer Creek.

Termination of lease agreement with the Southern Pacific Company covering a private road crossing to the company's tracks near Strassel, Washington County.

Bargain and sale deed conveying unto the Housing Authority of the County of Clackamas 1.029 acre of land together with a road easement containing 0.15 acre situate in Section 25, T. 1 S., R. 1 E., W. M., Clackamas County. Right of way files No. 2514 and No. 9396.

There being no further business to come before the Commission at this time the meeting was adjourned at 4:00 p. m.

Enroute John Day, Oregon, July 23, 1941

The following is a brief resume of matters disposed of by Chairman Henry F. Cabell, enroute from Portland to John Day, where a special meeting of the Commission was held in the home of Commissioner Oliver on that evening. Accompanying Mr. Cabell on this trip were: R. H. Baldock, State Highway Engineer; J. M. Devers, Attorney; and H. B. Glaisyer, Secretary. It was previously arranged that all three Commissioners would meet at Commissioner Oliver's home in John Day to dispose of accumulated routine matters and to pass on decisions made by Chairman Cabell enroute.

1. Inspection of the Gilbaugh property at Zig Zag Creek on the Mount Hood Highway, near Rhododendron. Such inspection revealed several large, concrete blocks on the edge of the stream, the blocks being connected with large cables embedded in the concrete, and it was evident that the purpose of the blocks was to prevent the cutting away of the bank of the stream by high water. The Attorney advised that Mr. Gilbaugh is complaining because he does not have free access to the stream from his adjacent property, and indicated that he would be satisfied if the cables were cut. It was the opinion of Chairman Cabell and the Engineer that no harm would result from the cutting of the cables, in view of which it was decided to dispose of the matter in such manner. The Engineer stated that he would have the cables cut at once.

2. Inspection of Warm Springs Highway. The party joined a group from Jefferson and Deschutes Counties at Bear Springs Junction and an inspection of the Warm Springs Highway was made immediately thereafter. Luncheon was taken at the Madras Hotel, following which at 2:00 p. m. the local committee, consisting of about thirty members from Madras, Prineville, Bend and Redmond, made an urgent plea for the early completion of the Warm Springs Highway. County Judge Thomas A. Power, of Jefferson County, presided. Chief spokesman for the group was the Honorable Ralph Hamilton, Circuit Judge, Bend. Responding thereto Chairman Cabell recited the history of this road and explained the status of funds. He advised that the Highway Commission appreciates that the Warm Springs Highway is an important link in the state highway system, and that it is the desire of the Highway Commission to complete the construction of the same as soon as possible. He also said that the Commission would give the matter very careful consideration in the next allocation of funds, but is not in position at the present time to make any definite commitment.

The meeting adjourned at 2:45 p. m., following which the party motored to John Day, inspecting enroute the Glen W. Berry property at Prineville, concerning which there is a controversy. Mr. Berry was not present, having moved to Portland, so no action was taken on his claim.

John Day, Oregon, July 23, 1941

The State Highway Commission met in special session at 8:30 p. m. at the home of Commissioner Herman Oliver. Present were:

Henry F. Cabell, Chairman
Huron W. Clough, Commissioner
Herman Oliver, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

The Commission approved by unanimous vote the minutes of the meetings held on January 21 and 22, February 14, February 27 and 28, March 24 and March 26, 27, and 28, 1941.

The Engineer discussed with the Commission the matter of increasing the wages of employees in the Maintenance Department, particularly those who are paid on the hourly basis. He recommended a ten per cent increase for such employees and a corresponding increase for foremen of maintenance crews who are paid on a monthly basis, and submitted a tabulation showing the classification of the employees, present rate of pay, and the rate of pay for each class under the proposed schedule. After discussion, the Commission approved such increase, by unanimous vote, subject to confirmation by Governor Charles A. Sprague or the State Budget Director (see revised standard wage schedules "A" to "M" inclusive, effective August 1, 1941.)*

The Engineer reported the cost to construct 3.8 miles of the Silets Secondary Highway, in Lincoln County, beginning at the end of the present section 5.5 miles south of Kernville, and extending southerly therefrom. By limiting the improvement to widening of the present grade with minor line changes, resurfacing and construction of an O-11 oil mat, the project, he said, would cost about \$66,000, compared to a total cost of \$115,000 to reconstruct the section to higher standards. In this connection the Secretary presented a letter from the Werner Timber Company offering to contribute the sum of \$5,000 toward such expense, which would relieve the company from building an unloading dock in the Silets River, for logs. The Engineer recommended acceptance of this offer and construction of the project on the basis of a standard improvement costing \$115,000. After discussion the Commission approved the recommendation and authorized the Engineer to advertise the project for bids as soon as it can be prepared.

The Engineer presented an economic analysis of the Illahe-Albany Section of the Pacific Highway East, covering alternate routes for the permanent location of the Pacific Highway between these points. The matter was discussed at considerable length during which the Engineer recommended adoption of the A-C-M-E-X Route as disclosed on the map attached to the Reconnaissance

*Filed in Special Matters File - No. 4

JUL 23 1941

Engineer's report dated February, 1939. He requested authority to make a location survey along such route. The Commission approved the request unanimously.

The Engineer also presented an economic analysis of the Wasco-Condon Section of the Wasco-Heppner Secondary Highway, in Sherman and Gilliam Counties. The report was discussed briefly, but action was deferred for future consideration.

The Attorney reported receipt of a letter from the Crown-Zellerbach Corporation, with respect to the leasing of the shore lines along the Willamette River, at Oregon City, in which the corporation indicates refusal to increase the amount of its previous offer for the use of such land and considers the matter closed so far as the corporation is concerned unless it should decide at a later date to increase the amount of its offer. The Commission took no action on this matter.

The Secretary presented a resolution from Wallowa County Court and a petition signed by numerous taxpayers of Wallowa County, requesting action as may be necessary to eliminate the steep, icy, dangerous and difficult portion of the Little Sheep Creek Secondary State Highway, between Joseph and Innaha, particularly the unit thereof which extends from the top of Sheep Creek Hill to Little Sheep Creek. The Engineer advised that this section is 1.27 miles in length, and that it would cost about \$25,000 to regrade, surface and oil the section. The Commission deferred action on this matter pending a personal inspection of the project on its next trip into this district later in the year.

A letter was presented from Mr. Frank Rebberg, Sandy, Oregon, requesting the oiling of the Eagle Creek-Sandy Section of the Woodburn Secondary Highway, and also requesting the oiling of the county road which connects this highway with the main road from Sandy to Estacada. The Commission deferred action on this matter pending a personal inspection of the roads by Chairman Cabell and the Engineer.

The Engineer reported that, due to increase in contract prices, the amount budgeted by the Commission for construction of the West Unit of the Shaniko-Cow Canyon Section of the Sherman Highway is not sufficient to do the entire job. He recommended, in view thereof, an increase in the budget allowance from \$85,000 to \$120,000, inasmuch as this job is scheduled to be contracted this fall and it has been the intention of the Commission to complete the work in its entirety, rather than by piece-meal. The Commission approved the request and so ordered.

The Engineer also requested authority to advertise for bids for the furnishing of maintenance materials for the following projects:

Viento-Mosier Rock Production Project. Estimated cost \$20,000.
Gilliam County Line-Umatilla Section. Estimated cost \$17,000.

JUL 23 1941

He explained that both projects are included in the 1942 maintenance materials program. The Commission approved the request.

A request was presented from the Oak Grove Parent-Teachers Association, Medford, for an extension of the sidewalk project heretofore approved by the Commission at the Oak Grove School. The Engineer advised that the proposed extension is about one-half mile in length and will cost about \$615.00. He recommended approval of the request, in order to secure full benefit of the original project. The Commission approved the recommendation.

A petition was presented from the City of South Scappoose, Columbia County, requesting construction of a short road, about 760 feet long, connecting the old Columbia River Highway and the new Columbia River Highway at a place known as Kocarnicks Store. There was also presented a letter from County Judge Ray Tarbell, of Columbia County, advising that the County Court is of the opinion that this road should be built. The Engineer advised that this matter has previously been before the Commission and was denied, and he recommended similar action at this time. The Commission approved the recommendation, at least for the time being.

The Commission discussed a letter from W. J. Carlson, City Recorder, Cascade Locks, requesting the oiling of the graveled shoulders between the highway pavement and the concrete curbs on the Columbia River Highway through the town of Cascade Locks. The Engineer estimated the cost to pave such strips between stations 110+10 and 146+10 at \$6,770.00, compared to a cost of \$2,900.00 to oil the strips between stations 107+00 and 160+00, using O-9 specification. He recommended approval of an oiling project costing \$2,900.00 and that the project be included in next year's budget. The Commission approved the recommendation.

Consideration was given by the Commission to a request from F. C. Hingsburg, Commander, United States Coast Guard, Seattle, requesting the improvement of the Cape Blanco State Secondary Highway, in Curry County. The Engineer advised that this road is narrow and winding and generally in poor condition and, in his estimation, could not be improved by ordinary maintenance work. He estimated the cost to reconstruct the road in a proper manner at approximately \$20,000 and recommended approval of the work as a federal aid secondary highway project. After discussion the Commission approved the recommendation and instructed the Engineer to endeavor to include it in the 1942 program.

A letter was presented from the City of Florence, requesting the construction of an oiled footpath to replace an existing wooden sidewalk along the northerly side of Main Street in Florence, within the area covered by the state's right of way, under the Siuslaw River Bridge. The Engineer estimated that it would cost about \$65.00 to do this work, although, according to the Attorney, it is not the Commission's obligation. He also advised that there is an oiled street that passes under this bridge structure which the Highway Department does not maintain, inasmuch as it was considered a part of the original street, with the bridge being considered simply an overhead structure. If the footpath is constructed and maintained, it would indicate that the state should also assume

the obligation for the maintenance of that portion of the street which lies under the bridge. After considerable discussion the Commission approved the construction of the footpath, provided the City of Florence would assume the responsibility for maintaining it subsequent to construction, and would treat the state in the same manner that the private property owners are treated with respect to such matters. The Commission ordered that the matter be covered by appropriate agreement between the city and the state to the effect that the construction of this sidewalk would entail no responsibility on the part of the state in regard to the future maintenance of the sidewalk itself or to any maintenance or reconstruction of that portion of the street proper which passes under the bridge.

The Commission discussed a letter from the Garibaldi Businessmen's Club, requesting the surfacing of the Oregon Coast Highway, full width between curbs, through the town of Garibaldi. The Engineer advised that investigation reveals that there are no curbs in this town at the present time. He estimated the cost, on the basis of improving the street without installation of curbs, at \$2,000. The Commission deferred definite action on this matter pending further investigation by the Engineer.

A resolution was presented from the Port Orford Chamber of Commerce urgently requesting the reconstruction of the Port Orford-Euchre Creek Section of the Oregon Coast Highway on proposed alignment that will not by-pass the town of Port Orford, and further urging the Commission to immediately acquire right of way across the Orris Knapp Hotel property at Port Orford, notwithstanding that the amount demanded by Mr. Knapp is in excess of the valuation placed on the property by the Highway Department's appraisers. The Attorney advised that his latest offer to Mr. Knapp was \$10,000, however, he believes that he could get Mr. Knapp to settle for \$10,500, if the Commission will authorize the increase. After discussion and in order to close this matter the Commission authorized payment of \$10,500 as recommended by the Attorney.

A petition was presented from citizens of Toledo requesting the elimination of dangerous curves on the Corvallis-Newport Highway, immediately north of Toledo. A letter was also presented from the Toledo Chamber of Commerce, endorsing the request and also requesting additional improvements west of the town of Toledo. The Engineer estimated the cost of the widening work at \$75,000 and gave as his thought that the expenditure is not justified at this time, particularly in view of the work that the Commission is now doing on the Siletz Secondary Highway and the Oregon Coast Highway in this district. The Commission concurred in the Engineer's viewpoint and instructed the Secretary to so inform the petitioners.

The question of constructing a parking area for automobiles adjacent to the Weston-Elgin Secondary Highway, in Umatilla County, near Tollgate, had the attention of the Commission. The Engineer advised that the United States Forest Service is contemplating construction of a winter sports lodge at a place known as "Spout Springs", about three miles east of Tollgate, and has made inquiries as to whether or not the State Highway Commission would cooperate by widening the highway to facilitate the parking of cars off the

main-traveled roadway. He further advised that this matter has been investigated by Division Engineer W. C. Williams, who estimates that to provide parking places for 200 cars would cost about \$2,600, and who further advises that, if the Forest Service actually constructs the lodge as planned, the parking situation for cars will be acute unless such a parking area is provided. He recommended approval of the expenditure. The matter was discussed at considerable length, during which Chairman Cabell suggested that if the Forest Service would provide a parking area entirely off the highway right of way the state might maintain and keep it free of snow for use of winter sports enthusiasts, as is now being done adjacent to the Mount Hood Highway. The suggestion was approved by Commissioners Clough and Oliver, and the Engineer was instructed to present it to the Forest Service and ascertain its reaction thereto.

Reconsideration was given by the Commission to the matter of improving the Sandy Boulevard route of the Columbia River Highway, between 82nd Street and 122nd Street. The Engineer advised that it would cost about \$40,000 to improve the section between 82nd Street and 108th Street, and an additional \$3,500 to oil the shoulders between 108th Street and 122nd Street. He recommended the improvement as a very desirable project in the 1942 program. The Commission approved the recommendation and so ordered.

The Secretary presented a letter from Harry R. Schuppner, Major, Q.M.C., United States War Department, in which the State Highway Commission was requested to make studies as may be necessary for an access road extending from the Boardman-Stanfield Highway to the U. S. Army ammunition dump west of Hermiston, including an underpass under the Union Pacific railroad tracks. The Engineer recommended approval of the request to the end that preliminary plans and estimates may be available when funds are provided to construct the same. The Commission approved the recommendation and thereupon authorized the Engineer to make such surveys.

The Engineer reported a request from the city officials of Hermiston for assistance from the State Highway Commission in relieving a traffic congestion in their town, which has resulted from activities incident to the construction of the U. S. Army ammunition dump about 7 miles west of Hermiston. He said that Division Engineer Williams had made investigations of existing conditions and reports that the city is having a lot of difficulty in caring for the tremendous increase in traffic resulting from the government's operations, and the city officials have asked the construction of an alternate route for the highway, following approximately the railroad tracks from the easterly edge of Hermiston to the intersection of Main Street, and in his estimation the city's request is reasonable and the state should do something to relieve the situation. The Engineer gave as his thought that the matter should be given some study, and requested authority to make investigations and surveys as may be necessary. The Commission approved the request, and instructed the Engineer to render a full report of the matter at his earliest convenience.

The Commission discussed a request from the City of Hillsboro for the installation of traffic signals at street intersections along the route of the Tualatin Valley Highway through their city, as an aid in the handling

of traffic and the prevention of accidents. The Commission deferred a decision in this matter pending a detailed report from the Engineer.

The Commission also discussed a request from the City of Dayton, calling attention to the need for more adequate signalization of the Southern Pacific grade crossing on the secondary state highway between Dayton and its junction with Highway 99W. The Engineer advised that this signalization project is not contained in the present signalization program so if signals are installed now they will have to be paid for with state funds or with state and railroad funds. He also said that investigation of the crossing reveals that it is quite low in the priority list. In view of this report the Commission decided not to make the installation at the present time. The Secretary was instructed to so inform Mayor Carl H. Francis, Dayton, and to advise him further that the Commission will give this project consideration in the formulation of its next signalization program.

The Commission discussed a letter from William F. Keady, Secretary of the Waldport Chamber of Commerce, requesting permission for the Waldport Lions Club to erect a concrete monument honoring soldiers, sailors and marines, on the premises of the state park at Waldport. The Engineer advised that the monument is to be about three feet square and eight or ten feet high. He recommended that the request be granted inasmuch as this park is really a city park and is primarily for use by local people. The Commission approved the recommendation subject to the condition that the monument be placed in a location satisfactory to the Engineer.

In this connection the Engineer suggested that title to the park should rest in the city, inasmuch as it is primarily for local use and is of no value to the state for park purposes. The Commission concurred and instructed the Engineer to confer with the city authorities relative thereto.

A. L. Schneider, General Freight Agent for the Oregon Nevada California Fast Freight, Inc., was present and asked the Commission to authorize the transportation over the Pacific Highway from the California line to Medford, of truck and trailer combination equipment having an overall length of 60 feet and having a gross weight of 68,000 pounds. He alleged that, because of the national defense program, the freight which his company is now being asked to haul has more than doubled, and in some cases tripled, within the past sixty days, and as a result the company is obliged to use additional truck and trailer units from California to Medford daily, which equipment, while legal in the state of California is not legal in the state of Oregon. He further advised that a very large percentage of the increased traffic consists of army airplane supplies assigned by the War Department for use in defence contracts, and that these consignments must go through without delay, but the company is not able to make deliveries with its present equipment without exceeding the Oregon statutory requirements. He urged the Commission to grant this privilege as a temporary proposition only, until such time as deliveries have been made on new equipment meeting the Oregon requirements that the company has already ordered, which equipment they anticipate receiving within the next 30 or 60 days. He explained that under the present set-up

his company can operate its standard equipment only as far as the Oregon line where the truck and trailer units are broken up into units that meet the Oregon requirements as to length and are then taken to Medford, where the freight is transferred to other equipment. Such procedure, he said, is not only costly but prevents the quick delivery of the freight. Their primary purpose is to avoid the consequent delays in delivery of the material that the government is in a hurry for. In this connection the Secretary presented a letter from Mr. Wm. M. McAllister, Attorney, Medford, supporting Mr. Schneider's oral request (see letter dated July 22, 1941, in General File). Chairman Cabell explained the Commission's attitude with respect to such movements, and its policy in regard to the granting of permits. After a lengthy discussion, the Engineer recommended that the Oregon Nevada California Fast Freight, Inc., be granted a thirty-day permit, authorizing isolated movements only consisting of loads that are not less than 75 per cent government defense materials, and that this permit be absolutely cancelled after the thirty days expire. The Commission approved the recommendation with the understanding that a manifest shall be carried in each truck disclosing the commodities being transported, such information being for the benefit of the State Police officers in checking the loads.

The Commission discussed the matter of permitting log hauling on state highways, starting at 12:00 o'clock midnight and ending at dusk on the same day, as has been requested by log-hauling operators from the Coos Bay district. Chairman Cabell outlined for Commissioner Oliver's benefit the arguments presented to the Commission by this delegation at the previous meeting in support of their request. After discussion the Commission voted unanimously to grant such privilege for the next ninety days as a trial proposition, and instructed the Secretary to recommend to the Public Utilities Commissioner the granting of requests for such privilege, subject to the following conditions:

1. No part of the hauling equipment or load shall extend beyond or to the left of the highway center stripe or to the left of the center of the traveled roadway in case there be no center stripe.
2. The width of the load shall not exceed eight feet and the speed of the movement on sharp curves and narrow bridges shall not exceed fifteen miles per hour. Except as to such limitations, the statutory speed limit restrictions shall control.
3. Flagmen shall be maintained by permittee at points where the logging equipment, either loaded or empty, enters upon or leaves state highways, and each flagman shall be equipped with red lanterns or other approved signaling devices to warn approaching traffic. One flagman shall be stationed on the highway approximately 300 feet on each side of the point of entrance or exit as the case may be.
4. Log hauling on state highways is absolutely prohibited between 8:00 p. m. and midnight of the same day.

5. No log hauling whatsoever shall be carried on on state highways between noon on Saturday and 1:00 a. m. on the following Monday; nor on the following holidays: January 1, May 30, July 4, Labor Day, November 11, and December 25; any holiday designated by the President of the United States or the Governor of the State of Oregon; nor on any Monday immediately following any of said holidays when such holidays fall on Sunday; nor on any Saturday morning immediately following a holiday which occurs on Friday.
6. Night-hauling of logs on state highways is strictly prohibited unless the hauling equipment is properly lighted in accordance with the legal requirements.
7. The overall length of load and equipment shall not exceed the statutory limit.
8. Night-hauling of logs shall not be permitted unless the applicant for such privilege has complied with requirements of the Oregon Motor Vehicle Laws and the Oregon Motor Transportation Act. These rules and regulations are to be considered as supplemental to such laws and regulations.
9. The violation of any of the provisions of the permit shall be considered sufficient cause for the immediate suspension or cancellation of the permit under which the equipment involved is being operated.

The Engineer brought up for discussion a procedure to be followed by the State Highway Department weighmasters in weighing logging trucks to ascertain whether or not they are carrying on their activities in strict conformance with the provisions of the statutes. In this connection the question arose whether or not such operators should be penalized for axle overloads as well as for gross overloads. The Commission decided that if an axle weight exceeds the allowable weight more than 10 per cent, then the penalty shall be the same as is now imposed for gross overloads. It was decided that such penalty shall apply to tandem-axle log-hauling equipment as well as to single-axle equipment. The Engineer was instructed to insert a clause in his instructions to weighmasters to that effect. He was also instructed to have the weighmasters report other violations of the law and report such violations to the Commission at its regular meetings when the Commission will determine the penalty that should be imposed for such violations. In this connection the Engineer recommended the cancellation of permits of log haulers who refuse to consent to the weighing of their equipment if they are within two miles of the state highway department's scales. The Commission approved the recommendation and ordered that this feature also be included in the list of instructions to weighmasters.

The Commission discussed the Engineer's report on alternate routes

JUL 23 1941

for a proposed secondary state highway extending from the Wolf Creek Highway, near Elsie, to Astoria. The report reveals that route No. 1, known as the Fishhawk Falls Route, is 29 miles in length and will cost \$1,230,000 to construct, and that route No. 2, the West Humbug Route, is 30.5 miles in length and will cost about \$1,290,000. Route No. 3, the Saddle Mountain Route, is 31 miles in length and will cost \$1,240,000. The Engineer recommended adoption of route No. 1, which extends from Humbug Creek, on the Wolf Creek Highway, to Fishhawk Falls, on the Nehalem Secondary Highway. This matter was given very careful consideration by the Commission, and as a result, the Commission decided to adopt the route recommended by the Engineer, if and when the Clatsop County Court makes formal request for such designation.

The Engineer reported that all encroachments on the North Santiam Highway, between Detroit and the Santiam Highway junction, have been removed, and that all conditions precedent to the designation of this section as a state secondary highway have been satisfied, so that the Commission can place this highway on the secondary highway system if it so desires. The Commission decided, in view of the report, to so designate this road, which is in accordance with previous understanding and agreement with the County Courts of Marion and Linn Counties. The following resolutions in respect thereto were thereupon adopted by the Commission by unanimous vote:

WHEREAS, under the provisions of Chapter 248, Laws of 1931; Chapter 196, Laws of 1935; and Chapter 529, Laws of 1939; the State Highway Commission, by mutual agreement with the respective county courts of the several counties of the State, is authorized and empowered to select, locate, and designate a system of secondary state highways, which highways shall be selected from the market roads or other county roads, or available locations or routes of the several counties; and

WHEREAS, the State Highway Commission, by mutual agreement with the Marion County Court of the State of Oregon, has selected the road or highway hereinafter named, and it is the purpose of the Commission to officially and regularly designate and adopt said highway as a highway to constitute, together with other highways heretofore adopted and/or which may hereafter from time to time be added, the system of secondary state highways under the provisions of said acts;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission, all members being present and affirmatively voting and participating, as follows:

1. That the following described market road, county road, highway, route, or location of a highway in Marion County be and the said market road, county road, highway, location, or route, hereby is selected, and designated, established, adopted and approved as a secondary state highway and shall be and hereby is designated as a part of the secondary state highway system, to wit:

A Section of the North Santiam State Secondary Highway No. 162:

Beginning at Detroit and extending easterly and southeasterly along the north bank of the North Santiam River to the Linn-Marion County line, a distance of approximately 11.1 miles.

2. That the said highway shall be and hereby is qualified for improvement under the provisions of said Chapter 248, Oregon Laws of 1931; Chapter 196, Oregon Laws of 1935; and Chapter 529, Oregon Laws of 1939; and amendments thereof.

WHEREAS, under the provisions of Chapter 248, Laws of 1931; Chapter 196, Laws of 1935; and Chapter 529, Laws of 1939; the State Highway Commission, by mutual agreement with the respective county courts of the several counties of the State, is authorized and empowered to select, locate, and designate a system of secondary state highways, which highways shall be selected from the market roads or other county roads, or available locations or routes of the several counties; and

WHEREAS, the State Highway Commission, by mutual agreement with the Linn County Court of the State of Oregon, has selected the road or highway hereinafter named, and it is the purpose of the Commission to officially and regularly designate and adopt said highway as a highway to constitute, together with other highways heretofore adopted and/or which may hereafter from time to time be added, the system of secondary state highways under the provisions of said acts;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission, all members being present and affirmatively voting and participating, as follows:

1. That the following described market road, county road, highway, route, or location of a highway in Linn County be and the said market road, county road, highway, location, or route, hereby is selected, designated, established, adopted and approved as a secondary state highway and shall be and hereby is designated as a part of the secondary state highway system, to wit:

A Section of the North Santiam Secondary State Highway No. 162

Beginning at a point on the Linn-Marion County Line near Whitewater Creek; thence in a southerly and southeasterly direction to a junction with the Santiam Highway, a distance of approximately 20.2 miles.

2. That the said highway shall be and hereby is qualified

for improvement under the provisions of said Chapter 248, Oregon Laws of 1931; Chapter 196, Oregon Laws of 1935; and Chapter 529, Oregon Laws of 1939; and amendments thereof.

The Commission also, by unanimous vote, adopted the following resolutions extending the Three Mile Lane Secondary Highway No. 152, in Yamhill County, from its present terminus at the intersection of Third Street and Johnson Street, in McMinnville, westerly along Third Street to the intersection of Third Street and Baker Street (route of the Pacific Highway West); and designating as the McMinnville Secondary Highway No. 156 the old route of the Pacific Highway West which extends north from McMinnville along Lafayette Avenue, a distance of 1.8 miles.

WHEREAS, under the provisions of Chapter 248, Laws of 1931, Chapter 196, Laws of 1935, and Chapter 529, Laws of 1939, the State Highway Commission, by mutual agreement with the respective county courts of the several counties of the state, is authorized and empowered to select, locate and designate a system of secondary state highways, which highways shall be selected from the market roads or other county roads, or available locations or routes of the several counties; and

WHEREAS, the State Highway Commission, by mutual agreement with the Yamhill County Court of the State of Oregon, has selected the highway hereinafter named, and it is the purpose of the Commission to officially and regularly designate and adopt said highway as a highway to constitute, together with other highways heretofore adopted and/or which may hereafter from time to time be added, the system of secondary state highways under the provisions of said act;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission, all members being present and affirmatively voting and participating as follows:

1. That the following named highway, route, or location of a highway in Yamhill County be and the said highway, location or route hereby is selected, designated, established, adopted and approved as a secondary state highway and shall be and hereby is designated as a part of the secondary state highway system, to wit:

A Section of the Three Mile Lane Secondary Highway No. 152, described as follows:

Beginning at the intersection of 3rd Street and Baker Street in McMinnville; thence easterly on 3rd Street to the intersection of 3rd Street and Johnson Street; a distance of approximately 0.45 mile.

2. That the said highway shall be and hereby is qualified for improvement under the provisions of said Chapter 248, Oregon Laws 1931, and amendments thereof.

WHEREAS, under the provisions of Chapter 248, Laws of 1931, Chapter 196, Laws of 1935, and Chapter 529, Laws of 1939, the State Highway Commission, by mutual agreement with the respective county courts of the several counties of the state, is authorized and empowered to select, locate and designate a system of secondary state highways, which highways shall be selected from the market roads or other county roads, or available locations or routes of the several counties; and

WHEREAS, the State Highway Commission, by mutual agreement with the Yamhill County Court of the State of Oregon, has selected the highway hereinafter named and it is the purpose of the Commission to officially and regularly designate and adopt said highway as a highway to constitute, together with other highways heretofore adopted and/or which may hereafter from time to time be added, the system of secondary state highways under the provisions of said act;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission, all members being present and affirmatively voting and participating, as follows:

1. That the following named highway, route, or location of a highway in Yamhill County be and the said highway, location or route hereby is selected, designated, established, adopted and approved as a secondary state highway and shall be and hereby is designated as a part of the secondary state highway system, to wit:

McMinnville Secondary State Highway No. 156, described as follows:

Beginning at the intersection of the Pacific Highway (West) with the former route of the Pacific Highway (West) which is an extension of Lafayette Avenue northeast of McMinnville; thence in a southwesterly direction along the former route of the Pacific Highway (West), Lafayette Avenue and Johnson Street in McMinnville to the intersection of Johnson Street and Third Street in McMinnville; a distance of approximately 1.80 miles.

2. That the said highway shall be and hereby is qualified for improvement under the provisions of said Chapter 248, Oregon Laws 1931, and amendments thereof.

The Commission adjourned at 11:50 p. m. with the understanding that additional routine matters would be disposed of on the following morning, enroute to Nyssa and Ontario.

Enroute John Day to Nyssa, Oregon, July 24, 1941

The Commission left the town of John Day at 7:15 a. m., and enroute to Nyssa disposed of the following routine matters, all Commissioners, the State Highway Engineer, the Attorney and the Secretary being present:

The Engineer discussed with the Commission partial programs for construction work on primary and secondary state highways for 1942 performance, to be paid for with state funds. After discussion the following projects were approved for the two programs, and the Engineer was authorized to work up the plans for each project and to advertise them for bids as soon as the plans are ready:

1942 STATE PARTIAL PROGRAM ON PRIMARY HIGHWAYS

County	Highway	Section and Kind of Work	Estimated Cost
<u>Divisions 1 and 2</u>			
Lincoln	Alsea	Rock Creek-West, Grade, Surface and Oil	\$75,000
Multnomah	Tualatin Valley	Sylvan-West Slope, Grade & Pave	75,000
Linn	Santiam	Lebanon-East, Grade Stabilization	75,000
<u>Division 3</u>			
Coos	Oregon Coast	Gold Beach, Pave	\$60,000
Jackson	Crater Lake	Medford-Eagle Pt., Grade & Pave	100,000
<u>Division 5</u>			
Wallowa	Enterprise-Lewiston	Enterprise-Forest Bdry., Grade, Surface & Oil	\$75,000*
Grant	John Day-Burns	Soda Mt.-South, Surface & Oil	100,000
Harney	Lakeview-Burns	Wagontire-North, Grade, Surface & Oil	100,000

*Include with previous allocation of \$47,400.

1942 STATE PARTIAL PROGRAM ON SECONDARY HIGHWAYS

County	Highway	Section and Kind of Work	Estimated Cost
<u>Divisional and 2</u>			
Lincoln	Siletz	Forest Bdry.-East, Grade & Surface	\$75,000
Linn	Scio-Lyons	Surface & Oil	25,000*
Washington	Farmington Road	Hazeldale-Hillsboro Road, 4 Miles Grade, Surface & Oil	30,000
<u>Division 3</u>			
Lane	Territorial	Smithfield-Elmira, 7 Miles, Surface & Oil	\$30,000
"	"	Veneta-Crow, 4 Miles, Grade, Surface & Oil	30,000
Douglas	Tiller-Trail	Wright Ranch-East, Grade, Surface & Oil	75,000
Coos	Powers Road	Grants Creek-Powers, Surface & Oil	50,000
<u>Division 4</u>			
Hood River	Hood River	Woodworth Acres-Bailey Road, Grade, Surface & Oil	\$50,000
Sherman	Sherars Bridge	Buck Hollow, Grade & Top	15,000
*Brought forward from previous F.A.S. programs.			
<u>Division 5</u>			
Malheur	Vale-West	Bully Creek, Grade, Surface & Oil	\$50,000**
Gilliam	Wasco-Heppner	Condon-Morrow Co. Line, Surfacing	75,000
Harney	Frenchglen	Wrights Pt.-Narrows, Surfacing & Oil	25,000
Union	Starkey	Grade & Surface	50,000**
Umatilla	Athena-Cold Springs	Grade, Surface & Oil	25,000*

*Brought forward from 1941 F.A.S. program.

**Tentative approval only.

The Commission also approved a special maintenance budget of \$450,000 for rock production projects, it being understood that the individual projects would be presented for approval as they arise.

The Commission discussed briefly the complaint of Mr. H. E. Hein, Scappoose, regarding use of a state-owned gravel pit which adjoins Mr. Hein's land on which he maintains cottages for rent. Mr. Hein contends that the continued use of this gravel pit by the state is devaluating his property and

is creating a dangerous condition for his tenants. The Engineer advised that the gravel pit is not a new one, having been used for many years by Columbia County, and was acquired by the state from the county in 1940 for use in connection with reconstruction of the Lower Columbia River Highway. Since acquisition of the quarry, he said, the highway contractor has been removing materials for his work, but his operations are now practically complete; furthermore, the quarry has been fenced, so in his estimation Mr. Hein has no further cause for complaint. Action on this matter was deferred by the Commission pending personal inspection of the premises by Chairman Cabell.

The Commission discussed matters pertaining to the Annual Convention of the American Association of State Highway Officials, which is to be held in Detroit, Michigan, September 29 and 30, and October 1 and 2, 1941. It was decided that all three members of the Commission, the State Highway Engineer, the Assistant State Highway Engineer, and the Attorney should attend this meeting at state expense, if Governor Charles A. Sprague approves.

The Attorney requested authority to print a compilation of the laws of the State of Oregon affecting roads and highways, including those enacted by the 1941 Legislature. He estimated the cost of printing 1,000 copies of such compilation at approximately \$1,000. The Commission approved the request.

The Engineer requested authority to advertise the following projects for bids to be received by the Commission at the special meeting of the Commission to be held in Portland about the middle of August:

Project	Class Of Funds	Estimated Cost
Structural Steel, Morrison Street Bridge	40 FA	\$ 6,500
South Milton, Roadside Improvement	42 FA	2,200
Shaniko-Cow Canyon (W. Unit), G., S. & Oil	42 FA	121,000
Fisher Road-Oak Hill, Grad., Surf. & Oil	41 FAS	33,900
Banzer Bridge-Mist, Grad., Surf. & Bit. Mac.	42 FAS	82,000
Wrights Point-Narrows (N. Unit), Grad. & Top.	41 State	28,000
Middle Unit, Crabtree Corner-Lebanon, G. & P.	41 State	75,000
Forest Boundary-Reed Creek, Siletz Sec. Hwy.	41 State	115,000
Grading, Surfacing & Oiling		

The Commission approved the request and thereupon set the date for such meeting as Thursday, August 14.

The Commission discussed and referred to the Engineer for additional information a request from the United Contracting Company for relief from payment of the full amount of the penalty imposed on them by the Commission for failure to complete their contract No. 2340, for the construction of the Corvallis-Lincoln School Section, in Benton County, within the specified time limit.

The Commission reconsidered its claim against Charles J. Rohkonen for damages that occurred to state equipment as a result of Mr. Rohkonen driving his car into such equipment. The Attorney advised that he has had some

correspondence with Senator F. M. Franciscovich, Mr. Rohkonen's attorney, with respect to the claim, and learned that Mr. Rohkonen has no funds whatsoever and that it would be absolutely impossible for him to pay the claim. In view of this report the Commission decided that it would be useless to make any further effort to collect, and instructed the Attorney to let the matter drop.

The Commission discussed, and referred to the Attorney for advice, the claim of the Gault Lumber Company for damage to a bridge on a privately-owned road connecting with the Siuslaw Highway, which it is alleged was destroyed last year during the progress of highway construction work at this point.

The Commission discussed briefly matters pertaining to its authority under the provisions of Chapter 297, Oregon Laws of 1941, whereby there was created the Old Oregon Trail Centennial Advisory Commission, and there was appropriated from the State General Fund the sum of \$15,000 for disbursement under the direction of the State Highway Commission in commemorating the Old Oregon Trail. The Attorney pointed out that the bill provides for the appointment of a commission to be known as the "Old Oregon Trail Centennial Advisory Commission", and that it also places certain responsibility on the State Highway Commission. The Commission considered a conference between the two commissions desirable for discussion of matters of mutual concern, and accordingly ordered that the Old Oregon Trail Centennial Advisory Commission be invited to meet with the Highway Commission at its next regular meeting for such purpose.

The Commission discussed a letter from the Attorney with respect to its authority over advertising signs placed on state highway routes through incorporated cities and towns, but deferred action thereon pending a report from the Attorney as to what cities and towns in Oregon now have ordinances covering this feature. The Attorney was instructed to secure such information.

The Commission also discussed the advisability of modifying its present policy with respect to the construction of culverts under private road approaches to state highways, and decided to make no change in such policy; however, ordered that hereafter, in each instance, a party desiring to install such type of culvert shall first obtain a permit from the State Highway Commission before commencing construction of the culvert.

The matter of conducting snow-removal operations on roads leading to the Anthony Lakes Recreational Area, in Baker County, for the benefit of winter sports enthusiasts, was discussed by the Commission. The Engineer advised that for the most part such roads are not on the state highway system and that the forest section has not been constructed to standards that would permit operation of modern, snow-fighting equipment; further, that the road is a stub-end road simply extending into the forest and does not connect with any other road and, in his estimation, to conduct snow-removal operations thereon is not an economically sound undertaking. The Commission deferred a decision in the matter pending a conference with interested local citizens later in the summer.

The Commission had under consideration the closure of Contract No. 1594 entered into by the State Highway Commission with Mr. Joseph H. Anderson on January 30, 1934, for the construction of a certain bridge over Mill Creek in the town of Aurora.

It appears that Mr. Anderson has filed a claim for damages occasioned by the fact that he was not permitted to commence work at the time contemplated due to the failure of Marion County to procure the necessary rights of way. This claim is in the sum of \$3,975. Offsetting this, the state has a claim in the amount of \$1,519.37 against Mr. Anderson for certain surfacing which was performed on his contract by state forces.

This controversy with Mr. Anderson has dragged along from year to year, and the state has repeatedly and diligently attempted to make an equitable settlement.

The Engineer reported that he had very carefully examined the contractor's claim for damage, and could only find justification for \$1,350 as against the sum of \$3,975 claimed. The Attorney reported that he had checked the Engineer's report and was in substantial agreement with it but that on July 13, 1939, he had written Mr. Anderson, stating that he would be willing to recommend to the Commission that the claim be settled in the amount of \$1,519.37, which would close the books, this last sum being the exact amount of the state's claim against Mr. Anderson.

It appears that under date of July 14, 1939, Mr. Anderson's attorney (Mr. Howard P. Arnest) refused this offer but made a counter offer to settle in the amount of \$2,519.38, this proposed settlement being exactly \$1,000 greater than the state's offer.

Both the Engineer and the Attorney stated that they considered this last offer unreasonable and recommended, in view of the state's inability to settle this controversy, that authority be given to the Engineer to close the books on this project.

After some discussion the Commission unanimously approved the recommendation and considered the transaction closed unless it becomes necessary to reopen it in the event of litigation.

The Commission discussed the claim of Oren D. Lynch, for repairs to his truck and trailer which were damaged by a falling rock on the Santiam Highway, near Sheep Creek ridge on July 9, 1941. The Engineer advised that one of the highway department's maintenance crews was engaged in removing some slide material above the highway at this point with a bulldozer, and it so happened that part of this material contained a large rock which rolled down the bank and struck Mr. Lynch's truck, causing damage to the truck, and the trailer attached to it, necessitating repairs costing \$47.19. The Attorney advised that this class of accident is not protected by the insurance the state carries on its equipment, so if the Commission acknowledges the liability and approves

payment of the claim, it would have to be paid under authority of Subsection 15 of Section 100-115 O. C. L. A. The Engineer recommended payment of the claim. The Commission approved the recommendation.

The Commission had under discussion the adoption of a policy with respect to the collection of damages for injuries caused to highways by farm equipment. The Attorney advised that the law provides that people who damage highways by movement thereover of farm machinery are liable for the damage, although as far as he knows the statutory liability has never been enforced. After discussion the Commission ordered that such claims be collected and that suit be instituted to collect, if necessary, and that such procedure be followed hereafter in cases of this kind.

The Commission discussed and approved the State Highway Engineer's press release with respect to a proposal to reduce the license fees of passenger motor vehicles and light delivery trucks from \$5.00 to \$2.00 per year. (See statement in General Files for details.)

The Commission approved and signed a joint letter with the District Engineer of the Public Roads Administration and the United States Regional Forester, revising the fiscal year 1941 forest highway program as agreed upon at the conference held in Portland on July 17, 1941.

The Commission also approved and signed a second modification of the agreement with the federal government, covering construction and maintenance of the Beech Creek-Forest Boundary Section of the Pendleton-John Day Highway, in Grant County.

A letter was presented from Mr. Carl H. Coad, Nyssa, offering objections to the improvement of the county road which extends southeasterly from Vale to a junction with the Nyssa-Adrian Secondary Highway, and stating his preference for the improvement of feeder roads out of Nyssa. The Secretary was instructed to inform Mr. Coad that the Commission is obliged to consult with the county courts with respect to county road improvements, inasmuch as they are the official bodies that represent the people of the counties, and must respect the wishes of the county courts regarding such improvements, otherwise chaos would prevail; however, the Commission will be pleased to bear Mr. Coad's suggestions in mind in the formulation of a program for county road improvements in Malheur County.

The Commission discussed a copy of a letter from E. P. Leavitt, Superintendent, Crater Lake National Park, to the H. M. Gousha Company, map makers, Chicago, in which Mr. Leavitt suggests that the route numbers of certain state highways, viz., Nos. 62, 209, and 232, respectively, that are now shown on the copies of the road map of Oregon, be deleted therefrom insofar as they are within the park boundaries, and that there be substituted therefor a note to the effect that the state highways end at the park line and all highways within the boundaries of Crater Lake National Park are constructed and maintained by the National Park Service. The Commission appeared favorably inclined to the suggestion; however, deferred action in the matter pending a

report from the Engineer, who gave as his thought that the numbers should not be eliminated because they represent travel routes which are important to motorists who are not familiar with the roads in this state.

A letter was presented from the Lower Columbia Associated Chambers of Commerce asking information as to which highways of the state of Oregon are to be included in the proposed national strategic network of highways. The Secretary was instructed to reply that a number of consultations have been held with respect to the strategic highway system in Oregon, and a system has been tentatively selected, although not yet approved by the United States War Department, and until such approval has been given, the Commission does not feel at liberty to make the information public.

The Commission also discussed another letter from the Lower Columbia River Associated Chambers of Commerce requesting information as to the Commission's plans for the further improvement of the Lower Columbia River Highway, between Rainier and Astoria. The Secretary was instructed to reply that the Commission has not yet formulated plans for such improvement.

The Commission discussed and ordered filed for future consideration a letter from C. H. Demeray, Chairman of the Highway Committee of the Grants Pass and Josephine County Chamber of Commerce, advising that the Chamber of Commerce has discussed matters pertaining to the proposed Medford Army Cantonment and is of the opinion that the program as outlined with respect to roads will meet with the approval of both the army authorities and the citizens of Jackson and Josephine Counties.

The Secretary presented a letter from the U. S. No. 95 Highway Association advising that the association has gone on record as favoring the placing of signs on the highway on both sides of the Snake River to properly indicate junctions and access roads to Weiser, Payette, Nyssa and Ontario. The Commission referred this letter to the Engineer to discuss with the State Highway Engineer of Idaho.

A request was presented from the Adrian Commercial Club, Adrian, Oregon, for the oiling of two county roads in Malheur County, viz., one through the Big Bend district to connect with the Wilder oiled road, and the other through the south Owyhee district to connect with the Homedale oiled road. It was alleged that these roads are both used by high school busses, are in very bad condition, and are difficult to travel over, especially during the winter months; also, that the people living in these communities prefer to trade in Oregon, but on account of road conditions are obliged to give their business to Idaho merchants. The Engineer advised that both roads referred to are county roads under the jurisdiction of the county court of Malheur County. The Secretary was instructed to inform the Commercial Club that its request will be considered in the formulation of future county road programs in Malheur County, but the Commission is obliged, under its present policy, to discuss such matters with the county courts, which are the governing bodies of the counties and to whom the Commission must look for advice on county road matters.

A resolution was presented from the Board of Surveyors of Siskiyou County, California, in which the Highway Commission was asked to join with the Highway Department of the State of California in a request to the U. S. Forest Service for the designation as a Number 3 Forest Service Road of the Happy Camp-O'Brien Road, which extends from Happy Camp, in Siskiyou County, California, to Waldo, Oregon, and is now designated as a forest trail. It appears that the designation of this road as a Number 3 Forest Service Road will make it possible for the U. S. Forest Service to improve it. The Commission decided not to join in this request unless the Forest Service intends to undertake a major improvement of the road in California.

The Commission discussed and ordered filed an editorial from the Klamath Falls Basin Progress concerning the proposed improvement of South Sixth Street, particularly declaring that any plan for the improvement of this street which does not include improvement of the South 6th Street viaduct will be to a large extent a waste of money and effort.

A resolution was presented from the Union County Pomona Grange favoring the seeding of highway slopes with Oregon-grown grass seed adaptable to the locality in which the seed is to be planted. The Engineer advised that the suggestion is in conformity with the practice now being followed by the Highway Department. The Secretary was instructed to so inform the Grange.

The Commission discussed a letter from John W. Cunningham and Associates, Engineers who are making studies for a proposed U. S. Army cantonment between Corvallis and Monmouth, requesting that the Highway Department conduct surveys as may be necessary for the relocation of U.S. 99W (Pacific Highway West), from Rickreall to Corvallis, to accommodate the cantonment. The Commission expressed a desire to cooperate in this matter as much as possible, and thereupon authorized the Engineer to make the surveys if the U. S. Army will pay the costs involved.

A report was presented from the Department of State Police with respect to log-hauling operations over Alsea Mountain, on the Alsea Highway. According to the report a number of loads of logs were observed to determine whether or not such operations created a hazard to the general traveling public, and it was found that in no instance could the loads be hauled over this mountain without some part of the equipment or load extending over the center line of the highway at the numerous curves, and it was the opinion of the police officer who made the observations that such operations on this section of the highway are a hazard to other traffic and that a bad accident might occur to an unsuspecting motorist who was not aware of the log-hauling operations. The Engineer advised that this report was made at his request because of complaints that he had received of conditions, and he recommended an allocation of funds to improve the highway when such funds can be spared from other projects. The Commission concurred in the Engineer's viewpoint, but decided to wait until a future meeting before deciding which section should be improved.

The Commission discussed and denied a request from William Raymond, Klamath Falls, for permission to truck-haul logs over a one-mile section of the Klamath Falls-Lakeview Highway, near the town of Bly, on Saturday afternoons.

The Commission confirmed the Engineer's reinstatement of the log-hauling permits of Standley Brothers, Camas Valley, and Nick Marsh, Port Orford, which permits were heretofore cancelled because of violations of the rules and regulations of the Public Utilities Commissioner, particularly the rule which prohibits the transportation of loads weighing in excess of those permitted by the Oregon statutes.

The Commission discussed the question whether or not to continue the present practice of requiring log haulers to furnish excess insurance coverage for the protection of the general traveling public and the members of the State Highway Commission, in cases where the overall lengths of the loads exceed the statutory length limit. The Secretary advised that the present practice is to require insurance protection in the amount of \$50,000/\$100,000 public liability, and \$10,000 property damage. The Commission decided to reduce the amount of such insurance to \$20,000/\$40,000 public liability and \$5,000 property damage, and to require all log haulers to furnish such amount of insurance, regardless of the overall length of the load. This matter is to be discussed with the Public Utilities Commissioner, who is to be asked to secure such amount of insurance from all log haulers. In the event the Public Utilities Commissioner offers objections to such arrangement, then a conference is to be arranged with him for further discussion of the matter.

The Engineer brought up for discussion Motor Ruling No. 26, promulgated by the Public Utilities Commissioner, relative to the question, "May a special carrier, transporting logs, poles or piling, declare, at the time of obtaining his permit, in excess of 54,000 pounds and include in such declaration 10 per cent thereof, or up to 59,400 pounds?" He advised that the Public Utilities Commissioner has ruled that the Commissioner can accept such a declared weight, as it is a lawful weight under Section 115-390, O.C.L.A., and he considers it proper to do so because of the constant loading of logs, poles or piling in excess of 54,000 pounds by many special carriers who did not pay fees for the highway use in excess of 54,000 pounds. The Engineer advised that he does not concur in the ruling, and he does not believe that the Public Utilities Commissioner can legally accept declared weights in excess of 54,000 pounds, notwithstanding that the applicant may pay the required fee. He requested instructions from the Commission relative thereto. After discussion, the Commission instructed the Engineer to arrange for a conference with the Public Utilities Commissioner on this matter.

The Commission discussed and by unanimous vote adopted the following supplemental rules and regulations to be recommended to the Public Utilities Commissioner for use in connection with the issuance of log-hauling permits, and instructed the Secretary to forward a copy of the same to the Public Utilities Commissioner for his information. (These regulations are supplemental to those printed by the Public Utilities Commissioner as effective June 15, 1941.)

Unless special permission is obtained from the State Highway Commission, the hauling of logs, poles or piling is prohibited on Saturday afternoons, Sundays, during hours of darkness, except as provided

under Section 13a of this permit, and on the following holidays: January 1st, May 30th, July 4th, Labor Day, November 11th, December 25th, also any holidays designated by the President of the United States or the Governor of the State of Oregon; also the Monday immediately following any of the above-mentioned holidays that occur on Sunday, and Saturday morning immediately following any of such holidays that occur on Friday.

During that portion of the year when daylight occurs later than 6:00 a. m. and ceases prior to 8:00 p. m., logs may be transported over state highways during the period from 6:00 a. m. to 8:00 p. m. regardless of whether or not darkness prevails during all or any portion of such period, provided however that the hauling equipment and load shall be equipped with and shall display lighted lamps and illuminating devices conforming with the provisions of Sections 115-367, 115-370, 115-372, 115-373, 115-374, and 115-375, O.C.L.A.; and Section 115-368, O.C.L.A., as amended by Chapter 69, Oregon Laws, 1941; and Section 115-369, O.C.L.A., as amended by Chapter 129, Oregon Laws, 1941, and Section 115-371, O.C.L.A., as amended by Chapter 58, Oregon Laws, 1941.

Operators of all logging trucks shall consent to the inspection and weighing of their loads on state-owned scales whenever so requested by "weighmasters" in the employ of the State Highway Commission, if the scales are not more than 2 miles distant. Signs will be erected at the scale sites requesting all logging trucks to stop at the scales. The refusal of any operator to allow his truck to be inspected or weighed shall be cause for the immediate suspension or cancellation of the permit under which he is operating.

A truck loaded with logs shall not follow another similarly-loaded truck closer than 300 feet except when overtaking and passing another, and no truck carrying a load of logs shall pass another similarly-loaded truck on an ascending grade. A passing maneuver shall not be attempted at any point unless there is a clear vision of the road ahead for at least one-half mile.

The speed of any logging truck, either with or without load, shall not exceed 15 miles per hour on sharp curves and/or narrow bridges.

The violation of any of the regulations hereinabove set forth shall be considered sufficient cause for the immediate suspension or cancellation of the permit under which the equipment involved is being operated.

A letter was presented from the Elliott Transfer Company, Astoria, requesting modification of the Commission's rule which requires log haulers

to report to state scales upon request of weighmasters, when they are within a distance of two miles from the scales. Mr. Elliott advised that his unloading dump is located approximately 1,000 feet west of the scales at Grande Ronde, and under the present arrangement the trucks are required to travel about 2,000 feet more than is necessary, causing him extra expense as well as loss of several loads of logs daily. The Commission denied the request.

The Commission discussed and approved the following regulations covering special movements other than logs, poles or piling, over state highways involving length, width, and/or height in excess of the limits allowed by statute, and ordered that such regulations be included hereafter in permits issued to cover such movements.

1. Movements shall not extend beyond or to the left of the highway center-line stripe or to the left of the center of the traveled roadway if there be no such center stripe, unless the movement is an emergency and such feature is covered by a special provision in the permit.
2. Speed of movements shall not exceed fifteen miles per hour on sharp curves and bridges.
3. Flagmen must be maintained at the point where the load enters the state highway and where it leaves the state highway. Flagmen must also accompany the movement at sharp curves, across narrow bridges, and at other points where sight distance along the highway is impaired. Where the movement is across any highway bridge structure with impaired vertical or horizontal clearance, the movement shall occupy the center of the roadway and a flagman shall be stationed at each end of the bridge to prevent other traffic from using the structure until it is cleared.
4. Special movements are prohibited on Saturday afternoons, Sundays, during hours of darkness, and on the following holidays: January 1, May 30, July 4, Labor Day, November 11, and December 25; also on any holiday designated by the President of the United States or the Governor of the State of Oregon; and on any Monday immediately following said holidays when such holiday falls on Sunday and on any Saturday morning immediately following a holiday which occurs on a Friday.
5. Special liability insurance in the amount of \$50,000/\$100,000 and property damage insurance in the amount of \$10,000 shall be furnished by the permittee in connection with permits for overall lengths in excess of 50 feet and for overall widths in excess of 12 feet.
6. Permittee shall be held responsible and liable for injury or damage that occurs by reason of movements under his permit and he shall also be held responsible and liable for injury or damage that occurs to the highway or any bridge structure by reason of the movement.

7. The trailer used in connection with movements involving overall length in excess of 75 feet shall be equipped with hand-steering device. .

Consideration was given by the Commission to the following requests for extensions of time within which to complete highway construction projects:

Kern & Kibbe, contract No. 2327, for the construction of Sunset Tunnel Section on the Wolf Creek Highway, in Washington County, requested an extension of time of thirty-two days, from July 31 to September 1, 1941, within which to complete this job. They attributed their failure to complete the project within the specified time limit to orders received from the State Highway Engineer to defer painting of the tunnel until such time as weather conditions were favorable for such work. The Engineer advised that the project, except for the paint work, was completed in April, and the contractor was instructed to defer painting work until the driest condition prevailed during the summer months. He recommended, in view thereof, that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation.

Chester T. Lackey, contract No. 2377, for grading and surfacing the Burns Section of the Central Oregon Highway, in Harney County, requested an extension of time of eight days, from June 15 to June 23, 1941, within which to complete this job. He attributed his failure to complete the project within the specified time limit to adverse weather conditions, stating that the roadbed was too spongy to roll and it was necessary for him to defer such operations until the roadbed had dried out. The Engineer advised that Mr. Lackey's operations were delayed because of rain which softened the subgrade to the extent that the surfacing could not be finished; however, such condition did not start until the time for the completion of the job had expired, and if Mr. Lackey had carried on his work expeditiously prior to that time, he could have completed the job within the specified time limit and avoided the rainy spell. He recommended, in view of the circumstances, that the extension of time requested be granted, but that Mr. Lackey be charged with the extra engineering expense incurred by the state subsequent to the specified date of completion of the project. The Commission approved the recommendation.

G. L. Potts, contract No. 2381, for construction of three culverts on the Lower Columbia River Highway, the Tualatin Valley Highway and the Beaverton-Aurora Secondary Highway, in Multnomah and Washington Counties, requested an extension of time from January 31 to June 18, 1941, within which to complete this job. Mr. Potts alleged that all work in connection with the job, with the exception of some shoulder work and cleaning up of the sites, was finished by May 25, and it was not possible for him to do the finishing work until the middle of June because of other pressing work. The Engineer advised

that the contract called for the completion of the work by January 31, 1941; however, weather conditions were such that the work could not go forward as planned without undue inconvenience to the traveling public, so the contractor was ordered to close down the work on December 20 for the remainder of the winter season. Work on the project, he said, was resumed on March 21; however, the cleaning up of the sites was not completed until June 18. The delay in completing the project, he added, was primarily for the accommodation of the state, and, in view thereof, he recommended that the extension of time requested be granted without penalty. The Commission approved the recommendation.

F. C. Dillard, contract No. 2383, for furnishing crushed materials in stock pile for the Lincoln County Line-Alsea Mountain Section of the Alsea Highway, in Benton County, requested an extension of time of 15 days from May 31 to June 15, 1941, within which to complete this job. He attributed his failure to complete the project within the specified time limit to adverse weather conditions in April and May and to an increase in the quantities of materials to be stock piled. The Engineer advised that the reasons given by the contractor for failure to complete the project within the specified time limit are correct. He recommended that the extension of time requested be granted without penalty. The Commission approved the recommendation.

J. F. Johnston, contract No. 2387, for construction of the Nashville Bridge on the Eddyville-Blodgett Secondary State Highway, in Lincoln County, requested an extension of time of thirty days from June 30 to July 30, 1941, within which to complete this job. He attributed his failure to complete the project within the specified time limit to adverse weather conditions, which were unfavorable for grading the approaches to the bridge. The Engineer advised that the bridge structure was completed well ahead of the contract completion date and in ample time for the contractor to have completed the grading and surfacing of the approaches; however, the latter work was carried on in a very dilatory manner, resulting in an overrun of the contract time. He recommended, in view of the circumstances, that the extension of time requested be granted, but that the contractor be required to reimburse the state for extra engineering expense incurred against the project subsequent to the specified date of completion. The Commission approved the recommendation.

Birkemeier & Saremal, contract No. 2452, for installation of new expansion plates on the Interstate Bridge on the Pacific Highway, between Portland and Vancouver, requested an extension of time of ten days, from June 30 to July 10, 1941, within which to complete this job. They alleged that their failure to complete the contract within the specified time limit was due to the fact that they were required to do considerable extra work. The Engineer advised that the reason given by the contractor for failure to complete the project within the specified time limit is correct. He recommended that

the extension of time requested be granted, without penalty. The Commission approved the recommendation.

The Engineer reported that contracts Nos. 2242, 2345, 2352, 2360, 2365, 2370, 2376, 2377, 2381, 2383, 2406, 2407, 2413, 2416, 2419, 2443, and 2461, for the construction of state highway projects, have been completed according to the requirements of the contracts or modifications thereof, and that said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts, and that said jobs are now ready for acceptance:

Contract No. 2242, with E. C. Hall, for furnishing 15,900 cubic yards of crushed rock in stock piles on the Mt. Hood Section of the Mt. Hood and Wapinitia Highways, in Clackamas and Wasco Counties. Completed June 25, 1941.

Contract No. 2345, with Leonard and Slate, for grading, surfacing and oiling the East Unit, Shaniko-Cow Canyon Section of the Sherman Highway in Wasco County. Completed June 14, 1941.

Contract No. 2352, with A. Milne, for grading and bituminous macadam surfacing on the Brookings Section of the Oregon Coast Highway, in Curry County. Completed July 12, 1941.

Contract No. 2360, with A. Milne, for grading, surfacing and oiling on the South Newport Section of the Oregon Coast Highway, in Lincoln County. Completed June 28, 1941.

Contract No. 2365, with Melhutt Bros., for grading and bituminous macadam surfacing on the Troy Ranch Section of the Old Oregon Trail Highway, in Baker County. Completed May 17, 1941.

Contract No. 2370, with Fisher Bros., for grading, surfacing and oiling the Bryant Hill-Trout Creek Section of the Santiam Highway, in Linn County. Completed July 3, 1941.

Contract No. 2376, with Fife & Company, for construction of maintenance patrolmen's headquarters on the John Day Highway at Seneca, in Grant County. Completed June 25, 1941.

Contract No. 2377, with Chester T. Lackey, for grade-widening and surfacing on the Burns Section of the Central Oregon Highway, in Harney County. Completed June 21, 1941.

Contract No. 2381, with G. L. Potts, for three culverts on the Lower Columbia River Highway, the Tualatin Valley Highway and the Beaverton-Aurora Secondary Highway, in Multnomah and Washington Counties. Completed June 17, 1941.

Contract No. 2383, with F. C. Dillard, for furnishing 8,000 cubic yards of crushed materials in stock piles on the Lincoln County Line-Alsea Mountain Section of the Alsea Highway, in Benton County. Completed June 12, 1941.

Contract No. 2406, with Frank Penepacker, for grading and topping on the Boardman-Umatilla County Line Section of the Old Oregon Trail Highway, in Morrow County. Completed June 25, 1941.

Contract No. 2407, with Norris. Bros., for surfacing and oiling the Owyhee River-McDermitt Section of the I.O.N. Highway, in Malheur County. Completed July 5, 1941.

Contract No. 2413, with M. L. O'Neil & Sons, for furnishing 8,000 cubic yards of crushed material in stock piles for the Hendricks Bridge-Silver Creek Section of the McKenzie Highway, in Lane County. Completed June 25, 1941.

Contract No. 2416, with A. S. Wallace, for furnishing 7,350 cubic yards of crushed rock in stock piles on the Endicott Creek-Bear Creek Section of the Coos Bay-Roseburg Highway, in Coos and Douglas Counties. Completed June 14, 1941.

Contract No. 2419, with E. C. Hall Co., for surfacing and oiling the Catherine Creek-Miles Bridge Section of the Medical Springs Secondary Highway, in Baker and Union Counties. Completed June 18, 1941.

Contract No. 2443, with O. C. Yocom, for surfacing the Foster-Cascadia Section of the Santiam Highway, in Linn County. Completed June 10, 1941.

Contract No. 2461, with J. C. Compton, for oil mat wearing surface on the Mountain Rest-Mt. Vernon and Butte Creek-Service Creek Sections of the Pendleton-John Day, Beech Creek Secondary and John Day Highways, in Grant and Wheeler Counties. Completed July 7, 1941.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects

be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

The Commission confirmed Thursday and Friday, September 4 and 5 as the date for its next regular meeting to receive bids, and Thursday, August 14, as the date for an interim meeting of the Commission, to receive bids for special projects. The Secretary was instructed to make arrangements to hold such meetings in the auditorium of the Public Service Building, Portland.

Nyssa, Oregon, July 24, 1941

The Commission arrived at Nyssa at 10:15 a. m., Pacific Standard Time (11:15 a. m. Mountain Time), and immediately conferred with the local delegations in the office of Mr. Frank Morgan, Secretary of the Nyssa Chamber of Commerce. Present at such meeting were: all three Commissioners, the State Highway Engineer, the Attorney, and the Secretary.

Mr. Morgan headed the local group, which included J. C. Olson, Mayor; J. E. Ostrom, Councilman; and Mr. Norcott, of Nyssa; Messrs. Lou Collins and Kay Johnson, Union Pacific Railroad Company; Sam R. Scott, Mayor, Jordan Valley; Geo. S. Parks, Councilman, Jordan Valley; and Marion Wroten, Jordan Valley; County Judge David F. Graham, Malheur County; Mr. Hartley, representing the Oregon State Grange; Ed Henderson; and others.

Mr. Morgan asked the Commission to complete the construction of the I.O.N. Secondary Highway (U.S. Highway No. 95), particularly the oiling of the forty-mile section between Rome and Jordan Valley which has already been graded and surfaced, and the construction of the thirteen-mile section between Jordan Valley and the Idaho state line. He called on members of the delegation to present arguments in behalf of this request. Mr. Wroten and Mayor Scott urged these improvements and especially the construction of the section north of Jordan Valley, in behalf of the Jordan Valley delegation. Chairman Cabell responded by stating reasons why the State Highway Commission is unable to make greater progress on this project. He advised that the I.O.N. Highway is on the tentative strategic system of military highways, for which the federal government is now considering an appropriation of federal moneys to finance needed improvements, and if the funds materialize the I.O.N. Highway, in his estimation, would be a good place to put some of them; however, the Commission is not in position at this time to make a definite commitment relative thereto, because the strategic highway system has not yet been approved by the government officials. He predicted that the federal moneys would be made available so that the work could go forward in 1942. Mayor Scott urged the Commission to construct the section between Jordan Valley and the Idaho state line as its first project. The first five miles north of Jordan Valley, he said, are now in fair condition, and if the Commission cannot see its way clear to finance the entire improvement, then it would help a lot if the Commission would build the section north of this five-mile unit. He was

informed that the Commission would bear his request in mind when the allocation of funds is made. This completed the discussion of the I.O.N. Highway.

Mr. Morgan then brought up for discussion the paving of Main Street, in Nyssa. (State highway route). He was informed by Chairman Cabell that the Commission has approved this project and will probably award the contract for the work some time this fall or winter. In any event the earliest the contract could be let is in October, on account of the time that it takes to prepare plans and specifications.

Mayor Olson advised that the City of Nyssa has voted \$15,000 to pay for a new water system and it is imperative that they have detailed information with respect to the highway paving work so they can arrange for the construction of their water system in conformity therewith. The State Highway Engineer stated that the construction work would not interfere with the highway work if it is entirely completed before the paving work is started. He suggested that the city proceed with the water system installation at once, and when the work is completed, send notification thereof to the State Highway Department, when the contracting of the paving work could go forward. He pointed out that such procedure would avoid delays to the paving contractor. After further discussion of this matter it was arranged that the city would forward to the Engineer a copy of the plans for its water system. These are to be checked by the Engineer to see if they fit in with the highway improvement, and it was understood that the State Highway Engineer would arrange for Division Engineer W. C. Williams to discuss the details with the City Engineer.

Mr. Morgan then brought up for discussion the matter of constructing a new bridge over the Snake River at Nyssa, to replace the existing structure which, he said, is an old, two-traffic-lane bridge in a very bad state of repair. He asked for a four-lane structure. In the discussion it was pointed out that the existing bridge cost \$30,000, was built in the fall of 1911, and was paid for with funds contributed by the state, Malheur County, and the City of Nyssa; further, that it was redecked in 1926 but has had nothing done to it since then. Chairman Cabell advised that this bridge is only one of several in the same category between the States of Oregon and Idaho, and before the Commission can make a definite statement with respect to any of them, a study of the entire situation must be made and the priority status of each bridge determined. He did not indicate when such study would be made.

At 12:15 p.m. (Mountain Time) a recess was taken to permit attendance at the festivities in connection with the completion of the Nyssa Underpass structure and the new Union Pacific depot in Nyssa. The meeting was resumed at 1:45 p. m. in the same room.

Mr. Hartley brought up for discussion the proposed improvement of the county road known as Lytle Boulevard, which extends from Vale to Adrian. He gave as his understanding that the Highway Commission has allocated certain funds for oiling this road and urged the Commission to reconsider the matter and reallocate the funds for the oiling of roads in the immediate vicinity of Nyssa. He pointed out that the Commission now has under contract the oiling of a six-mile section of Lytle Boulevard, starting at Owyhee and extending westerly and northerly therefrom to a point about one mile south of the junction with the road that leads to a place known as Enterprise. He suggested that, instead

of allocating further funds for the improvement of Lytle Boulevard, the Commission improve Enterprise Avenue, which is about three miles in length, and extends easterly from Lytle Boulevard to a connection with the Nysse-Adrian State Secondary Highway. He urged this project as a preference project on account of the heavy traffic that it carries, alleging that travel over this road is much heavier than on other roads in the vicinity; that it will serve many more people, and will be of much greater benefit and convenience to the local citizens than further improvement of Lytle Boulevard. The matter was discussed at considerable length, during which Chairman Cabell explained that it is the practice of the Commission to consult with the county courts of the respective counties relative to the improvement of county roads, because the county courts are the official public bodies and are in charge of the county roads in the respective counties. The Commission, he said, carefully considers the suggestions made by the county courts before it makes its allocation of funds. However, the Commission is always glad to have the point of view of individuals, as well. He also pointed out that Lytle Boulevard is on the federal aid secondary highway system, whereas, Enterprise Avenue is not on such system; that it is contemplated to use federal moneys to finance additional improvements to Lytle Boulevard; and that the Commission is not in position to make any change in the present plans until such change is approved by the federal authorities. There is also the question, he said, which improvement will provide the most good to the greatest number of people—the improvement of Enterprise Avenue or the further improvement of Lytle Boulevard, which is the main road leading from this district into Vale, the county seat. County Judge Graham suggested that the Commission inspect Enterprise Avenue in order to get first-hand information. The suggestion was approved by the Commission, and the meeting was thereupon adjourned at 2:00 p. m. with such inspection being made immediately thereafter, following which the Commission motored to Ontario.

Ontario, Oregon, July 24, 1941

At 3:00 p. m. the Commission conducted a public hearing in the Ontario City Hall, relative to the rerouting of the Old Oregon Trail along First Avenue West in that city, all Commissioners being present and participating. Fifteen local citizens were present, including Mayor Elmo V. Smith; George Aiken, Editor of the Ontario Argus; Fred W. Canfield; F. P. Ryan, City Recorder; Joe Lane, Attorney; Messrs. Boyer; W. J. Pinney; George Merritt, owner of the Moore Hotel; R. W. Jones; Jackson and Dr. Mann.

Chairman Cabell called the meeting to order and explained its purpose. The State Highway Engineer exhibited a map showing the proposed rerouting of the highway, and explained the engineering features involved. He pointed out that the Commission is faced with the problem of determining the extent of the change—should it be limited to the four blocks extending south from Idaho Street to Fourth Avenue or should it include the improvement of the section north of Idaho Street to a connection with the existing highway at the north city limits. Chairman Cabell then advised that the Commission is inclined to make the change requested, but considered it advisable first to secure an expression from the local people concerned. He then asked those present to express themselves relative thereto.

Mayor Smith advised that they were principally concerned with the rerouting of U.S.28 south of Idaho Street, that they would like this section

routed along First Avenue West from Fourth Avenue to the connection with U.S.30 on Idaho Street, and would like to have these four blocks improved, together with the one block on Idaho Street between West First Avenue and Oregon Street. He also stated that he believed that the change north of Idaho Street would be a project for the future.

Mr. Jones inquired as to the width of the proposed improvement and was informed by the Engineer that plans call for four traffic lanes for moving traffic and two parking lanes, which would require right of way at least 80 feet wide. He pointed out that this would mean the removal of trees in the parking strip on First Avenue West, north of Idaho Street, but would not effect the section south of Idaho Street which is now 60 feet wide between curbs and has two 10-foot sidewalk strips. Mr. Jones then stated that he would not object to the plan, notwithstanding it would take the trees in front of his residence, because he did not want to block the improvement which would be beneficial to him.

Mr. Jackson stated that he conducts a business at the intersection of Idaho Street and Oregon Street but would not object to the change because it will relieve congestion on Oregon Street and will be a benefit to all.

Dr. Mann stated that he has a decided preference for a good street. It was his thought that the trees should be sacrificed in order to obtain such a street. Mr. Pinney also spoke in behalf of the change, notwithstanding that it would necessitate the removal of trees in front of his residence. Mr. Merritt also approved the change.

There followed a general discussion in which the suggestion was made by one of the local citizens that it might be advisable to designate both streets as state highway routes and require traffic from the direction of Vale to use the First Avenue route and that from Idaho points to use the Oregon Street route. It was also brought out in the discussion that there are no objections to the improvement south of Idaho Street and practically none to the improvement north of Idaho Street, although there is a possibility that that section would necessitate revising the city's swimming pool. Mayor Smith declared that there is no objection whatsoever to improvement south of Idaho Street and that the city wants that four-block improvement undertaken; further, that the city will offer no objection to the improvement north of Idaho Street if the Commission is willing to include that in the project. The meeting was concluded at 4:45 p. m., following which the Commission inspected the proposed route on First Avenue West, particular attention being given to the proposed connection at the north end, where there is a possibility that the city swimming pool will interfere with the making of a proper connection with the present highway.

Thurman Oliver
Commissioner

JUL 21 1941

Portland, Oregon, August 14, 1941

The State Highway Commission met in regular session at 9:00 a. m. in the auditorium of the Public Service Building. Present were:

Henry F. Cabell, Chairman
Huron W. Clough, Commissioner
Herman Oliver, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

Bids, as follows, for highway construction work, and for the sale of junk material, were opened and read in conformance with previously published notice, following which Chairman Cabell announced that the award of contracts would be made at 3:00 p. m. in the same room, and that the successful bidders for the junk material would be announced from Salem later:

NEHALEM SECONDARY HIGHWAY

BANZER BRIDGE-MIST SECTION - GRADING, SURFACING AND BITUMINOUS MACADAM

	<u>Using Asphalt</u>	<u>Using Tar</u>
Porter W. Yett	\$108,120.00	- -
Tidepoint Co.	- -	\$123,489.75

FRENCHLEN SECONDARY HIGHWAY

NORTH UNIT, WRIGHTS POINT-NARROWS SECTION - GRADING AND TOPPING

M. L. O'Neil & Son	\$18,310.00
McNutt Bros.	21,580.00
Leonard & Slate	21,765.00
Norris Bros.	23,530.00

EUGENE-SWISSHOME SECONDARY HIGHWAY

FISHER ROAD-OAK HILL SECTION - GRADING, SURFACING AND OILING

	<u>Using Asphalt</u>	<u>Using Tar</u>
Jacobsen-Jensen Co.	\$35,974.00	- -
McNutt Bros.	41,023.50	- -

SILETZ SECONDARY HIGHWAY

FOREST BOUNDARY-REED CREEK SECTION
GRADING, SURFACING AND BITUMINOUS MACADAM

	<u>Using Asphalt</u>	<u>Using Tar</u>
C. J. Eldon	\$142,162.50	\$142,118.50

SANTIAM HIGHWAY
MIDDLE UNIT, CRABTREE CORNER-LEBANON SECTION
GRADE-WIDENING AND PAVING

Warren Northwest, Inc.	\$78,707.50
The United Contracting Co.	94,810.00

HARBOR DRIVE, CITY OF PORTLAND
FURNISHING STEEL FOR MORRISON STREET BRIDGE

Poole & McGonigle	\$9,555.00
-------------------	------------

COLUMBIA RIVER HIGHWAY
REPAIRS TO VISTA HOUSE AT CROWN POINT

Jud Beardsley	\$4,190.00
G. E. Anderson Co.	5,431.00
E. E. Settergren	5,735.00
Cramer Construction Co.	7,483.50

OREGON-WASHINGTON HIGHWAY
SOUTH MILTON SECTION - ROADSIDE IMPROVEMENT

Blair T. Alderman	\$2,288.50
M. E. Meyers & Son	3,185.00

SHERMAN HIGHWAY
WEST UNIT, SHANIKO-COW CANYON SECTION
GRADING, SURFACING AND OILING

Porter W. Yett	\$112,498.00
Rogers Construction Co.	115,402.00
Babler Bros.	119,866.00
Fisher Bros.	123,410.00
C. J. Eldon	129,584.00
Max J. Kuney Co.	131,904.00
McNutt Bros.	134,778.00

SCRAP MATERIALS

Bids received for scrap materials stored at the highway department shops at Salem, Klamath Falls, Coquille and La Grande. (For details see blue-print tabulation of bids filed in general files.)

Mr. Blair T. Alderman, Eugene, came before the Commission and requested the privilege of using the ocean beach at different locations along the coast as landing fields for his privately-owned airplane, which, he said, he uses continuously in connection with construction work, on which he is engaged for the U. S. Coast Guard. Chairman Cabell explained to him that the

Commission has a very strict policy which prohibits the use of ocean beaches for such purposes, because of the hazard to other people that use the beaches; further, that in his opinion to grant Mr. Alderman's request would create a very bad precedent. Commissioners Clough and Oliver concurred. The request was thereupon denied.

The Commission discussed and approved a letter directed by the State Highway Engineer to Mr. J. N. Bishop, Maintenance Engineer, with respect to the activities of highway department "weighmasters." (See letter dated August 27, 1941, in general files) The Secretary was thereupon authorized and instructed to act for the Commission in the carrying out of the provisions contained in such letter, upon receipt of information from the Maintenance Engineer. The Commission also approved a "Form of Notice" to be given by the weighmasters to violators of the traffic law, and instructed the Secretary to arrange for the printing of the same.

Mrs. Anna Suran, and her attorney, Mr. W. H. Fitzgerald, Portland, were present in regard to Mrs. Suran's claim for damages arising out of an accident on the Upper Columbia River Highway, near Oneonta Tunnel, resulting in personal injuries to Mrs. Suran, causing her expense for doctor bills, etc., and loss of employment for over two weeks. It appears that Mrs. Suran was on a pleasure trip and parked her car in the parking area adjacent to the highway at Oneonta, and after viewing the Oneonta Gorge was returning to her car when she stepped on the grill of a highway drainage sump. The grill gave way, causing her to fall and injure her leg, and as a result she lost over two weeks' employment at the Jantzen Woolen Mills, where she is employed, amounting to \$50.00, and in addition has been put to the expense of doctor bills. This matter was discussed at some length, but action thereon was deferred by the Commission until the next meeting. Chairman Cabell stated that he would make a personal inspection of the premises in the meantime, if possible. The Engineer was instructed to investigate this matter fully and report his findings to the Commission at such meeting.

Mr. R. W. Williams, representing the Werner Timber Company, Taft, Oregon, was present in regard to the awarding of a contract for the construction of the Forest Boundary-Reed Creek Section of the Siletz Secondary Highway in Lincoln County, bids for which were taken at this meeting. He advised that he is prepared to deliver to the Commission a check for \$5,000, in accordance with previous understanding, and as confirmed in his letter dated July 17, 1941, if the Commission awards the contract for the work. The Engineer advised that the Commission received only one bid for this project, which is considerably in excess of the estimated cost thereof, and could not be accepted by the Commission without deviating from its established policy. Chairman Cabell advised that it is the intention of the Commission to reject the bid and to readvertise the project for bids to be received at the next meeting. He further stated that the Commission would not hold the Werner Timber Company to its offer if it wishes to withdraw the same. Furthermore, the Commission at this time is not in position to guarantee that it would award the contract as a result of bidding at the next meeting, because an unsatisfactory bid may be received at that time. Mr. Williams renewed the company's offer to pay \$5,000 toward the cost of this work, which offer is to remain in effect until September 6, 1941, the date mentioned in his letter of July 17, 1941.

1111 1941

The County Court of Lane County, represented by County Commissioners W. J. Holland and Allan P. Wheeler, and County Engineer P. M. Morse, was present in regard to the bids received this day for the grading, surfacing and oiling of the Fisher Road-Oak Hill Section of the Eugene-Swisshome Secondary Highway. The State Highway Engineer advised that the Commission received only two bids for this work, both of which were unsatisfactory, and it is his intention to recommend rejection. He suggested that the county court might be able to do the work with county forces and if that is possible that the county submit a bid for consideration with those of other contractors when the project is readvertised either this fall or next spring. The county court agreed to give the matter consideration. The Commission decided to reject the bids received today and to readvertise the project for bids to be received in October. The Engineer was so instructed.

The county court also brought up for discussion the matter of improving the Eugene-Swisshome Secondary State Highway (Route "F"), between Veneta and Noti. They asked the Commission to give serious consideration to such project in the formulation of its program for construction next spring. Mr. Morse advised that the county is prepared to pay 25 per cent of the cost of such work. The Commission took the matter under advisement.

The Engineer brought up for discussion the matter of constructing another section of the new Columbia Gorge Highway between Troutdale and Dodson as a WPA project. He advised that there is approximately 1,200,000 cu. yds. of excavation in the Jordan Borrow Section and in the Island Section that could be done as a WPA project using state equipment, after the WPA work has been completed on the Wilson River Highway, in September. It was his thought that WPA forces could be kept busy on such a project for about one year, using equipment that is now being employed on the Wilson River job. The Commission appeared to be favorably inclined to such project, but deferred a definite decision in regard thereto, particularly a decision as to the section that should be improved in such a set-up.

The Commission also considered a proposed WPA project for clearing between Seaside and Hug Point. The Engineer advised that the construction of the Oregon Coast Highway on the proposed new alignment between these points involves about eleven miles of heavy clearing and grubbing, which is exceptionally well suited for WPA purposes. It was the thought of the Commission that this would be a good project for next year's program; however, a definite decision was deferred pending consultation with Mr. E. J. Griffith, State WPA Administrator.

The Commission approved and ordered filed a report from the Assistant Attorney advising that Edlefsen-Weygandt Company, contractors on the Front Avenue Project, have refunded to the City of Portland all of the rentals which the company collected on parking lots on such project.

The Engineer reported the cost to realign the Old Oregon Trail through the town of Hermiston, particularly from Main Street south a distance of 0.67 mile. He advised that the proposed route follows along the east side of the railroad track and avoids the congestion along Main Street which is very bad at the present time due to activities incident to the construction.

of the United States Army ammunition dump west of Hermiston. He estimated the cost to construct this section at \$25,000.00 and recommended the improvement and that it be paid for with state funds. The Commission approved the recommendation.

In this connection the Engineer requested approval of the following projects for the 1942 municipal program to be financed with state funds:

Oswego	\$25,000
Ocean Lake	25,000
Deer Island	15,000
Corvallis	30,000
Seaside	35,000
Taft	10,000
Parkrose	30,000
West Linn	10,000
Hermiston	<u>25,000</u>

Total \$205,000

After discussion the Commission approved the projects and the amounts allocated for each. The Engineer was authorized to make surveys as may be necessary and to prepare plans and specifications for advertising.

The Engineer presented a statement of funds available for contract lettings this fall, particularly disclosing the amounts of the several classifications of funds. This was discussed briefly by the Commission but no action was taken thereon.

The Commission adjourned at 12:10 p. m. and reconvened at 2:00 p. m. in the same room with the same persons present and participating.

Mr. E. K. Burton, City Manager of Silverton, was present and asked the Commission to provide state funds to repair certain city streets over which heavy logging trucks operate in the transportation of logs from Mehama to the Silver Falls Timber Company's mill in Silverton, and to reconstruct a certain steel truss bridge on the street that serves as a connecting link between state highways in Silverton. He advised that the city does not have funds available with which to do this work, particularly the bridge work, and urged the Commission to provide state funds therefor. He advised that the bridge is in bad state of repair and is now posted for ten-ton loading. The Engineer estimated the cost to repair the bridge to carry legal weight loads at \$3,500. Mr. Burton stated that they would be satisfied with such repair job.

Chairman Cabell explained briefly the proposed plan of the Commission to set aside a certain amount of money for repairs to city streets that are not state highway routes. He advised, however, that the Commission has not yet adopted a definite program for such projects but in several instances the Commission is proceeding with the work because of emergency conditions. According to the tentative plan, he said, the cost to repair the bridge in

Silverton will be considerably in excess of the amount that Silverton would be entitled to, so it would take the allocations of several years to make up the total. He inquired, in view of this condition, whether or not the City of Silverton would be satisfied with the bridge repair work at this time and would be willing to wait for the street repair work until such time as the annual allotments to the City of Silverton equal the cost of the bridge work. Mr. Burton replied that the bridge work is the more important project of the two and, in his estimation, such arrangement would be satisfactory to the city officials. The Engineer thereupon recommended approval of the bridge project. The Commission approved the recommendation subject to approval by the city officials, and ordered that the matter be covered by written agreement between the city and the state.

Mr. O. J. Mitchell, representing Mitchell Freightways, and his attorney, Mr. Thomas White, came before the Commission and requested authority to operate over the Pacific Highway, between the California state line and Medford, truck and trailer combinations sixty feet overall in length, having gross loads of 68,000 lbs. Mr. White was spokesman. He advised that under present rulings the company is obligated to break up its combinations at the state line, which is not only a costly procedure but also entails delays in the delivery of freight, most of which is defense materials for the United States Government. He explained that Mr. Mitchell is now negotiating for the sale of his rights to Consolidated Freightways, and is simply waiting for approval of the transaction by the Interstate Commerce Commission; further, that their plan is to operate the oversized equipment only as far as Medford, where the loads will be transferred to the equipment of the Consolidated Company. He asked for a permit similar to the one granted the Oregon Nevada California Fast Freight, Inc., and under which that company is now operating between the same points. He gave as his thought that the Highway Commission now has such discretionary power, and urged the Commission to exercise that power in view of the conditions of the times and the need to speed up deliveries of defense materials.

Chairman Cabell pointed out that the 1941 Legislature defeated legislation that would have provided for movements of this kind, notwithstanding that the Highway Commission approved the bill, in view of which the Highway Commission feels that it does not have the power or authority to grant the permit requested. He explained that the permit issued to the Oregon Nevada California Company was of an emergency nature, and for a 30-day period only, and absolutely will not be renewed. This matter was discussed at considerable length and was concluded by Chairman Cabell's statement to the effect that the Commission would give consideration to the arguments presented and would advise them as soon as possible of its decision. (The Commission discussed the matter later in the session and at that time voted unanimously not to grant the permit. The Secretary was instructed to so inform Mitchell Freightways and to deny a request for the renewal of the permit granted the Oregon Nevada California Fast Freight, Inc.)

Mr. Warde W. Erwin, attorney, Portland, came before the Commission in regard to the claim of Mr. Charles F. Peake, Jr., arising out of an accident that occurred on the Pacific Highway East in Albany, resulting in injuries

to Mr. Peake and damage to his car. Mr. Erwin explained that Mr. Peake was driving north on the old highway near the north city limits of Albany and accidentally drove his automobile into a concrete traffic island at the junction of the old and the new highways, that he was traveling at a moderate rate of speed, and had no knowledge that the island was there, it being after dark and the island being unlighted. Furthermore, there were no signs anywhere on the road indicating that a traffic island existed. Mr. Peake, he said, suffered severe stomach injuries as a result of being thrown against the steering wheel of the car and there is a question as to the permanency of the same. He further advised that Mr. Peake was required to hire a man to run his garage business in the town of Milwaukie because of his injuries, and finally lost his business because he was unable to give it his personal attention, so he is now out of a job. Furthermore, he is destitute and is unable to provide for his family and cannot pay his doctor bill. He quoted the law with reference to the Commission's liability in damage cases and asked the Commission to pay Mr. Peake the full amount allowed therein. The claim, he said, is against this fund rather than against the Highway Commission personally.

Chairman Cabell explained the theory of the channelization of traffic and advised that, if investigation of any accident reveals that the Commission has been negligent, then the state should pay accordingly; however, in this particular instance the Commission does not believe that negligence on its part was involved. The matter was discussed at considerable length and at the suggestion of Commissioner Clough a decision was deferred until the Commission has had an opportunity to study the records in the case.

At 3:00 p. m. Chairman Cabell announced the following awards of contracts, for which bids were taken at the morning session, such awards having been previously approved by the Commission by unanimous vote:

"Panzer Bridge-Mist Section of the Nehalem Secondary Highway, in Columbia County. 2.99 miles grading and surfacing, and 3.13 miles of bituminous macadam. Porter W. Yett, Portland, submitted the low bid for this work, in the amount of \$108,120.00, based on the use of asphalt. He did not submit a bid based on the use of tar. The Tidepoint Company, Astoria, submitted the only other bid. This bid, in the amount of \$123,489.75, was based on the use of tar. They did not submit a bid based on the use of asphalt. The Commission awards this contract to Porter W. Yett, at his low bid of \$108,120.00, based on the use of asphalt.

"North Unit, Wrights Point-Narrows Section of the Frenchglen Secondary Highway, in Harney County. 5.40 miles grading and topping. M. L. O'Neil & Son, Mitchell, submitted the low bid for this work, in the amount of \$18,310.00. McNutt Bros., Eugene, submitted the second-low bid, in the amount of \$21,530.00. There were two higher bids. The Commission awards this contract to the low bidders M. L. O'Neil & Son, at their bid of \$18,310.00.

"Fisher Road-Oak Hill Section of the Eugene-Swisshome Secondary Highway, in Lane County. 1.26 miles grading, surfacing and oiling. Jacobsen-Jensen Co., Portland, submitted the low bid for this work in the amount of \$35,974.00, based on the use of asphalt. They did not submit a bid based on the use of tar. McNutt Bros., Eugene, submitted the next-low and only other bid for this work in the amount of \$41,023.50, using asphalt. They did not submit a bid based on the use of tar. The Commission rejects the bids for this project and orders it readvertised.

"Forest Boundary-Reed Creek Section of the Siletz Secondary Highway, in Lincoln County. 3.5 miles grading, surfacing and bituminous macadam. C. J. Eldon, Portland, submitted the only bid for this project, in the amount of \$142,162.50, using asphalt, and \$142,118.50, using tar. The Commission rejects this bid and hereby orders the project readvertised.

"Middle Unit, Crabtree Corner-Lebanon Section of the Santiam Highway, in Linn County. 3.2 miles grade-widening and paving. Warren Northwest, Inc., Portland, submitted the low bid for this work, in the amount of \$78,707.50. The only other bid submitted for this work was made by The United Contracting Co., Portland, in the amount of \$94,810.00. The Commission awards this contract to Warren Northwest, Inc., at their low bid of \$78,707.50.

"Furnishing structural steel for the Morrison Street Bridge on Harbor Drive in the City of Portland, Multnomah County. Poole & McGonigle, Portland, submitted the only bid for this project, in the amount of \$9,555.00. The Commission awards this contract to Poole & McGonigle at their bid of \$9,555.00.

"Repairs to Vista House at Crown Point, on Columbia River Highway, in Multnomah County. Jud Beardsley, Salem, submitted the low bid for the work, in the amount of \$4,190.00. G. E. Anderson Co., Portland, was second-low, with a bid of \$5,431.00. There were two higher bidders. The Commission awards this contract to the low bidder, Jud Beardsley, at his bid of \$4,190.00.

"South Milton Section of the Oregon-Washington Highway, in Umatilla County. 0.51 mile roadside improvement. Blair T. Alderman, Eugene, submitted the low bid for this work in the amount of \$2,238.50. M. E. Meyers & Son, Echo, submitted the only other bid, in the amount of \$3,185.00. The Commission awards this contract to the low bidder, Blair T. Alderman, at his bid of \$2,238.50.

"West Unit, Shaniko-Cow Canyon Section of the Sherman Highway, in Wasco County. 5.06 miles grading, surfacing and oiling. Porter W. Yett, Portland, submitted the low bid, in the amount of \$112,498.00. Rogers Construction Company, Dayton, Washington, was next low with a bid of \$115,402.00. There were five higher bidders. The Commission awards this contract to Porter W. Yett at his low bid of \$112,498.00.

"Sale of scrap materials at Salem, Klamath Falls, Coquille, and La Grande. All bids received for the purchase of this material were referred to the Engineer with power to sell the material to the high bidder in each instance if the bids compare favorably with the appraised value of the items."

A delegation representing the Columbia Basin Loggers headed by Mr. Fred S. Packwood, attorney, Portland, came before the Commission relative to the truck hauling of logs over state highways. Others in the delegation were Senator F. M. Franciscovich, Astoria; H. C. Patton, representing the Hammond Lumber Company; W. G. Tilton, Pacific Northwest Loggers Association; W. W. Schaefer, McDowal Creech Loggers; E. B. Stamm, Crown-Zellerbach Corporation; G. S. Gray and Otto Achord, loggers, Seaside; Ford M. Converse, C & H Logging Company, Portland; Phil Chipman, Smith Wood-Products, Inc., Coquille; H. Standley, Camas Valley; Mr. Christensen, Crown-Zellerbach Corporation; and others. Senator Franciscovich was spokesman for the group. He mentioned first the extent of the penalty imposed on loggers for overloading, and expressed appreciation for the clarification of the ruling, which he understands hereafter is to be based on calendar days rather than on working days.

Senator Franciscovich asked the Commission to make it clear in its letter of instructions to weighmasters that the P.U.C. plates of an offending operator need not be surrendered immediately after being apprehended by a weighmaster but may be retained by such operator for 24 hours in order to give the operator an opportunity to deliver his load and to arrange for another truck to take his place during the suspension of his permit. He explained that the surrender of the P.U.C. plates by the operator immediately upon being apprehended by a weighmaster will affect every man working in the woods and will not only penalize the operator but will also penalize all of the others which in his estimation is unfair and not really what the Commission intends.

The ruling that requires all logging trucks to come to a dead stop before crossing railroad tracks was also mentioned by Mr. Franciscovich. It was his thought that such ruling creates a hazardous condition for other traffic, and that the matter could be satisfactorily handled by requiring the logging operator to slow down to five or ten miles per hour. He mentioned particularly the situation at the crossing of the Oregon Coast Highway with the railroad tracks at Skipanon near Astoria, where the highway department scales are located only 700 feet beyond the railroad crossing. In order to drive on to the scales, he said, it is necessary for the logging trucks to cross the highway, and while no accidents have occurred at this point they quite likely will occur unless the loggers are allowed to proceed across the railroad tracks without stopping.

Chairman Cabell explained that the Commission's ruling was adopted at the request of one of the railroad brotherhoods and the Commission thought at the time that it was a good ruling and in the interests of safety to the

general traveling public. He inquired whether or not Senator Franciscovich intends that his suggestion should apply to the Skipanon crossing only or to all crossings. Senator Franciscovich replied that in his estimation each individual case should be considered on its own merits.

Honorable Ormond R. Bean, Public Utilities Commissioner, was present and pointed out that there are 3,500 railroad crossings in Oregon, and that it would be very difficult to make a selection of those where logging trucks should be required to stop. He agreed, however, with Senator Franciscovich as to the conditions with respect to the Skipanon crossing and also to his suggestion that each case should be studied individually.

After further discussion the State Highway Engineer suggested the adoption of a 10-mile per hour speed limit for logging trucks at the railroad crossing at Skipanon, such speed limit to apply only to one side of the highway where the loaded trucks approach the highway scales after crossing the railroad tracks, (it would not affect traffic going in the opposite direction) and that the crossing be appropriately posted in accordance therewith. He also suggested that the railroad crossings at other points be considered as they arise. The Commission approved the suggestion.

Senator Franciscovich also brought up for discussion the matter of weighing all logging trucks. He gave as his thought that it is unnecessary to weigh every truck and that the weighmasters should be allowed to use their judgment as to which trucks should be weighed. He alleged that it takes about fifteen-minutes' time on the average to weigh one truck, and as a consequence trucks have to stop and line up, awaiting their turn at the scales and many times are delayed thirty minutes or more for one weighing. Such delay, he said, is costly to the operators, who lose one trip every other day or about two trips each week of five and one-half days. There are not many overloads, he added, and the hardship created on the operators by the present practice in his estimation is not warranted. He suggested that weighmasters could pass on the loads without actually weighing them, and if, in their judgment, the trucks are not overloaded, they could flag them through; otherwise they could direct them to the scales. The Commission agreed to give the suggestion consideration.

Senator Franciscovich then suggested the following solution for logging operators in the Seaside district--that the loggers install scales on the abandoned section of the Wolf Creek Highway near Vollmer Creek at which point they could also install facilities for adjustment of their loads. Loggers would then load their trucks in the woods in accordance with their best judgment and submit to weighing on their own scales at this point and make adjustments as may be necessary. The Commission agreed to give the matter consideration.

The matter of moving loads consisting of one extremely large log was also brought up by Senator Franciscovich. He said that occasionally logs are cut from extremely large trees and they cannot be transported over the highways without violating the weight limits, regardless of the fact that only one log is hauled at a time. In such cases, he said, the loggers know that they have

an overweight, but they do not want to let the log rot in the woods, particularly at times such as we are now experiencing, and they would like authority from the Commission to move these logs over state highways without fear of having their permits suspended although they are willing to pay any fine that may be imposed for the overload. If the Commission will grant such concession, he added, the loggers would be willing to cut such logs in 20-foot lengths. He was informed by Chairman Cabell that the Commission would discuss this matter among themselves later; however, if the Commission approved it, it would be temporary and on a trial basis only, and the Commission would restore the penalty in the event that many overloads occur.

Mr. Packwood stated for the record that his remarks were made in behalf of individual loggers and not in behalf of the Columbia Basin Loggers Association. He offered objections to the weighing of all logging trucks, and alleged that often as many as fifteen trucks are held up at the scales near Willamina for weighing purposes, necessitating the loss to each of one trip a day. He asked the Commission to modify its rule in that regard. Mr. Packwood spoke in behalf of the unintentional violator of the weight rule, particularly where the overweight is very small. It was his thought that the penalty should not apply in such cases because these men are not willful violators and they lose a gross revenue of from \$60 to \$70 each day that their operations are suspended. He asked the Commission for authority to confer with the Commission's Engineer and Attorney in order to agree on some formula or solution as to such violations.

Mr. Tilton presented figures showing the actual shipping weights of logs, and exhibited samples of lumber to show the variation in weights of lumber cut from the same class of logs. He declared that the present penalty for overloading is too harsh, because it is very difficult for logs to be loaded within the ten per-cent tolerance allowed by law.

Mr. Chipman stated that he was speaking in behalf of Smith Wood-Products Company and not for the loggers. He gave as his thought that the penalty which requires the suspension of permits and the taking up of P.U.C. plates for certain periods is too drastic and that the penalty should be limited to the payment of a fine only. He also said that present conditions deserve special consideration, particularly pointing out the difficulty in securing logging trucks.

Chairman Cabell at this time advised that the Highway Commission has for years struggled with this matter and has found that the only effective remedy or solution to the problem is suspension of permits for certain periods.

Mr. Stamm alleged that no one can guess the weight of logs within fifteen per cent. He also said that the existing scales at Skipanon are in the wrong place and should at least be moved to the opposite side of the highway. He also suggested that it would be advisable to install additional scales and gave as his thought that the functions now being carried on by the State Highway Department, State Police, and Secretary of State should be

consolidated under one authority. He confirmed Senator Franciscovich's arguments in behalf of the movements of one-log loads, and advised that unless the Commission grants some concession in that regard logs will have to be left in the woods to rot or they will have to be split up in the woods with dynamite which greatly reduces their value. In summing up he asked for more scales, that the existing scales be put in more practical locations, and that the present penalty for overloading be adjusted to eliminate the suspension and cancellation features.

Chairman Cabell replied that perhaps some of the scales have been installed in wrong locations, but as a general rule that has not been the case and the Commission believes that for the most part the scales have been installed in the best locations possible. With reference to delays to the loggers when being weighed, he stated that the Highway Commission is sympathetic with the difficulties of the loggers and it may be that it will require more men at the scales to expedite weighing operations, but that is a matter that the Commission will look into. As to the existing penalty, Chairman Cabell advised that the Commission is not prepared or inclined to make any change in its present policy, that the Commission has tried for years to stop overloading, and the present penalty is the only thing that the Commission has been able to think of to date that would stop the overloading.

Mr. Stamm, speaking again, said that no one is able to guess the weight of a log within five per cent, and he knows this to be a fact because he has been in the logging business for over ten years. Also speaking in behalf of the loggers were Messrs. Standley and Christensen.

Mr. Russell J. Hubbard, Reedsport, was present and asked the Commission to sell him certain property situate between the proposed new location of the Umpqua Highway and the Umpqua River at Reedsport, which property lies outside of the standard width highway right of way. He said that he is operating a mill at this point and needs this extra ground for storage of lumber, et cetera, and also that he is willing to pay a reasonable price for the property. The Engineer advised that this property was obtained in order to preserve the scenery and an unobstructed view of the Umpqua River at this section. After discussion the Commission decided to inspect the property before making its decision. The Engineer was instructed to have survey stakes set in the meantime so the property can be readily identified. The Secretary was instructed to notify Mr. Hubbard when the Commission sets a time for such inspection.

A delegation from Cascade Locks, consisting of Allen Stancell, Chief of Police; W. N. Keller; A. W. Foote; W. J. Carlson and S. P. Ness, was present and asked the Commission to order a 25-mile per hour speed limit on the Columbia River Highway through their town. Mr. Stancell headed the group. He said that the present speed limit through the town is 35 miles per hour, but that limit is not observed, and in his estimation a further reduction in the allowable rate of speed should be declared. The Attorney quoted the law which specifies a speed limit of 20 miles per hour through business districts of cities and towns and 25 miles per hour through residential districts. However, he said, the 1941 Legislature passed a law which authorizes the State

Speed Board to change such limits if that is considered advisable after study. In view of the Attorney's statement, the Commission voted unanimously to install signs at Cascade Locks to meet the legal requirements, notwithstanding the possibility that the State Speed Board will change the limits at some future time.

Mr. Carlson asked the Commission to eliminate the curve in the Columbia River Highway just east of the highway department maintenance shed, near the east city limits of Cascade Locks. He was informed by the Engineer that this curve is only a small portion of a major improvement and, in his estimation, if anything is done at all it should be the major project, approximately one mile in length or more. The Commission took no action on this matter.

Mr. Carlson also asked for the oiling of the shoulders between the highway pavement and the concrete curbs through the town. He was informed by the Engineer that the Commission has already approved such improvement and that the work will be done next year.

Mr. Keller inquired as to the plans for the construction of the new highway between Troutdale and The Dalles and was informed by Chairman Cabell that the Commission is not in position to prepare a program for the improvement because funds are not available to finance more than a short section at a time and there is a question as to the moneys that the federal government plans to provide to finance strategic highway improvements.

A delegation from Tillamook, consisting of D. E. Steinbach, Mayor; C. W. Barrick, City Attorney; and C. A. Ross, representing the Chamber of Commerce, conferred regarding improvements on the Oregon Coast Highway, and the Wilson River Highway routes, in the city of Tillamook. The Engineer explained that the city wants the Oregon Coast Highway widened through the town; also Third Street, present route of the Wilson River Highway. He gave as his thought that the widening work could be done by narrowing the sidewalk areas and estimated the cost of both improvements at about \$60,000. He further stated that both jobs are meritorious and should be constructed as soon as funds are available to finance them. He requested authority to conduct surveys as may be necessary in connection with each. The Commission approved the surveys.

Mayor Steinbach asked the Commission to maintain certain city streets that are not on state highway routes but which are being damaged by log hauling traffic. The Engineer estimated that it would cost about \$8,000 to repair these streets and advised that the work could not be done this summer. Chairman Cabell advised that the Commission is friendly to the idea but because of the money situation would not be able to do the work this year.

The matter of improving the curve at Thayers Corner was discussed briefly and it was mutually agreed that the city would acquire needed right of way at this point.

Mesdames A. E. Rockey and F. E. Smith, Portland, representing the Oregon Roadside Council, were present in regard to the disposition of the Knapp Hotel property at Port Orford. They urged the Commission to preserve this hotel on account of its historic background. Chairman Cabell advised that the Commission's only interest in this hotel is its removal from the present site to provide a permanent location for the Oregon Coast Highway. Further, that the Commission is now negotiating for the purchase of this property, but the conditions of the sale, if the Commission's offer is accepted, are not immediately available. After further discussion it was agreed that Mrs. Rockey and Mrs. Smith would be informed of future details in connection with this matter when the deal with Mr. Knapp has been consummated.

The Commission adjourned at 6:00 p. m. to reconvene the following morning in the Imperial Hotel to dispose of accumulated routine matters.

Portland, Oregon, August 15, 1941

The State Highway Commission reconvened at 9:00 a. m. in Room 415 (Imperial Room) Imperial Hotel, with all Commissioners present and participating. Also present were the State Highway Engineer, the Attorney and the Secretary.

The Commission by unanimous vote approved the minutes of the meeting held on April 3 and 4, 1941.

The Assistant Attorney reported the status of the right of way budget explaining that of the \$600,000 budgeted by the Commission for 1941 general real property purchases \$502,000 has been obligated, and that of the \$800,000 budgeted for the acquisition of right of way for the Front Avenue Project, Portland, \$490,500 has been obligated. The Commission approved the report.

The Attorney requested authority to acquire certain parcels of real property that are needed for various improvements throughout the state. He submitted a list of such properties with offers that he recommended for each parcel. After due consideration the Commission approved the request and by unanimous vote adopted the following resolution pertaining thereto:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be

declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed:

NOW, THEREFORE, BE IT RESOLVED that the several offers, or bases of settlement hereinafter enumerated be, and the same hereby are, approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

Mr. F. T. Fowler, Traffic Engineer of the City of Portland, was present and discussed with the Commission the proposed rerouting of south-bound Pacific Highway East traffic (Union Avenue) under the east approach to the Burnside Bridge, Portland, as follows: along Couch Street to East Third Avenue, thence south along East Third Avenue to East Ankeny Street, thence east along East Ankeny Street to a connection with Union Avenue. He said that the Portland city officials as well as the traffic safety committee of the city have approved such rerouting as a permanent proposition, at least until the east approach to the Burnside Street Bridge is rebuilt over Union Avenue, which improvement is not scheduled for the near future. In view of this improvement the Commission decided to proceed with the acquisition of right of way at the northwest corner of Union Avenue and Couch Street and at the southwest corner of Union Avenue and East Ankeny Street and instructed the Attorney to negotiate for the same on the basis of previous discussion.

The Engineer discussed with the Commission matters pertaining to the improvement of the Oregon Coast Highway between Marshfield and North Bend. He recalled that the Commission has already approved the construction of the middle unit of this section, 0.97 mile in length, at a cost of \$170,000 and gave as his thought that it would be advisable to include in this contract the construction of a north-bound traffic lane on the south unit which is estimated to cost \$66,000. Furthermore, the north unit, 0.51 mile in length, should also be included in the contract, such project being estimated to cost \$140,000, making the total estimated cost to complete the entire improvement \$376,000. After discussion the Commission approved the additional expenditure to be paid out of state highway funds and thereupon authorized the Attorney to negotiate for needed right of way.

The Engineer also brought up for discussion matters pertaining to the reconstruction of the Pacific Highway between Eugene and Springfield. He estimated the cost to relocate the railroad between these points at \$248,000 and to rebuild the highway at \$585,000, or a total of \$833,000, exclusive of right of way which is estimated to cost about \$250,000. After considerable discussion, which consisted principally of right of way features, the Commission instructed the Attorney that all settlements for right of way needed for this new railroad location except those in connection with which commitments have already been made be held up until he has received further instructions from the Commission.

The Attorney discussed with the Commission matters as follows pertaining to condemnation cases for right of way needed for the Wolf Creek Highway in Washington County:

B. F. Friday property, 2.89 acres:-The Attorney advised that this property is now under condemnation and Mr. Friday is demanding \$500 for this land and that he offered to pay Mr. Friday \$350 for the same but it was refused. Furthermore, Mr. Friday wants access to the highway from his property. The Commission approved the offer of \$350 for the land and access privileges and instructed the Attorney to proceed with the condemnation in the event the offer is refused.

B. F. Friday and W. O. Galloway property:-The Attorney advised that these men own 20 acres of land of which the state needs 7.2 acres for right of way; further that Messrs. Friday and Galloway paid only \$750 for the entire 20 acres and are demanding \$1500 for the entire acreage or \$1000 for the right of way only. He said he offered \$1000 for the 20 acres but this was refused. After discussion the Commission approved an offer of \$1500 for the entire acreage.

Maller Estate:-The Attorney advised that the state is taking 4.58 acres of land belonging to this estate; further, that the owners are asking \$3000 for the same and are demanding access to the highway in addition, whereas he has had the property appraised by different appraisers, two of whom place a value of \$1600 on the property, although the third valued the property at \$3,300. The Commission deferred a decision on this matter pending inspection of the property by Chairman Cabell.

Wade Armentrout property:-The Attorney advised that the state is taking 2.86 acres from Mr. Armentrout and that Mr. Armentrout is demanding \$875 for the land and wants the privilege of moving cordwood from the same, whereas four different appraisers valued the property at \$576, \$532, \$675 and \$791, respectively. The decision in this case was likewise deferred by the Commission pending personal inspection of the property by Chairman Cabell.

Inez Maude Taylor property, consisting of 5.61 acres:-The Attorney reported that he has had this property appraised by four appraisers who value the property at \$1,211, \$1,552, \$1,687 and \$1,921, respectively, whereas the owner is demanding \$2,250 for the same. He recommended an offer of \$2,000 for land and access privileges. The Commission approved the recommendation.

Mary E. Ibach property:-The Attorney advised that he had this property appraised by four different appraisers who value the property at \$1,480, \$1,250, \$1,275 and \$1,608, respectively, exclusive of moving barn and construction of a cattle pass in each instance. He also said that he has already made an offer of \$1,500 for the land. The Commission approved such offer.

The Attorney then asked the Commission to authorize condemnation proceedings to acquire other parcels of land that are needed for right of way or other highway purposes. He presented a list of such properties together with the following offers that he recommended in condemnation:

<u>File No.</u>	<u>Name</u>	<u>Purpose Required</u>	<u>Recommended Offer</u>
8752	Southern Pacific Company	Filler Pit	\$518
9638	Ellen E. Wood	R/W	20

10544 1041

<u>File</u>	<u>Name</u>	<u>Purpose Required</u>	<u>Recommended Offer</u>
9633	D. M. Morley	R/W	\$15
*9636	Donald W. Johnson, et al	R/W	200
4415	J. H. Cartwright, et al	R/W	892.50
		Road Approach Easement	
9552	First National Bank of Sheridan	R/W	231 + moving
9544	C. A. Fertig	R/W	100
9545	Mrs. David Tagg	R/W	85
9546	R. B. Poole	R/W	70
9547	Helen A. Hurlbutt	R/W	45
9252	Webster L. Kincaid	R/W	3000
9321	Webster L. Kincaid	R/W	550
9251	George P. Hitchcock, et al	R/W	10,000
4869	Juanita Starr	R/W	10,000

After careful consideration of each item the Commission approved the offers and thereupon by unanimous vote adopted the following resolution authorizing the Attorney to proceed with condemnation:

WHEREAS, the State Highway Commission is authorized to locate, relocate, construct, reconstruct, maintain, widen, straighten, and otherwise improve state highways, both primary and secondary, and said Commission is also authorized to construct shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, and snow fences, and is authorized to acquire quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, and broadcasting stations, and is further authorized to develop, construct, improve, operate, and maintain parks, parking places, auto camps, camp sites, roadside development, recreational grounds, or resorts, and other places of attraction and scenic value; and

WHEREAS, said Highway Commission is authorized to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property, or any interest therein, necessary or deemed by the Highway Commission necessary for the accomplishment of any and all of the foregoing things; and

WHEREAS, in the judgment of the Highway Commission the several tracts or parcels of land hereinafter described are each and all necessary for the specific and particular purposes hereinafter specifically set forth;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the Commission does hereby find and declare that

*The amount of the offer is indeterminate but is to be taken up with Mr. Cabell if it is more than about \$200.

the several parcels of real property hereinafter described are each and all necessary for the accomplishment of the purposes hereinafter expressly and specifically set forth, which said real properties and the specific purposes for which the same are being acquired are described as follows, to wit:

Real property owned by Juanita A. Starr, which property is located in Government Lots 1, 2, 3, and 4, and in the southeast quarter (SE $\frac{1}{4}$) of the northeast quarter (NE $\frac{1}{4}$) and in the northeast quarter (NE $\frac{1}{4}$) of the southwest quarter (SW $\frac{1}{4}$) of Section 3, and in Government Lot 1 of Section 4, Township 1 North, Range 6 East, and in Government Lot 1, and the southeast quarter (SE $\frac{1}{4}$) of the northeast quarter (NE $\frac{1}{4}$) of Section 3, and in the northwest quarter (NW $\frac{1}{4}$) of the northwest quarter (NW $\frac{1}{4}$) of Section 2, Township 1 North, Range 6 East, and in Lots 3 and 4 of Section 35, Township 2 North, Range 6 East, W. M., Multnomah County, Oregon, and is more particularly described on the attached sheets and designated as Parcels Nos. 1 and 2 and is further identified in the records of the Highway Commission as file R 4869, and which property is being acquired for right of way purposes in connection with the Columbia River Highway.*

Real property owned by Southern Pacific Company, which property is located in the north half of the northwest quarter of Section 31 and in the northwest quarter of Section 31, Township 17 South, Range 4 West, W. M., in Lane County, Oregon, and is more particularly described on the attached sheets and designated as Parcels Nos. 3 and 4 and is further identified in the records of the Highway Commission as file R 8752, and which property is being acquired for right of way purposes in connection with the Eugene-Swisshome Highway;*

Real property owned by Ellen E. Wood, which property is located in Government Lot 7 of Section 20 and in Government Lot 8, Section 19, Township 8 South, Range 10 West, W. M., in Lincoln County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 5 and is further identified in the records of the Highway Commission as file R 9638, and which property is being acquired for right of way purposes in connection with the Siletz Highway;*

Real property owned by D. M. Morley, which property is located in Government Lot 1 (NW $\frac{1}{4}$ of NE $\frac{1}{4}$) of Section 20, Township 8 South, Range 10 West, W. M., in Lincoln County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 6 and is further identified in the records of the Highway Commission as file

R 9633, and which property is being acquired for right of way purposes in connection with the Siletz Highway;*

Real property owned by J. H. Cartwright, et al., which property is located in the southeast quarter (SE $\frac{1}{4}$) of Section 4 and in the northeast quarter (NE $\frac{1}{4}$) of the northeast quarter (NE $\frac{1}{4}$) of Section 9, Township 15 South, Range 5 West, W. M., in Benton County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 7 and is further identified in the records of the Highway Commission as file R 4415, and which property is being acquired for highway purposes in connection with the Territorial Highway;*

Real property owned by First National Bank of Sheridan, which property is located in the James Taylor D. L. C. No. 43 of Section 10, Township 7 North, Range 10 West, W. M., in Clatsop County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 8 and is further identified in the records of the Highway Commission as file R 9552, and which property is being acquired for right of way purposes in connection with the Oregon Coast Highway;*

Real property owned by Emily M. Fertig and Charles A. Fertig, wife and husband, located in the Lewis Thompson D. L. C. No. 45 in Section 4, Township 7 North, Range 10 West, W. M., in Clatsop County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 9 and is further identified in the records of the Highway Commission as file R 9544, and which property is being acquired for right of way purposes in connection with the Oregon Coast Highway;*

Real property owned by Emma M. Tagg, et al., which property is located in the Lewis Thompson D. L. C. No. 45 in Sections 4 and 9, Township 7 North, Range 10 West, W. M., in Clatsop County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 10 and is further identified in the records of the Highway Commission as file R 9545, and which property is being acquired for right of way purposes in connection with the Oregon Coast Highway;*

Real property owned by Robert B. Poole, et ux., which property is located in the John Hobson D. L. C. No. 44 in Section 9, Township 7 North, Range 10 West, W. M., Clatsop County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 11 and is further identified in the records of the Highway Commission

as file R 9546, and which property is being acquired for right of way purposes in connection with the Oregon Coast Highway;*

Real property owned by Webster L. Kincaid, which property is located in the Zara Sweet D. L. C. No. 68 in Section 33, Township 17 South, Range 3 West, W. M., and in Block 1, Kincaid Park, Eugene, all in Lane County, Oregon, and is more particularly described on the attached sheets and designated as Parcels Nos. 12, 13, and 14 and is further identified in the records of the Highway Commission as files R 9252 and 9321, Parcels Nos. 12 and 13 being acquired for right of way purposes in connection with the Pacific Highway and Parcel No. 14 being acquired for right of way purposes in connection with the Willamette Highway;*

Real property owned by George P. Hitchcock, et ux., which property is located in Section 33, Township 17 South, Range 3 West, W. M., in Lane County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 15 and is further identified in the records of the Highway Commission as file R 9251, and which property is being acquired for right of way purposes in connection with the Pacific Highway.*

2. That the Commission does hereby find and declare that each of the said described parcels of real property is necessary and acquisition of the same by the State is required for the specific purposes hereinabove set forth, and the said properties are being acquired for the express and specific purposes in this resolution set forth.

3. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real properties, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of the said real properties, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property or properties, whether said properties be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

4. That J. M. Devers, Attorney for the State Highway Commission, be and he is hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement or agreements can be reached, then it is hereby

further resolved that J. M. Devers, Attorney for the State Highway Commission, be and he hereby is requested to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated.

5. That this resolution be entered in full in the minutes and records of this Commission.

*(The detailed descriptions of the respective parcels of real property mentioned in this resolution are attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 15, under the heading "Real Property Condemnation Resolutions", and said descriptions by this reference are made a part of this minute entry to the same extent as if copied in full herein.)

The Attorney discussed with the Commission the acquisition of right of way for the new Columbia Gorge Highway across property owned by Mrs. Juanita Starr. He said that Mrs. Starr is demanding \$22,500 for such right of way, but, in his estimation, it is not worth more than \$10,000. He recommended an offer of \$10,000 in connection with this condemnation case. The Commission approved the recommendation.

The Engineer discussed with the Commission two letters from W. H. Lynch, District Engineer, Public Roads Administration, in which the Highway Commission is asked to waive restrictive regulations and permit the transportation over certain state highways of loads with overall lengths up to 60 feet and with gross weights of 68,000 pounds as an emergency measure, associated directly with national defense. (See letters dated August 2 and August 14, 1941) Both letters were read aloud and discussed. The Engineer was instructed to reply that the Commission feels strongly that the increased weight should not be placed on Oregon highway bridge structures and that general highway traffic should not be subjected to the hazard of loads that cannot keep on their own side of the road; furthermore, that the Commission would be glad to comply with the request but in its opinion it has no authority to grant permits for movements of vehicles which exceed the weights and dimensions prescribed by law and ignore the express will of the recent legislature notwithstanding that it is a recognized fact that the present statute serves as a barrier to the free movement of interstate commerce.

The Commission adjourned at 12:15 p. m. and reconvened at 1:00 p. m. in the same room with the same persons present and participating.

The Engineer requested authority to advertise for bids for the following rock production projects:

Swisshome Rock Production Project on the Siuslaw Highway, Lane County. Estimated cost \$20,200.

Pendleton-Meacham Rock Production Project on the Old Oregon Trail, Umatilla County. Estimated cost \$19,000.

Gilliam County Line-Umatilla Rock Production Project on the Columbia River Highway, in Morrow and Umatilla Counties. Estimated cost \$17,000.

Bellnap Springs-Fourmile Butte Rock Production Project on the McKenzie Highway, in Deschutes and Lane Counties. Estimated cost \$26,000.

The Commission approved the request by unanimous vote.

The Engineer also requested authority to replace the Rogue River Bridge on the Salmon River Highway, in Polk County, at an estimated cost of \$7,500. The Commission approved the expenditure.

A letter was presented from Honorable J. D. Perry, Deer Island, requesting the elimination of a curve in front of the Deer Island public school ground. The Engineer advised that this work is estimated to cost \$15,000 and the Commission previously in this session approved the project. He was instructed to so inform Mr. Perry.

The Engineer advised that on his return from the Commission's Eastern Oregon trip on July 25, he stopped at LaGrande and discussed certain road matters with Mr. Charles Reynolds, President of the Oregon Trail Association, and Mr. Reynolds particularly asked that the Commission give consideration to the following projects:

- (1) Extend the improvement of the Wallowa Lake Highway a distance of about two miles south of the completed section at Boswell Ranch.
- (2) Improve the county road between Tollgate and Milton, about ten miles in length, as a federal aid secondary highway project.
- (3) Construct the proposed revision of the Old Oregon Trail between Union and North Powder on the Ladd Canyon route.
- (4) Authorize additional improvements for the Starkey Secondary Highway.
- (5) Extend the federal aid secondary highway improvement on Hunter Lane a distance of about five miles to the end of the farming district.

Action on these requests was deferred by the Commission pending inspection of the several projects on its next trip into this district.

The Commission discussed a letter from J. H. Wittrock, Kerby, Oregon, requesting the oiling of the Redwood Highway full width through the business district and construction of a sidewalk for the benefit of school children and other pedestrians. The Engineer estimated the cost of the oiling at \$1,500 and the cost of an oiled footpath, 0.04 mile in length, at \$300. He recommended construction of the sidewalk and that the request for the other oiling work be denied. The Commission approved the recommendation.

The Commission considered and referred to the Engineer for investigation and cost report a resolution from Malheur Pomona Grange No. 33 requesting the improvement of the County road which extends from the Adrian-Nyssa Highway to Owyhee Dam, in Malheur County.

The Commission also discussed a letter from Mr. L. J. Simpson, Empire, Oregon, urging further improvement of the Cape Arago Secondary Highway between the end of the present improvement and Cape Arago State Park. The Commission denied the request on account of lack of funds with which to finance the work and for the further reason that the Commission is now spending considerable money in the Coos Bay district for highway improvements and feels that this district is getting its full share of the highway funds. The Secretary was instructed to so inform Mr. Simpson.

A letter was presented from Mr. H. W. Gauntlett, President of the Bank of Newport, requesting the improvement of the Oregon Coast Highway between Newport and Taft. The Secretary was instructed to inform Mr. Gauntlett that the Commission plans to give this project due consideration in the formulation of its next construction program.

The Engineer requested authority to spend about \$14,000 for landscaping and yard work at the highway department's new testing laboratory in Salem, so as to provide an improvement comparable to the adjoining highway department premises and those of the forestry department and the state penitentiary. The Commission approved the request.

The Engineer reported the destruction by fire of the maintenance buildings at Alkali Lake adjacent to the Lakeview-Burns Highway, in Harney County. He requested authority to replace the buildings, which consist of two patrolmen's houses and one maintenance shed, at an estimated total cost of \$15,500. This matter was discussed at considerable length during which the question arose whether or not it is absolutely necessary to build both patrolmen's houses at this time. The Commission's final decision was to construct all three buildings at this time, thus avoiding probable extra expense if one of the patrolmen's houses was built later on.

The Commission discussed the matter of maintaining city streets that are not on state highway routes, particularly those which are being damaged by log hauling operations and general commercial trucking. After careful consideration of this matter the Commission authorized an expenditure of \$250,000 for such purpose, \$150,000 of which is to be spent next year in cities and towns having a population of not less than 250 and not more than 50,000 in conformity

with the following formula: one-third population, one-third mileage of streets on U-2S (general use streets - see Technical Report #38-1), and one-third on the ton-miles of travel on the U-2S; the balance of the money is to be used now, if necessary, to finance emergency improvements on city streets. The improvements in each instance are to be covered by written agreement between the city and the state. The Engineer was instructed to prepare a program for such improvements. The Attorney presented and read aloud the following cooperative form of agreement between the cities and the state covering the matter, which form the Commission approved by unanimous vote:

THIS AGREEMENT made and entered into this ____ day of _____, 1941, by and between the STATE OF OREGON, by and through its State Highway Commission, hereinafter called the "State", party of the first part, and the CITY OF _____, a municipal corporation of the State of Oregon, by and through its municipal authorities, hereinafter called the "City", party of the second part;

W I T N E S S E T H :

RECITALS:

1. The city streets hereinafter named have been and are now being subjected to a kind and volume of motor traffic which is destructive of said streets beyond the financial ability of the City to repair and maintain the same.

2. One of the major uses of said streets at this time is by commercial motor traffic including logging traffic.

3. It is the judgment and opinion of the Highway Commission that, because of the kind and volume of traffic using said streets, the State should in equity cooperate with the City in the improvement or maintenance of said streets or sections thereof which are hereinafter named.

4. Subsection 32 of Section 100-115 O. C. L. A., authorizes the Highway Commission among other things to "enter into an agreement or agreements with any county, city, town or road district for the construction, reconstruction, improvement or repair of any road, highway or street upon such terms and conditions as the contracting parties may mutually agree upon".

NOW, THEREFORE, the premises being as stated in general and in part in the foregoing recitals, it hereby is agreed as follows:

1. The State shall, without cost to the City except with respect to rights of way, improve and maintain, in the manner and to the extent set out in the maps, plans and specifications which are

hereto attached, certain streets or sections thereof, as indicated on the maps, plans and specifications.

2. The State shall be under no obligation to do any work on said streets other than as is specified and set out in the maps, plans and specifications which are marked Exhibit A and which exhibit is hereto attached and made a part hereof.

3. Nothing in this agreement shall, nor shall any work done on said streets pursuant to this agreement, impose on the State, its State Highway Commission or employees any liability or obligation of any kind or character other than the duty and obligation to do the work specified in said plans and specifications.

THINGS TO BE DONE BY THE CITY:

1. The City shall retain in full its jurisdiction and control over and duties with respect to said streets.

2. The City shall provide, when necessary, any and all rights of way needed for the carrying out of the provisions of this agreement.

3. The City shall police said streets to the same extent and for like purposes as the City should and would do if this agreement had never been executed.

4. The City shall keep the Highway Commission advised of any and all apparent defects in said streets so that the same may be with all reasonable dispatch and good workmanship remedied.

5. If any defect occurs in any of said streets which is in the nature of an emergency and requires immediate attention, the City shall take proper and appropriate measures to safeguard the public, and shall immediately notify the Highway Commission of such condition.

GENERAL PROVISIONS:

1. It is recognized that this agreement is intended to represent a cooperative effort on the part of the City and the State to meet special and unusual conditions, and, therefore, each party to this agreement pledges complete cooperation with the other.

2. This agreement shall be in full force and effect until December 31, 1942, and no longer, unless a writing executed by these parties extending the life of the agreement is attached hereto.

IN WITNESS WHEREOF, the parties hereto have subscribed their names and affixed their seals the day and year first above written:

The Engineer requested authority to purchase the following equipment:

- 2 light-type trucks to replace two trucks destroyed by fire at Alkali Lake section headquarters. Estimated total cost \$2,000;
- 3 new paving plants each of which consists of the following equipment:

1 - Paving Plant	\$12,000.00	\$12,000.00
6 - Hauling Trucks	1,200.00	7,200.00
2 - Pick-up Cars	600.00	1,200.00
1 - 6-Ton Roller	4,000.00	4,000.00
1 - Roller Trailer	2,000.00	2,000.00
1 - Office Trailer	1,000.00	1,000.00
1 - 550 Gallon Asphalt Kettle	1,500.00	1,500.00
1 - 200 Gallon Asphalt Kettle	500.00	500.00
1 - 100 Gallon Asphalt Kettle	360.00	360.00
1 - Flush Coat Cart	60.00	60.00
4 - Rubber Tired Wheelbarrows	15.00	60.00
Miscellaneous		120.00
(Miscellaneous equipment consists of shovels, rakes, pouring pots, etc.) Total		\$30,000.00

Estimated total cost of the three units \$90,000.

He explained that the Commission's new policy of spending a certain amount of money each year for the improvement of city streets that are not on state highway routes, together with the extra expense that is now being incurred for repairing damage done to the state highways by logging traffic, necessitates the additional equipment and in order to have the equipment available for use next year, it is necessary to place the order for the same now because deliveries are very slow on account of defense orders which have priority. After careful consideration of this matter the Commission authorized the purchase of all of this equipment, the purchases to be made through the State Purchasing Agent in accordance with the usual practice.

The Engineer then requested authority for Maintenance Engineer J. N. Bishop and Master Mechanic Emil Halik to go to Spokane, Washington, at state expense to inspect a small paving plant that is owned by the Washington Highway Department, it being a new type of equipment that might be used to good advantage in this state. The Commission approved the request subject to further approval by Governor Sprague.

The Commission deferred action on a letter from Mr. David Eccles, State Budget Director, inquiring whether or not it would be possible for the State Highway Department to make a topographical survey of Cascade Locks and vicinity in view of the possible development of this area for industrial purposes.

A letter was presented from Mr. J. D. Shirley, District Director, Division of Operations, Work Projects Administration, advising that it is the desire of the Work Projects Administration that the more important projects carried out under its program be properly marked for permanent identification, particularly referring to the Wolf Creek Highway project and the Wilson River Highway project. He suggested three separate schemes for such marking, one being a combination sponsor-federal marker; the second consisting of two markers, one for the sponsor and one for the federal agency; and the third consisting of one marker for the federal agency only. The Engineer recommended the third scheme, consisting of one marker for the federal agency. The Commission approved the recommendation.

Reconsideration was given by the Commission to the request of the United Contracting Company for relief from payment of the full penalty imposed for failure to complete its contract, No. 2340, for the construction of the Corvallis-Lincoln School Project on the Pacific Highway West, in Benton County, within the specified time limit. The company alleged the following facts in support of its request: that bids were first taken for this project on June 13, 1940, with the completion date set at September 30, 1940; that the Highway Commission rejected such bids and readvertised the project for bids to be received on July 18, 1940, although the time limit was not extended accordingly; that the contract forms were expressed to the company on July 20 and were signed and returned by the company on July 22 but a fully executed copy of the contract was not delivered to it until August 9, 1940; and that construction work was started on August 26, 1940, which gave them only a few days over one month within which to complete the contract on time, which was humanly

APR 14 1941

impossible. The company further alleged that because of inclement weather it could not successfully operate during the winter season and work was ordered shut down during such period, and in view of these conditions, it feels that it is entitled to relief from payment of the penalty. The Engineer advised that he believes that the contractor's statements are substantially correct and in view thereof recommended a 50 per cent reduction in the penalty. The Commission approved the recommendation and thereupon signed the voucher covering final payment for the work.

The Engineer reported that in conformance with authority previously granted him by the Commission he has awarded the following contracts, the conditions of the awards having been satisfied:

Grading, surfacing and bituminous macadam construction on the Algoma-Terminal City Section of The Dalles-California Highway, in Klamath County. Bids taken June 13, contract awarded August 5, 1941, to Frank Penepacker and Clifford A. Dunn, low bidders:

Detroit-South Santiam Junction Rock Production Project on the North Santiam Secondary Highway, in Linn and Marion Counties. Bids taken July 17, contract awarded July 30, 1941, to A. O. Ekstrom, low bidder.

The Commission confirmed such awards as reported.

A letter was presented from Mr. Frank Rada, Mill City, requesting permission to construct and maintain a fence across the uncompleted section of the North Santiam Highway in Mill City as a temporary proposition until the highway improvement is extended along the north side of the Santiam River toward Mehama. The Engineer advised that this section of road is not used at the present time by anyone except Mr. Rada and that the closing of the same as a temporary proposition would not inconvenience the public. He recommended approval of Mr. Rada's request. The Commission approved the recommendation subject to the condition that Mr. Rada will remove the barricade when requested to do so and that the matter is covered by written agreement between Mr. Rada and the state.

The Engineer asked authority for Traffic Engineer John Beakey to attend at state expense a traffic school in Berkeley, California, August 6 to 12, 1941. He estimated Mr. Beakey's expense at \$80.00. The Commission approved the request subject to concurrence by Governor Sprague.

The Commission discussed its proposed inspection trip into Wallowa County and tentatively decided to make such trip some time during the month of October.

The Commission discussed an inquiry from Mr. Charles Reynolds, President of the Oregon Trail Association, LaGrande, as to whether or not the funds that the Commission has authorized for the construction of the new Pendleton Airport Road is to be charged against the Eastern Oregon district. The

Commission deferred a decision in this matter pending receipt of definite information with respect to the federal appropriation for access roads.

The Engineer reported that the communication system for the benefit of log haulers has been installed in the Elkton Tunnel on the Umpqua Highway, in Douglas County, and is ready for operation by flagmen who are to stop other traffic in the tunnel while it is being occupied by logging trucks. He recommended that the Commission order the use of these facilities by all loggers desiring to truck-haul logs through this tunnel and suggested that such operators should furnish flagmen at their own expense. The Commission approved the suggestion as to the flagmen and instructed the Secretary to recommend to the Public Utilities Commissioner the granting of PUC permits for logging operations in this tunnel only in the event that the operators will utilize the communication facilities.

Reconsideration was given by the Commission to the matter of allowing one-log loads weighing in excess of the statutory weight limits to be transported over state highways, which matter was discussed on the previous day with a delegation of persons interested in the logging industry. The Engineer advised that the Washington Highway Department has a rule with respect to such operations which might work satisfactorily in the state of Oregon. He was instructed by the Commission to secure full information with respect to the Washington ruling and to put it into effect in Oregon for a period of 30 days as a trial if he considers the ruling reasonable and there are possibilities that it will prove a satisfactory solution of the problem in this state.

Commissioner Oliver brought up for discussion the need for traffic scales on the John Day-Burns Highway at Seneca to weigh logging trucks. After discussion the Commission approved the installation which was estimated to cost about \$2,500. The Engineer pointed out the need for scales in other locations. The Commission approved the purchase of five additional scales at this time and indicated that it would purchase more later on.

The Engineer submitted a report from Landscape Engineer George Otten with respect to construction of an entrance roadway into the property of Mr. T. M. Gilchrist near the intersection of the Pacific Highway and the Santiam Highway in Albany, involving certain landscaping work. He submitted a plan for the proposed improvement and recommended adoption of the same. After discussion the Commission approved the recommendation by unanimous vote and instructed the Engineer to submit the plan to Mr. Gilchrist. In the event that Mr. Gilchrist will not accept the plan then an attempt is to be made to settle with Mr. Gilchrist on a cash basis. If Mr. Gilchrist approves the plan, a written agreement shall be executed setting forth clearly that permission to place his gasoline pumps directly on the property line is of limited duration and will cease and terminate when the Highway Commission constructs the proposed wye connection at which time he will be required to set his curb pumps back in such manner as to obviate the necessity of serving traffic on any portion of the highway right of way.

The Engineer reported that Mr. R. W. Nelson, who represents the Port

of Portland, has expressed a desire to discuss with him the proposed cooperative arrangement relative to the use of the Port of Portland's dredge in connection with additional construction on the Columbia Gorge Highway. He said that he has not had an opportunity as yet to contact Mr. Nelson but will do so as soon as possible and hopes to have a report for the Commission at the next meeting. The Commission approved.

The Engineer brought up for discussion the improvement of the Sprague River County Road, in Klamath County, for which the federal government has appropriated \$150,000 contingent upon such sum being matched by state funds. He gave as his opinion that greater efficiency could be obtained and more road actually constructed if the state's share of the work were done by contract, provided, of course, the Commission approved an expenditure of \$150,000 of state money for this purpose or, in lieu thereof, furnished material, equipment and services equivalent in value. If such an arrangement can be made, he said, it will necessitate taking over a section of the road as a state secondary highway and thereafter maintaining it as such. He suggested the section between the town of Sprague River and the junction with the Klamath Falls-Lakeview Highway near Beatty, a distance of about ten miles. After discussion the Commission expressed a preference for the contract method of doing the work and thereupon approved Chairman Cabell's letter of August 13, 1941, directed to Mr. B. G. Courtright, Superintendent, Klamath Indian Agency, outlining the plan in more detail.

A letter was presented from the United States Farm Security Administration, Los Angeles, requesting permission to transport one hundred house trailers over state highways from the California state line to the army munitions dump near Umatilla, particularly requesting authority to tow two such trailers behind one pickup truck so as to expedite the entire movement. The Commission deferred a decision in the matter pending a test run to determine whether or not the movement would be hazardous to other traffic. The Secretary was instructed to arrange for such test run over United State Highway No. 395. If the results are satisfactory, then he is authorized to grant a permit for the movement of the remaining trailers.

The Engineer brought up for discussion the matter of improving the Union Avenue approach to the Interstate Bridge on the Pacific Highway in Portland and particularly a letter from Mr. Harvey Wells, President of the Hayden Island Amusement, who requests such improvement between the Interstate Bridge and Oregon Slough Bridge in accordance with previous understanding. The Engineer advised that Mr. Wells is anxious to proceed with certain development work in Jantzen Beach Park which necessitates certain improvements to the highway that is estimated to cost about \$12,000. He exhibited a map showing the proposed improvement and recommended that he be authorized to advertise the project for bids to be received as soon as it can be prepared for letting. After discussion the Commission approved the plan and authorized the Engineer to advertise the project for bids notwithstanding that circumstances may arise that the award of the contract cannot be made.

The State Parks Superintendent reported on the following park matters:

Request of Mr. Russell Hubbard to purchase certain state-owned property adjacent to the Umpqua Highway at Reedsport:-The Parks Superintendent advised that he has no objection to the sale to Mr. Hubbard of certain city lots situate opposite Mr. Hubbard's mill and near the point where the highway turns onto Main Street, Reedsport, but in his estimation the Commission should not dispose of the other tract desired by Mr. Hubbard but should retain the same so as to preserve the unobstructed view of the Umpqua River. The Commission deferred a decision pending inspection of the property in question.

Acquisition of Mead property adjacent to the Upper Columbia River Highway at Shell Rock Mountain:-The Parks Superintendent advised that Mrs. Mead wants \$5000 for her land which consists of 112 acres. He gave as his thoughts, however, that if the Commission purchased this property it should also acquire certain adjoining property some of which no doubt could be obtained without charge and across which a proposed revision of the Columbia River Highway has been projected. He further advised that these properties will fit in very nicely with the program for the Upper Columbia River parks. The Attorney advised that the owners of this property have another buyer for the same so if the Commission wants the property it probably will have to act soon. After discussion the Commission ordered further investigation and that the owners of the adjoining property be contacted relative to the sale of their holdings.

Proposed crossing of Bonneville Power transmission line over Emigrant Park:-The Parks Superintendent advised that the Bonneville Power Administration has requested a permit to build its pole line over Emigrant Park in the SW $\frac{1}{4}$ of the SW $\frac{1}{4}$ of Section 9, Township 1 North, Range 35 East, W. M., Umatilla County; further that he investigated the proposed crossing and found the location to be the least harmful in this particular section. He recommended approval of the request. The Commission approved the recommendation.

Addition to state park at The Cove, in Jefferson County:-The Parks Superintendent presented an amendment to the cooperative and license agreement with the Department of Agriculture covering recreational lands located at The Cove in Jefferson County and providing for the lease of an additional 1,980 acres for a period of 50 years, subject to three 15-year renewals without cost. The Commission approved the lease.

Proposed parks in Lincoln County:-The Parks Superintendent reported receipt of a petition from the North Lincoln County Chamber of Commerce urging the Highway Commission to establish three state parks as follows: (1) tract at the mouth of Devils Lake between the Oregon Coast Highway and the Pacific Ocean; (2) a three-acre tract located adjacent to the Oregon Coast Highway at Fogarty Creek; and (3) tract adjoining the Port of Newport Docks at Taft. The Parks Superintendent advised that he has investigated all of

these sites and cannot recommend any of them. The tract at the mouth of Devils Lake, he said, would require an expenditure of approximately \$30,000 to make the area serviceable and in his estimation the expenditure is not justified. Furthermore, the Commission has previously refused to purchase this property. The area at Fogarty Creek, he said, comes within the right of way of the proposed highway line change, and the tract at Taft consists of bay frontage about 200 feet long and 50 feet deep. The Commission decided not to acquire any of these tracts.

Proposed park north of Elgin, Union County:-The Parks Superintendent presented a resolution from Union County Pomona Grange No. 6 requesting the establishment of a state park at a place known as Rock Wall about five miles north of Elgin. He said that this area has been investigated and in his estimation does not meet the state parks' qualifications. Furthermore, it would be necessary to construct five miles of road to provide access to the area. He recommended that the tract be not acquired. The Commission approved the recommendation.

Archery concession at Silver Creek Falls State Park:-Upon recommendation of the State Parks Superintendent the Commission denied the request of E. J. Callahan and R. L. Russell to maintain an archery concession at Silver Creek Falls State Park.

Wayside strips along the Pendleton-John Day Highway:-The Parks Superintendent recommended an expenditure of federal aid funds in the amount of \$15,000 to purchase wayside timber strips along the Pendleton-John Day Highway between Dale Ranger Station and the junction of Camas Creek and the John Day River; further, that he be authorized to employ three appraisers to check the purchase price of the property as established by the right of way department and as required under the federal aid act. He advised that options have been secured from the several owners and that such options expire on December 1, 1941. He further advised that this project is in his estimation a first priority project for federal moneys. After discussion the Commission instructed the Parks Superintendent to secure an extension of time, if possible, on the options because it will take some time to secure the government funds. The Commission approved the purchase with government funds and also authorized the appraisals as requested. The Engineer was instructed to file an application for the federal funds as soon as the appraisals are completed.

Sheep grazing in Humberg Mountain State Park, Curry County:-The Parks Superintendent presented forms of agreements with Mr. Ray Fromm and Mr. Ace Turner covering the grazing of sheep in this park at a price of 20¢ per sheep per year. The Commission considers the price too low; however, agreed to grant such grazing privileges if the owners of the sheep are willing to pay 50¢ per head yearly for this privilege.

Proposed addition to Ecola State Park, in Clatsop County:-The Parks Superintendent advised that Mr. John Yeon, Portland, owns approximately 12 acres of land at the westerly end of Chapman Point in this park and has offered to sell this property to the state for the sum of \$8,175.37, which he states represents the actual cost of the property to him. He also stated that there are several other small tracts at this location which should be acquired in order to fill out the park. The Commission indicated that the price demanded by Mr. Yeon is satisfactory; however, deferred a definite decision pending further investigation as to the desirability of acquiring the property. The Parks Superintendent was instructed to make a survey of the entire proposal and present the same to the Commission at a future meeting.

Proposed park on Blacklock-Sandstone property, Curry County:-The Parks Superintendent reported an offer of W. Robert McMurray of Commonwealth, Inc., to sell to the state for park purposes 1400 acres of land with a three-mile frontage on the Pacific Ocean, said property being situate in northern Curry County three miles west of the Oregon Coast Highway. The Commission decided not to purchase this property at the present time.

Concession at Silver Creek Falls State Park:-The Parks Superintendent brought up for discussion the matter of the sale of a concession in Silver Creek Falls State Park and reported on the procedure followed by other governmental agencies with respect to such matters. After discussion he was instructed by the Commission to secure proposals from prospective concessionaires who are qualified to operate this concession and to submit the same for the consideration of the Commission.

Proposed use of Flounce Rock State Park by the United States Army:-The Parks Superintendent advised that a request has been made by the United States Army authorities for permission to conduct a recreational retreat in this park for the benefit of army pilots. He recommended approval of the request if it is presented in formal manner. The Commission approved the recommendation.

The Engineer reported receipt of two petitions from residents of Pendleton, one of which endorses the proposed widening of Southwest Court Avenue and the other opposes such widening because of the necessity to remove shade trees now growing in the parking areas. He advised that the traffic conditions along this street, which is the route of the Old Oregon Trail, are serious and that some means should be taken to alleviate the traffic congestion; further, that the most feasible and economical way would be to widen Southwest Court Street to a width of from 46 to 48 feet between curbs which would permit parallel parking and would provide for three moving lanes of traffic. The only feasible alternative, he said, would be to make Court Street a one-way street for north-bound traffic and to route south-bound traffic along Dorian Avenue, although during the time of the Pendleton Round-Up such routing would no doubt

cause considerable confusion. After discussion the Commission decided that this is a problem for the City of Pendleton to work out. The Engineer was instructed to inform the city council that the Commission is of the opinion that the widening of Court Street is the proper solution but the Commission cannot do this without taking away the trees. He was also instructed to ascertain the attitude of the city council with respect thereto.

The Commission discussed the claim of Mrs. Violet Jones for damage to her wearing apparel by wet paint. The Attorney explained that Mrs. Jones's claim is in the amount of \$6.10 and represents expense for cleaning her wearing apparel which was damaged by paint when she inadvertently leaned against the highway department scalehouse on the Pacific Highway near Jantzen Beach Park. He questioned the state's liability in the case. The Engineer advised that people have formed the habit of waiting at this point for busses, and it is quite evident that that is what Mrs. Jones was doing when she came in contact with the scalehouse which was freshly painted. It was his thought that Mrs. Jones should have known the condition notwithstanding that there were no warning signs in evidence. After discussion the Commission denied the claim; however, instructed the Engineer to hereafter maintain warning signs at locations where painting operations are underway.

The Commission discussed the complaint of the Lutz Marble Company, Portland, concerning the drainage of the Lower Columbia River Highway in front of their premises at Guild's Lake, Portland. The company alleges that the Highway Commission installed a culvert across the highway at this point to care for highway drainage and as a result water from the highway flows over their property, seriously damaging the same. Further, that the culvert was installed at a location where there has been no natural drainage channel for over twenty years and they demand that the culvert be permanently closed, otherwise they will take steps as may be necessary to remove the hazard.

The Engineer advised that the culvert referred to is in a natural drainage channel, that it was installed in August of 1940 to replace an old wooden culvert that was placed there by Multnomah County years ago, but was inadequate to take care of the drainage water, in fact has not been in use for a long time and as a consequence, during the rainy season, water overflowed the pavement creating a hazard to the traveling public. He further advised that when Guild's Lake was filled in by the Port of Portland, a wooden flume was constructed to convey surface water across the privately owned land; however, the flume has long since rotted and there seemed to be no community drainage system to take care of the surface water as was formerly provided by the lake. By installing the new culvert, he added, the State Highway Commission is simply following the standard policy of conveying water from one side of the highway to the other side in natural drainage channels.

This matter was discussed at considerable length and it appeared to the Commission to be a responsibility not of the State Highway Department but of the party that sold the land to the Lutz Marble Company. The Engineer and the Attorney were instructed to discuss the matter further with Mr. Lutz from that standpoint some time during the following week.

The Attorney reported that the federal government is now taking action to condemn a portion of the Columbia River Highway at Tongue Point, which portion is needed in connection with the development of Tongue Point Naval Base. He inquired as to the wishes of the Commission with respect to the formulation of defense in such action. He was instructed by the Commission to point out that the road in question is the only available road for general public use through this particular district and must be replaced, otherwise the people of Astoria will be isolated; further, that the Highway Commission will expect the government to furnish a substitute road equally as good as the present one and pay damages that the state may incur by reason of the taking of the present road.

The Attorney brought up for discussion the matter of acquiring additional land as right of way for the proposed improvement of the Oregon Coast Highway across the Orris Knapp property at Port Orford. He advised that approximately eleven acres of land are involved in this transaction and that Mr. Knapp originally demanded \$100 an acre for the same; however, his attorney, Mr. Collier H. Buffington, Gold Beach, now advises that Mr. Knapp will accept \$80 per acre. He gave as his opinion that the land is not worth more than \$75 per acre and recommended settlement with Mr. Knapp on such basis. He was authorized by the Commission to pay \$75 per acre and to raise this offer to \$80 per acre if absolutely necessary.

The Assistant Attorney presented the question of allowing Grace Blackstock to take certain plumbing and other items of salvage from the building purchased from her on the Tongue Point Project in Clatsop County, in order to close the right of way settlement with her. He stated that in his opinion the salvable items in the building would not justify the expense of receiving bids and recommended that the owner be allowed to take the items. The Commission approved the recommendation.

The Engineer brought up for discussion the matter of further purchases of asphalt and road oil from the Casmite Corporation. He explained that on July 2, 1941, he directed a letter to the State Purchasing Agent recommending the discontinuance of the purchase of asphalt and road oil from this company because they contain so much dirt and foreign material which materially delays unloading of the cars, causes extra expense due to repair of equipment, and creates a hazard to employees by reason of danger of explosion. The officials of the Casmite Corporation, he said, are very much concerned about this recommendation and have agreed, if given another trial, to furnish asphalt products that will absolutely meet the specifications and have further agreed to reimburse the state for costs due to delays and repairs to damaged equipment. Furthermore, they have agreed to indemnify the State of Oregon for any losses sustained or injuries to persons. He recommended in view of the company's offer that it be given another opportunity to deliver materials under specification, particularly in view of the fact that this company was the low bidder in the recent taking of bids for the furnishing of such products. After discussion the Commission approved the recommendation.

The Commission had under discussion the proposed agreement with

Babler Brothers disposing of their claim for extra compensation arising out of their contract, No. 2456, with the state, covering repairs to the drawspan pier on the bridge over the Willamette River on the Corvallis-East Side Secondary Highway, in Corvallis. The Engineer explained that the specifications indicated a net quantity of 140 cubic yards of concrete to be placed whereas actually there were only 99 cubic yards placed or an underrun of 41 cubic yards. He further advised that a considerable part of the cost of the project was in the falsework around the piers which cost the contractor distributed to the concrete yardage in making up his unit bid, and in view thereof he has experienced a loss in this item. He estimated such loss at \$124.47 and recommended payment of such amount to the contractor. The Commission approved this settlement and thereupon signed an agreement with Babler Brothers disposing of the claim.

Ben Titus, Acting Director of the Travel and Information Department, was present and reported as follows with respect to the activities of his department during 1942. He advised that he discussed with Mr. Merle Chessman, Chairman of the Advisory Committee on Publicity Matters, whether or not any change should be made in the agency through which the Highway Commission has carried on its travel activities in the past, and it was Mr. Chessman's thought that the services of the present agency, Botsford, Constantine and Gardner, should be retained, and with that thought in mind he communicated with the other members of the committee all of whom, with the exception of Mr. Ball of Hood River who could not be reached, agreed that that was the proper thing to do. He read aloud several of the letters. The Commission discussed the matter at some length but deferred a definite decision in regard thereto pending consultation with Governor Sprague. It was decided that Chairman Cabell and Mr. Chessman should talk the matter over with the Governor.

Mr. Titus also mentioned that the Advisory Board has a meeting scheduled for Thursday, September 4, and at that time will listen to any agencies who wish to be heard on this subject. The Commission approved the plan.

Consideration was given by the Commission to the following requests for extensions of time within which to complete highway construction projects:

Frank Penepacker, contract No. 2346, for grading and surfacing the Butte Creek-Mayville Road Section of the Kinzua County Road, in Wheeler County, requested an extension of time from November 30, 1940, to July 10, 1941, within which to complete this job. He attributed his failure to complete the project within the specified time limit to adverse weather conditions. The Engineer advised that Mr. Penepacker encountered very bad weather during the late fall and early spring which very materially retarded progress of the work. However, he might have avoided this delay had he started operations within a reasonable length of time after the award of the contract. He attributed the overrun in time to Mr. Penepacker's negligence in not commencing the work at the proper time. In view thereof he recommended that the extension of time requested be granted but that the contractor be required to reimburse the state for all extra engineering

expense incurred in connection with the job subsequent to the specified date of completion. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation.

Angelo Doveri, contract No. 2354, for construction of a diversion canal and the Henley Flume on the Klamath Falls Section of the Klamath Falls-Malin Highway, in Klamath County, requested an extension of time from March 15 to June 7, 1941, within which to complete this job. He attributed his failure to complete the project within the specified time limit to the fact that he was required to wait for the completion of the diversion canal in order to remove drainage waters. The Engineer advised that the Henley Flume was completed during the winter months while there was no water in the flume and that part of the job, except for minor finishing work, was done by the time the Irrigation District turned the water back into the flume. However, the diversion canal carried water all winter, making it impracticable to do any work on that structure during the winter season. Water was turned out of the canal, he said, on April 16 and the contractor started work on the diversion canal bridge the next day; however, he was not well organized and did not finish the job until June 7, although one month would have been ample time to have completed the work. He recommended in view of the circumstances that an extension of time up to May 15, 1941, be granted without penalty but that an additional extension of time to and including June 7, 1941, be granted with the understanding that Mr. Doveri will reimburse the state for the extra engineering expense incurred subsequent to May 15, 1941. The Commission approved the recommendation.

L. B. James, contract No. 2405, for construction of a testing laboratory building at the state highway shops in Salem, requested an extension of time of 31 days, from July 31 to August 31, 1941, within which to complete the project. He attributed his failure to complete the project within the specified time limit to difficulties encountered in securing materials for the work due to the government's priority defense orders. The Engineer advised the reason given by the contractor for failure to complete the project within the specified time limit is correct, that in several instances it was necessary to make a substitution of materials and progress on the work was materially delayed thereby. He recommended granting the extension of time now requested without penalty. The Commission approved the recommendation.

Dimitre Electric Company, contract No. 2418, for electrical work on the Interstate Bridge on the Pacific Highway between Portland, Oregon, and Vancouver, Washington, requested an additional extension of time from June 30 to August 31, 1941, within which to complete this project. They attributed their failure to complete the project within the specified time limit to nondelivery of some of the electrical equipment which was to be furnished by the state. The Engineer advised

that the contract called for the completion of the job by May 15, 1941, but it was originally extended by the Commission to June 30, 1941, without penalty, because difficulties were encountered in securing certain electrical equipment; further, that the additional extension of time is necessary solely on account of nondelivery of the electrical equipment which is being furnished by the state. He recommended in view thereof that the extension of time requested be granted without penalty. The Commission approved the recommendation.

The Engineer reported that Contracts Nos. 2346, 2354, 2410, 2431, and 2445, for the construction of state highway projects, have been completed according to the requirements of the contracts or modifications thereof, and that said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and adopted by the unanimous vote of the Commission:

WHEREAS, The Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts and that said jobs are now ready for acceptance:

Contract No. 2346, with Frank Penepacker, for grading and surfacing the Butte Creek-Mayville Road Section of the Kinzua County Road in Wheeler County. Completed July 2, 1941.

Contract No. 2354, with Angelo Doveri, for construction of the Henley Flume and U.S.R.S. Diversion Canal on the Klamath Falls-Malin Highway in Klamath County. Completed June 7, 1941.

Contract No. 2410, with O. C. Yocom, for surfacing and oiling the Hoffman Bridge-Grants Creek Section of the Powers Secondary Highway in Coos County. Completed July 28, 1941.

Contract No. 2431, with C. A. Dunn, for grading, surfacing and oiling the Henley Section of the Klamath Falls-Malin Highway in Klamath County. Completed July 22, 1941.

Contract No. 2445, with Norris and Philpott, for construction of a bridge over Meadowbrook Creek on the Starkey Secondary Highway in Union County. Completed July 31, 1941.

THEREFORE, BE IT RESOLVED, that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

The Commission set Thursday and Friday, October 9 and 10, 1941 as the date for its October meeting to receive bids for highway construction work. (Later postponed to October 16 and 17, 1941) The Secretary was instructed to make the usual arrangements to hold this meeting in the auditorium of the Public Service Building, Portland.

The Commission considered and signed agreements, et cetera, as follows:

Agreement with the Eugene Power Company covering re-establishment of its power facilities on account of the proposed reconstruction of the Pacific Highway between Eugene and West Springfield.

Agreement with the City of Portland relative to the Front Avenue Project in Portland.

Agreement with Jack Higgins and wife covering the lease of a maintenance headquarters site adjacent to the Tiller-Trail Secondary Highway, in Douglas County. Real property file No. 9642-A.

Agreement with Bahler Brothers disposing of their claim for extra compensation arising out of their contract for repairs to the bridge over the Willamette River on the Corvallis-East Side Secondary Highway, in Corvallis. Contract No. 2456.

Agreement with Dee Davis and wife providing for the use of a strip of land belonging to the Davises at LaGrande to improve the radio facilities at the LaGrande division headquarters. Real property file No. 9584.

Bargain and sale deed conveying unto Bennett Swanton and wife and Robert Swanton three parcels of property lying outside of the standard width highway right of way limits in Nasburg Addition to Marshfield. Real property files No. R 8061 and R 8087.

Bargain and sale deed conveying unto Morrison A. Conway one acre of land in Washington County. Real property files R 9348 and R 9349.

Bargain and sale deed conveying unto Sunset Fuel Company property lying outside of the standard width highway right of way in Lots 1, 2, 3 and 4, Block 8, Southern Portland. Real property files R 9388 and R 9389.

Bargain and sale deed conveying unto Frank H. Seal and wife 8922 square feet of land in Lane County. Real property files R 8799 and R 8800.

Amendment to cooperative and license agreement between the United States of America and the State of Oregon providing for

additional lands for the state park known as The Cove, in Jefferson County.

There being no further business to come before the Commission at this time the meeting was adjourned at 5:15 p. m.

Ross
State Highway Engineer

W. B. Glaisyer
Secretary

Henry F. Cabell
Chairman

Herman Oliver
Commissioner

Thomas Oliver
Commissioner

Portland, Oregon, September 4, 1941

The State Highway Commission met in regular session at 9:00 a.m. in the auditorium of the Public Service Building. Present were:

Henry F. Cabell, Chairman
Herman Oliver, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

Commissioner Clough was excused from attending this meeting.

Bids as follows for highway construction projects and operation of the Enegren Ferry were opened and read in conformance with previously published notice:

MCKENZIE HIGHWAY
BELKNAP SPRINGS-FOURMILE BUTTE ROCK PRODUCTION

A. S. Wallace

\$28,450.00

COLUMBIA RIVER AND MT. HOOD HIGHWAYS
HOOD RIVER ROCK PRODUCTION

A. S. Wallace	\$16,300.00
Lofts & Son	16,677.50
A. H. Saxton & Sons	20,175.00
R. E. Rush	21,400.00
E. C. Hall Co.	23,475.00
Rogers Construction Co.	25,880.00

LITTLE BUTTE SECONDARY HIGHWAY
SALT CREEK-HANLEY RANCH SECTION - SURFACING AND OILING

Norris Bros.	\$48,660.00
J. C. Compton	51,638.00

THE DALLES-CALIFORNIA HIGHWAY
MADRAS-JUNIPER BUTTE SECTION - GRADING

Leonard & Slate	\$82,423.00
G. D. Lyon & Co.	83,507.00
McNutt Bros.	87,388.50
M. L. O'Neil & Son	91,979.50
E. L. Rigdon	98,634.50
Jacobsen-Jensen Co.	105,196.50

KLAMATH FALLS-LAKEVIEW HIGHWAY
BEATTY-PARADISE CREEK ROCK PRODUCTION

A. S. Wallace	\$23,372.50
Rogers Construction Co.	25,847.50

SIUSLAW AND ALSEA-DEADWOOD HIGHWAYS
SWISSHOME ROCK PRODUCTION

A. S. Wallace	\$18,358.00
---------------	-------------

SILETZ SECONDARY HIGHWAY
FOREST BOUNDARY-REED CREEK SECTION - GRADING, SURFACING, BITUMINOUS
MACADAM

	Using Asphalt	Using Tar
C. J. Eldon	\$135,381.00	\$135,337.00
E. C. Hall Co.	136,571.00	-

COLUMBIA RIVER HIGHWAY
GILLIAM COUNTY LINE-UMATILLA ROCK PRODUCTION

A. S. Wallace	\$16,783.50
A. H. Saxton & Sons	16,800.00

(Continued on next page)

(Gilliam County Line-Umatilla Rock Production - Cont.)

Rogers Construction Co.	\$17,450.00
R. E. Rush	18,400.00
R. O. Dail & Warren Bros.	18,650.00
Babler Bros.	23,000.00

PACIFIC HIGHWAY WEST
MORRISON STREET BRIDGE, PORTLAND - RECONSTRUCTION

Birkemeier & Sarnal	\$106,582.00
Gilpin Construction Co.	108,425.35
L. H. Hoffman	108,695.00

SHERARS BRIDGE SECONDARY HIGHWAY
WEST UNIT OF SHERARS GRADE SECTION - GRADING AND TOPPING

Norris Bros.	\$16,245.50
Leonard & Slate	16,270.00
Vernie Jarl	18,844.00
S. S. Montague	26,221.00

OLD OREGON TRAIL HIGHWAY
PENDLETON-MEACHAM ROCK PRODUCTION

A. S. Wallace	\$17,990.00
River Bend Sand & Gravel Co.	18,430.00
R. E. Rush	18,820.00
Rogers Construction Co.	21,341.00

WARM SPRINGS HIGHWAY
WARM SPRINGS RIVER-MILL CREEK SECTION - GRADING

Max J. Kuney	\$117,746.00
G. D. Lyon	138,802.00
Leonard & Slate	139,148.00
Sam Orino	144,132.50
C. J. Eldon	154,697.00
McNutt Bros.	156,759.00
A. C. Greenwood Co., Inc	189,722.00
M. L. O'Neil & Son	226,256.50
Nat McDougall Co.	294,376.50

COOS RIVER SECONDARY HIGHWAY
FURNISH FERRY SERVICE AT ENEGREN CROSSING OF COOS RIVER

Andrew Stambuck	\$1,369.60 per month
-----------------	----------------------

Chairman Cabell brought up for discussion matters pertaining to a proposed industrial site adjacent to the Columbia River Highway at Troutdale. He advised that he has received information to the effect that the government is to select this site for a large aluminum plant rather than the site at Cascade Locks, and the people concerned have requested the construction of the new Columbia Gorge Highway, including a bridge over the Sandy River, at this time before the aluminum plant is built. The Engineer gave as his thought that in view of the circumstances, it would be advisable to do at least a portion of the highway work at this time if money can be found to finance it. He pointed out that there are no funds immediately available unless the Commission would consider the transfer of funds that have already been set up for some other work. The Commission deferred action on the matter pending investigation by the Engineer to determine the costs involved.

Mr. L. G. Devaney, Director of Aeronautics and representative of the Civil Aeronautics Board, came before the Commission relative to the construction of an emergency aircraft landing field near the junction of the North and South Santiam Highways. He asked the Commission to cooperate with the Civil Aeronautics Board in this undertaking, in accordance with authority granted by the 1941 Legislature. The Engineer read aloud the provisions of Chapter 54, Oregon Laws 1941, covering the matter, and particularly pointed out the provisions thereof which authorize the State Highway Commission to make surveys of proposed sites and to otherwise cooperate in such projects, the cost and expense thereof to be an obligation of the Aeronautics Board. He also pointed out that the land for the proposed site is under the control of the United States Forest Service, and it will be necessary first for the Board of Aeronautics to secure permission from that department to use the land for the purpose intended. Mr. Devaney agreed to do that. Mr. Devaney asked the Commission to authorize preliminary surveys as may be necessary for the project, and offered in behalf of the Board of Aeronautics to pay one half of the cost of such surveys. He stated also that the Board of Aeronautics would pay the entire cost of engineering work and supervision as may be required during the course of construction. In the discussion of this matter, the question arose whether or not an expenditure of state funds involved would be considered by the Public Roads Administration as a diversion of funds; also, whether or not the Highway Commission has legal authority to expend state funds for the purpose. Mr. W. H. Lynch, District Engineer, Public Roads Administration, who was present, advised that his department would not consider such expenditure a diversion of funds. The Commission's Attorney advised that the Commission has legal authority to cooperate in the project if it so desires. After discussion the Commission approved the making of surveys and other engineering work on the basis of Mr. Devaney's offer.

Mr. R. W. Williams, Vice-president of the Werner Timber Company, came before the Commission in regard to the award of the contract for the Forest Boundary-Reed Creek Section of the Siletz Secondary, in Lincoln County, bids for which were received at this letting. He inquired whether or not the Commission received a satisfactory bid, and deposited with the Commission the company's check for \$5,000, in accordance with previous understanding. The Engineer advised that the amount of the low bid received for this work is more than ten per cent in excess of the estimated cost of the job. He explained

that it is the Commission's policy to reject all bids for any particular project, if they exceed such ten per cent allowance, so unless the Commission should modify its present policy at this time, it would have no alternative but to reject the bids. He suggested that it might be advisable to raise the limit to fifteen per cent, in view of the fact that costs are rising, and under present conditions it is difficult to correctly estimate the cost of a job. The Commission deferred a decision in the matter until its afternoon session. (See ahead for final decision.)

The Commission conferred with W. H. Lynch, District Engineer, Public Roads Administration, and R. F. Griefe, Assistant Regional Engineer of the United States Forest Service, relative to the programming of the fiscal year 1942 forest highway funds. Also present and entering into the discussion were Messrs. H. D. Farmer, T. M. Davis, and F. E. Andrews, Senior Highway Engineers of the Public Roads Administration. Mr. Lynch advised that the fiscal year 1942 federal authorization for forest road construction totals \$947,711, of which amount \$60,711 is the estimated requirement for administration and equipment, leaving available for construction projects the sum of \$887,000. After full discussion of this matter, and careful consideration of the eligible projects submitted by Mr. Lynch and the State Highway Engineer, it was mutually agreed to provide a program at this time for only \$510,000 of the amount available. Such action was taken in order to reserve freedom of action with respect to the programming of the balance in the event that conditions should change which might make alterations in the program desirable, when the appropriations are made available. The following projects were selected for the present partial program by unanimous consent: Santiam Highway, 12.2 miles surfacing and bituminous macadam, estimated cost \$160,000; John Day Highway, 8.9 miles surfacing and bituminous macadam, estimated cost \$190,000; Warm Springs Highway, 7 miles grading, estimated cost \$160,000. The following letter, recommending such partial program to the Chief of the Forest Service and the Commissioner of Public Roads Administration, Washington, D. C., was approved and signed on the following day:

At a conference attended by representatives of the Oregon State Highway Commission, the Forest Service, and the Public Roads Administration, it has been agreed to recommend the following partial Forest Highway Program for the State of Oregon for the fiscal year 1942:

Funds available (fiscal year 1942 authorization)	\$947,711
Less Administration and Equipment	<u>60,711 *</u>
Available for Program	\$887,000

*Administrative set-ups already made from F. Y. 1941 funds for F. Y. 1942 expenditure bring the total to the usual 10%.

RECOMMENDED PROGRAM, MAJOR PROJECTS

<u>Project No.</u>	<u>Project</u>	<u>Approx. Length</u>	<u>Funds Programmed Forest Highway</u>	<u>Remarks</u>
SN 23-G5,H3,I3	Santiam Hwy. Surf. & Bit. Surf.	12.2 mi.	\$160,000	Surf.& Bit. Surf.planned on sections H & I, bit. surf.only on section G.
36-A2	John Day Hwy. Surf.& Bit.Surf.	8.9 mi.	190,000	
SN 42-A1	Warm Springs Hwy. Grading	7.0 mi.	160,000	
	Unprogrammed		<u>377,000</u>	
			\$887,000	

Santiam Hwy., Surf. & Bit. Surf., Proj. SN 23-G5, H3, I3, 12.2 miles

Funds recommended for this project contemplate the surfacing with crushed rock or crushed gravel over a 7.8 mile section between the junction with the North Santiam Highway and the end of the surfacing improvement financed with fiscal year 1941 funds. There will also be included the bituminous surfacing of the above-mentioned section as well as a 4.4 mile section of previously surfaced road extending from the junction to Hogg Rock, making a total length of 12.2 miles.

John Day Hwy., Surf. & Bit. Surf., Project 36-A2, 8.9 miles

It is planned under the funds herein recommended to place a crushed rock or crushed gravel surfacing and a bituminous surfacing on the section of road graded with fiscal year 1941 funds as well as on a short adjacent section which has been graded with Federal Aid funds. The recommended improvement will complete the surfacing of the Forest Highway Route as other portions have been resurfaced under earlier programs financed from Federal Aid and other funds, and will make usable the section graded this season.

Warna Springs Hwy., Grading, Project SN 42-A1, 7.0 miles

Funds proposed for this project will finance the grading of the section which was cleared with fiscal year 1941 funds and will make usable a very considerable investment already made in the route east of the national forest boundary which has been financed from Federal Aid and Public lands funds.

Unprogrammed Funds

No program is recommended at this time for the balance of the funds as all parties at the conference, but particularly the State Highway

Commission, wished to reserve freedom of action in respect thereto in the event that conditions should change which might make shifts in the program desirable by the time the appropriations are made available. A supplemental program allocating the balance of the funds will be recommended later when the factors affecting the situation are more definitely known.

The County Court of Morrow County, represented by County Judge Bert Johnson and County Commissioners George W. Peck and L. D. Neill, and County Engineer Harry Tamblin, was present and asked for the surfacing of the Boardman-Stanfield Highway, particularly the oiling this year of the section between Boardman and the Umatilla County line so that this section can be used the coming winter. Judge Johnson explained that the army ammunitions dump, now under construction, is located at the county line, and the most convenient entrance to the site is from the Boardman-Stanfield Highway, at the county line between Morrow and Umatilla Counties, and if this section is oiled it will be of great benefit to the government's operations at the dump, in that it will expedite the hauling of materials needed therefor, and will also be of great benefit to the people of Boardman and vicinity who are employed at the dump and travel this road daily. The Engineer estimated the cost of the project at \$250,000 and advised that in order to do a good job, it will be necessary to provide a leveling course of gravel upon which to construct the finished surface of penetration type macadam. The oiling work, he explained, should be done at the same time that the graveling is done in order to secure a good job, but the Highway Commission is without funds at the present time to finance the work, in view of the fact that Congress failed to pass over the President's veto the appropriation bill which would have provided the moneys that the Commission wanted to use for this work. Chairman Cabell advised that the Commission is ready to proceed with the surfacing work as soon as it knows where the money is coming from to finance it and the Commission concurs in the opinion of the Engineer that the surfacing and oiling work should be done at the same time. This concluded the discussion of this project.

Judge Johnson then asked the Commission for improvements to the Heppner-Spray Secondary Highway, particularly the Hardman Hill Section and the section between Hardman and Rock Creek. County Engineer Tamblin advised that the Hardman grade improvement is four miles in length and involves re-alignment. As to the Hardman-Rock Creek Section, he said that the first six miles to the mouth of Chapman Creek has already been graded and surfaced to proper standards but is in very poor condition. He said that the county would like to have this section oiled and the four-mile section between Chapman Creek and Rock Creek graded, surfaced and oiled, but beyond Rock Creek it is not so important. The State Highway Engineer estimated the cost of the entire improvement at \$130,000. The county court was informed by Chairman Cabell that the Commission is not in position to make any definite commitment at this time but their project will be kept in mind. He explained the difficulties in

securing bids for projects in this class due to the uncertainties of the time. He questioned that the Commission would secure any bids for the work even if the project were advertised. He inquired whether or not this project is the county's first choice of projects for moneys that the Commission may have available for expenditure in Morrow County, and was informed by the county court that this project should have priority over others.

The County Court of Sherman County, represented by County Judge George A. Potter and County Commissioner David Reid, was present and requested the improvement of the Sherman Highway at the undercrossing of the Union Pacific railroad, about two and one-half miles south of Moro. They asked for the straightening of the highway at this point and the remodeling of the underpass as a safety measure, in view of the many accidents that occur at this place. Judge Potter gave as his understanding that it is the plan of the United States Army to move troops over this highway, and if such is the case this improvement would be especially desirable. The Engineer advised that this project has been considered in the formulation of programs for some time, but has not been approved because it is quite low in the priority setup.

Judge Potter also inquired as to the Commission's plans for the construction of a bridge across the Columbia River at Biggs. He was informed by Chairman Cabell that the Commission has no plans as yet for such work, that it is a big problem, and the Commission is now making investigations with respect to this site along with others between the Washington state line and the mouth of the Columbia River.

The County Court of Lane County, represented by County Commissioner W. J. Holland, and County Engineer P. M. Morse, discussed with the Commission the matter of improvement of the Eugene-Swisshome Secondary State Highway (Route F Highway) between Eugene and Veneta, particularly a $1\frac{1}{2}$ -mile section thereof at the railroad crossing near Veneta. Mr. Morse recalled that the Commission received bids for this project at its meeting on August 14, but rejected them as being too high. He urged the Commission to readvertise the project for bids to be received at its November meeting because they want to make certain that the project is done during the 1942 construction season. The State Highway Engineer was instructed by the Commission to readvertise this project as soon as possible.

The Commission discussed the matter of widening Court Street in Pendleton, particularly a petition from residents and property owners of Pendleton urging that immediate steps be taken to widen this street westerly from Main Street as far as is necessary to eliminate the cause of traffic congestion and hazards incident thereto. The Engineer advised that investigation has been made, and it has been found that the street could be widened to provide three lanes for moving traffic and two lanes for parking purposes, at reasonable cost; however, this would involve the removing of trees along this thoroughfare, to which some of the property owners object. He suggested that there are two ways in which this project can go forward, one is under the original plan involving the removal of the trees and the other is to provide two one-way streets, one for north-bound traffic and the other for south-bound traffic. He also said the suggestion has come from the Pendleton City Council

that the parking of cars be prohibited on Court Street, which, in his opinion, would not solve the problem. After discussion, and in view of the conflicting opinion of the local residents, the Commission decided not to program this improvement at the present time, but to let the city try out the nonparking arrangement if it wants to.

A letter was presented from E. D. Myers, Scio, in which the Commission was urged to complete the oiling of the Albany-Lyons Secondary State Highway, from South Scio to what is known as the Elliott Place, a distance of about 2½ miles, which would provide an oiled road throughout its entire length between Scio and Lebanon and points east of Scio. The Engineer advised that this is a meritorious project, and suggested that it be given consideration in the formulation of the 1942 program. The Commission approved the suggestion and instructed the Secretary to so inform Mr. Myers.

A letter was presented from Labor Union Representatives of Hermiston requesting improvement of the county road which extends from Hermiston to the Army Ordnance Depot about seven miles westerly thereof. They explained that this road was programmed for improvement as a W.P.A. project, that bids were received for construction of the same, but were rejected as being too high, and that it is expected that new bids will be taken on September 1. They would like the Highway Commission to assume the responsibility for the improvement in the event that unsatisfactory bids are received at that time. The Engineer advised that this project is not an obligation of the state, inasmuch as the road referred to is a county road. The Commission deferred a decision in the matter, pending information from the W.P.A. whether or not a satisfactory bid was received as a result of the bidding on September 1. (The Engineer reported later in the session that he contacted the W.P.A. office and ascertained that a satisfactory bid was received, and that it is the intention of the W.P.A. to award the contract. In view of this report, the Commission considered the matter satisfactorily disposed of.)

The Engineer reported that the construction budget contains an item of \$20,000 for the improvement of the Midland Secondary State Highway, in Klamath County. However, recent investigations reveal that such amount is insufficient to do a worth-while job. He recommended increasing the budgeted amount to \$45,000, which is the smallest project that it would be economically feasible to construct. The Commission approved such increase.

The matter of providing cabins for the use of employees at the Santiam Junction maintenance patrol station had the attention of the Commission. The Engineer advised that, according to the original plan for this maintenance station, it was intended to employ only unmarried men, and provision was made in the design of the main building to house these men. However, due to the selective draft, it is practically impossible to find men who do not have families, so it is necessary to provide extra housing facilities. He recommended the construction of two-cabin units at an estimated cost of \$3,700 each, including sewer and water lines. The Commission approved the recommendation,

in view of the circumstances, and authorized the Engineer to advertise the project for bids to be received as soon as plans can be prepared.

The Commission discussed the proposed agreement with the University of Oregon, concerning the proposed reconstruction of the Pacific Highway between Eugene and West Springfield. The matter was discussed at considerable length, and the detailed provisions were explained thoroughly by the Engineer and the Attorney from the engineering and legal standpoints. The Commission approved the arrangements provided therein. The agreement was thereupon signed. (See copy of agreement for details.)

Mr. Harvey Wells, Portland, was present and discussed briefly with the Commission the matter of protecting the Oregon approach to the Interstate Bridge from sabotage. He said that while the Jantzen Beach Resort was in operation there was not much chance of sabotage, because so many people were around at all times during the day and night; however, the resort is closing down soon, and such protection will not be afforded, and anyone desiring to destroy the bridge approach would have no difficulty in doing so. He suggested the employment of a watchman at this place as a protective measure. The Commission thanked Mr. Wells for his suggestion and instructed the Engineer to have the sectionman inspect the premises frequently.

The Commission adjourned at 12:00 noon and reconvened at 2:00 p. m. in the same room with the same persons present and participating.

Mr. R. W. Williams of the Werner Timber Company reappeared before the Commission in regard to the award of the contract for grading, surfacing and bituminous macadam on the Forest Boundary-Reed Creek Section of the Siletz Secondary Highway, in Lincoln County. It was again pointed out by the Engineer that the low bid received for this work at the morning session is more than ten per cent in excess of the estimated cost of the project. The Commission discussed the advisability of awarding the contract to the low bidder, notwithstanding the excessive bid, and decided to reject the bids and to readvertise the project. Mr. Williams's check for \$5,000 was thereupon returned to him.

Mr. Williams inquired if the state will furnish 3,500 cubic yards of maintenance rock, if his company will agree to place this rock on the highway and maintain the highway. The Commission considered it the responsibility of the State Highway Department to maintain roads that belong to the state. Chairman Cabell inquired whether or not the Werner Timber Company is willing to renew its offer to pay \$5,000 toward the cost of the work, if the project is readvertised and a satisfactory bid is received. Mr. Williams replied that the company would renew this offer until the November meeting of the Commission, but would expect to receive credit for any amount that the company might spend by way of maintenance of the road in the meantime, and that he would write the Commission to that effect. After further discussion the Commission authorized and instructed the Engineer to provide maintenance rock as may be necessary to keep the road in good condition until such time as the contract for the improvement of the road has been awarded. He was also instructed to

maintain the road in a passable condition, and to readvertise the project for bids to be received at the November meeting of the Commission.

The Commission then discussed the advisability of modifying its policy with respect to the award of contracts, when the low bid exceeds the estimated cost of the work by more than ten per cent. The Commission decided to adhere strictly to its present policy in this regard the first time a project is advertised. If more than one bid is received on a project as a result of advertising the same a second time, the Commission will either reject all bids or award the contract to the low bidder, if the amount of such low bid does not exceed the estimated cost of the project by more than fifteen per cent. In the event only one bid is received as a result of advertising the project the second time, the Commission will either reject the bid or award the contract to the bidder, if his bid does not exceed the estimated cost of the project by more than ten per cent. The Commission ordered that such policy be followed hereafter until changed by order of the Commission.

Mr. C. A. Beattie, representative of the Bethlehem Steel Company, Portland, came before the Commission in regard to the hauling of piling, involving overall lengths of 135 feet, over the Territorial Secondary State Highway and the Pacific Highway, from Lorane to Anlauf. He explained that J. H. Baxter and Company have a contract with the Bethlehem Shipbuilding Corporation to furnish a quantity of piling, which is to be used in connection with the construction of destroyers and cruisers for the United States Navy at its San Francisco shipbuilding plant, and that the timbers for this piling were purchased from the Puget Timber Company of Oregon and are to be delivered to the railroad line for shipment by E. G. Whipple, Drain, Oregon. These timbers, he said, are being secured in the Lorane district west of Eugene, and the railroad loading point is at Anlauf, requiring them to be transported over the highways above mentioned. He further advised that Mr. Whipple's request for a permit to haul the piling over said highways has been denied because it is not possible to transport them without crossing over the center line of the highway. He urged the Commission to authorize the movements in order to facilitate the federal government's defense program. After discussion the Commission approved the request subject to conditions and requirements to be designated by the Engineer. The Engineer was instructed to arrange for a test run of one load of piling, which shall be accompanied by a state police officer as well as a representative of the state highway department. The purpose of this test run is to ascertain just what must be done in order to properly protect and safeguard general highway traffic.

The Engineer reported that construction work on the new section of the Wolf Creek Highway between Sunset Camp and Davies has progressed so far that it will be possible to open this section for general public use on Saturday, September 6, 1941. He recommended the opening of the highway for such use at noon, Saturday, September 6, and that announcement be made to that effect to the press and to the Oregon Motor Association. The Commission approved the recommendation.

The Commission discussed the bid received from Mr. Andrew Stambuck at the morning session, for the operation of the Enegren Ferry across Coos River on the Coos River Secondary Highway, Coos County. The Engineer advised

SEP 4 1941

that loading on the ferry, under the present contract, is limited to ten tons, but that provision was made in the new specification for fifteen-ton loads, and on that basis Mr. Stambuck is asking \$500 per month more than the state is paying him under the old contract for the same service. He advised that the present contract contains provision for renewal on the same basis if the Commission so desires. He also pointed out that the only request received for the increased loading is from the operator of a small sawmill on Upper Coos River, who hauls lumber into Coquille, and who alleges that he cannot do this with profit unless the load limit is raised to fifteen tons. The Commission considered that an additional \$500 per month is an excessive amount to pay for the operation of the ferry for the benefit of one small operator, and accordingly rejected the bid. However, the Engineer was instructed to negotiate with Mr. Stambuck for the renewal of the present contract on both ten- and fifteen-ton load basis.

The Commission discussed the proposed agreement with the University of Oregon and the Eugene Power Company, relative to the reconstruction of the Pacific Highway between Eugene and West Springfield. In this connection the Attorney pointed out that the land that the state is purchasing as right of way for the relocated Southern Pacific railway tracks is being deeded to the railroad company by warranty deed, and it is his understanding that the railroad company is arranging to convey to the state the old railroad right of way by similar deed, although he has not as yet received definite information as to whether or not that could be accomplished, but he expects to receive such information on the following day. After discussion the Commission signed the agreements, but ordered that all copies thereof be retained until the right of way with the Southern Pacific Company has been satisfactorily disposed of and until the Commission releases them.

Mr. M. L. Hallmark, attorney, Roseburg, came before the Commission and requested in behalf of certain Douglas and Coos County log-hauling operators the privilege of truck-hauling logs over state highways during Saturday afternoons and Sundays for the next sixty days. He explained that these log haulers have contracts to supply logs to the Smith Wood-Products Company at Coquille, but have not been able to deliver them up to expectations due to adverse weather conditions, and the mill now has in its pond a supply for only three-weeks' operation. He further advised that one of the log haulers has 5,500,000 feet of timber cold decked in the woods, and two others each have 4,000,000 feet cold decked in the woods which must be moved as rapidly as possible when weather will permit. He declared this to be an emergency situation, and urged the Commission to give favorable consideration to the request. The matter was discussed at some length, but a definite decision thereon by the Commission was deferred until later in the session. (See record of action on following day.)

At 3:00 p. m. Chairman Cabell announced the awards of contracts as follows for which bids were opened and read at the morning session, such awards having previously been approved by the Commission by unanimous vote:

"Belknap Springs-Fourmile Butte Rock Production Project on the the McKenzie Highway, in Deschutes and Lane Counties. A. S. Wallace,

Roseburg, submitted the only bid for this project, in the amount of \$28,450.00. The Commission rejects this bid.

"Hood River Rock Production Project on the Columbia River and Mt. Hood Highways, in Hood River and Wasco Counties. A. S. Wallace, Roseburg, submitted the low bid for this work, in the amount of \$16,300.00. Lofts & Son, Hood River, submitted the second-low bid, in the amount of \$16,677.50. There were four higher bids. The Commission awards this contract to A. S. Wallace, at his low bid of \$16,300.00.

"Salt Creek-Hanley Ranch Section of the Little Butte Secondary Highway, in Jackson County. 4.07 miles surfacing and oiling. Norris Bros., Seattle, Washington, submitted the low bid for this project, in the amount of \$48,660.00. J. C. Compton, McMinnville, submitted the next-low bid, in the amount of \$51,638.00. There were no other bidders. The Commission refers both bids received for this project to the Engineer with power to award the contract to the low bidder when certain conditions have been satisfied.

"Madras-Juniper Butte Section of The Dalles-California Highway, in Jefferson County. 10.40 miles grading. Leonard & Slate, Multnomah, submitted the low bid for this work, in the amount of \$82,423.00. G. D. Lyon & Co., Spokane, Washington, submitted the second-low bid, in the amount of \$83,507.00. There were four higher bidders. The Commission refers all bids received for this project to the Engineer with power to award the contract to the low bidder when certain conditions have been satisfied.

"Beatty-Paradise Creek Rock Production Project on the Klamath Falls-Lakeview Highway, in Klamath County. A. S. Wallace, Roseburg, submitted the low bid for this work, in the amount of \$23,372.50. Rogers Construction Co., Dayton, Washington, submitted the only other bid for the project, in the amount of \$25,847.50. The Commission awards this contract to A. S. Wallace, at his low bid of \$23,372.50.

"Swishome Rock Production Project on the Siuslaw and Alsea-Deadwood Highways, in Lane County. A. S. Wallace, Roseburg, submitted the only bid for this project, in the amount of \$18,358.00. The Commission refers this bid to the Engineer with power to award the contract to A. S. Wallace when certain conditions have been fulfilled.

"Forest Boundary-Reed Creek Section of the Siletz Secondary Highway, in Lincoln County. 3.5 miles grading, surfacing and bituminous macadam. C. J. Eldon, Portland, submitted the low bid for this work, in the amount of \$135,337.00, based on the use of tar. He also submitted a bid of \$135,381.00, based on the use of asphalt. E. C. Hall Co., Eugene, submitted the only other bid for this project, in the amount of \$136,571.00, based on the use of asphalt. He

did not submit a bid based on the use of tar. The Commission rejects the bids received for this project.

"Gilliam County Line-Umatilla Rock Production Project on the Columbia River Highway, in Morrow and Umatilla Counties. A. S. Wallace, Roseburg, submitted the low bid for this project, in the amount of \$16,783.50. A. H. Saxton & Sons, Corvallis, submitted the next-low bid, in the amount of \$16,800.00. There were four higher bidders. The Commission awards this contract to A. S. Wallace at his low bid of \$16,783.50.

"Morrison Street Bridge on the Pacific Highway West, in Multnomah County. Reconstruct westerly steel truss of existing Morrison Street Bridge, construct two reinforced concrete approach spans, pedestrian subway, and miscellaneous retaining walls. Birkemeier & Saremal, Portland, submitted the low bid for this work in the amount of \$106,582.00. Gilpin Construction Co., Portland, submitted the second-low bid, in the amount of \$108,425.35. There was one higher bidder. The Commission awards this contract to Birkemeier & Saremal at their low bid of \$106,582.00.

"West Unit of Sherars Grade Section of Sherars Bridge Secondary Highway, in Sherman County. 1.61 miles grading and topping. Norris Bros., Seattle, Washington, submitted the low bid for this work, in the amount of \$16,245.50. Leonard & Slate, Multnomah, were next low, with their bid of \$16,270.00. There were two higher bidders. The Commission refers all bids received for this project to the Engineer with power to award the contract to the low bidder when certain conditions have been satisfied.

"Pendleton-Meacham Rock Production Project on the Old Oregon Trail Highway, in Umatilla County. A. S. Wallace, Roseburg, submitted the low bid for this project, in the amount of \$17,990.00. River Bend Sand & Gravel Co., Pendleton, submitted the next-low bid, in the amount of \$18,430.00. There were two higher bidders. The Commission refers all bids received for this work to the Engineer with power to award the contract to the low bidder when certain conditions have been satisfied.

"Warm Springs River-Mill Creek Section of the Warm Springs Highway, in Wasco County. 6.91 miles grading. Max. J. Kuney, Spokane, Washington, submitted the low bid for this project, in the amount of \$117,746.00. G. D. Lyon, Spokane, Washington, submitted the next-low bid, in the amount of \$138,802.00. There were seven higher bidders. The Commission refers all bids received for the project to the Engineer with power to award the contract to the low bidder when certain conditions have been fulfilled.

"Furnish ferry service at Enegren Crossing of the Coos River on the Coos River Secondary Highway, in Coos County. Andrew Stambuck, Marshfield, submitted the only bid, in the amount of \$1,369.60 per month. The Commission rejects this bid.

Mr. C. A. Hart, of the firm of Carey, Hart, Spencer & McCulloch, legal counsels for the Oregon Electric Company, and Mr. A. J. Witchell, chief engineer of such company, came before the Commission in regard to the installation of a railroad crossing signal on the Tualatin Valley Highway at Beaverton. Mr. Hart was spokesman. He said that he appreciates the fact that the federal funds that were provided for projects of this kind have been programmed; however, a very serious condition exists at this crossing which, in his estimation, amply justifies an expenditure of state money to pay for a signal installation. He said that until railroad service along Front Avenue in Portland was discontinued the situation at the Beaverton crossing was not so bad; however, railroad traffic at this crossing has been doubled since then, due solely to the Front Avenue Project, creating a very hazardous condition, which will increase with the increase in volume of highway beach travel. He declared that the expense of the installation should be paid with public funds, because the railroad company was in no way responsible for the condition. The State Highway Engineer estimated the cost of the installation at approximately \$2,500 or \$3,000. The Commission agreed to consider the railroad company's request, and to let Mr. Hart know its decision on the following day. (See record of Commission's action on following day.)

Mr. Dow Walker, representing the C. D. Johnson Lumber Company, Toledo, and Mr. G. K. Litchfield, Newport City Attorney, came before the Commission and asked for the improvement of the city street which extends from the Oregon Coast Highway, in Newport, to the Newport docks, and for the improvement of the Bay Front road to a certain log dump. Mr. Walker advised that considerable log hauling is being carried on over this city street, which was not constructed to carry such heavy traffic, and as a consequence the street has gone to pieces; in fact the city council recently adopted an ordinance prohibiting log hauling on this street. He further advised that logs are being dumped into the bay at this point, and are then moved to the C. D. Johnson Lumber Company's mill at Toledo. He pointed out that this street is the only one available over which to transport logs to the bay, and urged the Commission to repair it and maintain it in good condition. Mr. Litchfield declared that a real emergency exists; that the street is in very bad condition; and the City of Newport has neither money nor facilities to effect its repair. He said that the city council was reluctant to prohibit the use of the street by log haulers, but was forced to do so in order to preserve the street for the use of other traffic and to avoid the occurrence of accidents. The State Highway Engineer suggested that the Commission should do something in Newport to correct this situation, and recommended an expenditure of state funds for the purpose on the same basis that the Highway Department is maintaining city streets in Albany and Canby. After discussion, the Commission instructed the Engineer to make an investigation of the conditions, and authorized him to proceed with repair work as may be necessary in the event he considers that a real emergency exists.

A delegation from Gold Beach, consisting of County Judge A. H. Boice, Representative Roy E. Carter, and Jay Moltzner, Attorney, representing the Chamber of Commerce was present. Judge Boice stated that when the Gold Beach delegation appeared before the Commission some time ago, and urged the

retention of the present route for the highway through this town, they were not particular about the width of the improvement; and, while they preferred a right of way 80 feet wide, they did not object to an improvement on a 60-foot right of way. However, since then conditions have changed, because some of the business establishments affected by the highway improvement have been destroyed by fire, and the people of Gold Beach now insist on an improvement on an 80-foot right of way, as they feel they are entitled to an 80-foot street. Mr. Carter said that one of the buildings that burned belonged to him, and he has plans to rebuild, but doesn't want to do so until he has definite information about the highway, particularly as to which location the Commission intends to adopt, how wide the right of way is to be, and when the job is to be done. He also said that there are other proposed developments in Gold Beach that are hanging fire until the Commission makes its decision. As to the extra right of way needed, he said that there are quite a number of property owners on his side of the street who will donate property for this purpose. He also urged an 80-foot right of way from the north end of town to the highway fill at Dean Street. He gave as his thought that the economical thing to do is to provide an 80-foot street through this place. Mr. Moltner also spoke for an 80-foot right of way in behalf of the Chamber of Commerce. He said that their purpose in coming before the Commission at this time is primarily to find out where the highway is to be located.

Chairman Cabell advised that the Commission, at a previous meeting, decided to reconstruct the highway on the present route, and on a 60-foot width right of way, and instructions to that effect were given to the Engineer, who is now preparing plans on such basis; further, that it was the intention of the Commission to go ahead with the project just as soon as moneys could be found with which to finance it; however, if the Commission should now change to an 80-foot right of way, the work will have to be deferred. In any event, the Commission will have to have more time to study the situation. He added that so far as he personally is concerned he is still favorable to a 60-foot street, although he doesn't want to decide definitely until he has had an opportunity to discuss the matter with Commissioner Clough. The matter cannot be decided today, he said, but, if possible, a decision will be reached at the next meeting of the Commission. He agreed, in the meantime, to make a personal inspection of the premises if he can find time to do it.

Judge Boice then asked the Commission for the improvement of Cape Blanco Secondary State Highway. He was informed by the Engineer that so far as the Highway Commission is concerned this project has been approved for federal aid secondary moneys, and that the work would go forward next year, if moneys of such class become available.

Mr. Frank J. Van Dyke, City Attorney, Ashland, and Ralph E. Koozer, President of the Pacific Highway Association, and member of the Ashland City Council, came before the Commission in regard to the improvement of the Pacific Highway at the Plaza Corner, in Ashland. They inquired as to the status of this project, and urged the Commission to expedite construction, because they have received reasonable assurance that the proposed army cantonment at Medford will be authorized within the next thirty days and, in their estimation,

the highway improvement should be definitely settled before work is commenced on the cantonment project. They were informed by Chairman Cabell that the Commission plans to advertise this project for bids about the first of the coming year, if federal funds are available to finance it; however, Congress failed to pass the bill that would have provided funds for projects of this kind, and the Commission has been in somewhat of a quandary as to what to do. He gave as his thought that the work should go forward, notwithstanding that it might be necessary to finance it with state funds. Commissioner Oliver concurred. The Attorney was thereupon instructed to rush the acquisition of right of way, and to secure options for the same as soon as possible. The Engineer was authorized and instructed to advertise this project for bids as soon as the options have been secured and the purchase prices approved.

Mr. L. B. Sandblast, Attorney, Portland, representing the Oregon-Washington Bridge Board of Trustees, was present and discussed briefly with the Commission matters pertaining to the proposed bridge across the Columbia River near Tongue Point. He advised that the army engineers disapproved the original site for this project because a bridge at such location would interfere with the operations of the Tongue Point Naval Base, but have indicated they would not object to a bridge located above the Naval Base. The site preferred by the bridge committee, he said, is situate about five miles east of Svensen, and involves a physical cost of approximately \$3,100,000. He pointed out that a bridge in such location would necessitate the construction of certain approach roads, and his purpose in coming before the Commission at this time is to ask the Commission to cooperate in building the same. He filed with the Commission a map of the proposed location and a copy of a letter from Robinson and Steinman, Consulting Engineers, directed to Guy Boyington, County Judge of Clatsop County, and Secretary of the Oregon-Washington Bridge Board of Trustees, with respect to the project, and advised that he was simply bringing this entire matter to the Commission's attention at this time for its information, so it can have the data available in its study of the situation.

The Commission adjourned at 5:00 p. m. and reconvened at 9:00 p. m. in Room 415, (Imperial Room), Imperial Hotel, with the same persons present and participating.

Mr. Merle Chessman, Chairman of the Advisory Committee on Publicity Matters, was present and reported the decisions reached by the Advisory Board, at a meeting this day, with respect to the activities of the Travel and Information Department for the year 1942. Mr. Ben Titus, Acting Director of the Travel and Information Department, was also present. It was the recommendation of the Board, Mr. Chessman said, that the State Highway Commission appropriate for such activities in 1942, the sum of \$100,000, which is the same amount that was appropriated for this purpose in 1941. Such recommendation, he said, is conditioned, and if it develops that there is a decrease in the revenues derived by the State Highway Commission from the gasoline tax fund, then the Advisory Board is inclined to the belief that expenditure for publicity should be likewise curtailed.

The Advisory Board also recommends, he said, that the State Highway Commission retain the services of Botsford, Constantine and Gardner as its

advertising agency to handle the Commission's Travel and Information Department publicity matters for another year on the same basis as heretofore. However, the Board believes that, starting with next year, all advertising agencies interested should be given an opportunity to secure this business, and that such agencies should be given 90-days' notice in which to formally present a program of activity, with the understanding that the agency submitting the program that the committee considers best for the state and the State Highway Department shall be selected as the official agency to handle such publicity matters for the state during 1943. He thanked the Commission for its indulgence, and for the opportunity of serving on this committee, and advised that formal presentation of his recommendation would be made by Mr. Titus, Acting Manager of the Travel and Information Department, on the following day.

Mr. Cabell thanked Mr. Chessman for his personal service, and for the services of the other members of the Board in connection with this matter, and assured Mr. Chessman that the Commission will accept and assume full responsibility for the carrying out of the recommendations. Commissioner Oliver concurred.

The Commission also conferred with the following members of the Oregon Trail Centennial Advisory Commission: Philip H. Parrish, Chairman, Portland; J. Roy Raley, Pendleton; and Kenneth L. Hicks, The Dalles. Plans for the 1943 Oregon Trail Centennial, and the expenditure of \$15,000 of state funds appropriated by the 1941 Legislature therefor, were discussed. Mr. Parrish outlined briefly a general plan that the committee has in mind, which includes the appointment of a special committee in each city and town that it is anticipated will take an active part in the Centennial activities, to arouse enthusiasm for the Centennial and to provide entertainment for prospective visitors. This matter has aroused considerable interest in the City of Portland, he said, and Mayor R. E. Riley has appointed such a committee to handle it at this place, which committee is represented at this meeting by Mr. Walter May.

He also reported briefly on his recent trip to Denver in attendance at a meeting of the National Pioneer Trail Association, advising that considerable interest was shown at such meeting in the Oregon Trail Centennial, and, in view thereof, it is quite likely that the association will hold its 1943 meeting in Portland. Chairman Cabell advised that the State Highway Commission is in accord with the objectives of the Centennial Committee as outlined; however, is of the belief that a program for the expenditure of the state's \$15,000 should be arranged as soon as possible. He gave as his understanding that the committee does not intend to budget the expenditure of \$15,000 until the program has been arranged. Mr. Parrish replied that that was correct, and that they expect to work up at least a tentative program within the next couple of months. There will be no rapid disbursement of this money, he said, and the committee considers it a promotional fund, to be used for promotional purposes, and not to pay the cost of any particular celebration or entertainment. The idea, he added, would be to first determine the interest of the various communities, correlate the ideas of the several communities, and then decide where and how to spend the money. He declared that perfect coordination of the several communities must be had, otherwise there will be conflict.

Expressions were asked of the other members of the committee. Mr. Raley gave as his thought that each community would be interested and would have enough civic pride to put on some sort of a program. However, in his estimation, Portland should be the center of activities, and should provide the biggest attraction as an objective to tourists. The Portland entertainment, he said, should be conducted throughout the summer months. He also gave as his thought that the \$15,000 of state funds should not be expended for the benefit of any particular community, but should be general, letting each community finance its own contribution.

Mr. Hicks reported considerable enthusiasm in The Dalles. The County Court of Wasco County, he said, is particularly interested, and now has under consideration a place to hold the celebration at this place. He brought up the question of time of holding the local celebrations.

It was the consensus of opinion that the celebration in the city of Baker should be first, the others to follow; and that definite dates for each celebration should be decided, so they can be used in connection with publicity matters.

Mr. May stated that he represents Mr. Paul McKee, who is Chairman of the Portland Committee. He endorsed the plans as so far outlined at this meeting. He suggested, however, that it would be a good idea to erect markers along the highway pointing out historic locations, for the information and guidance of tourists who are interested in such matters.

Mr. Parish suggested the employment of someone to work on this project, giving at least part of his time at the start, and full time later on; this person, of course, to work under the general direction of Mr. Titus, Acting Director of the Highway Department's Travel and Information Department.

Mr. Merle Chessman, who was present, endorsed the employment of a full-time man of high-class caliber. He gave as his thought that the committee should have more than \$15,000 to work with, and suggested that the 1943 Legislature be asked to appropriate additional funds.

After further discussion, it was agreed by all that the first thing to be done is for the Portland Committee to work up a program for the City of Portland. A meeting of the members of the Centennial Commission will then be called, including committee members from the local communities, to arrange a state-wide plan. The question of employment of a full-time man to handle the project was deferred until the Portland Committee has had an opportunity to discuss and formulate plans for the Portland celebration.

This concluded the conference, following which at 10:20 p. m. the Highway Commission adjourned, to reconvene on the following morning in the same room.

Portland, Oregon, September 5, 1941

The State Highway Commission reconvened at 9:00 a. m. in Room 415 (Imperial Room) Imperial Hotel. Present were:

Henry F. Cabell, Chairman
Herman Oliver, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

Commissioner Clough was absent.

The Attorney brought up for discussion matters pertaining to the federal government's condemnation case to acquire a portion of the Lower Columbia River Highway which is needed in connection with the development of the Tongue Point Naval Base near Astoria. He advised in this connection that the government has authority to condemn such right of way and other state-owned property if it can show a superior use for the property, and gave as his opinion in this particular instance that the government would have no difficulty in making such showing. Title to the property, he said, is now vested in the federal government because of the filing of the complaint and a declaration of taking and the only question remaining is the amount of consideration that the government should pay for it, and in order to decide this feature the government authorities have asked for another conference with the Commission to be held as soon as possible. He also advised that the Clatsop County Court has refused to join with the state in the filing of a joint answer in the condemnation complaint, because the court is of the belief that the compensation to be paid for the property should be limited to the amount of the contribution to be made by the Work Projects Administration toward the cost of building the new highway, and has elected to file a separate answer. It was the Commission's decision that the amount of the consideration to be paid by the government should be the total estimated cost of the highway revision as set forth in the Attorney's answer. The Commission thereupon approved a conference with the government authorities on Thursday, September 12, for further discussion of the matter and authorized Chairman Cabell to act for the Commission at such conference.

The Engineer brought up for discussion the matter of permitting log haulers to transport loads consisting of one extremely large log as was requested by a delegation that appeared before the Commission at a previous meeting. He said that computations reveal that it would be possible to permit loads of this type without overstressing bridges provided the average diameter of the log does not exceed $7\frac{1}{2}$ feet and the length of the log does not exceed 25 feet. He recommended in view thereof that the Commission permit such loads as a trial proposition for the next 60 days provided the average diameter of the log is not greater than 7 feet and 6 inches and the maximum diameter of the log does not exceed 8 feet and provided further that the gross weight of load and hauling equipment does not exceed 59,400 pounds. The Commission approved the recommendation.

The Attorney reported that the state had already acquired from Mr. Louis Roeygens and wife right of way for the Wolf Creek Highway and in the transaction the state acquired the entire 50 acres, and is now acquiring from Mr. Emil H. Duyck and wife right of way for the same highway through property which joins the Roeygens' property. He further advised that there is a 10-acre tract of the Roeygen property on which is located the farm buildings which Mr. Duyck will take in exchange at a consideration of \$4,000 as part settlement for right of way through his property. The Attorney recommended a settlement with Mr. Duyck for 10 acres at a consideration of \$4,000. The Commission approved the exchange.

The Attorney requested authority to acquire certain parcels of real property that are needed for various highway improvements. He submitted a list of such properties, together with amounts that he recommended be paid for each. After careful consideration of each item the Commission approved the request and by unanimous vote adopted the following resolution in regard thereto: (See note following the resolution with respect to several of the listed items.)

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed:

NOW, THEREFORE, BE IT RESOLVED that the several offers, or bases of settlement hereinafter enumerated be, and the same hereby are, approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

File No. 9446, Paul Schuttpelz:-This settlement was approved as to price, if an exchange of properties can be effected. The Attorney was instructed to ascertain whether or not it would be possible for the state to secure a one-half acre tract of land from the United States Forest Service to trade to Mr. Schuttpelz, it appearing that Mr. Schuttpelz is unable to secure the one-half acre

SEP 5 1941

from the Forest Service direct. Mr. Schuttpelz offers to donate his property to the state if the state can secure for him without cost the one-half acre of national forest land. (See Mr. Schuttpelz letter dated August 22, 1941, for details.)

File No. 9150, Gardiner Lumber Company:- This settlement was approved by the Commission as to price; however, the Commission desired a different breakdown of the items making up the total, so as to show the true facts of the land value and damages. (The amount shown in the resolution is the breakdown furnished by the Assistant Attorney for the record.)

File No. 9576, Carl Barclay:- The Commission approved this settlement and authorized the purchase of an additional area, if it can be purchased at the same rate of \$200 per acre, it being understood that the additional acquisition will satisfy all claims which Mr. Barclay may have by reason of past trespass on his property, et cetera.

The Commission also discussed the matter of acquiring additional properties needed in connection with the proposed improvement of the Pacific Highway between Eugene and Springfield, particularly land needed to affect a change in the millrace. Details concerning each of these settlements were explained by Mr. C. W. Parker, Right-of-Way Buyer. After full discussion of the matter, the Commission approved the payments as follows:

<u>File No.</u>	<u>Owner</u>	<u>Purpose</u>	<u>Area</u>	<u>Payment Approved</u>
9243	Eyler & Gerda Brown	R/W	8,200 sq.ft.	\$450.00
9244	C. Irena Williams	"	3,000 " "	600.00
9245	Howard A. and Marjorie W. Hall	"	4,000 " "	700.00
9246	Ida V. Stam	"	6,700 " "	350.00

The Attorney also requested authority to condemn certain parcels of real property that are needed for highway purposes, and concerning which he has been unable to reach satisfactory settlements. He presented a list of such properties and recommended the following offers in condemnation:

<u>File No.</u>	<u>Name</u>	<u>Purpose Required</u>	<u>Recommended Offer</u>
9647	Frank Nygren, et al.	Gravel Pit	\$ 500.00
9648	Reed Charley, et ux.	" "	1,150.00

8584	Pacific Power & Light Co.	"	20.00
8632	J. H. Peterson, et ux.	"	5.00

*Inasmuch as this is a stockpile site, condemnation will not be brought, but the amount of the offer for the property was approved,

After careful consideration of each item the Commission approved the request and by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, the State Highway Commission is authorized to locate, relocate, construct, reconstruct, maintain, widen, straighten, and otherwise improve state highways, both primary and secondary, and said Commission is also authorized to construct shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, and snow fences, and is authorized to acquire quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, and broadcasting stations, and is further authorized to develop, construct, improve, operate, and maintain parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, and other places of attraction and scenic value; and

WHEREAS, said Highway Commission is authorized to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property, or any interest therein, necessary or deemed by the Highway Commission necessary for the accomplishment of any and all of the foregoing things; and

WHEREAS, in the judgment of the Highway Commission the several tracts or parcels of land hereinafter described are each and all necessary for the specific and particular purposes hereinafter specifically set forth;

NOW, THEREFORE, BE IT AND IT WHEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the Commission does hereby find and declare that the several parcels of real property hereinafter described are each and all necessary for the accomplishment of the purposes hereinafter expressly and specifically set forth, which said real properties and the specific purposes for which the same are being acquired are described as follows, to wit:

Real property owned by Frank Nygren, which property is located in the southwest quarter (SW $\frac{1}{4}$) of the northwest quarter (NW $\frac{1}{4}$) of Section 13, Township 36 South, Range 1 East, W. M., in Jackson County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 1 and is further identified in the records of the Highway Commission as file R 9647, and which property is being acquired for the purpose of securing roadbuilding materials therefrom for use in connection with the improvement of the Little Butte Highway;*

Real property owned by Reed Charley and Myrtle Charley, husband and wife, which property is located in the south half (S $\frac{1}{2}$) of the northeast quarter (NE $\frac{1}{4}$) of Section 14, Township 36 South, Range 1 East, W. M., in Jackson County,

Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 2 and is further identified in the records of the Highway Commission as file R 9648, and which property is being acquired for the purpose of securing roadbuilding materials therefrom for use in connection with the improvement of the Little Butte Highway;*

Real property owned by H. S. James, which property is located in the west half ($W\frac{1}{2}$) of the southeast quarter ($SE\frac{1}{4}$) of Section 35, Township 3 South, Range 14 East; in the west half ($W\frac{1}{2}$) of the northeast quarter ($NE\frac{1}{4}$) of Section 2, Township 4 South, Range 14 East; and in the south half ($S\frac{1}{2}$) of Section 36, Township 3 South, Range 14 East and in the northeast quarter ($NE\frac{1}{4}$) of Section 1, Township 4 South, Range 14 East, W. M., in Sherman County, Oregon, and is more particularly described on the attached sheets and designated as Parcels Nos. 3, 4, and 5 and is further identified in the records of the Highway Commission as file R 8810, and which property is being acquired for right of way purposes in connection with the Sherar's Bridge Highway;*

Real property owned by the Ada Kautz Estate, which property is located in the northwest quarter ($NW\frac{1}{4}$) of Section 7, Township 9 South, Range 12 East, W. M., in Jefferson County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 6 and is further identified in the records of the Highway Commission as file R 9565, and which property is being acquired for right of way purposes in connection with the Warm Springs Highway;*

Real property owned by Snowden A. White, et ux., and William Brownhill, which property is located in Lot 5 of Block 6, Depot Addition to Madras, in Jefferson County, Oregon, and is more particularly described on the attached sheets and designated as parcel No. 7 and is further identified in the records of the Highway Commission as file R 8631, and which property is being acquired for right of way purposes in connection with The Dalles-California Highway;*

Real property owned by J. H. Peterson, et ux., which property is located in Lots 2 and 3 of Block 7, Depot Addition to Madras, in Jefferson County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 8 and is further identified in the records of the Highway Commission as file R 8632, and which property is being acquired for right of way purposes in connection with The Dalles-California Highway;*

Real property owned by Louise Olson, which property is located in the southwest quarter (SW $\frac{1}{4}$) of the northwest quarter (NW $\frac{1}{4}$) of Section 12, Township 11 South, Range 13 East, W. M., in Jefferson County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 9 and is further identified in the records of the Highway Commission as file R 8573, and which property is being acquired for right of way purposes in connection with The Dalles-California Highway;*

Real property owned by the Pacific Power and Light Company, which property is located in Lot 1, Block 1, Northwest Townsite Company's First Addition to Madras, situated in Section 11, Township 11 South, Range 13 East, W. M., Jefferson County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 10 and is further identified in the records of the Highway Commission as file R 8584, and which property is being acquired for right of way purposes in connection with The Dalles-California Highway;*

Real property owned by T. B. Waller, et ux., which property is located in Government Lots 4 and 5 and in part of the Jas. H. Twogood D.L.C. No. 37 in Section 11, Township 34 South, Range 6 West, W.M., in Josephine County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 11 and is further identified in the records of the Highway Commission as file R 8868A, and which property is being acquired for right of way purposes in connection with the Pacific Highway.*

2. That the Commission does hereby find and declare that each of the said described parcels of real property is necessary and acquisition of the same by the State is required for the specific purposes hereinabove set forth, and the said properties are being acquired for the express and specific purposes in this resolution set forth.

3. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and

*(The detailed descriptions of the respective parcels of real property mentioned in this resolution are attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 16, under the heading "Real Property Condemnation Resolutions", and said descriptions by this reference are made a part of this minute entry to the same extent as if copied in full herein.)

acquisition of said real properties, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of the said real properties, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property or properties, whether said properties be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

4. That J. M. Devers, Attorney for the State Highway Commission, be and he is hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement or agreements can be reached, then it is hereby further resolved that J. M. Devers, Attorney for the State Highway Commission, be and he hereby is requested to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated.

5. That this resolution be entered in full in the minutes and records of this Commission.

Chairman Cabell brought up for discussion the matter of granting permits for movements over state highways of combination truck and trailer units, having an overall length in excess of the Oregon statutory length limits. He gave as his understanding that the "Office of Production Management" is going to ask that overlength loads be permitted in order to facilitate the government's defense program. During the discussion he expressed his thought that it might be satisfactory to grant such permits if the request comes from a national agency, but not otherwise. Commissioner Oliver concurred.

In this connection the Secretary presented resolutions from the Oregon State Grange and the Northwest Trailer Manufacturing Association, and a letter from the Portland Draymen and Warehousemen's Association, requesting that the State Highway Commission grant permits of this character and permit operation through Oregon of equipment having the size and weight limits that are legal in adjoining states. The Commission took no action on these communications.

Mr. O. W. Bentley, Portland, representing the Crown Willamette Lumber Company, was present and asked the Commission to authorize log hauling over the Netarts Secondary Highway, at least in an amount sufficient to demonstrate to government officials the value of certain spruce timber taken from their holdings in this vicinity. The Engineer advised that this road was not constructed to bear up under log hauling traffic; furthermore, the bridge located a short distance out of Tillamook is in very bad condition,

and is now posted for ten-ton loads. He further advised that he has explained this situation to Mr. Bentley, who has agreed to dump the logs into the river at the west end of the bridge, so as to avoid the use of the bridge entirely. Mr. Bentley estimated that they would have about thirty loads of logs to haul at this time, and agreed to limit the loads to one log each, and to not more than two logs if the logs are small. He urged the Commission to grant this request as a trial proposition. The Engineer recommended approval of the request on such basis, provided a maximum of not more than forty loads are hauled, that the company will use light-type trucks to do the hauling, and will confine the loads to one log and not more than two logs if they are small. The Commission approved the recommendation.

The Commission adjourned at 12:15 p. m. and reconvened at 1:30 p.m. in the same room with the same persons present and participating.

Chairman Cabell brought up for discussion an accident that occurred at the McLoughlin Bridge on the Pacific Highway East near Oregon City. It appears that during the time that this bridge was being repainted one of the workmen who was employed on the job slipped and, in an endeavor to keep from falling, accidentally dislodged a short timber, a part of the scaffolding, which timber fell to the ground and unfortunately struck a small boy who was playing under the bridge, causing injuries for which the boy's father is now seeking compensation through his attorney. The Commission's attorney read aloud several reports on the subject which were discussed. The Commission assumed no responsibility or liability in the case; however, instructed the Engineer hereafter to maintain warning signs at appropriate places around structures that are being painted, as a warning to people of danger, particularly at such locations where a pathway leads down to the stream from the highway.

The Commission discussed briefly matters pertaining to the Eugene-Springfield Project, and particularly the proposed connection at the McKenzie Highway junction. The Engineer was instructed to give the matter further study, and to explain fully to Chairman Cabell the following Thursday on the trip to Tongue Point.

Mr. Guy Cordon, Attorney, Roseburg, and Mr. A. L. Schneider, general freight agent for the Oregon Nevada California Fast Freight, Inc., Medford, came before the Commission relative to the transportation of government defense materials over state highways through the state of Oregon, from California points to Washington points, on equipment the overall length of which exceeds the Oregon statutory length limits. Mr. Cordon was spokesman. He said that the Oregon Nevada California Fast Freight, Inc., has a contract with the federal government to move federal equipment and supplies, much of which is assigned to points in Washington, necessitating travel through the state of Oregon; that at least twenty-five per cent of each load is material of this class; and that the company is obliged to deliver the material regardless of conditions, but is handicapped in doing so because the overall length of this equipment is 60 feet, being 10 feet in excess of the Oregon length limit, and it is unable to secure a permit to move across the state of Oregon. He declared that the situation is an emergency, and, in his estimation, it is not

only within the province of the State Highway Commission to authorize the movements, but also the duty of the Commission to grant the necessary permit for the general welfare of the public. He made an urgent plea for this privilege in behalf of the company.

Chairman Cabell explained the position and the attitude of the Commission with respect to such movements, and advised that the Commission feels that it is without authority to grant the request because of the action taken by the 1941 Legislature, which voted down a bill that would have authorized overall lengths of 60 feet and gross weights of 68,000 pounds on Oregon highways, and in view thereof the Commission must refuse to grant such permits which are requested by the general trucking interests; however, the Commission will give careful consideration to such requests if they are presented by some recognized governmental agency. Commissioner Oliver concurred. Mr. Cordon recognized the fairness of Chairman Cabell's statement; however, again urged the Commission to do what it can to help out in this difficulty.

The Commission discussed and denied a request from the Lang Transportation Company, San Francisco, for permission to operate over Oregon state highways between the California state line and Klamath Agency, one combination truck and trailer unit, having an overall length of 60 feet, it being contrary to the established policy of the Commission to issue continuous permits for such movements.

W. H. Lynch, District Engineer, Public Roads Administration, was present and inquired as to the attitude of the State Highway Commission with respect to allocating additional funds for the improvement of the I.O.N. Secondary Highway, in Malheur County. Chairman Cabell explained that the Commission has it in mind to apply federal strategic highway funds for this road, but is not in position at this time to state definitely just what it can do, in view of the fact that Congress failed to pass the appropriation bill over the President's veto. However, should the federal government provide additional federal funds, other than those now available to the Commission, the Commission would be disposed to allocate such funds to this road. Commissioner Oliver concurred.

Mr. Lynch also mentioned that the State of Idaho has, at least temporarily, abandoned the idea of rerouting the Old Oregon Trail by way of Weiser and is now seeking to route it along another route which crosses the Snake River at Nyssa. He inquired as to the attitude of the Oregon State Highway Commission relative thereto. The matter was discussed briefly, but no action was taken. Mr. Lynch agreed to forward the State Highway Engineer all available information for study.

The Attorney presented for the Commission's acceptance a stipulation in the case of the United States of America versus O. M. Jetson, et al, with respect to a 40-foot hauling road across property known as the Fisher Tract, which road extends from the Eugene-Swisshome Secondary Highway (Route F Highway) to a state-owned rock quarry in Lane County. He explained that this stipulation would preserve the state's rights to maintain such hauling road across property that is now owned by the federal government, and that the road

is needed to provide access to the quarry. The Commission approved the stipulation, and thereupon signed the same.

The Attorney also presented a letter from Mr. Ben Hur Lampman, Portland, with respect to the Commission's action in refusing to abandon a short section of the old right of way of the Oregon Coast Highway in front of his premises at Nelscott. This matter was discussed at some length, during which the history of the entire case was recalled. The Commission confirmed its previous action, it appearing to the Commission that Mr. Lampman has no definite right to the property, and that the old roadway is needed for public purposes. The Attorney was instructed to inform Mr. Lampman of the action taken and to assure him that the Commission will allow him reasonable access to the highway from his property.

A letter was presented from Dolan & Serfling, general merchants, Gardiner, Oregon, requesting permission to maintain a certain gasoline pump in its present location in front of their store building at Gardiner, notwithstanding that the state is acquiring the property on which the pump is located for widening the highway at this point. They alleged that if they are required to move the pump to another location, they will be forced to abandon the pump, and will suffer a direct loss in excess of \$5,000. The Assistant Attorney read the letter aloud. The Engineer advised that no harm would be done if the pump were left in the present location; however, that would be strictly contrary to the Commission's established policy, which prohibits the servicing of automobiles at the curb line, and would set a very undesirable precedent. Several suggestions were made for disposing of this matter. The Assistant Attorney was instructed to discuss these with Messrs. Dolan and Serfling.

Reconsideration was given by the Commission to the request of Mr. Russell Hubbard, Reedsport, to purchase certain state-owned property lying between the Umpqua Highway and the Umpqua River, near the north city limits of Reedsport. The Engineer recommended the sale to Mr. Hubbard of several lots in the platted portion of Reedsport and the retention by the state of the other property in order to preserve an unobstructed view of the Umpqua River from the highway. The Commission approved the recommendation, and instructed the Attorney to convey the Commission's action to Mr. Hubbard. He was also instructed to inform Mr. Hubbard that, if he is not satisfied with the Commission's decision, the Commission will be pleased to discuss the matter with him further, and inspect the property with him if he so desires. The question arose as to how much Mr. Hubbard is to be asked to pay for this property, and it was decided to charge him one cent per square foot, or a total of approximately \$165 for the land involved.

Messrs. Philip H. Carroll, Executive Secretary, and Albert Merrill, Chief Engineer, Commission of Public Docks, Portland, came before the Commission in regard to the vacation of certain Dock Commission property, which is needed in connection with the construction of the Front Avenue Project, Portland. Mr. Carroll advised that they have received notice to vacate the premises by October 1, but they are unable to comply therewith without considerable inconvenience, and the Dock Commission would appreciate it if the Highway

Commission will grant them an extension of time to November 15 in which to vacate. The Engineer recommended approval of the request. The Commission approved the recommendation.

Mr. Merrill then inquired as to what provision the Highway Commission has made for rebuilding the approach to the floating dock. He offered to sell the float to the Commission for the sum of \$10,000. He pointed out that, if the Commission purchased the float, it would eliminate construction of the tunnel approach to the same. The Commission took the matter under advisement, and instructed the Engineer to contact Mr. Merrill some time during the following week with regard thereto.

Consideration was given by the Commission to the matter of terminating its lease of the Jim Ford property near Gardiner, which has been used as a C. C. C. camp site. The Parks Superintendent, who was present, explained that the lease expires on October 31, but he has been leaving the matter of the cancellation of the lease until the camp is abandoned. He further stated that the camp is no longer in operation, and recommended termination of the lease. The Commission approved the termination of the lease as soon as it is definitely determined that the property is no longer needed.

The question whether or not to permit a Mrs. Mabel Stevens to maintain a residence building on the right of way of the Lower Columbia River Highway, at a place known as Holbrook, had the attention of the Commission. The Attorney explained that in November, 1934, at the request of the Board of County Commissioners of Multnomah County, the Commission granted Mrs. Stevens the privilege of occupying the right of way with her building, because she was in destitute circumstances. However, the permit provided that she should vacate the premises within 30 days from the date of receiving notice so to do from the State Highway Commission. He further advised that Mrs. Stevens no longer lives in the house, but leased it to other people, from whom she collects rent, and it appears to him that necessity for maintaining the house on the highway right of way no longer exists. He recommended that Mrs. Stevens be given notice to move the building off the state's property. After discussion the Commission approved the recommendation, and instructed the Attorney to serve such notice, and to give Mrs. Stevens 90 days within which to vacate the premises.

The claim of Mrs. Eva Cade King of Marshfield for damage to her property, which resulted in connection with a highway improvement, was considered by the Commission. The Attorney reported that Mrs. King's property was damaged by reason of faulty drainage in connection with the highway improvement, and that she has indicated a willingness to settle her claim for \$600. He recommended settlement on that basis. The Commission approved the settlement, and ordered that, as a part of the settlement, Mrs. King be required to sign a complete release.

The Assistant Attorney brought up for discussion the claim of Mr. Charles R. Cooley for damages to his property adjacent to the Pacific Highway south of Grants Pass, which he alleged resulted from the reconstruction of the

highway at this point. He recited the history of this case and advised that Mr. Cooley originally demanded settlement in the amount of \$1,000 although he now will settle for \$500. He estimated the amount of the damage at \$300, but recommended payment of \$500 as a compromise in order to avoid a law suit. The Commission approved the recommendation.

The Attorney reported a request from the City of Eugene to acquire a parcel of land at the intersection of the Pacific Highway with the road which extends to the new Eugene airport. He said that the city wants to purchase about one-half acre of land, which is to be used in providing a good approach to the highway. He recommended sale of the property for the sum of \$50, which is at the rate that the Commission paid for it. The Commission approved the recommendation.

The Secretary presented a letter from the Hood River Chamber of Commerce suggesting that the State Highway Commission furnish "Oregon windshield stickers" to all chambers of commerce and tourist information organizations in the state, for distribution to tourists desiring the same. The Commission considered this matter under the jurisdiction of the Secretary of State; furthermore, Section 115-379, O.C.L.A., prohibits the carrying of stickers on windshields and/or windows of automobiles that are operated over the highways of this state. The Secretary was instructed to so inform the chamber of commerce.

The Commission discussed briefly and ordered filed an opinion from the Attorney General dated August 25, 1941, concerning the meaning of several statutes, and the conduct of the Public Utilities Commissioner and the State Highway Commission with respect to the administration and enforcement of certain statutes relating to the maximum load of motor vehicles. (See opinion in general files.)

The Commission had under consideration approval of the payment of the final estimate to E. C. Hall Company, arising out of its contract No. 2242 with the Commission, for the Mt. Hood Rock Production Project on the Mt. Hood and Wapinitia Highways, in Clackamas and Wasco Counties. The Secretary explained that Mr. Hall subcontracted part of the work to Mr. H. L. Rice, who failed and left outstanding claims in excess of \$3,000, and that Mr. Hall has arranged to take care of these claims. However, it has been the practice, for a long time, not to release the final payment in connection with any job, if the outstanding claims amount to a considerable sum, as in this instance. He further advised that he has received a letter from the surety on the bond furnished by E. C. Hall Company in connection with this job, consenting to the release of the final payment without prejudice to the bond. The Attorney advised that the surety's letter is satisfactory, and that the Commission could approve payment of the final estimate if it so desires without incurring obligation. The Commission thereupon approved release of the final warrant.

Reconsideration was given by the Commission to the matter of permitting log hauling on state highways during Saturday afternoons and Sundays, heretofore prohibited. The Engineer recommended, in view of the apparent emergency that exists, that hauling during such periods be authorized as a

trial proposition for 30 days on all highways except the Oregon Coast Highway between the Wolf Creek Highway junction and Cannon Beach. The Commission approved the recommendation, subject to the condition that the privilege will be cancelled in the event there is strong opposition from the general public to log hauling during such periods. In the event public opinion is not adverse to such arrangement, the Commission will consider extending the privilege after the 30-day period expires. It was also understood that each application for the privilege should be considered individually and that the 30-day trial period in each instance will start when the applicant's request is received and approved.

This action of the Commission was conveyed to Mr. Ormond R. Bean, Public Utilities Commissioner, by telephone, and received his approval. The Secretary was instructed to forward to Mr. Bean all applications received for such privilege with recommendation that the P.U.C. permits be amended accordingly.

A request was presented from the Coos Bay Dredging Company for a permit authorizing the moving of a large tank, 14 feet high and 44 feet in diameter, directly across the Oregon Coast Highway between Marshfield and North Bend. They advised that the movement would take about one hour's time, and that the tank will have to be moved some time, in order to accommodate the proposed highway improvement at this place, the tank being now located on property that will be needed as right of way for such highway improvement. The Commission approved the request, subject to the condition that the highway travel is not completely stopped during the time that the highway is occupied by the tank; that a suitable detour is provided; and that the company will furnish the customary insurance and will take all necessary precautions to safeguard the traffic.

The Commission also discussed an application of Mr. H. A. Dowd, Albany, for authority to transport logs over a one-mile section of the Corvallis-East Side Secondary Highway, just out of Albany, which operations are now prohibited on this highway. The Engineer recommended the granting of the request subject to the condition that a flagman is maintained at the railroad crossing at all times when log hauling activities are under way. He explained that such requirement is necessary, because the railroad is several feet higher than the highway, and the view of traffic along the highway is obscured at the point where Mr. Dowd proposes to construct his approach road to the mill. It was his thought that the flagman at the railroad crossing should be maintained in order to safeguard other traffic and to avoid the occurrence of accidents. The Commission approved the granting of the permit, subject to the conditions as recommended by the Engineer.

The Commission considered an inquiry from a Mr. C. E. Powell as to when he will be permitted to resume log hauling operations on the Wilson River Highway. The Secretary was instructed to inform Mr. Powell that he will be permitted to haul logs over this highway when the highway has been opened for general public use.

The Commission discussed an opinion from the Attorney relative to the necessity for log haulers to furnish excess public liability and property damage insurance as a prerequisite to the securing of permits for the transportation over state highways of loads of logs, poles or piling, the overall length of which exceeds the statutory length limits. According to such opinion the members of the Highway Commission are amply protected by law without such excess insurance. In view thereof the Secretary was authorized and instructed by the Commission to discontinue the practice of requiring such excess insurance, provided the log hauler has already furnished insurance in the amounts required by the Public Utilities Commissioner.

The Commission discussed a date for its inspection trip into Baker, Union and Wallowa Counties, and decided to make such trip during the last week in October, starting on Wednesday, October 29, 1941.

A letter was presented from County Judge Wm. O. Powell, Yamhill County, inviting the members of the Commission to be the guests of the Yamhill County Court and representatives of several city chambers of commerce, on a joint inspection of a proposed road extending from Carlton to Tillamook, which inspection is tentatively set for September 8, 1941. The members of the Commission expressed regrets that it will not be possible for them to join the county court on this trip, and instructed the Secretary to convey the information to Judge Powell.

The Commission considered and ordered filed a resolution from Washington State Grange, favoring operation of bridges and ferries across the Columbia River by a joint commission representing the highway departments of the States of Oregon and Washington.

Chairman Cabell reported numerous complaints from log haulers that the operations of the state highway department weighmasters are causing much unnecessary delay in log hauling operations. It was the Commission's decision that no change be made in the instructions to weighmasters heretofore approved until such time as the Commission knows definitely that the instructions are too stringent. The Engineer was instructed to investigate conditions and report his findings.

The Engineer reported that subsequent to the appearance of Mr. Hart before the Commission on the previous day, he consulted with Mr. Witchel, Chief Engineer of the Oregon Electric Railway Company, relative to the installation of the traffic signal at the railroad crossing in Beaverton, and among other things he inquired of Mr. Witchel whether or not the railroad company would agree, in the preparation of the next program for railroad crossing funds, to charging the Oregon Electric Railway Company's share of such funds an amount equal to the cost of the signal installation at Beaverton and Mr. Witchel agreed to such charge. He recommended, in view thereof, that the Commission install the signal at this time, advancing state funds to pay the costs involved. The Commission approved the recommendation. The Engineer was instructed to inform Mr. Hart of the Commission's decision.

The State Parks Superintendent was present and reported on the following park matters:

Proposed park property along the Columbia River Highway between Mitchell Point Tunnel and Viento:- The Parks Superintendent advised that this property consists of 155 acres situate in Section 35, Township 3 North, Range 9 East, W. M., Hood River County, and that his only interest is in securing wayside strips through the same. He pointed out, however, that the Commission will need some of the property for right of way for a proposed revision of the highway. It was his thought that the entire holding should be acquired if it can be purchased at a reasonable cost. The Commission authorized the Attorney to negotiate with the owners for the property.

Right of way for proposed highway between Cannon Beach and Wolf Creek Highway junction:- The Parks Superintendent suggested that, when new right of way for the Oregon Coast Highway between these points is acquired, it would be advisable for the right of way agents to negotiate for the acquisition of wayside strips as well as for the right of way, so as to protect the standing timber on such strips. The Commission approved the suggestion and so ordered.

Proposed park site adjacent to Upper Columbia River Highway between milepost 55 and milepost 56:- The Parks Superintendent advised that this property has several owners, part of it being owned by Mrs. Ruby Wells Mead, and part by Russell, Carter and Mrs. Anna Kvavle and the Berkenfeld Lumber Company. The Kvavles, he said, are asking \$75 per acre for their property, consisting of 23 acres, or a total of \$1,725, and he has already secured options from them on that basis. He further advised that he has not yet heard from the Berkenfeld Lumber Company, although he believes there is a possibility that the company will present their property to the state as a gift. As to the Mead property, he said he has been unable to secure a satisfactory quotation, but he is still negotiating and hopes to be able to render a full report on all properties at the next meeting.

Disfigurement of pioneer monument at Talbot State Park:- The Parks Superintendent advised that several women of Portland, whose names are known to him, have scratched their names on this monument, disfiguring the same. He inquired whether or not he should take legal action against these women. The Commission decided not to take such action at this time.

Proposed wayside park area adjacent to Mt. Hood Highway, in Hood River County:- The Parks Superintendent advised that the Commission some time ago authorized him to purchase from the county a certain parcel of land adjacent to this highway, particularly on the Booth Hill Section; however, when he contacted the county court, he ascertained that the tract had been sold at a tax sale, and this report is simply to inform the Commission of the status of the matter. The Commission took no action.

Proposed park site at Bandon Beach, Coos County:- The Parks Superintendent reported an offer from E. G. Opperman, Coquille, to deed to the state 3.83 acres overlooking the ocean at Bandon. The Commission deferred action on this matter, in view of the fact that the purchase of another tract at Bradley Lake, about three miles south of the Opperman property, is being considered.

Addition to Ecola State Park, Clatsop County:- The Parks Superintendent inquired as to the wishes of the Commission with respect to the purchase of certain property from Mr. John Yeon, Portland, at Chapman Point, which property contains twelve acres, and for which Mr. Yeon is asking the sum of \$8,175.37. He pointed out that if the Commission purchased this property, it would also have to purchase additional properties, in order to round out the park. He also pointed out that the "Point" is slowly being washed away by ocean-wave action. The Commission gave careful consideration to this purchase, and decided that it would be unwise to acquire the property at this time.

The Commission discussed a letter from Mr. Carl Ewing, Forest Supervisor, Umatilla National Forest, relative to the widening of the Weston-Elgin Secondary State Highway at a place known as Spout Springs, so as to provide parking space for automobiles during the winter skiing season. Mr. Ewing advised that it would be impossible for the Forest Service to construct a parking area anywhere off the highway right of way near the lodge, because it would rob the gentle ski slope near the highway of considerable of its value for the use of people who are just learning how to ski, and who are in the majority. Furthermore, it is doubtful that there is sufficient room to develop a parking area large enough to accommodate future needs within a reasonable distance of the ski lodge. He gave as his opinion that the only feasible solution of the problem is the widening of the highway itself. He urged the Commission to reconsider its previous decision relative to the widening of the highway right of way and removal of snow therefrom, for the benefit of winter sports enthusiasts. The matter was referred to the Engineer for further investigation and report.

Chairman Cabell brought up for discussion the matter of securing priority preference rating for highway construction work in accordance with the rulings of the "O.P.M." (Office of Production Management). It was pointed out in the discussion that procedure has been established whereby priority preference ratings may be obtained for certain classes of highway construction projects, and that the ratings are not of the "blanket" type and must be applied for and assigned separately for each project; further, that applications for preference ratings must be made by the State Highway Department, and must be submitted to the O.P. M. through the Public Roads Administration; otherwise they will not be accepted; furthermore highway contractors must make their applications through the State Highway Department for each individual purchase of materials that cannot be obtained without a preference rating. In view of this information, the Commission authorized and instructed the Engineer to notify all contractors on state highway work of the facts, and to file applications for preference ratings expeditiously, so as to avoid unnecessary delays in the performance of work.

Chairman Cabell also brought up for discussion matters pertaining to the Morrison Street Bridge remodeling work necessitated by the construction of the Front Avenue Project, Portland, and particularly the question whether or not to allow the contractor to proceed with the work until the materials are on hand. It was the Commission's decision that the contractor should do no work whatsoever until the steel required for the project has been assembled and is either on the bridge premises or has at least been delivered to Portland. It was also decided that this project should be a "two-shift" job.

The question then arose whether or not to permit the closing of the bridge to traffic during the Christmas holiday season. The Commission considered it important that the bridge be not closed during such period, because of the extremely heavy volume of traffic that would use the bridge at such time. The Engineer was instructed by the Commission to try to work out a solution for the problem.

Consideration was given by the Commission to the following requests for extensions of time within which to complete highway construction projects:

Colonial Construction Company, contract No. 2392, for construction of a viaduct and masonry walls on the Minam Hill Section of the Wallowa Lake Highway, in Union County, requested an extension of time of fifteen days, from July 31 to August 15, 1941, within which to complete this job. It attributed its failure to complete the project within the specified time limit to adverse weather conditions, and difficulty in securing skilled labor, particularly carpenters and stone masons. The Engineer advised that this contract was awarded on November 13, 1940, but work on the structure was not commenced until February 18, 1941; further, that, in his estimation, the contract could have been completed within the specified time limit had the work been started sooner. He recommended, in view thereof, that the extension of time requested be granted, but that the contractor be required to reimburse the state for extra engineering expense incurred subsequent to the specified completion date. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation.

Averill & Corbin, contract No. 2403, for construction of the Goose Rock Bridge over the John Day River, on the John Day Highway, Grant County, requested an extension of time of 60 days, from August 31 to October 31, 1941, within which to complete this job. They attributed their failure to complete the project within the specified time limit to adverse weather conditions and high water in the John Day River, which prevented excavations at pier #3, in the middle of the channel. The situation was further aggravated by a cloudburst, which washed out a coffer dam and cribbing. The Engineer advised that the reasons given by the contractor for failure to complete the project within the specified time limit are correct. He recommended the granting of the extension of time requested without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation.

M. C. Lininger & Sons, contract No. 2411, for the Kerby Rock Production Project on the Oregon Caves and Redwood Highways, in Josephine County, requested an extension of time of 60 days, from May 31 to July 30, 1941, within which to complete this project. They gave no reason for failure to complete the project within the specified time limit. The Engineer advised that there was some delay in the awarding of the contract, and the contractor lost some time by reason of high water. Also, that the public was not inconvenienced by failure of the contractor to complete the contract within the specified time, and the state has not incurred any expense for extra engineering supervision. He recommended that the extension of time requested be granted without penalty. The Commission approved the recommendation.

Birkemeier & Saremal, contract No. 2452, for installing new expansion plates on the Interstate Bridge, between Portland and Vancouver, Washington, on the Pacific Highway, Multnomah County, requested an extension of time of 31 days, from June 30 to July 31, 1941, within which to complete this job. They attributed their failure to complete the project within the specified time limit, to extra work which they were required to perform. The Engineer advised that the reason given by the contractor for failure to complete the project within the specified time limit is correct. He recommended that the extension of time requested be granted without penalty. The Commission approved the recommendation.

The Engineer reported that contracts Nos. 2320, 2327, 2379, 2387, 2392, 2402, 2411, 2418, 2423, 2429, 2430, 2439, 2452, and 2456, for construction of state highway projects, have been completed according to the terms of the contracts or modifications thereof, and that said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and was adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts, and said jobs are now ready for acceptance:

Contract No. 2320, with General Construction Company, for embankment construction and culvert pipe installation on the Troutdale-Dodson Section of the Columbia River Highway in Multnomah County, completed on August 6, 1941.

Contract No. 2327, with Kern & Kibbe, for grading, tunnel excavation, lining and paving on the Sunset Tunnel Section of the Wolf Creek Highway in Washington County, completed on August 19, 1941.

1941

Contract No. 2379, with K. L. Coulter, for embankment topping and slope protection on the Troutdale-Oneonta Section of the Columbia River Highway, in Multnomah County, completed on August 30, 1941.

Contract No. 2387, with J. F. Johnston, for work on the Nashville Bridge Section of the Eddyville-Blodgett Secondary Highway in Lincoln County, completed on July 23, 1941.

Contract No. 2392, with Colonial Construction Company, for construction of the Minam Hill Viaduct on the Wallowa Lake Highway, in Union County, completed on August 14, 1941.

Contract No. 2402, with C. J. Eldon, for work on the Davies Grade Separation Project, in Washington County, completed on August 27, 1941.

Contract No. 2411, with M. C. Lininger & Son, for furnishing 11,700 cubic yards of crushed gravel in stockpile on the Kerby Section of the Redwood and Oregon Caves Highways, in Josephine County, completed on July 15, 1941.

Contract No. 2418, with Dimitre Electric Company, for furnishing electrical work on the Interstate Bridge at Portland, in Multnomah County, completed on August 16, 1941.

Contract No. 2423, with A. S. Wallace, for furnishing 10,000 cubic yards of crushed materials in stockpile on the Bear Creek-Coos Junction Section of the Coos Bay-Roseburg Highway, in Douglas County, completed on July 22, 1941.

Contract No. 2429, with Leonard & Slate, for grading, bituminous macadam surfacing and bridge construction on the Ramsay-Blalock Section of the Columbia River Highway in Gilliam County, completed on August 18, 1941.

Contract No. 2430, with Leonard & Slate, for grading, bituminous macadam surfacing and widening bridge on the Quinton-Ramsay Section of the Columbia River Highway, in Gilliam County, completed on August 18, 1941.

Contract No. 2439, with R. O. Dail and Warren Bros., for grading, surfacing and oiling the Jones Hill-Lena Section of the Heppner Highway, in Morrow County, completed on August 12, 1941.

Contract No. 2452, with Birkemeier & Saremal, for replacing expansion plates on the Interstate Bridge, in Multnomah County, completed July 31, 1941.

Contract No. 2456, with Babler Brothers, for placing pier protection for swing span pier for the bridge over the Willamette River at Corvallis, in Benton County, completed July 26, 1941.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

The Commission considered and signed agreements, et cetera, as follows:

Foreword for use by Attorney in connection with his compilation of the Oregon Road Laws.

Agreement with University of Oregon and the Eugene Power Company pertaining to the proposed highway improvement between Eugene and Springfield.

Agreement with University of Oregon re Eugene-Springfield Project.

Agreement with Ray Fromm covering grazing of sheep in Humbug Mountain State Park.

Agreement with Ace Turner covering grazing of sheep in Humbug Mountain State Park.

Stipulation with the United States of America with respect to a hauling road from "Route F" Highway to the state quarry located on lands known as the Fisher Tract, in Lane County.

Bargain and sale deed conveying unto Cecil Mestretti 7,992 square feet of land in Lots 10 and 11, Block "M" Reservation Addition to Pendleton. (Right of way file 3866)

There being no further business to come before the Commission at this time the meeting was adjourned at 4:45 p. m.

Robert J. ...
State Highway Engineer

Harold ...
Secretary

Henry F. Cabell
Chairman

Thomas C. ...
Commissioner

Portland, Oregon, October 16, 1941

The State Highway Commission met in regular session at 9:00 a. m. in the auditorium of the Public Service Building. Present were:

Henry F. Cabell, Chairman
Huron W. Clough, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

Commissioner Herman Oliver was excused from attending this meeting.

Bids as follows for highway construction projects, removal of buildings from right of way in East Portland, sale of scrap steel rails at Portland, and sale of Ox-Yoke Service Station north of Grants Pass, were opened and read in conformance with previously published notices, following which Chairman Cabell announced that the award of contracts, et cetera, would be made at 3:00 p. m. in the same room:

WOLF CREEK HIGHWAY
NECANICUM JUNCTION-SUNSET CAMP ROCK PRODUCTION

A. S. Wallace	\$31,770.00
E. C. Hall Company	33,830.00
Babler Bros.	34,985.00
A. T. Dolan	35,240.00
Rogers Construction Company	38,350.00

MCKENZIE HIGHWAY
BELKNAP SPRINGS-FOURMILE BUTTE ROCK PRODUCTION

No bids received on this project

WASCO-HEPPNER SECONDARY HIGHWAY
CONDON-MORROW COUNTY LINE SECTION - SURFACING AND OILING

Alaska Junk Company	1,292.20
Crawford & Doherty Foundry Company	1,213.80

OX-YOKE SERVICE STATION, NORTH OF GRANTS PASS

Kenneth Dodd	\$526.00
--------------	----------

Mr. Ormond R. Bean, Public Utilities Commissioner of Oregon, and Mr. A. F. Harvey, Superintendent of Motor Transportation, came before the Commission in regard to continuation of the temporary privilege heretofore granted log haulers, to truck-haul logs over state highways on Saturday afternoons, Sundays, and during hours of darkness. After full discussion of this matter the Highway Commission decided to extend the privilege to June 1, 1942, except as to the Oregon Coast Highway between Arch Cape Tunnel and the junction of the Oregon Coast Highway with the Wolf Creek Highway, it appearing that only one complaint had been received objecting to the hauling of logs during such restricted periods. The Secretary was instructed to forward a formal recommendation to the Public Utilities Commissioner covering this matter, such recommendation to include the following rules and regulations, as an amendment to the rules adopted on July 24, 1941:

1. The speed of the movement shall not exceed fifteen (15) miles per hour on all sharp curves and narrow bridges. Except as herein limited the statutory speed restrictions shall control.

2. Flagmen shall be furnished by permittee to stop and warn other traffic at all points where logging equipment, either loaded or empty, enters upon and/or turns off the said highways. Said flagmen shall be equipped with red lanterns or other approved signaling devices properly and effectively to stop and warn approaching traffic of danger. Said flagmen shall be stationed on the highway at points approximately 300 feet on each side of the said point of entrance or exit, as the case may be, and shall be maintained at such locations at all times while log hauling operations are under way.

3. The truck hauling of logs on state highways, during periods of darkness, is limited to the hours between 12:01 a. m. (midnight) and 8:00 p. m. of the same day. No log hauling whatsoever shall be carried on between 8:00 p. m. on any Saturday and 6:00 a. m. on the following Sunday, nor between 8:00 p. m. on any Sunday and 6:00 a. m. on the following Monday; furthermore, no log hauling shall be permitted on any of the holidays hereinafter mentioned, nor between 12:01 a. m. and 6:00 a. m. on the day following the holiday. When the holiday falls on Sunday the following Monday shall be considered an additional holiday, and the prohibited period shall extend from 8:00 p. m. on the previous Saturday to 6:00 a. m. on the following Tuesday. The holidays to be observed are: January 1st, May 30th, July 4th, Labor Day, November 11th, December 25th, and any holiday designated by the President of the United States of America or by the Governor of the State of Oregon.

4. Permittee shall be held responsible and liable for any and all injury or damage to any highway or to any highway structure, occasioned by the transportation of logs over said roads, and he hereby agrees to reimburse the State Highway Commission for the cost or expense of repairing any such injury or damage, such reimbursement to be made within ten days after being billed for the same by the State Highway Commission.

5. The violation of any one of the provisions of this permit as hereinabove set forth shall be considered sufficient cause for the immediate suspension or cancellation of the permit under which the equipment involved is being operated.

6. The actual transportation of logs over the highways mentioned herein shall be construed as acceptance by permittee of the provisions of this permit.

7. The special privileges herein authorized do not apply to the section of the Oregon Coast Highway between Arch Cape Tunnel and Wolf Creek Highway junction.

The authority above granted shall expire without limitation or further notice on Monday, June 1, 1942.

The Public Utilities Commissioner advised that upon receipt of such rules and regulations he would mail a copy of the same to each special carrier as an amendment to the special carrier's permit.

The question whether or not to permit loads in excess of 50 feet overall in length to be transported over state highways during hours of darkness was also discussed. The Engineer gave as his thought that the geometric design of the highway should control this feature. The matter was referred by the Commission to the Engineer and the Secretary for a decision. (The Engineer advised later that it would be satisfactory to allow overlength loads to be transported over state highways during hours of darkness provided the operations are covered by the same rules and regulations that cover such movements during daylight hours, and provided the vehicles are legally lighted.)

County Commissioners W. J. Holland and Allen P. Wheeler of Lane County were present and inquired whether or not the Commission expects to award the contract for the Fisher Road-Oak Hill Project on the Eugene-Swisshome Secondary Highway, bids for which were taken at this meeting. They were informed that the low bid received for this project is considerably in excess of the estimated cost of the job so it will be necessary to reject it unless the Commission changes its policy with respect to such matters, which it is not inclined to do at this time; further, possibilities are that the work could not be done until next year. Mr. Holland then pointed out that the road is in bad condition where it crosses the Southern Pacific railroad tracks. It was his thought that the necessary improvements could be made by a state maintenance crew at small cost. The Engineer was instructed to investigate the condition and have it remedied as a minor betterment project if it is not too costly.

The Tillamook County Court, consisting of County Judge Harland M. Woods and County Commissioners E. H. Lindsey and E. G. Anderson, was present and presented several projects. They were accompanied by Mr. John Aschim, Secretary of the Tillamook Chamber of Commerce. Judge Woods was spokesman. He asked for a new bridge on the Wilson River Highway to replace an existing, narrow, temporary structure at a place known as Camp One. The Engineer advised that this bridge should be replaced at the earliest possible time, and recommended approval of the project as soon as funds can be spared to finance it. The Commission indicated approval of the recommendation, but took no definite action.

Judge Woods also asked for the straightening of the Wilson River Highway between Mills Bridge and Tillamook. No action was taken by the Commission on this request.

He also asked for a new bridge over the Trask River on the Netarts Secondary Highway just out of Tillamook, to replace the existing covered bridge which is in very bad condition and is posted for ten-ton loads. In the discussion of this matter it was pointed out that one of the serious objections is the narrowness of the bridge, and the short sight distance that obtains for one passing over it. Mr. Lindsey suggested, if the Commission could not see its way clear to construct a new bridge, that it would help if the

cover over the existing structure were removed. The Engineer advised that this could be done at small cost. The Commission thereupon authorized such remodeling work.

Judge Woods also asked for the non-skidding of the Netarts Secondary Highway throughout its entire length. He urged that the work be done next summer when conditions are satisfactory. The Commission took the matter under advisement.

He also brought up for discussion the matter of revising the Oregon Coast Highway south of Tillamook, which involves a change to avoid the proposed Tillamook airport. The Engineer advised that a location survey of the section south of Tillamook was made some time ago by Chief Locating Engineer H. W. Libby. He exhibited a map showing the proposed alignment and recommended its adoption. He pointed out that it could be constructed in increments as funds are available. The Commission approved the "Libby" line as recommended by the Engineer. The Engineer then requested authority to set survey stakes along the proposed line. Such request was granted. He also requested authority for the right-of-way department to secure options for needed right of way between Tillamook city limits and a place known as Pleasant Valley. The Commission also approved such request.

The County Court also inquired as to the plans of the Highway Commission to rebuild a section of the Oregon Coast Highway between the town of Cannon Beach and the Wolf Creek Highway Junction. The Engineer explained that the Commission now has under advisement a W.P.A. project for clearing and grubbing on the proposed alignment and for the installation of drainage facilities. The Commission thereupon reviewed the details of the project, which is estimated to cost \$456,364, of which amount 25 per cent, or approximately \$114,280, represents the state's contribution as sponsor. The Commission approved the project and authorized the Engineer to sign the application for the same and forward it to the Work Projects Administrator of Oregon.

Judge Woods also brought up for discussion the matter of payment of Tillamook County's share of reconstructing the Johnson Bridge over the Trask River on the Fairview-Clements Corner County Road. He recalled that Tillamook County is obligated to contribute \$7,000 toward the cost of such work, such amount to be paid by the Secretary of State out of the county's share of the 1942 gasoline tax funds. He asked the Commission to defer the payment of such amount until after July, 1942, which would be an accommodation to the county. The Commission approved the request. The Secretary was instructed to notify the Secretary of State of the action taken after it is known definitely the actual amount that Tillamook County is to contribute.

Mr. Anderson requested improvements to the Little Nestucca Secondary Highway. He also asked the Commission to designate as a secondary state highway the county road known as the Sand Lake Road. The Engineer was instructed to have Maintenance Engineer Bishop and Assistant Office Engineer Cutler investigate the Little Nestucca Road and ascertain just what has to be done to put it in passable condition. No action was taken by the Commission on the request for the designation of the Sand Lake Road as a state secondary highway.

The Honorable J. D. Perry, Deer Island, headed a delegation which consisted of the following: C. J. Miller, V. L. Shepard, E. A. Brett, Charles T. Bross, Tom Morris, Wm. Reice, G. O. Clement, C. R. Hallberg, Wilbur J. Smith, Fred McKinley, A. S. May and Fred N. Mallom. He advised that there is now pending in Congress a bill which would authorize the federal government to acquire the Longview Bridge over the Columbia River and operate the same as a toll-free bridge, and that their purpose in coming before the Commission at this time is simply to ask the Commission to assist them in securing the passage of such legislation. Chairman Cabell advised that the engineers of the Oregon State Highway Department are now making a joint survey of prospective bridge sites along the Columbia River in conjunction with engineers of the Washington Highway Department and will be pleased to give due consideration to the Longview Bridge in such study; further, that it was his hope that it would not be necessary for the Commission to take a definite stand with respect to any particular bridge or bridge site until this survey was completed. Mr. Perry stated that haste in the matter is urgent. Chairman Cabell replied that, while the Commission is not in position to make a definite statement at this time, it will give the matter serious consideration and will discuss it at the November meeting of the Commission when all Commissioners are present, following which Mr. Perry will be advised of the action taken.

The Honorable F. M. Franciscovich, Astoria, came before the Commission in regard to the application of a Mr. Reed Holding to transport truck loads of logs 62 feet overall in length over a five-mile section of the Wolf Creek Highway, immediately west of the Nehalem River crossing, involving a crossing of the highway at the east end of the bridge where a connection is made to the county road leading to Jewell. He said that Mr. Holding wants to eliminate every possible hazard to Wolf Creek Highway traffic and to that end is willing to grade a suitable approach from the county road to the highway at his own cost and expense if the Commission will allow him to do it, which would avoid a turnaround near the east end of the bridge requiring two crossings of the highway, and in the meantime he is asking the privilege to haul logs in the best possible manner under existing conditions, but will maintain two flagmen at the east end of the bridge where he is obliged to cross the highway twice in making the turn. The Engineer recommended approval of Mr. Holding's proposition, and that the rocking and oiling of the approach between the two roads be accomplished at state expense when Mr. Holding has completed the grading work. The Commission approved the recommendation.

The Commission also approved the truck-hauling of overlength loads of logs over the Wolf Creek Highway, subject to the condition that two flagmen are maintained on the highway at points where crossings are made at the east end of the Nehalem River Bridge, until such time as Mr. Holding's road connection is completed.

Mr. H. B. Roadman, County Commissioner, Douglas County, and Mr. W. C. Harding, former secretary of the Roseburg Chamber of Commerce, were present and urged the Commission to continue the improvement of the North Umpqua county road from the end of the present improved section to a place known as Glide, particularly the grading of the section, which they estimate would cost approximately \$60,000. Mr. Roadman presented a copy of a resolution adopted by the

county court in which notification is given to the public that the county court, on November 10, 1941, intends to make an order relative to right of way for such proposed improvement. He assured the Commission that all of the right of way would be acquired by the time that the Commission is ready to construct. The Commission took the matter under advisement.

Senator F. M. Franciscovich reappeared before the Commission relative to the penalty that is imposed on log haulers for overloading their trucks. He said that the present penalty of five days for the first offense, ten days for the second offense, and fifteen days for the third offense, in his estimation, is too severe in view of the fact that when a truck is suspended there is absolutely no way to replace it on the job. He suggested a reduction in the penalty to three days for the first offense, six days for the second offense, and nine days for the third offense, and gave as his thought that such reduced penalty, during present times, is just as severe as was the five-day penalty a few years ago. The Commission concurred, and thereupon adopted the suggestion. The Secretary was instructed to put the change into effect immediately.

The Commission discussed a letter from Resident Engineer A. G. Johnson relative to the transfer of Vernon R. Thorp from his engineering party to that of Locating Engineer J. F. Waller at Maupin. It appears that Mr. Thorp lives in an apartment in Portland and, upon receipt of notice of his transfer, endeavored to vacate the apartment but was not allowed to leave the premises until he had paid the manager of the apartment the sum of \$32.50 for one month's rent and \$3.50 for cleaning up the apartment after he had left. The question arose whether or not the state would take care of this item. The Engineer recommended against the payment of the amount. He suggested, however, that the matter might be taken care of satisfactorily by deferring the transfer of Mr. Thorp a sufficient length of time to enable him to give the manager of the apartment thirty-days' notice of his moving. The Commission approved the suggestion.

The Commission adjourned at 12:00 noon and reconvened at 1:30 p. m. in the same room with the same persons present and participating.

The Engineer brought up for discussion the matter of increasing the 1942 betterment budgets for primary and secondary highways. He advised that, since the budgets were approved by the Commission last fall, additional minor betterments for construction work have been authorized totaling \$149,403, of which amount \$103,347 is for primary minor betterments and \$46,056 is for secondary minor betterments. He asked the Commission to approve budget increases in such amounts and submitted a list of the projects making up the totals. (See list attached to letter dated September 20, 1941, from Maintenance Engineer J. N. Bishop to R. H. Baldock, Chief Engineer.) After discussion and careful consideration of the various items, the Commission approved the request by unanimous vote.

The Engineer brought up for discussion the proposed improvement of West First Street North in Ontario. He advised that the cost to improve the entire section from Fourth Avenue to a connection with the present highway at the north city limits, including a one-block section on Idaho Avenue connecting

with Oregon Street, would cost about \$32,000 using B-2 type surfacing, whereas to construct a concrete pavement on the four blocks south of Idaho Street, including the one block connecting with Oregon Street, would cost about \$19,600. He recommended improvement of the shorter project using concrete pavement, and advised that such an improvement would satisfy the people of Ontario. As to the balance of the proposed improvement, he said that that can be deferred until some future time. The Commission approved the recommendation.

The Engineer reported briefly on investigations that have been made of the request of the United States Forest Service that provision be made for the parking of cars adjacent to the Weston-Elgin Secondary State Highway near Tollgate for the benefit of winter sports enthusiasts. The Commission decided to let this matter rest until next year when it will be reconsidered.

The Engineer reported on the cost to construct a sidewalk on Cozine Creek Bridge on the Pacific Highway West at McMinnville. He estimated the cost of such sidewalk at \$2,200 and recommended approval of the project, which has been requested by people of McMinnville, in view of the large amount of pedestrian traffic that uses the bridge. The Commission approved the recommendation subject to the condition that the proposed revision of the highway at this location is not undertaken within the next two or three years.

The Engineer also reported on the cost to construct a cinder footpath along the Lower Columbia River Highway at Warren, in Columbia County, as has been requested by School District No. 58, Columbia County. Investigation of this project, he said, reveals that the walk would cost about \$700. The Commission decided not to construct this footpath at the present time; however, instructed the Engineer to include it in the list of sidewalk projects for consideration in the formulation of next year's priority budget for such projects.

The Commission discussed the Engineer's report on the request of Mikkalo Grange for the construction of a sidewalk on Rock Creek Bridge on the John Day Highway at Olex, in Gilliam County. The Engineer estimated the cost of such sidewalk at \$360. The question arose whether or not there is justification for this expenditure. The matter was re-referred to the Engineer for further investigation and report.

A letter was presented from the town of Long Creek, Grant County, requesting the graveling and oiling of the main street of this town, route of the Kimberly-Long Creek Secondary State Highway. The Engineer estimated that it would cost about \$11,000 to do this work. The Commission considered that there are other places throughout the state which are of more importance from the general public standpoint, and from which much more benefit could be received by the expenditure of such sum of money, and accordingly denied the request subject to confirmation by Commissioner Oliver.

The Commission also discussed a report from the Engineer on the controversy with Mr. A. E. Rice relative to the construction of a private road approach to the Pacific Highway near the South Umpqua River Bridge in Douglas County. The Engineer advised that the highway was realigned when the new

bridge was constructed across the South Umpqua River and there now exists a strip of land between the old highway and the new highway, but no roadway was constructed between the old and the new location of the highway so under present conditions Mr. Rice is obliged to take a round-about course from his premises to the new highway to which he objects strenuously. The Attorney advised that the Highway Commission has an obligation to Mr. Rice because he had a satisfactory outlet from his premises before the highway was rebuilt. However, there is a question as to ownership of this roadway, because it seems that it is on land owned by a Mr. Coon. The Engineer gave as his thought that it would be unwise to build an approach to the new highway at the location desired by Mr. Rice because it would introduce an unnecessary hazard to the traveling public, the roadway being too near the bridge. After discussion the Commission referred the matter back to the Attorney for a review of the facts of the case and to determine definitely whether or not the Highway Commission has an obligation to Mr. Rice and, if the Commission has such obligation, then to ascertain the ownership of the lands across which the roadway must be constructed and whether or not it would be possible to secure right of access to the highway across such lands.

Mr. W. H. Fitzgerald, attorney, Portland, came before the Commission in regard to the claim of Mrs. Anna Suran, who was injured when she stepped through the grate of a drainage inlet adjacent to the Columbia River Highway near Oneonta Gorge. Mr. Fitzgerald inquired whether or not the Commission had approved this claim which amounts to \$67.50. He was informed by Chairman Cabell that the Commission's liability is questionable because it was not intended, in the first place, for pedestrians to use the area on which the inlet is located. However, the inlet belongs to the state and was in bad state of repair, so the Commission has decided to pay the claim if it has legal authority to do so. Commissioner Clough concurred. The matter was referred to the Attorney to handle.

The Commission instructed the Engineer to erect and maintain appropriate warning signs at this location in an endeavor to avoid further accidents.

Mr. R. E. Steele, Secretary of the Hood River Chamber of Commerce, conferred with the Commission in regard to the reconstruction of the Columbia River Highway on permanent alignment through the town of Hood River. He alleged that the present highway is a virtual bottleneck for traffic, and urged the Commission to take early action to eliminate the same. He also said that, until the highway is rebuilt, the people of Hood River are not in position to develop their properties which they want to do as soon as possible. Chairman Cabell pointed out that this was a large undertaking and that the Hood River improvement necessarily must tie into a major highway improvement several miles long, so the Commission is not in position to say just when it can do the work. He pointed out, however, that the Commission is now concentrating its efforts on the construction of a new highway up the Columbia Gorge between Troutdale and Bonneville and gave as his thought that monies available to the Commission for expenditure in this vicinity should be allocated to finance additional improvements from the Troutdale end, rather than in the vicinity of Hood River, which would hasten the time when benefits can be

secured from the Commission's present investments. It was his thought that such procedure is the logical one to follow. Commissioner Clough concurred.

Mr. Steele then reported that he understood that the Highway Commission is looking for a maintenance headquarters site at Hood River. He advised that the City of Hood River owns a two and one-quarter acre tract near the west city limits of the town, which it will be pleased to donate for such purpose if the Commission wants it. The Commission thanked him for the offer and referred the matter to the Engineer for investigation.

At 3:00 p. m. Chairman Cabell announced the following awards of contracts, removal of building in Portland, sale of scrap steel, and sale of Oxyke Service Station, for which bids were received at the morning session, such awards having previously been approved by the Commission by unanimous vote:

"Mechanicum Junction-Sunset Camp Rock Production Project on the Wolf Creek Highway, in Clatsop, Tillamook, Columbia and Washington Counties. A. S. Wallace, Roseburg, submitted the low bid for this project, in the amount of \$31,770.00. E. C. Hall Company, Eugene, was second-low, with a bid of \$33,830.00. There were three higher bidders. The Commission awards this contract to A. S. Wallace, at his low bid of \$31,770.00.

"Belknap Springs-Fourmile Butte Rock Production Project on the McKenzie Highway, in Deschutes and Lane Counties. No bids were received for this project.

"Condon-Morrow County Line Section of the Wasco-Heppner Secondary Highway, in Gilliam County. 14.10 miles surfacing and oiling. F. R. Hewett, Spokane, Washington, submitted the low bid for this work, in the amount of \$63,855.00. R. O. Dail and Warren Bros., Portland, submitted the next-low bid, in the amount of \$72,256.00. There were six higher bidders. The Commission awards this contract to F. R. Hewett, at his low bid of \$63,855.00.

"Condon-Servicecreek Rock Production Project on the John Day Highway, in Gilliam and Wheeler Counties. F. R. Hewett, Spokane, Washington, submitted the low bid for this project, in the amount of \$19,750.00. Rogers Construction Company, Dayton, Washington, was second-low, with a bid of \$25,200.00. There were four higher bidders. The Commission awards this contract to F. R. Hewett, at his low bid of \$19,750.00.

"Fisher Road-Oak Hill Section of the Eugene-Swisshome Secondary Highway, in Lane County. 1.26 miles grading, surfacing and oiling. Rogers Construction Company, Dayton, Washington, submitted the low bid for this work in the amount of \$40,739.00, using asphalt. They did not submit a bid using tar. A. T. Dolan, Tillamook, was second-low, with a bid of \$43,002.00, using tar. He did not submit a bid using asphalt. There was only one other bid received. The Commission rejects these bids.

"Employee cabins at Santiam Junction Patrol Station, in Linn County. Construct two frame cabins. Blair T. Alderman, Eugene, submitted the low bid for this project, in the amount of \$7,934.00. The second-low bid was submitted by Tri-State Construction Company, Portland, in the amount of \$10,367.08. There was one other bid received. The Commission awards this contract to Blair T. Alderman at his low bid of \$7,934.00.

"Brogan-Jamieson Section of the John Day Highway, in Malheur County. 5.3 miles grading, surfacing and oiling. Triangle Construction Company, Boise, Idaho, submitted the low bid for this work, in the amount of \$69,600.00. The next-low bid was submitted by Henry L. Horn, Caldwell, Idaho, in the amount of \$73,625.00. There were three higher bidders. The Commission refers these bids to the Engineer with power to award the contract to the low bidder when certain conditions have been satisfied.

"Illahee-Steiwer Hill Section of the Pacific Highway East, in Marion County. 2.22 miles grading and paving. E. C. Hall Company, Eugene, submitted the low bid on this project in the amount of \$158,923.50, using asphalt. It did not submit a bid based on the use of tar. The second-low bid was submitted by Jacobsen-Jensen Company, Portland, in the amount of \$161,323.50, using asphalt. It did not submit a bid using tar. There was only one other bid received. The Commission rejects these bids.

"Interstate Bridge-Oregon Slough Bridge Section of the Pacific Highway East, in Multnomah County. 0.27 mile roadbed widening. Logan & Taylor, Inc., Portland, submitted the low bid on this project, in the amount of \$3,997.00. The second-low bid was submitted by Jacobsen-Jensen Company, Portland, in the amount of \$4,385.00. There was one other bid received. The Commission rejects these bids.

"Rogue River Bridge on the Salmon River Highway near Grand Ronde, in Polk County. 76-foot reinforced concrete viaduct. J. F. Johnston, Newberg, submitted the low bid, in the amount of \$3,517.00. C. W. Reeve, Salem, submitted the next-low bid for this project in the amount of \$8,729.00. There were six higher bidders. The Commission awards this contract to J. F. Johnston at his low bid of \$3,517.00.

Removal of Buildings in Portland

"Wreck and remove one frame building and one concrete building at 101 S. E. Union Avenue, East Portland. Shipyard Wood Company, Portland, submitted the low bid for this work, in the amount of \$400.00. The only other bid received was that of the Sullivan Wrecking & Salvage Company, Portland, in the amount of \$832.00. The Commission refers the bids to the Engineer for further information.

Sale of Scrap Steel at Portland

"Zidell-Steinberg Company, Portland, submitted the low bid on this project, in the amount of \$1,632.40. The next-low bid was that of the Alaska Junk Company, Portland, in the amount of \$1,292.20. There was one other bid received. The Commission rejects these bids. (Reconsidered the following day.)"

Sale of Ox-Yoke Service Station, North of Grants Pass

"The only bid received for the purchase of this service station was that of Kenneth Dodd, Eugene, in the amount of \$526.00. The Commission rejects this bid."

Mr. O. W. Bentley of the Crown Zellerbach Corporation, Portland, came before the Commission relative to the use of an unloading dock for logs which the company inadvertently installed on the right of way of the Metarts Secondary Highway, about two miles west of the Trask River Bridge, Tillamook County. Mr. Bentley recalled that the Commission, at a previous meeting, authorized the corporation to transport several loads of spruce logs over this highway with the understanding that the loads would be limited to one large log or two small logs, and that the logs would be dumped in the Trask River west of the bridge because the bridge is in a weakened condition and is posted for ten-ton loads. The company, he said, was not aware of the ruling of the Highway Commission which prohibits private encroachments on highway rights of way and was not informed with respect to the Commission's policy until the log dump had been constructed. He asked the Commission to permit the use of this log dump for a short period of time so as to enable the company to get out a few specimen logs for inspection by federal government authorities who are in the market for timber of this kind. The Engineer recommended approval of the request subject to the condition that the unloading dock is removed and the premises cleaned up to his satisfaction by November 1, 1941. The Commission approved the recommendation.

Mr. L. M. Lepper, Director of Highways and District Improvements, East Side Commercial Club, Portland, headed a delegation which came before the Commission relative to the construction of a new bridge across the Columbia River between Portland and a place known as Fisher in the state of Washington, utilizing Government Island. Others in the delegation were: W. P. Yaw, M. D. Wills, James P. Bates and W. W. Tyler, Secretary, representing the East Side Commercial Club; and Will C. Minea, Harry H. Pearce, and J. C. Strudgeon, representing the Parkrose Chamber of Commerce. Mr. Lepper urged the Commission to "formally" study this project and bring it to the attention of the United States army officials, so that needed information may be available if and when a new bridge across the Columbia River is required. His remarks were endorsed by the other members of the delegation. The Commission thanked the delegation for its presentation but took no action with respect thereto.

The Parkrose group then inquired as to the plans of the Commission for improvement of Sandy Boulevard (Columbia River Highway) through the Parkrose district, particularly between 82nd Avenue and 122nd Avenue. They were informed that the Commission has budgeted a certain sum for this improvement and that it is planned to do the work next year. Whether or not a sufficient sum has been provided, in view of present conditions, to improve the entire section is questionable; however, the Commission will stretch the improvement as far as possible.

The Commission discussed briefly matters pertaining to the proposed revision of the Columbia River Highway to accommodate the Tongue Point Naval Base near Astoria. The Commission approved the Engineer's letter dated September 16, 1941, directed to Mr. E. J. Griffith, State Administrator, Work Projects Administration, relative thereto, and a later letter supplementing the same. The Engineer advised that he has not yet received a reply from Mr. Griffith and there is a question whether or not it would be possible to do the highway work as a W.P.A. project. He suggested that the work be done as a federal aid project in the event the federal authorities do not approve it for W.P.A. funds. A general discussion of the matter followed, but action was deferred until the November meeting of the Commission. The Engineer was instructed to discuss the matter with Mr. Griffith in the meantime.

The Commission also discussed the matter of contributing state highway funds to match certain federal funds which have been appropriated by Congress to finance improvements to the Sprague River county road, in Klamath County. The Commission approved Chairman Cabell's letter of August 13, 1941, directed to Mr. B. G. Courtright, Superintendent of the Klamath Indian Agency, relative thereto, in which letter Chairman Cabell indicates that the Highway Commission will be willing to spend \$150,000 of state funds for the improvement of the section between the town of Sprague River and the junction with the Klamath Falls-Lakeview Highway near Beatty, a distance of about ten miles, if the Commission were permitted to do the work on contract basis. Furthermore, the Commission would then designate such section as a state secondary highway and maintain it thereafter. (See letter in general files for details.)

The Commission discussed briefly matters pertaining to the proposed improvement of South Sixth Street, Klamath Falls, route of the Klamath Falls-Lakeview Highway. The Engineer gave as his thought that traffic conditions along this section may necessitate the widening of South Sixth Street notwithstanding that the Commission may reroute the highway to avoid this congested district. The Commission took no action on the matter.

Two delegations from The Dalles came before the Commission in regard to the operation of The Dalles ferry across the Columbia River. One of the delegations was headed by County Judge J. B. Kirk of Wasco County and included Mace Fulton, County Commissioner; W. S. Nelson, Secretary, The Dalles Chamber of Commerce; F. V. Galloway, Attorney, Port of The Dalles; Homer Wall, City Engineer; F. M. Sexton, representing the Chamber of Commerce; H. A. Dent, Jr., representing Inland Navigation Company, Vancouver, Washington; Captain A. Leppalour, representing the Upper Columbia River Towing Company; and J. S. Robinson of Lytle, Washington. The other delegation consisted of C. I. Smith,

owner of The Dalles ferry; Esson Smith; and Leland Brown, attorney for The Dalles Ferry Company. The first above-mentioned delegation complained about the service that is being rendered by The Dalles Ferry Company. The speakers were Judge Kirk and Messrs. Nelson, Dent, Wall, Leppalour and Galloway. They urged the Commission to take action as may be necessary to provide and maintain satisfactory ferry service and suggested that the state take over this ferry operation which, in their estimation, is of general public concern. Mr. Galloway particularly gave as his thought that the Highway Commission now has the legal authority to take over this ferry operation; in fact, it is the Commission's implied duty to do so according to action of the Legislature at its sessions in 1925 and 1935.

Mr. Brown, speaking in behalf of Mr. Smith, owner of the ferry, disputed the statements made by members of the other delegation. He gave as his thought that this is a matter which concerns only the contending parties and one that such parties must work out among themselves. Mr. Smith asserted his willingness to do everything possible to eliminate the differences.

Chairman Cabell stated the position of the Highway Commission with respect to this controversy by stating that the Commission realizes that it is a serious and important matter, but feels that it is a problem over which it has no control in any way, there being a question whether or not the Highway Commission has authority to operate a ferry at The Dalles, and, if it does have such authority, should the Commission exercise it. He inquired just what the delegation wants the Commission to do, and was informed by Mr. Nelson that they believe the Commission has legal authority to establish ferry service at this point and to operate it without charge, and that is just what they want the Commission to do. Chairman Cabell then advised that the Commission feels, from information at hand, that it can only act if the State of Washington, which is concerned, will cooperate, inasmuch as the ferry operates between the two states, but the Commission does not now have information as to the attitude of the Washington authorities with respect thereto. He pointed out that the installation of a new ferry service calls for new approaches on each side of the river which, indications are, will cost a considerable sum of money. He also pointed out that many people are asking for a bridge across the river at this point so, if the Commission should go to a lot of expense in connection with the ferry operation and later on build the bridge, it seemed to him that ferry expenditure would be a waste of public funds. He advised that the Commission is not in position today to make a decision, but will have to consult with the authorities in the State of Washington first, and even if such officials approve the project, there is still the question just what the Oregon Highway Commission will do about it; however, the Commission will then go into the merits of the case. This concluded the conference.

Mrs. Jessie M. Honeyman, President of the Oregon Roadside Council, was present. Mrs. Honeyman brought up for discussion the matter of acquiring a certain myrtle grove in Curry County, same being owned by Mr. Elmer Bankus, Brookings, who is asking the sum of \$10,000 for the same. She said that the Oregon Roadside Council is very enthusiastic in securing this property for the state as a state park, and that they have the endorsement of the Garden Club. Furthermore, efforts are now being made to raise the purchase price by private

subscription so the state will not be called upon to pay any of such expense, although later on the Highway Commission will probably be asked to improve the road which extends to the grove from the Oregon Coast Highway. The object of the Roadside Council, she said, is simply to preserve the myrtle grove for the benefit of posterity and, if action is not now taken to that end, the probabilities are that the grove will be sold for commercial purposes. She asked the Highway Commission to state whether or not it is willing to endorse the project, because the Oregon Roadside Council cares not to do anything that does not have the approval of the Commission.

Chairman Cabell advised that the Highway Commission some time ago had under consideration the purchase of this area but decided not to buy it because it meant the assumption of a big obligation with respect to the improvement of the road to the area which the Commission felt it could not very well afford to take on at the time, in view of the indefiniteness of highway funds. He requested time for the Commission to give the matter further thought, and assured Mrs. Honeyman that she would be given an answer on or before October 28, the date of the next annual meeting of the Oregon Roadside Council.

Mrs. Honeyman also asked the Commission to cooperate with the Oregon Roadside Council in preserving satisfactory conditions along the roadsides adjacent to United States Army cantonments, especially as to morals, housing, and sanitation. The Commission took no action.

Mrs. Honeyman also brought up for discussion the matter of beautification of the Columbia Gorge. She said that the Oregon Roadside Council has plans for a survey to determine just what is needed to preserve the scenic beauties of this Gorge, and is asking the Highway Commission to guide them in their efforts because they want to work with the Highway Commission in every way possible and to do everything that they can, and, as may be necessary, to perfect their object as well as to please the Highway Commission. The Commission took no action.

Mr. Clark Irving, Independence, was present and presented a claim, in the amount of \$541.10, for damage to his truck and trailer and for loss of time resulting from an accident, involving his equipment and a state highway department truck, on the North Santiam Highway. Mr. Irving stated that he was engaged in hauling logs on the North Santiam Highway and in rounding one of the curves, suddenly came upon a state highway department truck that was being driven on the wrong side of the road, and in order to avoid a collision drove his truck into the ditch, damaging the same and causing expense for repairs, etc., in the amount stated. He alleged that the highway department employee admitted at the time that he was at fault and was not paying proper attention to his driving and, in view thereof, asked the Commission to reimburse him for his losses.

The Engineer stated that reports on this accident indicate that the highway department employee was not entirely to blame, and that Mr. Irving was exceeding a safe rate of speed and could have avoided the accident if he had had his truck under full control. The matter was discussed at some length

during which the Attorney gave as his opinion that the Commission could not avoid liability in the case because the state truck was being operated on the wrong side of the road by a state employee. He suggested that the claim be submitted to the state's insurance company for settlement. The Commission approved the suggestion and referred the matter to the Attorney to handle.

Mrs. E. L. Philpott, Port Orford, was present and discussed with the Commission the matter of re-establishing her tourist cottages at Port Orford to accommodate the improvement of the Oregon Coast Highway at that place, which matter was discussed with the Commission at a previous meeting. The Attorney recalled the facts in the case and advised that the main issue is whether or not the state will raise the cottages to a level of the new highway when it is built. He advised that, according to the plans for the highway improvement, waste materials from the highway excavation are to be filled in around the cottages to approximately the level of the new highway grade, but no provision has been made for raising the cottages to this level. Chairman Cabell advised that there is a question whether or not the Highway Commission is liable for such expense, and there is also the question whether or not the Commission has legal authority to spend state money for the purpose, so the Commission is not in position to make a definite statement at this time. The Attorney suggested that a decision in the matter be deferred until the highway has been constructed. Mrs. Philpott expressed her willingness to wait until that time. This concluded the conference.

Mr. George H. Clausen, log hauler, Molalla, and his attorney, Mr. J. Dean Butler, Oregon City, came before the Commission in regard to the suspension of Mr. Clausen's log hauling permit, for violation of the traffic laws and the rules governing truck hauling of logs over state highways. It appears that Mr. Clausen's equipment has been weighed on three different occasions by weighmasters in the employ of the state highway department, and in each instance was found to be carrying loads weighing in excess of the statutory limits; further, that the penalty imposed on Mr. Clausen for the third offense was a fifteen-day suspension of the operation of the equipment involved in the overload. Mr. Butler offered objections to the penalty, stating that he did not believe that Mr. Clausen's equipment was overloaded, because it previously had been weighed on scales installed by Ostrander Brothers, logging operators, in the timber at the loading point, and was there found to be within the legal weight limits. It was his thought that the state's scales at Molalla do not weigh accurately, and, in view thereof, he urged the Commission to cancel the penalty, and allow Mr. Clausen to continue operating at once. Mr. Butler pointed out that Ostrander Brothers have installed two sets of scales in the woods, so placed that the entire load can be weighed at one time, whereas the state's scales will permit the weighing of only one axle at a time. He declared it an impossibility to get an accurate weighing on a single set of scales and alleged that Mr. Clausen's losses will amount to \$1,000 if he is required to discontinue the operation of his truck for the fifteen-day period. The Engineer advised that the state's scales are inspected frequently by the State Sealer of Weights and Measures, and there is absolutely no question as to the accuracy of the weighings; furthermore, by the well-known principle of mechanics, the gross weight of the combination would be the same, whether weighed in one operation on two sets of scales, or in increments on a single

set of scales. He suggested another check of both sets of scales by the State Sealer of Weights and Measures, the state to pay the fee for checking the state's scales and the company to pay that for checking its scales.

Chairman Cabell advised that, while the Highway Commission appreciates the value of the scales installed by logging companies, it cannot accept weighings on such scales, but must base its actions on the results of the weighings on the state scales. He concurred in the suggestion of the Engineer that both scales be again checked. After further discussion, and in view of the differences of opinion with respect to the correctness of the state scales, the Commission decided to let Mr. Clausen go back to work immediately. The Engineer was thereupon instructed to have the state scales checked. The Secretary was instructed to release Mr. Clausen's P.U.C. plates. (The state's scales were later rechecked and found to be correct by the State Sealer of Weights and Measures, who verified the Engineer's statement that the total weight obtained by weighing the axles separately gives a correct measurement.)

Mr. Fred Packwood, attorney for certain logging interests, came before the Commission and requested the following in behalf of his clients: (1) Speeding up of weighing by state weighmasters at state scales. (2) Moving of scales near Seaside, which, he declared, are now in the wrong location. (3) Keeping of a complete record of all weighings, including such items as species of logs, number of logs in the load, and others. (4) Revision of the penalty for minor offenses. He questioned the legality of the procedure which requires the surrender of P.U.C. plates of the operator; however, stated that the principle is satisfactory as far as the operators are concerned, although they feel that the penalty is too severe, particularly on the occasional violator whose loads weigh only slightly in excess of the legal limit. He held no brief for the willful violator. (5) Mr. Packwood requested a conference among representatives of the State Highway Commission and representatives of the lumbering industry to ascertain whether or not a solution of the problem can be arranged whereby the loads can be determined by board feet rather than by weights.

Chairman Cabell advised that the Commission has already ordered the scales at Seaside removed to another location, and the work will be done as soon as possible; further, that the speeding up of weighing at state scales has also been ordered, so as to avoid as much loss of time as possible on that account. As to the reduction in penalty for overloading, he stated that the Commission has approved a reduction in such penalty from five, ten, and fifteen days suspension of a permit for the first, second, and third offenses, to three, six, and nine days suspension for the same offenses, subject to the condition that Commissioner Oliver concurs. He also said that the Commission will take under consideration Mr. Packwood's request with respect to the keeping of a complete record of all weighings, regardless of whether or not an overload is involved.

The Commission adjourned at 6:00 p. m. to reconvene the following morning in the same room.

Portland, Oregon, October 17, 1941

The State Highway Commission reconvened at 9:00 a. m. in the auditorium of the Public Service Building. Present were:

Henry F. Cabell, Chairman
Huron W. Clough, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Claisyer, Secretary

Commissioner Oliver was absent.

Bids as follows for highway construction work were opened and read in conformance with previously published notice, following which Chairman Cabell announced that the awards of contracts would be made at 3:00 p. m. in the same room:

CORVALLIS-NEWPORT AND KINGS VALLEY SECONDARY HIGHWAYS
WHEN ROCK PRODUCTION

A. T. Dolan	\$25,200.00
R. O. Dail & Warren Bros.	25,320.00
Rogers Construction Company	28,920.00
A. H. Saxton & Son	29,720.00

LAKEVIEW-BURNS HIGHWAY
CINDER BUTTE-JUNIPER RIDGE SECTION
GRADING, SURFACING AND OILING

Rogers Construction Company	\$118,252.60
Babler Bros.	139,999.50
McKutt Bros.	156,446.00

MIDLAND SECONDARY HIGHWAY
DIVERSION CANAL-MIDLAND OVERCROSSING SECTION
GRADING, SURFACING AND OILING

Rogers Construction Company	\$47,451.00
Clifford A. Dunn	54,523.00
Jones & King	60,364.45

FOUR STATE HIGHWAYS NEAR KLAMATH FALLS
KLAMATH FALLS ROCK PRODUCTION

Rogers Construction Company	\$17,500.00
Clifford A. Dunn	19,225.00
Jones & King	24,000.00
W. D. Miller Construction Company	25,300.00

MAINTENANCE STATION AT ALKALI LAKE
TWO FRAME DWELLINGS AND ONE EQUIPMENT BUILDING

Tri-State Construction Company

\$21,092.56

CITY STREETS IN PORTLAND
NORTH BURGARD STREET SECTION - GRADING AND PAVING

Porter W. Yett
Parker-Schram Company
Jacobsen-Jensen Company

\$32,703.50
33,500.20
35,569.00

ATHEA-HOLDMAN SECONDARY HIGHWAY
GERKING SCHOOL-ATHENA SECTION - GRADING, SURFACING & OILING

Rogers Construction Company

\$26,229.00

OLD OREGON TRAIL HIGHWAY
SOUTH HERMISTON SECTION - GRADING, SURFACING & OILING

Jacobsen-Jensen Company
Rogers Construction Company

\$24,460.20
\$25,037.50

TUALATIN VALLEY HIGHWAY
SYLVAN-WEST SLOPE SECTION - GRADING AND PAVING

Jacobsen-Jensen Company
Porter W. Yett

\$106,528.00
114,061.00

The Engineer requested authority to advertise for bids for the furnishing of maintenance materials for the Olney-Jewell Section of the Nehalem Secondary Highway, in Clatsop County. He estimated the cost of the project at \$19,200. The Commission approved the request.

The Commission discussed the proposed improvement of North Burgard Street, Portland, which extends from the St. Johns district to the Oregon Shipbuilding Corporation's plant, which improvement is estimated to cost approximately \$35,000, and is needed in order to relieve the congestion caused by the shipbuilding plant in this locality. The Commission confirmed its oral decision previously rendered, authorizing this improvement as a state financed project, subject to the City of Portland's securing the extra right of way that may be required. The Commission also confirmed the oral authority previously granted the Engineer to advertise this project for bids. The Attorney was instructed to ascertain who has jurisdiction over the road, the City of Portland or Multnomah County. The standard form of agreement covering improvement of city streets not on the state highway system is to be entered into with the proper authorities.

The Commission discussed a letter from the Town of Granite, Grant County, requesting improvement and maintenance of certain streets in this

town that are being damaged by heavy trucking. The Commission considered that the Town of Granite does not qualify for state funds under the Commission's program for city street improvements, and accordingly denied the request.

The Commission also denied a petition from residents of Douglas County requesting additional improvements to the Tiller-Trail Secondary Highway between Days Creek and the "top of the mountain."

The Secretary presented several communications from organizations and citizens of Toledo, Oregon, requesting sidewalk construction along the Corvallis-Newport Highway within the city limits of Toledo. The Engineer estimated that such construction would cost about \$5,050. He recommended approval of the expenditure and that the project be included in the Commission's sidewalk program for 1942. The Commission approved the recommendation.

The Commission discussed and adopted recommendations contained in the resolutions of the Advisory Committee on Publicity Matters, covering activities of the Travel and Information Department during the year 1942.

The Commission approved purchases of the following equipment and supplies, and ordered that the purchases be made through the State Purchasing Agent:

Traffic line lacquer required for 1942. Estimated total cost \$112,050.

70 new trucks of Ford and Chevrolet type; 70 old trucks to be traded in as part purchase price. Total cash outlay \$77,000.

15 cars of Ford and Chevrolet type to replace a like number which have traveled more than 100,000 miles, and one additional car for Assistant Maintenance Engineer; 15 old cars to be traded in as part purchase price. Total cash outlay \$13,700.

1 portable churn drill. Estimated cost \$2,500.

1 rotary drill. Estimated cost \$450.

6 radio receiving sets; 6 old sets to be traded in as part purchase price. Estimated total cost \$300.

Mr. James Morrell, representing Consolidated Freightways, and Mr. Tom J. White, attorney for the company, came before the Commission in behalf of the company's request for permission to operate over Oregon state highways truck and trailer units having an overall length of 60 feet, and a gross weight of 68,000 pounds. Mr. White was principal spokesman. He urged the Commission to authorize such movements and gave as his opinion that the Commission has legal authority to do so if it so desires, particularly because of the present emergency requiring the swift movement of defense materials. He exhibited communications from numerous organizations, including the Oregon

State Grange, Oregon Wool Growers Association, Portland Draymen and Warehousemen's Association, Northwest Trailer Manufacturers' Association, Oregon State Federation of Labor, and the Eastern Oregon Wheat League, all of whom are in sympathy with the request, and urged favorable consideration thereof by the Highway Commission. He declared that this is a problem that affects all industries and is not simply for the benefit of any particular trucking line.

Chairman Cabell advised that the Highway Commission has given this matter considerable thought, and would like to approve the request if it could, but considers that it does not have authority to do so, in view of the action taken by the 1941 Oregon Legislature. Furthermore, there is a question in the minds of the Commission, in view of such legislative action, whether or not it should exercise any authority that it may now have with respect thereto.

Mr. White stated that he already has secured numerous statements from recognized lawyers who are of the opinion that the Commission would not be violating its authority by granting such permits, and can secure many more such opinions if necessary.

The Commission's Attorney stated that the Commission cannot liberalize the legislative action and, in his mind, if the Commission approved the granting of the permits, it would be doing so "in spite" of the act rather than in conformity with it. He suggested that it might be possible to clarify this situation by securing a declaratory judgment from the courts. Chairman Cabell then advised that the Commission is now considering the securing of such a declaratory judgment, and is also considering the advisability of meeting with members of the Legislature and with the officials of the railroads, but has not reached a definite decision as yet thereto.

Mr. Guy Cordon, attorney, Roseburg, and Mr. Tom Shea, Manager of the Oregon Motor Transport Association, were also present and entered into the discussion. Mr. Cordon advised that he is convinced that the Highway Commission now has the authority needed to grant the permits requested, and gave as his thought that the law now provides an authority to take care of emergency situations in the public interest, in fact the law, in his estimation, cannot carry any other meaning.

Chairman Cabell concluded the discussion, stating that the Commission appreciates the seriousness of the situation and the necessity for an early decision, and that it is the intention of the Commission to make such decision as soon as it possibly can; however, the matter cannot be decided until all three members of the Commission are present. He promised to let the delegation know as soon as possible just what to expect.

Mr. Walter Meacham, member of the Commission's Old Oregon Trail Marker Committee, was present and asked the Commission to continue the marking of historical spots along this highway, so that all such locations will be properly marked in 1943, during the Old Oregon Trail Centennial of that year. He also suggested that the marking of such historical spots should be done on other state highways throughout the state. The Commission took no definite action in the matter; however, instructed the Engineer to report at

the next meeting the progress that has been made to date on the Old Oregon Trail markers, and how much it has cost the state to install the markers now in place. Mr. Meacham was informed that the Commission will give him an answer when the Engineer's report has been considered.

Messrs. Zidell and Steinberg of the Zidell-Steinberg Company, Portland, came before the Commission at this time relative to the bid submitted by them on the previous day for the purchase of steel rails, et cetera, salvaged from the Front Avenue improvement in Portland. Mr. Zidell gave as his understanding that the Commission has rejected their bid, which was the highest offer presented, and he asked the Commission to reconsider the matter. He stated that the price submitted by them was based on delivery of the material to the Bethlehem Steel Company, F.O.B. Portland, whereas it is their understanding that the Commission was of the opinion that the price was for delivery F.O.B. Seattle, which would explain the difference between the amount of their offer and the price approved by the O.P.M. for delivery in Seattle. He further stated that, at the offer which his company made, they are realizing a profit of only 50 cents per ton which would barely pay the cost of trucking the material from its present location to their warehouses and loading of the same on the cars for shipment. The Engineer stated that, at the time he recommended rejection of the bids, he was under the impression that the basic point for calculating steel prices was in Portland; however, if Seattle is the basic point as stated by Mr. Zidell, he would be inclined to reconsider his recommendation, inasmuch as his estimate was made on the basis of Portland being the basic point. After considerable discussion the Commission referred the matter to the Engineer to verify the statements made by Messrs. Zidell and Steinberg, it being the understanding that, if the facts are as stated, the Commission would revise its previous decision in the matter. Accordingly, final action was deferred until later in the session. (The Engineer reported during the afternoon session that the statements made by Messrs. Zidell and Steinberg are correct and, in view thereof, the Commission sold the material to this company.)

The Honorable Elmo E. Smith, Mayor of Ontario, was present and discussed with the Commission the proposed improvement of West First Street North, Ontario, as the new route for the Old Oregon Trail. Mr. Smith stated that the City of Ontario will be satisfied with the improvement of the four blocks south from Idaho Street and the one-block connection with Oregon Street, and inquired as to the plans of the Commission in regard thereto.

The Engineer reported on the cost involved as follows: to construct a B-2 type surfacing the full length of West First Street, from Fourth Avenue South to a connection with the present highway at the north city limits, including a one block connection with Oregon Street on Idaho Avenue, will cost \$32,000; to construct a B-2 type surface on the four-block section south of Idaho Avenue and the one-block connection with Oregon Street will cost about \$9,200; whereas, to construct such section using cement concrete type of pavement will cost approximately \$19,600, the improvement to consist of pavement 50 feet wide for three lanes forming traffic with two parking lanes 3 feet wide. He recommended the Portland cement concrete improvement costing \$19,600

on the four-block section, including the connecting block on Idaho Avenue; and that the improvement of West First Street, north of Idaho Avenue, be deferred until some future date. Mayor Smith expressed satisfaction for such an improvement. He also said that the city council intends to adopt an ordinance providing for parallel parking of cars. After discussion the Commission, by unanimous vote, approved the West First Street improvement on the basis recommended by the Engineer, the work to be done as a city project and to be covered by written agreement. The matter of rerouting the highway on West First Street was deferred by the Commission until some future time.

Mayor Smith then asked the Commission to construct an oil surface on South First Avenue West between West First Street and Oregon Street. He said that the city would like to have this work done by one of the state's oiling crews when operating in that vicinity, and that the city would reimburse the state for full cost thereof. The Engineer suggested that it would be better to let one of the state's contractors do the work and advised that, if the city would approve such arrangement, he would include the work in one of the state's contracts when bids are taken; and, if the low bid received is not satisfactory, the city could again ask the Commission to have the work done by a state crew. Mayor Smith approved the suggestion.

Reconsideration was given by the Commission to the claim of Alfred Buchheit, Jr., for injuries received while playing under the McLoughlin Bridge near Oregon City. (See previous record for details of accident.) The matter was discussed at some length, during which the details of the accident were recalled. The Commission decided that it has certain liability in the case and thereupon approved payment of the claim in principle. Final action in the matter was deferred by the Commission until it knows definitely the exact amount of the claim. The matter was referred to the Attorney for report.

The Commission considered and denied the claim of one Dent Clark for reimbursement for the cost of repairing his automobile which was damaged in a collision with a state-owned car on January 22, 1936. The Attorney was instructed to so inform Mr. Clark.

The question of penalty to be imposed on log haulers for a fourth offense in overloading their trucks was discussed. The Commission decided that such penalty should consist of suspension of the special carrier permit for an extra three days over and above that provided for the third offense, making a total of twelve-days' suspension for the fourth offense.

The Commission confirmed the Engineer's action in reinstating the logging truck belonging to Haley and Haley which was previously suspended for overloading. (See letter dated September 20, 1941, from Haley and Haley to Oregon State Highway Commission, for conditions of reinstatement.)

The question of penalty to be imposed on log haulers for refusal to report to state traffic scales for weighing when requested to do so by state weighmasters was also discussed. The Commission decided that for a first offense of this kind the operator shall be given fair warning; and for a second offense the penalty shall be the revocation of the operator's permit.

The Commission discussed a complaint from the Southern Pacific Company that log haulers have formed the habit of dumping logs on railroad property at Molalla in order to avoid being caught with an overload and to evade the customary penalty for overloading. The Commission assumed no jurisdiction in the matter, it being considered a matter for the State Police to handle.

The Secretary presented a letter from the Updegrave Trucking Company, Chiloquin, requesting permission to truck haul logs over state highways in the vicinity of Agency Lake, Klamath County, during Armistice Day, which is prohibited under present rulings. It gave as its reason for such request that Agency Lake may freeze over in the near future and, when it does, it will not be possible for them to deliver logs to the Algoma Lumber Company's mill, and the company is particularly anxious to secure all of the logs that it can in the meantime. The Commission approved the request as an emergency proposition.

Consideration was given by the Commission to the request of System Freight Service for a continuous permit to transport loads having an overall height of 12' 6" over the Pacific Highway from the California state line to Portland. It was pointed out in the discussion that there are three points on the Pacific Highway where impaired clearances exist, viz., South Umpqua River Bridge near Myrtle Creek, in Douglas County, where the clearance on each side of the bridge is 11' 8"; Goshen Undercrossing, with a clearance of 12' 11"; and Springfield Undercrossing, with a clearance of 13' 00". The Secretary recalled that the Commission previously ordered that no permits involving over-height be issued unless there is a clearance of at least 12 inches between the top of the load and the lowest point of the overhead structure, which ruling prohibits the granting of permits for more than 10' 8" on this highway.

The Engineer advised that the center portion of the South Umpqua River Bridge has a clearance of 15' 00", and that the impaired clearances are at the portals, which could be remedied at small expense so as to allow movements 12' 6" high overall to pass through without difficulty. At the other two points, he said, movements having an overall height of 12' 5" could pass with safety if the Commission would modify its present ruling for clearances from 12 inches to 6 inches. He recommended such modification. He also recommended the remodeling of the portals of the South Umpqua River Bridge, and advised that if these recommendations are adopted, it would then be possible for movements having an overall height of not more than 12' 5" to traverse the Pacific Highway throughout its entire length in Oregon without difficulty, and without undue hazard to other traffic.

The Commission approved the recommendations and thereupon authorized the Engineer to proceed with the remodeling work on the South Umpqua River Bridge. The Secretary was authorized to grant a continuous permit to the System Freight Service for movements of 12' 5" overall in height subject to the condition that, until the South Umpqua Bridge remodeling work is done, movements across this structure shall be under the direction of flagmen (stationed one at each end of the bridge) to stop other traffic from using the bridge while it is occupied by the company's equipment, it being necessary for the company's equipment to use the center of the roadway at this particular location.

The Commission denied a request of Bordenave & Beckley, Stockton, California, to operate over Oregon state highways between the California state line and Fort Klamath, Lakeview, and other points in southern Oregon, truck and trailer units having an overall length of 60 feet, and weighing up to 68,000 pounds gross. The Commission considers that it has no legal authority to grant permits of this kind.

For similar reasons the Commission denied a request from the Lang Transportation Company, San Pablo, California, to operate similar sized equipment in the transportation of petroleum products from California to Klamath Falls, Ashland, Medford, and Grants Pass.

The Secretary presented a request from the Sun Transportation Company, Hermiston, Oregon, for permission to transport an overload of 750 pounds on its trucks that operate over the highways of this state, such overloads consisting of special sanding equipment attached to the company's trucks during the winter season. The Commission denied the request, there being a question as to whether or not the Commission has authority to grant such permit. The Secretary was instructed to so inform the company.

The Commission discussed a date for its proposed inspection of highways in Wallowa County, heretofore tentatively set for October 29, 30 and 31. The Commission decided to postpone this trip until November 11 and 12, immediately preceding the Commission's regular meeting in Portland which was tentatively scheduled for Thursday and Friday, November 13 and 14. (The regular meeting date was later changed to November 12 and 13, and again to November 17 and 18. The Eastern Oregon trip was deferred indefinitely on account of the illness of Commissioner Oliver.)

The Secretary presented a letter from the Redwood Empire Association inviting the members of the Commission and its staff to be present at its twenty-first annual banquet in Eureka, California, on Saturday, October 18, 1941. The Secretary was instructed to acknowledge the invitation with thanks, and express regrets that none of the Commissioners or staff members can be present.

Similar action was taken by the Commission on an invitation received from the Montana Motor Transport Association for the Commission and its staff to attend the third annual state convention of the association in Missoula, Montana, on November 21 and 22, 1941.

The Commission discussed a report from the State Police Department advising that one Elvin Thomas Cully, Portland, maliciously cut down and destroyed two Japanese cherry trees that were planted by the state highway department forces on the right of way of the Pacific Highway East (McLoughlin Boulevard) near the Multnomah County line. The report indicates that Mr. Cully was arrested and fined \$45 and costs, and was given a 30-day suspended jail sentence. The Commission ordered the trees replaced at once.

A letter was presented from the Bethlehem Steel Company suggesting, on account of the serious shortage of scrap steel, et cetera, and in order to

avoid an accumulation of large quantities of scrap materials by scrap dealers to the detriment of the consuming mills and the national defense program generally, that, whenever the State Highway Commission has scrap materials for sale, it turn over such scrap material to the consuming mills at the maximum prices established by the government for the respective grades of scrap, rather than take competitive bids for the purchase of the same. The Commission deferred a decision in the matter, pending receipt of information from the O P M. The matter was referred to the Engineer to secure such information.

The Engineer reported the award of contracts for highway construction work, as follows, under authority previously granted him by the Commission, the conditions of the awards having been satisfied:

Grading and topping the West Unit of Sherars Grade Section of the Sherars Bridge Secondary Highway, in Sherman County. Bids taken September 4; contract awarded September 16, 1941, to Morris Bros., the low bidders.

Grading the Madras-Juniper Butte Section of The Dalles-California Highway, in Jefferson County. Bids taken September 4; contract awarded September 22, 1941, to Leonard & Slate, the low bidders.

Grading the Warm Springs River-Mill Creek Section of the Warm Springs Highway, in Wasco County. Bids taken September 4; contract awarded September 23, 1941, to Max J. Kuney, the low bidder.

Swisshome Rock Production Project on the Siuslaw and Alsea-Deadwood Highways, in Lane County. Bids taken September 4; contract awarded September 24, 1941, to A. S. Wallace, the low bidder.

Surfacing and oiling the Salt Creek-Manley Ranch Section of the Little Butte Secondary Highway, in Jackson County. Bids taken September 4, 1941; contract awarded October 1, 1941, to Norris Bros., the low bidders.

Pendleton-Meacham Rock Production Project on the Old Oregon Trail Highway, in Umatilla County. Bids taken September 4; contract awarded October 3, 1941, to A. S. Wallace, the low bidder.

The Commission confirmed such awards as reported.

The Engineer reported a request from the City of Oregon City for permission to construct a driveway, permitting access to the Pacific Highway from Block 12, between 13th Street and 14th Street, in Oregon City. He said that the city will pay the costs involved and will do the work in conformance with state requirements. He recommended a proval of the request subject to the condition that a traffic divider is installed on the highway pavement in front of this block to separate the traffic, such divider to be constructed and paid for by the state. The Commission approved the recommendation under the condition that the city will not allow traffic to turn to the left when entering the highway over this driveway.

The Commission discussed and approved the Attorney's letter of September 26, 1941, directed to Mr. Edward C. Kelley, Assistant General Counsel for the Bonneville Power Administration, relative to the installation and maintenance of a power pole line along the Lower Columbia River Highway in front of the Tongue Point Naval Base near Astoria, which section of highway is now under condemnation by the United States of America and is to be used in connection with the development of the naval base. Briefly, the Attorney's letter grants authority for the installation and maintenance of the power line on the highway, subject to the control, ownership, and authority of the United States Government over the property as defined and declared in the condemnation proceedings.

A letter was presented from U. W. Ellmaker, Eugene, requesting state cooperation in the construction of a stock fence along the right of way of the Eugene-Swisshome Secondary State Highway westerly from the "Porter Place" across the E. M. Warren land, a distance of about one mile. Mr. Ellmaker offers to furnish woven-wire fencing and barbed wire as may be necessary, and is asking the Highway Commission to furnish fence posts and to erect the fences. The Commission denied the request as a matter of policy, it being considered that the construction of the fences on such basis would establish an undesirable precedent and very likely would involve the state in considerable expense in the future.

The Commission discussed the matter of future maintenance of the county road between Glenwood and Sunset Camp, in Washington County, which road has been used for a number of years as a detour pending completion of the Wilson River and Wolf Creek Highways. The Engineer advised that this detour is no longer required in view of the fact that both state highways have been opened for general public use at this location and accordingly he directed a letter to the Washington County Court on September 21, 1941, stating that the Highway Commission desires to relinquish all jurisdiction over the road and responsibility for the maintenance of the same, and received a reply signed by all three members of the county court in which the county agrees hereafter to assume full responsibility with respect to the road. The Commission approved the arrangement.

A letter was presented from the Bonneville Power Administration requesting the removal of certain telephone poles now existing on the highway right of way in front of the Bonneville substation near Youngs Bay Bridge in Astoria. The Engineer advised that originally the right of way was 60 feet wide at this point but was later widened to 80 feet by acquisition of a strip of land 20 feet wide on the side of the Bonneville Power Administration's plant; also, that the telephone poles that occupied this strip are not now in the proper location with respect to the right-of-way line. He gave as his thought the Commission is strictly within its rights in asking the telephone company to remove them. The Attorney confirmed the Engineer's statement. The Commission indicated a desire to accommodate the Bonneville Power Administration and accordingly instructed the Engineer to ask the telephone company to move the poles.

The Engineer brought up for discussion the matter of installing traffic signals on the Tualatin Valley Highway at certain street intersections in Hillsboro. The Engineer advised that a traffic survey made at this place some time ago indicated that traffic lights were not justified; however, the opening of the Wilson River Highway to public use has changed the situation and it is now apparent that traffic lights should be installed. He recommended the installation of fixed-time signals at the intersection of First, Second, and Third Streets with the state highway, provided the City of Hillsboro will pay one-half of the cost of the installations which he estimated would amount to about \$4,500. The Commission approved the recommendation.

The Engineer also brought up for discussion the matter of establishing speed zones on the Pacific Highway West in the town of Tigard. He advised that the town of Tigard is not incorporated, hence the Highway Commission has authority to control the speed of traffic if it so desires. He recommended the following speed limits: 35 miles per hour between mile post 9.477 (station 55+00) and mile post 9.875 (station 76+00), and 35 miles per hour between mile post 10.170 (station 91+60) and mile post 10.780 (station 123+80). He also recommended installation of a flashing beacon at the intersection of this highway with the Beaverton-Aurora Secondary State Highway. The Commission approved both recommendations. The Attorney was instructed to prepare an appropriate form of resolution relative to the establishment of the speed zone for adoption by the Commission at its next meeting.

The matter of adopting speed zones for the Siletz Secondary Highway was also discussed. The Engineer advised that investigations made as to the necessity of establishing speed zones on this highway reveal that they are not justified and he accordingly recommended against such procedure. However, in view of the number of accidents that have occurred on this highway, he suggested that appropriate signs be installed at curve points warning the traveling public to drive carefully and to beware of other traffic. The Commission approved the suggestion.

The Commission adjourned at 12:15 p. m. and reconvened at 1:30 p. m. in the same room with the same persons present and participating.

Mr. William Tugman, Eugene, was present and discussed briefly with the Commission matters pertaining to the "Route F" Highway. He questioned the advisability of spending any state funds for the improvement of this road, and gave as his opinion that the project never should have been started. The Commission took no action.

The Commission discussed Lincoln County's indebtedness to the state for highway purposes, which account amounts to \$15,500. The Attorney advised that the county is willing to settle this account on a 50-50 basis, in other words is willing to pay the state \$7,750 if the Highway Commission will consider such amount as settlement in full and will approve payment out of the county's share of the state gasoline tax fund as follows: \$1,500 to be paid from the December 15, 1942, allotment of motor vehicle funds and a like sum each December thereafter until the full amount is paid. The Commission approved such settlement subject to the condition that it meets with the approval

of Commissioner Oliver. An agreement with the county court was thereupon signed; however, the Secretary was instructed to retain all copies of the agreement until Commissioner Oliver's reaction thereto has been secured.

The matter of adopting speed zones for the Oregon Coast Highway between Cannon Beach and Manzanita was brought up for discussion by the Engineer. He recommended that speed zones be established as follows:

40 miles per hour between mile post 24 and mile post 25									
30	"	"	"	"	"	"	25	"	"
20	"	"	"	"	"	"	26.5	"	"
15	"	"	"	"	"	"	27	"	"
25	"	"	"	"	"	"	28	"	"
35	"	"	"	"	"	"	29	"	"
45	"	"	"	"	"	"	32.5	"	"
55	"	"	"	"	"	"	36	"	"

After discussion the Commission approved the recommendation as a trial proposition. The Attorney was instructed to prepare an appropriate form of resolution with respect thereto for consideration at the next meeting.

The Commission by unanimous vote confirmed, subject to approval by Governor Sprague, oral action heretofore taken authorizing Mr. Walter Meacham, member of the Old Oregon Trail Centennial Committee, to go from Portland to Marysville, Kansas, at state expense, in the interests of the Centennial.

County Judge A. H. Boice, of Curry County, and Mr. Jay Moltzner, attorney at Gold Beach, representing the Gold Beach Chamber of Commerce, came before the Commission in regard to the proposed improvement of the Oregon Coast Highway through Gold Beach. They gave as their understanding that the Highway Commission has decided to construct this improvement on a 60' right of way, whereas the people of Gold Beach with few exceptions are most decidedly in favor of an 80' right of way improvement, and feel that they are entitled to it. They urged the Commission to modify its decision and provide a standard improvement on an 80' right of way basis.

Chairman Cabell advised that the Commission had given this matter considerable thought, and did not make its decision until the attitude of the people of Gold Beach had been ascertained by representatives of the Highway Department, who found that while the people were inclined favorably to an 80' right of way improvement, they did not object to the improvement on a 60' right of way. Another reason that the Commission decided on a 60' right of way was because of the extra right of way expense, investigations having revealed that to provide an 80' right of way would cost over \$40,000 more than a 60' right of way. The Commission, he said, would not particularly object to paying the extra cost to construct on an 80' right of way, but could not see its way clear to pay the extra right of way costs and, so far as he personally is concerned, he has not changed his mind, although he favored an 80' right of way improvement at reasonable extra expense.

Mr. Moltzner advised that the recent fire in Gold Beach has altered property values, and the probabilities are that an 80' right of way can now be acquired at much less expense than before the fire occurred. The matter was discussed at considerable length and as a result the Commission agreed to construct the project on an 80' right of way basis, if the cost to acquire an 80' right of way does not exceed the cost to acquire a 60' right of way by more than \$20,000. The Attorney was instructed to make a reappraisal of the property in company with Mr. Moltzner, within the next week or ten days.

At 3:00 p. m. Chairman Cabell announced two contract awards as follows, bids for which were taken on the previous day:

"Sale of scrap steel:- The bids for this project were rejected on the previous day. However, at that time the Commission was of the belief that the government limitation of prices was based on a figure F.O.B. Portland, whereas it really is F.O.B. Seattle. Had the Commission known this, he said, it would have accepted the bid of the high bidder, Zidell-Steinberg Company. The Commission has, therefore, reconsidered the matter and is today awarding the sale to Zidell-Steinberg Company at its high bid of \$11.66 per ton.

"Wreck and remove one frame building and one concrete building at 101 S. E. Union Avenue, East Portland:-The bids for this project were referred to the Engineer on the previous day. The Commission has reconsidered them and has awarded the contract to Shipyard Wood Company, Portland, at its bid of \$400.00."

Chairman Cabell also announced the award of contracts as follows, bids for which were taken at the morning session, such awards having been previously approved by the Commission by unanimous vote:

"Wren Rock Production Project on the Corvallis-Newport and Kings Valley Secondary Highways, in Benton County. A. T. Dolan, Tillamook, submitted the low bid for this work, in the amount of \$25,200.00. R. O. Dail & Warren Bros., Portland, were second-low, with a bid of \$25,320.00. There were two higher bidders. The Commission awards this contract to A. T. Dolan, at his low bid of \$25,200.00.

"Cinder Butte-Juniper Ridge Section of the Lakeview-Burns Highway, in Harney County. 4.8 miles grading and 13.1 miles surfacing and oiling. Rogers Construction Company, Dayton, Washington, submitted the low bid for this project, in the amount of \$118,252.60. The next-low bidder was Babler Bros., Portland, with a bid of \$139,999.50. There was only one other bid received. The Commission awards this contract to Rogers Construction Company, at its low bid of \$118,252.60.

"Diversion Canal-Midland Overcrossing Section of the Midland Secondary Highway, in Klamath County. 2.07 miles grading, surfacing and oiling. Rogers Construction Company, Dayton, Washington, submitted the low bid for this work, in the amount of \$47,451.00. The

second-low bidder was Clifford A. Dunn, Klamath Falls, with a bid of \$54,523.00. There was only one other bid received. The Commission awards this contract to Rogers Construction Company at its low bid of \$47,451.00.

"Klamath Falls Rock Production Project on four state highways near Klamath Falls, in Klamath County. Rogers Construction Company, Dayton, Washington, submitted the low bid for this work, in the amount of \$17,500.00. Clifford A. Dunn, Klamath Falls, submitted the next-low bid, in the amount of \$19,225.00. There were two higher bids received. The Commission awards this contract to Rogers Construction Company at its low bid of \$17,500.00.

"Maintenance Station at Alkali Lake, in Lake County. Two frame dwellings and one frame equipment building; also drill well, furnish and install pumping plant, lighting plant, and other miscellaneous work. Tri-State Construction Company, Portland, submitted the only bid on this project, in the amount of \$21,092.56. The Commission awards this contract to Tri-State Construction Company, at its bid of \$21,092.56.

"North Burgard Street Section of city streets in Portland, Multnomah County. 0.72 mile grading and paving. Porter W. Yett, Portland, submitted the low bid for this work, in the amount of \$32,703.50. The next-low bidder was Parker-Schram Company, Portland, with a bid of \$33,500.20. There was only one other bid received. The Commission awards this contract to Porter W. Yett, at his low bid of \$32,703.50.

"Gerking School-Athena Section of the Athena-Holdman Secondary Highway, in Umatilla County. 2.97 miles grading, surfacing and oiling. The only bid received for this work was from Rogers Construction Company, Dayton, Washington, in the amount of \$26,229.00. The Commission rejects this bid and orders the project readvertised.

"South Hermiston Section of the Old Oregon Trail Highway, in Umatilla County. 0.70 mile grading, surfacing and oiling. Jacobsen-Jensen Company, Portland, submitted the low bid for this project, in the amount of \$24,460.20. There was only one other bid received for this work, being that of the Rogers Construction Company, Dayton, Washington, in the amount of \$25,037.50. The Commission awards this contract to Jacobsen-Jensen Company, at its low bid of \$24,460.20.

"Sylvan-West Slope Section of the Tualatin Valley Highway, in Washington County. 1.44 miles grading and paving. Jacobsen-Jensen Company, Portland, submitted the low bid for this project, in the amount of \$106,528.00. The second-low, and only other bid submitted, was that of Porter W. Yett, Portland, in the amount of \$114,061.00. The Commission rejects these bids.

Mr. Howard H. Kramer, City Manager, Milton, Oregon, and County Judge Carl W. Chambers of Umatilla County, were present. They inquired as to the Commission's plans for a proposed revision in the Oregon-Washington Highway between the town of Milton and the Washington state line. They were informed by Chairman Cabell that the Commission had this project in mind at one time for fairly early construction; however, due to the failure of Congress to pass the bill that would have provided federal funds to finance it, the project had to be postponed and the Commission has no idea at the present time just when the job will go forward. Mr. Kramer urged the Commission to reconsider the matter and construct the project at the earliest possible time. He advised that the State of Washington has already purchased right of way for the Washington Section; furthermore, the State of Washington at one time had the money appropriated to pay for its section, but couldn't spend it because Oregon couldn't build its section, it appearing that both sections had to be constructed simultaneously. He stated that the project is a very important one, and the people are very anxious to have it constructed without delay. Judge Chambers also spoke in behalf of the project. The Engineer advised that, while the alignment of the new highway has been approved, no definite survey has yet been made. He gave as his thought that it would be a good idea to make a location survey now and secure right of way options so that everything will be in readiness when the Commission sees its way clear to proceed with the improvement. After some discussion the Commission authorized the survey and the taking of options for needed right of way. Chairman Cabell advised that it is doubtful that the Commission can do this job next year on account of uncertainties of funds; however, the Commission will do the best that it can.

Mr. Kramer then brought up for discussion the improvement of Main Street in Milton, which street is occupied by the railroad tracks of the Walla Walla Traction Company, under franchise from the city. He said that the street is in bad condition and needs repair at once, and that the present condition is not caused by railroad traffic but is principally the result of heavy trucking. Chairman Cabell stated that the Highway Commission is willing to cooperate in the improvement, but, in his estimation, the railroad company should carry out its contractual obligation as set forth in its franchise, or the equivalent thereto. The Engineer suggested that the railroad company should be required to at least install new ties and ballast and bring the rails up to the proper elevation of the street and, if the company would do that, the state might do the paving work between the rails in connection with the paving of the rest of the street. The matter was discussed at some length, but the Commission deferred a definite decision pending receipt of additional information.

Mr. Kramer agreed to furnish the Engineer with a copy of the railroad company's franchise, and it was agreed that a meeting on the ground should be held among the engineers of the state highway department, representatives of the railroad company, and representatives of the City of Milton to arrive at some arrangement which it is understood would be confirmed by the principals. It was also understood that the final arrangement would be covered by written agreement between the parties concerned. The meeting is to be held within the next couple of months, if possible.

A delegation from Ashland, consisting of Franklin J. Van Dyke, City Attorney, Mr. T. S. Wiley, Mayor, Mr. Green of the Ashland Tidings, and Mr. Homer Billings, was present in regard to the improvement of the Pacific Highway at the Plaza Corner in Ashland. They renewed their request for this improvement at the earliest possible time. They were informed by Chairman Cabell that the project will require considerable extra right of way and that, according to options taken from the property owners, such right of way will cost about \$82,000 which, in the minds of the Commission, is excessive as compared with the cost of construction, which is estimated at \$20,000. The delegation strongly urged the improvement as an extreme necessity notwithstanding the difference in cost of right of way and construction. Chairman Cabell expressed regrets that the right of way costs are excessive, which prevents the Commission from proceeding with the work. He said, however, that the Commission would give the matter further consideration and would make a final decision after consulting Commissioner Oliver. In the event such final decision is adverse, then the delegation will be given an opportunity to discuss the project with the Commission again.

The Assistant Attorney reported the status of the right of way budget. He advised that the amount of \$600,000 was budgeted for this purpose in 1941; however, obligations up to the present time exceed this amount by about \$45,000 although actual expenditures during this calendar year, in his estimation, will not exceed the amount of the budget. He also advised that of the \$800,000 budgeted for purchase of right of way for the Front Avenue Project in Portland \$501,800 has been obligated, and, in his estimation, actual expenditures this year will not exceed \$650,000. The Commission approved the report.

The Attorney brought up for discussion the matter of acquiring a small, triangular tract of land, containing 352 square feet, within the wye intersection of Union Avenue and Denver Avenue, Portland. He advised that this property is owned by Swift & Company which has agreed to sell it to the state for the sum of \$50 under the condition that the Standard Oil Company, which has the property under lease, is allowed the use of a 9-foot strip of right of way extending southerly from the triangular tract a distance of approximately 85 feet and is also granted a revocable permit, allowing the oil company the use of another strip of land 37 feet wide and approximately 160 feet long, immediately joining the 9-foot strip on the south. It was explained that the two strips are to be used by the oil company for driveway and parking purposes in front of its service station at this location and that no buildings will be constructed thereon. After considerable discussion the Commission approved the purchase of the triangular area at \$50 and the granting of a revocable permit for the use of the 9-foot strip, without charge; however, denied the request for the use of the 37-foot strip. (See map attached to right of way file No. 5671.)

The Attorney also reported a conversation with Mr. Harvey Wells, owner of certain property on the east side of the Pacific Highway near the Interstate Bridge, a portion of which property is needed for widening the highway at this point. He stated that, in the discussion of this matter, Mr. Wells suggested that it would be advisable for the state to acquire additional land at this location, which he thought would be needed in connection

with the traffic grade separation structure that is proposed for this location, and he indicated at the time that he would be willing to sell the property to the state if the Commission wants it. The question arose whether or not the additional area is absolutely needed for future developments at this point. The Engineer was instructed by the Commission to investigate and report on the situation.

The Attorney also rendered a brief report on the acquisition of the Mead property adjacent to the Upper Columbia River Highway which it is contemplated to acquire for park purposes. He advised that there are more than 100 acres of land in the Mead tract and that the owners are asking \$4,000 for the same. The Parks Superintendent, who was present, stated that he is interested only in securing enough of the property to protect the roadsides and is not particularly concerned with acquiring the entire area for park purposes. He pointed out that the right of way is quite crooked at this point, and some of the Mead property will be needed for right of way when the highway is realigned. The Commission appeared disinclined to purchase the entire area; however, ordered further negotiations with the owners with respect to acquiring right of way for the proposed highway revision with sufficient area on each side to protect the waysides.

The Assistant Attorney reported results of further negotiations with Serfling and Dolan, Gardiner, with respect to the acquisition of extra right of way needed for the improvement of the Oregon Coast Highway in front of the Serfling and Dolan store in Gardiner. He submitted two alternates as a solution of this problem which concerns the location for the gasoline pump which is now maintained by Serfling and Dolan in front of their store building, one of which alternates provides for the purchase of 3,180 square feet of land at 20 cents per square foot plus damages in the amount of \$5,550, and involves total destruction of the gasoline pumps. The other provides for the purchase of a smaller area at 15 cents per square foot plus \$50, subject to the understanding that the right of way width will be reduced from standard 40-foot width to approximately 31-foot width, and the curb will be built out on the adjoining private property so that vehicles may be serviced outside of the right of way limits. This settlement also involves the securing of an easement for the construction of the sidewalk upon the adjoining private property. After consideration the Commission approved settlement upon the basis of the latter alternate. (See details in right of way file 9665.)

The Attorney requested authority to acquire certain parcels of real property that are needed for various highway improvements throughout the state. He submitted a list of such properties together with offers that he recommended be made in connection with each. After careful consideration of the various items the Commission approved the request, and by unanimous vote adopted the following resolution with respect thereto:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed:

NOW, THEREFORE, BE IT RESOLVED that the several offers, or bases of settlement hereinafter enumerated be, and the same hereby are, approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

The Attorney reported the results of further negotiations for the acquisition of three parcels of property, as follows, needed as right of way for the improvement of the Wolf Creek Highway, in Washington County, which properties, he said, are now under condemnation:

B. W. Armentrout, et al.	2.86 acres
Charles Ellis Taylor, et al.	5.61 "
B. F. Friday	2.98 "

He said that the following settlements have been reached with the owners in order to avoid condemnation:

B. W. Armentrout, et al.	\$875.00
Charles Ellis Taylor, et al.	\$2,250.00
B. F. Friday	\$175.00

He recommended acceptance of the offers. After discussion the Commission, by unanimous vote, approved the settlements as recommended.

The Attorney also requested authority to institute condemnation proceedings to acquire certain parcels of real property that are needed for various highway improvements and concerning which he has been unable to reach

SEP 17 1941

satisfactory settlements. He presented a list of such properties together with offers that he recommended be made in condemnation, as follows:

<u>File No.</u>	<u>Name</u>	<u>Purpose Required</u>	<u>Recommended Offer</u>
9230	Northwest Cities Gas Co.	Right of Way	\$336.25
9316	Mabel J. Reagan et vir	" " "	\$11,000.00
9796	Peter Peterson Estate	Drainage Ditch Easement	\$10.00
9228	Frances G. Horn	Park Site	\$175.00
2334	M. S. Kern, Roy C. Hale, et al.	Right of Way	\$1,500.00
9700	Luella L. Minor Howell	Slope Easement	\$150.00
9701	Elsie M. Christensen	" "	\$150.00 to \$200
9703	Charles H. Rogers	" "	\$50.00

After careful consideration of each of the items the Commission approved the offers recommended, and thereupon adopted the following resolutions authorizing the Attorney to proceed with condemnation:

WHEREAS, the State Highway Commission is authorized to locate, relocate, construct, reconstruct, maintain, widen, straighten, and otherwise improve state highways, both primary and secondary, and said Commission is also authorized to construct shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, and snow fences, and is authorized to acquire quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, and broadcasting stations, and is further authorized to develop, construct, improve, operate, and maintain parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, and other places of attraction and scenic value; and

WHEREAS, said Highway Commission is authorized to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property, or any interest therein, necessary or deemed by the Highway Commission necessary for the accomplishment of any and all of the foregoing things; and

WHEREAS, in the judgment of the Highway Commission the several tracts or parcels of land hereinafter described are each and all necessary for the specific and particular purposes hereinafter specifically set forth;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the Commission does hereby find and declare that the several parcels of real property hereinafter described are each and all necessary for the accomplishment of the purposes hereinafter

expressly and specifically set forth, which said real properties and the specific purposes for which the same are being acquired are described as follows, to wit:

Real property owned by Northwest Cities Gas Company, which property is located in the north half ($N\frac{1}{2}$) of Section 32, Township 17 South, Range 3 West, W. M., in Lane County, Oregon, and is more particularly described on the attached sheets and designated as Parcels Nos. 1 and 2 and is further identified in the records of the Highway Commission as file R 9230, and which property is being acquired for right of way purposes in connection with the Pacific Highway;*

Real property owned by Mabel J. Reagan, et vir., which property is located in Lots 1, 2, 3, 4 and 5 of Block 3, Kincaid Park, City of Eugene, in Lane County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 3 and is further identified in the records of the Highway Commission as file R 9316, and which property is being acquired for right of way purposes in connection with the Pacific Highway;*

Real property owned by the heirs of Peter Peterson, which property is located in the southwest quarter ($SW\frac{1}{4}$) of Section 2, Township 26 South, Range 25 East, W. M., in Harney County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 4 and is further identified in the records of the Highway Commission as file R 9796, and which property is being acquired for right of way purposes in connection with the Lakeview-Burns Highway;*

Real property owned by M. S. Kern, et ux., sold on contract to Roy C. Hale, et ux., which property is located in the east half ($E\frac{1}{2}$) of the northeast quarter ($NE\frac{1}{4}$) of the northwest quarter ($NW\frac{1}{4}$) of the northwest quarter ($NW\frac{1}{4}$) of Section 14, Township 4 North, Range 28 East, W. M., in Umatilla County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 5 and is further identified in the records of the Highway Commission as file R 2334, and which property is being acquired for right of way purposes in connection with the Old Oregon Trail;*

Real property owned by Elsie M. Christensen, which property is located in the southwest quarter ($SW\frac{1}{4}$) of Section 12, Township 1 South, Range 1 West, W. M., in Washington County, Oregon, and is more particularly described on the attached sheets and designated as Parcel

No. 6 and is further identified in the records of the Highway Commission as file R 9701, and which property is being acquired for right of way purposes in connection with the Tualatin Valley Highway;*

Real property owned by Charles H. Rogers, which property is located in the east half (E $\frac{1}{2}$) of Section 11, Township 1 South, Range 1 West, W. M., in Washington County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 7 and is further identified in the records of the Highway Commission as file R 9703, and which property is being acquired for right of way purposes in connection with the Tualatin Valley Highway.*

2. That the Commission does hereby find and declare that each of the said described parcels of real property is necessary and acquisition of the same by the State is required for the specific purposes hereinabove set forth, and the said properties are being acquired for the express and specific purposes in this resolution set forth.

3. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real properties, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of the said real properties, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property or properties, whether said properties be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

4. That J. M. Devers, Attorney for the State Highway Commission, be and he is hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement or agreements can be reached, then it is hereby further resolved that J. M. Devers, Attorney for the State Highway Commission, be and he hereby is requested to commence and

*(The detailed descriptions of the respective parcels of real property mentioned in this resolution are attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 17, under the heading "Real Property Condemnation Resolutions" and said descriptions by this reference are made a part of this minute entry to the same extent as if copied in full herein.)

prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated.

5. That this resolution be entered in full in the minutes and records of this Commission.

WHEREAS, by virtue of the laws of the State of Oregon, the State Highway Commission is authorized and empowered to acquire land or ground necessary for the development, maintenance, and operation of parks, parking places, automobile camps, camp sites, public square, recreational grounds or resorts, and land for the preservation of trees or timber growing thereon; and

WHEREAS, said Highway Commission is authorized to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property, or any interest therein, necessary or deemed by the Highway Commission necessary for said purposes; and

WHEREAS, in the judgment and opinion of the State Highway Commission it will be for the convenience and is for the best interests of the general public that there be acquired for public purpose, to wit: for the purpose of developing and maintaining a park, recreational ground and/or resort, and for the purpose of preserving the timber growing thereon, the following described parcel of land, to wit:

Property of Frances G. Horn

A parcel of land lying in the north half ($N\frac{1}{2}$) of Lot 16 ($SE\frac{1}{4}$ of $SE\frac{1}{4}$) and in the south half ($S\frac{1}{2}$) of the south half ($S\frac{1}{2}$) of Lot 9 ($NE\frac{1}{4}$ of $SE\frac{1}{4}$) of Section 3, Township 1 North, Range 10 East, W. M., Hood River County, Oregon, and being a portion of the following described property: that tract of land which was conveyed by that certain deed to Frances G. Horn recorded in Book 26, Page 143, of Hood River County Record of Deeds; the said parcel being all that portion of the foregoing described property included in a strip of land 110 feet in width, 80 feet on the west-erly side and 30 feet on the easterly side of the center line of the Mt. Hood Highway, as said highway has been surveyed over and across or adjacent to the said property; the location of the said strip of land (in so far as it encroaches upon said property) being determined by the said center line from Station 623+69.7 to Station 633+13.1, which portion of center line is described as follows:

Beginning at a point which is Engineer's center line Station 623+69.7, opposite and 30 feet distant from which point the easterly line of the said strip of land intersects the south line of said property; said point being 836 feet north and 820 feet west of the southeast corner of Section 3, Township 1 North, Range 10 East, W. M.; thence North 9° 14' West a distance of 271.5 feet; thence on a 204.62 foot radius curve right (the long chord of which bears North 20° 54' East 205.44 feet) a distance of 215.2 feet; thence North 51° 02' East a distance of 16.3 feet; thence on a 238.73 foot radius curve left (the long chord of which bears North 31° 14' 30" East 161.67 feet) a distance of 164.9 feet; thence North 11° 27' East a distance of 44.4 feet; thence on a 286.47 foot radius curve right (the long chord of which bears North 28° 39' 30" East 169.50 feet) a distance of 172.1 feet; thence North 45° 52' East a distance of 59.0 feet to Engineer's Station 633+13.1, opposite and 30 feet distant from which station the easterly line of said strip of land intersects the north line of said property.

The parcel of land to which this description applies contains 2.21 acres, of which 1.25 acres lie within the existing right of way, title to which hereby is acknowledged to be in the public, and 0.96 acre lies outside of the existing right of way.

NOW, THEREFORE, BE IT RESOLVED that the said parcel or tract of land be and the same hereby is declared by this resolution to be necessary for the purpose herein stated; and

BE IT FURTHER RESOLVED that title to the said parcel or tract of land be acquired by the State of Oregon, by and through its State Highway Commission, for the above specified public use and purpose.

BE IT FURTHER RESOLVED that the best interests and convenience of the general public require that title to the said tract or parcel of real property be acquired for the purpose of developing and maintaining the same for a park, recreational ground or public resort and for the purpose of preserving the timber growing thereon, and for the further purpose of making said parcel of land available for the use and enjoyment of the general public.

BE IT FURTHER RESOLVED that J. M. Devers, Attorney for the State Highway Commission, be and he hereby is requested to negotiate further with the owner of said property and endeavor to acquire said property by agreement, and in the event that said property cannot be acquired by agreement, then the said J. M. Devers, Attorney for the State Highway Commission, is hereby

requested to institute and prosecute such condemnation proceeding or other suit or action as may be necessary to acquire the said real property.

BE IT FURTHER RESOLVED that in such suit, action, or procedure as may be prosecuted for the acquisition of said real property provision be made whereby title in fee simple shall be acquired in the name of the State of Oregon, by and through its State Highway Commission.

The Engineer brought up for discussion the proposed agreement with the Southern Pacific Company with respect to the reconstruction of the Pacific Highway between Eugene and West Springfield, in Lane County. He presented a copy of the proposed agreement which he said, had been revised in accordance with previous understanding had with the railroad company officials. He recommended approval of the agreement as prepared. After discussion the Commission approved the recommendation and thereupon signed the agreement.

In this connection the Attorney requested instructions relative to the closing of options for right of way needed for this improvement, and was authorized by the Commission to complete those taken for the property needed for the first project between Eugene and Judkins Point.

The Commission discussed the signing of a petition for the exclusion of certain state-owned lands from the Klamath Irrigation District near Klamath Falls, in order to avoid the payment of annual taxes and other charges. It was explained by the Attorney that this petition is a substitute for one previously signed by the Commission which contained several additional parcels, widely separated, and for that reason the petition was denied. The petition now under consideration simply provides for the exclusion of the highway maintenance headquarters site at Klamath Falls, consisting of 6.8 acres, and he has been given to understand that the petition on such basis would be approved. He recommended acceptance of the petition as revised, notwithstanding that it does not exclude all of the state land that was mentioned in the original petition. The Commission approved the recommendation and thereupon signed the petition.

The Commission also authorized the payment of \$191.40 which has been assessed against this property for irrigation construction costs, it being understood that the Secretary of Interior will not approve the petition until such charges have been paid.

The Commission discussed briefly the H. A. Hein controversy at Scappoose, which has to do with the operation of a state-owned quarry adjacent to Mr. Hein's property at this place. A decision in the matter was deferred pending inspection of the premises by Chairman Cabell.

A letter was presented from the Commissioner of Public Docks, Portland, requesting a contribution in the amount of \$50 from the State Highway Commission to help defray the expense of preparing maps for use in connection with the contesting of certain congressional legislation relative to the ownership of submerged and tide lands. The Commission expressed appreciation of the importance of this matter and the seriousness of the proposed legislation, but questioned its legal authority to contribute state funds in connection therewith. The Attorney was instructed to convey such information to the Commissioner of Public Docks.

The State Parks Superintendent, Mr. S. H. Boardman, was present and reported on the following state park matters:

Status of 1941 budget:- He reported that the Commission authorized a budget of \$100,000 for park acquisition in 1941, of which amount there has been expended up to October 1, 1941, the sum of \$92,863.95; and of the \$30,000 authorized for betterment in 1941 there has been expended up to October 1, 1941, \$14,131.99. The cost of operation and maintenance of parks, for which the sum of \$38,600 has been budgeted, he said, has cost to date the sum of \$29,917.16, leaving a balance of \$13,100.00 estimated expenditure during the last quarter, which amount includes \$5,600.00 for repairs to the Vista House at Crown Point. The Commission approved the report.

Proposed addition to Harris Beach Park, Curry County:- The Parks Superintendent proposed the purchase of 129.6 acres of land adjacent to the Oregon Coast Highway, about three miles north of Brookings, said property being owned by a Mr. Carl Bauers and being described as Lots 3, 4 and 5 and the NE $\frac{1}{4}$ of the SE $\frac{1}{4}$ of Section 36, Township 40 South, Range 14 West, W. M. He said that this property joins a present state park and is one of the most scenic of the coastal areas, fronting on the Pacific Ocean opposite what is known as Goat Island. He advised that it can be purchased for \$7,000, and recommended approval of the acquisition. The Commission approved the recommendation and authorized inclusion of the item in the real property resolution heretofore adopted at this meeting.

Purchase of wood lot in Lane County:- The Parks Superintendent advised that Lane County owns a 40-acre tract described as the SE $\frac{1}{4}$ of the NW $\frac{1}{4}$ of Section 10, Township 18 South, Range 12 West, W. M., Lane County, which he would like to purchase as a source of supply for wood to be used in state parks located along the coast between Heceta Head and the Umpqua Lighthouse. Lane County, he said, has offered to sell this to the state for the amount of delinquent taxes against the same, which is \$30.00. He recommended purchase at such price. The Commission approved the recommendation and ordered that the item be included in the real property resolution.

Purchase of O and C recreational tract:- The Parks Superintendent advised that the State Highway Commission for the past eleven years has made annual payments to the federal government for

the lease of 160 acres of O and C lands situate adjacent to the Coos Bay-Roseburg Highway at the top of Camas Mountain between Roseburg and Camas Valley; also that, according to the terms of the lease, the Highway Commission can purchase such tract within a certain period if it so desires; however, there is a question in the minds of the personnel of the O and C Administration in Portland whether or not the lease agreement actually does provide for the purchase of the area under lease. In order to ascertain definitely the state's rights in the matter, he suggested that an attempt be made to acquire outright the Camas Mountain tract. The Commission approved the suggestion.

Maintenance of two C.C.C. Camps:- The Parks Superintendent advised that two C.C.C. Camps that he has been operating in the past, viz., one at Short Sand Beach Park and the other at Saddle Mountain State Park, have been discontinued and the camps vacated. He also said that the camps are now being maintained temporarily by his department, but there is a question whether or not he should continue to maintain them. He requested instructions. The Commission considered it advisable to continue the maintenance of these two camps for a year or so and so ordered.

Status of Helmick State Park with respect to the United States Army cantonment:- The Parks Superintendent advised that Helmick State Park is located within the area considered for the United States Army cantonment south of Monmouth, and the probabilities are that the government will want to acquire this tract. He recalled that the park was presented to the state as a gift by the Helmick family to be used exclusively for park purposes, and requested instructions relative thereto in the event he is approached with respect to acquisition by the government. The Commission deferred a decision pending further contact by the government relative to the acquisition of the area.

Sale of Port Orford Cedar Park near Port Orford:- The Parks Superintendent reported a request from Mr. W. G. Hellier, Bandon, to purchase this park which is situate adjacent to the Oregon Coast Highway about six miles north of Port Orford. Mr. Hellier, he said, desires the property for mining purposes, believing that the property contains valuable chrome ore. He recommended against the sale of the property. The Commission approved the recommendation.

The Commission considered the following requests for extensions of time within which to complete highway construction projects:

McNutt Bros., contract No. 2252, for construction of a bridge over Devils Lake Fork on the Wilson River Highway, in Tillamook

County, requested an extension of time, from November 30, 1940, to August 3, 1941, within which to complete this job. They attributed their failure to complete the project within the specified time limit to adverse weather conditions which would not permit painting of the structure. The Engineer advised that adverse weather conditions prevailed during the fall of 1940, which would not permit a good painting job, and on October 23, 1940, he ordered the contractors to discontinue such work until suitable weather in the spring of 1941, so they are entitled to an automatic extension of time during this intervening period. The painting work was actually completed on July 11, 1941. He recommended that the extension of time up to July 11, 1941, be granted, subject to the condition that the contractor be required to reimburse the state for extra engineering costs incurred between July 1 and July 11, 1941. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation.

W. D. Miller Construction Company, contract No. 2319, for grading, surfacing and oiling the Lost River Section of the Klamath Falls-Malin Highway, in Klamath County, requested an extension of time, from June 30 to August 1, 1941, within which to complete this job. They gave no reason for failure to complete the project within the specified time limit. The Engineer advised that he knows of no reason why the construction should not have been completed within the time limit specified in the contract. He recommended the granting of the extension of time requested, subject to the condition that the contractor be required to reimburse the state for extra engineering expense incurred against the job subsequent to the specified completion date. The Commission approved the recommendation.

Homer G. Johnson, contract No. 2325, for surfacing and bituminous macadam construction on the Germantown Road-Barnes Section of the Skyline Boulevard, in Multnomah County, requested an extension of time of eight days, from July 31 to August 8, 1941, within which to complete this job. He gave no reason for failure to complete the project within the specified time limit. The Engineer advised that this contract was awarded by the Commission on June 13, 1940, and specified that the work should be completed by July 31, 1941. Further, that Mr. Johnson did not start clearing operations until March 11, 1941, and that he knows of no valid reason why the construction should not have been completed within the specified time limit. He recommended the granting of the request, subject to the condition that Mr. Johnson be required to reimburse the state for extra engineering expense incurred subsequent to the specified date of completion. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation.

E. L. Gates, contract No. 2342, for construction of a roadside improvement along the Pacific Highway East at Albany, in Linn County, requested an extension of time, from June 30 to August 11, 1941,

within which to complete this job. He alleged that his failure to complete the project within the specified time limit was due to adverse weather conditions which prevented the planting of grass seed for the lawn. The Engineer advised that the reason given by the contractor for failure to complete the project within the specified time limit is correct. He recommended, in view thereof, that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation.

E. C. Hall, contract No. 2343, for surfacing, oiling and construction of bridges on the Sanderson Bridge-Crabtree Creek Section of the Albany-Lyons Secondary Highway, in Linn County, requested an extension of time, from June 30 to July 5, 1941, within which to complete this project. They attributed their failure to complete the project within the specified time limit to adverse weather conditions. The Engineer advised that the oiling of the main mat was completed during the latter part of May, that the second seal coat was completed on July 2; however, it was impossible for the contractor who was to do the oiling work, to start operations before this time, due to the press of other oiling work which he had under way. He gave as his opinion that the road benefited by the delay and use of the road by traffic between the applications of the first and second seal coats. He recommended that the extension of time requested be granted without penalty. The Commission approved the recommendation.

Colonial Construction Company, contract No. 2357, for grading the Forest Boundary-Warm Springs River Section of the Warm Springs Highway, in Wasco County, requested an extension of time, from July 31 to August 18, 1941, within which to complete this job. They attributed their failure to complete the project within the specified time limit to adverse weather conditions during the winter months, which prevented grading work, and to the increase in the quantities of material moved and additional clearing work required. The Engineer advised that the reasons given by the contractor for failure to complete the project within the specified time limit are correct. He recommended, in view thereof, that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation.

J. F. Johnston, contract No. 2362, for construction of the King Creek Culvert on the Salem-Dayton Secondary Highway near West Salem, in Polk County, requested an extension of time, from December 31, 1940, to October 3, 1941, within which to complete this job. Mr. Johnston alleged that actual work on the contract was completed well within the specified time limit and that the work which remained to be done simply consisted of cleaning up the adjacent private property on which he piled surplus excavation material, with the consent of the owner, subject to the understanding that he would remove this material during the summer of 1941. The Engineer advised that while the contract called for completion of the work by December 31, 1940, the contractor was granted permission to delay the cleaning of the inlet and outlet

channels until this year. This work, he said, has now been completed satisfactorily, and it is his recommendation that the extension of time requested be granted without penalty. The Commission approved the recommendation.

E. L. Rigdon, contract No. 2367, for grading, surfacing and oiling the Okerman Ranch-Sagehen Hill Section of the Central Oregon Highway, in Harney County, requested an extension of time, from June 30 to September 3, 1941, within which to complete this job. He gave no reason for his failure to complete the project within the specified time limit. The Engineer advised that he knows of no reason why the contractor should not have completed the work within the specified time. He recommended, in view thereof, that the extension of time be granted but that the contractor be required to reimburse the state for extra engineering expense incurred subsequent to the date of completion specified in the contract. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation.

Birkemeier & Saremal, contract No. 2368, for construction of a maintenance building adjacent to the state highway at Madras, in Jefferson County, requested an extension of time from May 31 to September 19, 1941, within which to complete this job. They attributed their failure to complete the project within the specified time limit to orders received from the Engineer to defer the painting of the building until favorable weather conditions obtained and until the grading work on the premises was completed. The Engineer advised that the contract specified that all work with the exception of the exterior painting should be completed by December 31, 1940, and that the entire contract should be completed on or before May 31, 1941. Dust storms during the spring of 1941, he said, made it advisable to postpone the painting work until after the specified date of completion. It was finished on September 19, 1941. He recommended, in view of the fact that the delay was due entirely to his orders to defer the painting work, that the extension of time requested be granted without penalty. The Commission approved the recommendation.

Fisher Bros., contract No. 2398, for grading, surfacing and oiling the East Unit, Dixie Summit-Austin Junction Section of the John Day Highway, in Grant County, requested an extension of time, from August 31, 1941, to June 30, 1942, within which to complete this job. They stated that the only work remaining to be done is oiling work which cannot be done during the winter months. They attributed their failure to complete the project within the specified time limit to exceptionally rainy weather during the spring and summer of 1941, also to difficulty encountered in connection with excavation work, which resulted in frequent breakdowns of their equipment. The Engineer advised that the contractor was seriously handicapped in the progress of the work by unusually wet weather. Furthermore, they had a lot of trouble in securing repair parts for their equipment which frequently broke down because the excavation material was very hard to handle. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation.

C. A. Dunn, contract No. 2399, for furnishing maintenance rock for the Deception Creek-Salt Creek Falls Section of the Willamette Highway, in Lane County, requested an extension of time, from June 30 to August 7, 1941, within which to complete this project. He attributed his failure to complete the project within the specified time limit to adverse weather conditions and to difficulties in securing a suitable quarry. The Engineer advised that the reasons given by Mr. Dunn for his failure to complete the work within the specified time limit are substantially correct. He recommended, in view thereof, that the extension of time requested be granted without penalty. The Commission approved the recommendation.

United Contracting Company, contract 2441, for grading and paving the St. Helens Section of the Columbia River Highway, in Columbia County, requested an extension of time, from July 31 to September 6, 1941, within which to complete this job. They alleged that they were delayed in completing the project within the specified time limit by bad weather conditions and by increased quantities of rock work to be performed. The Engineer advised that the weather during the progress of the work was normal and that there was no material increase in excavation quantities; however, there was an increase of 388 tons in the paving work, being approximately 20 per cent, which would entitle the contractor to a four-day extension of time. He pointed out that the Commission took bids for this work on February 27 and did not award the contract until March 27, 1941, thirty days later, so, in his estimation, the contractor should be entitled to an additional fifteen-day extension of time on this account. He recommended that the extension of time requested be granted subject to the condition that the contractor be required to reimburse the state for additional engineering expense incurred on the job subsequent to August 19, 1941. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation.

J. C. Compton, contract No. 2458, for pavement widening and non-skid oiling on the Josephine County Line-Central Point Section of the Pacific Highway, in Jackson County, requested an extension of time of ten days, from September 15 to September 25, 1941, within which to complete this job. They alleged that the overrun of time limit was occasioned by an increase in the quantities of aggregate, hauling aggregate and furnishing and placing asphalt. The Engineer advised that it was necessary to change the specifications during the progress of the work, which change increased contract quantities for several items. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. The Commission approved the recommendation.

E. H. Itschner, contract No. 2477, for surfacing and oiling the Woodburn-Rock Creek Section of the Woodburn-Sandy Secondary Highway, in Clackamas and Multnomah Counties, requested an extension of time, from September 30, 1941, to June 30, 1942, within which to complete this job. He attributed his failure to complete the project within the specified time limit to inability to secure experienced workmen and to the resulting slowness in getting the work done, giving due regard to their safety.

The Engineer advised that the reasons given by the contractor for failure to complete the contract within the specified time limit were due to emergency conditions over which he had no control, particularly the war emergency which makes contract work uncertain with respect to men and materials. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. The Commission approved the recommendation.

Jed Wilson, contract No. 2485, for construction of an oiled rock footpath on the Oregon Coast Highway between Gearhart and Seaside, in Clatsop County, requested an extension of time of two days, from August 31 to September 2, 1941, within which to complete this project. He gave no reason for failure to complete the project within the specified time limit. The Engineer advised that the overrun in time limit was due to adverse weather conditions which delayed oiling work. He recommended that the extension of time requested be granted without penalty. The Commission approved the recommendation.

Jud Beardsley, contract No. 2508, for repairs to the Vista House at Crown Point on the Columbia River Highway, in Multnomah County, requested an extension of time of one month, from September 30 to October 31, 1941, within which to complete this job. He gave the following reasons for failure to complete the project within the specified time limit: intermittent rains which, at times, completely halted operations and prevented an orderly sequence of work; increase in the volume of work required in the moving of mortar joints, et cetera; also, additional work required in order to finish the project in a workman-like manner. The Engineer advised that continued bad weather during the month of September made it impracticable to attempt the water-proofing of the structure and accordingly he ordered the contractor to defer such work until later. He recommended that the extension of time requested be granted without penalty. The Commission approved the recommendation.

The Engineer reported that contracts Nos. 2252, 2319, 2325, 2342, 2343, 2349, 2357, 2362, 2367, 2368, 2384, 2399, 2404, 2436, 2441, 2444, 2458, 2469, 2470, 2478 and 2485, for the construction of state highway projects, have been completed according to the requirements of the contracts or modifications thereof, and that said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts, and that said jobs are now ready for acceptance:

Contract No. 2252, with McKutt Brothers, for construction of a bridge over Devils Lake Fork on the Wilson River Highway, in Tillamook County. Completed July 11, 1941.

Contract No. 2319, with W. D. Miller Construction Company, for grading, surfacing and oiling on the Lost River Section

of the Klamath Falls-Malin Highway, in Klamath County. Completed July 26, 1941.

Contract No. 2325, with Homer G. Johnson, for bituminous macadam surfacing on the Germantown Road-Barnes Road Section of the Skyline Boulevard, in Multnomah County. Completed August 8, 1941.

Contract No. 2342, with E. L. Gates, for roadside improvement on the Albany Section of the Pacific Highway East, in Linn County. Completed August 11, 1941.

Contract No. 2343, with E. C. Hall Company, for grading, surfacing and oiling, and construction of three bridges on the Sanderson Bridge-Crabtree Creek Section of the Albany-Lyons Secondary Highway, in Linn County. Completed July 5, 1941.

Contract No. 2349, with Henry L. Horn, for grade separation with the Union Pacific Railway and grading, oiling and paving on the Nyssa Undercrossing Section of the Old Oregon Trail, in Malheur County. Completed September 16, 1941.

Contract No. 2357, with Colonial Construction Company, for grading on the Forest Boundary-Warm Springs River Section of the Warm Springs Highway, in Wasco County. Completed August 18, 1941.

Contract No. 2362, with J. F. Johnston, for reconstruction of the King Creek Culvert on the Salem-Dayton Secondary Highway, in Polk County. Completed October 1, 1941.

Contract No. 2367, with E. L. Rigdon, for grading, surfacing and oiling on the Okerman Ranch-Sagehen Hill Section of the Central Oregon Highway, in Harney County. Completed September 3, 1941.

Contract No. 2368, with Birkemeier & Saremal, for construction of a maintenance building at Madras on The Dalles-California Highway, in Jefferson County. Completed September 19, 1941.

Contract No. 2384, with Rogers Construction Company, for bituminous macadam surfacing on the Hug Point-Manzanita Section of the Oregon Coast Highway, in Clatsop and Tillamook Counties. Completed August 15, 1941.

Contract No. 2399, with Clifford A. Dunn, for furnishing 8,900 cubic yards of crushed material in stock pile, on the Deception Creek-Salt Creek Falls Section of the Willamette Highway, in Lane County. Completed August 7, 1941.

Contract No. 2404, with Fisher Brothers, for grading, surfacing and oiling and construction of two bridges and three culverts on the Forest Boundary-Cottonwood Creek Section of the Klamath Falls-Lakeview Highway, in Lake County. Completed September 11, 1941.

Contract No. 2436, with Berle Brothers, for grading and topping on the Lytle Creek-Ochoco Creek Section of the Madras-Prineville Secondary Highway, in Crook County. Completed September 20, 1941.

Contract No. 2441, with the United Contracting Company, for grading and paving on the St. Helens Section of the Columbia River Highway, in Columbia County. Completed September 6, 1941.

Contract No. 2444, with A. Milne, for construction of a reinforced concrete span over Butter Creek and one concrete span over the irrigation canal at Station 989 on the Morrow County Line-Stanfield Section of the Boardman-Stanfield Highway, in Umatilla County. Completed September 25, 1941.

Contract No. 2458, with J. C. Compton, for pavement widening and nonskid oiling on the Josephine County Line-Central Point Section of the Pacific Highway, in Jackson County. Completed September 16, 1941.

Contract No. 2469, with Tony Marrazzo, for grading, surfacing and oiling on the Bully Creek-Vale Section of the Vale-West Secondary Highway, in Malheur County. Completed September 13, 1941.

Contract No. 2470, with Tony Marrazzo, for grading, surfacing and oiling, also construction of a concrete bridge on the Cow Hollow Creek-Adrian Junction Section of the Vale-Adrian County Road, in Malheur County. Completed September 18, 1941.

Contract No. 2478, with Viesko & Hannaman, for construction of a maintenance building at Condon, in Gilliam County. Completed September 17, 1941.

Contract No. 2485, with Jed Wilson, for oiled rock footpath on the Gearhart-Seaside Section of the Oregon Coast Highway, in Clatsop County. Completed September 2, 1941.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

Reconsideration was given by the Commission to the matter of dates for its next regular meetings, and it was decided to hold the November meeting on Wednesday and Thursday, November 13 and 14, (later changed to Monday and Tuesday, November 17 and 18); the December meeting on Thursday and Friday, December 18 and 19; and the January 1942 meeting on Thursday and Friday, January 15 and 16. The Secretary was instructed to make the usual arrangements to hold these meetings in the auditorium of the Public Service Building, Portland. The Commission also set Thursday, November 6, 1941, as the date for an interim meeting to be held in Salem.

The Commission considered and signed agreements, et cetera, as follows:

Agreement with Malheur County providing for the maintenance of the Vale-Adrian Federal Aid Secondary Highway, between the junction with the Nyssa-Adrian Secondary Highway and Cow Hollow Creek, after construction by the state, being Project No. FAS-21 A(2), B(1).

Agreement with City of Scio covering improvement of certain city streets.

Agreement with City of Bend covering improvement of certain city streets.

Agreement with City of Myrtle Point covering improvement of certain city streets.

Agreement with City of Coquille covering improvement of certain city streets.

Agreement with City of North Bend covering improvement of certain city streets.

Agreement with Bonneville Power Administration covering crossing of Old Oregon Trail near the top of Emigrant Hill.

Agreement with Bonneville Power Administration covering an encroachment on highway near Astoria.

Agreement with Bonneville Power Administration covering construction of a power pole line over and across the Old Oregon Trail at Station 931+41.7, in Umatilla County, between Pendleton and the Union County Line.

Agreement with O.W.R.N. Company and Union Pacific Railroad Company covering construction of overhead crossing near Troutdale.

Agreement with Anderson Bros. providing for log road crossing of the state park property adjacent to the Salmon River Highway.

Agreement with Postal Telegraph Company in reference to pole line reconstruction on Sexton Mountain Section of the Pacific Highway.

Agreement with Dwight F. Seward and wife disposing of their claim for damages arising out of the improvement of the Old Oregon Trail at Nyssa.

Agreement with P. B. Davis providing for maintenance headquarters site at the Town of Sisters.

Agreement with City of Port Orford providing for the improvement of certain city streets in Port Orford.

Agreement with City of Bandon providing for improvement of certain city streets.

Agreement with Bay City providing for improvement of certain city streets.

Agreement with City of Silverton covering work performed on Main Street Bridge.

Agreement with City of Marshfield providing for improvement of certain city streets in Marshfield.

Agreement with Stanfield Irrigation District covering construction of a syphon for the Furnish ditch at the Boardman-Stanfield Highway crossing.

Agreement with John T. Foreman and David Petersen covering lease of gravel pit.

Extension agreement with Botsford, Constantine and Gardner covering their services during 1942 in connection with the State Highway Department's Travel and Information Department.

Agreement with Southern Pacific Company covering proposed revision of Pacific Highway between Eugene and Springfield.

Agreement with Lincoln County disposing of the county's indebtedness to the state for certain road construction.

Petition for exclusion of certain lands from the Klamath Irrigation District, in Klamath County.

Bargain and Sale Deed conveying unto the City of Eugene 0.5 acre of land situate adjacent to the Pacific Highway in the W $\frac{1}{2}$ of the NW $\frac{1}{4}$ of the NE $\frac{1}{4}$ of Section 8, Township 17 South, Range 4 West, W. M., in Linn County. Consideration \$50.00. Right of Way file No. 5937-B.

Deed conveying unto Louis L. Jones and wife fractional lot in Portland fronting on Southwest Macadam Street. Right of way file No. 9393.

There being no further business to come before the Commission at this time the meeting was adjourned at 5:45 p. m..

State Highway Engineer

Secretary

Chairman

Commissioner

Salem, Oregon, November 6, 1941

The State Highway Commission met in regular session at 10:00 a. m. in the office of the State Highway Engineer, Room 325, State Office Building. Present were:

Henry F. Cabell, Chairman
Huron W. Clough, Commissioner
R. W. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

Commissioner Oliver was unable to attend this meeting on account of illness. Messrs. W. H. Lynch, District Engineer, and T. M. Davis, Senior Highway Engineer, for the Public Roads Administration, were also present.

Mr. Lynch brought up for discussion the bids received by him on November 5, 1941, for the construction of the Quartz Mountain-Smalley Ranch Section of the Klamath Falls-Lakeview Highway, which work is to be done as a forest highway project. He advised that the low bid received for this work is entirely satisfactory; however, the funds allocated to the project are not sufficient to pay the cost of the work and it will require about \$10,000.00 additional funds. He stated that forest highway funds are not available to make up this deficit, and inquired whether or not the Commission would be willing to contribute such amount of state funds so the work can go forward as planned. The Commission approved the additional contribution, in view of the desirability of the project and its previous understanding with the local people. The Commission thereupon signed a second modification of the project agreement covering the matter.

The Commission discussed the request of the Honorable J. D. Perry, St. Helens, and the delegation which appeared before the Commission at the previous meeting, for the Commission's assistance in securing congressional legislation authorizing the purchase by the federal government of the Longview-Rainier Bridge over the Columbia River, and decided that, if the federal government should purchase this bridge and turn it over to the state, the State Highway Commission would assume future responsibility for maintenance and upkeep of the same, provided the State of Washington would agree to pay one half of the costs involved.

Chairman Cabell was thereupon authorized to send the following telegram to Mr. Perry, it being understood that the same answer would be given to the owners of other Columbia River bridges who make the same request:

J. D. Perry
Deer Island, Oregon

Response your inquiry. If federal government acquires Longview Bridge pursuant to bill now before Congress State of Oregon through its Highway Commission will agree

to assume one half cost of its future maintenance and operation provided State of Washington will agree to pay remaining half.

Henry F. Cabell, Chairman
Oregon State Highway Commission

The Attorney reported the results of a reappraisal of the property needed to provide a right of way 80 feet wide for the Oregon Coast Highway through the town of Gold Beach, Curry County. He stated that it would cost about \$34,485.00 to provide a right of way 80 feet wide, as compared with about \$4,785.00 to provide a right of way 60 feet wide, both figures being exclusive of land values, it being understood that the people of Gold Beach would furnish the extra land needed for the 80-foot right of way. After discussion the Commission approved the improvement on an 80-foot right of way basis, subject to the securing of releases from the property owners against future damage claims and subject further to concurrence by Commissioner Oliver. The Attorney was thereupon authorized to proceed with the taking of options for the properties involved. The Commission will make its final decision in the matter when the options have been secured and reported.

The Engineer brought up for discussion a proposal sponsored by Mr. William W. Currier, state highway department maintenance section foreman, Grants Pass, for the formation of an organization to be known as the "Oregon State Employees Association," and Mr. Currier's request for the State Highway Commission's approval of such an organization. He presented a copy of the proposed constitution and by-laws of the organization, and recommended that the request be denied, because it is contrary to the "Code of Relations" heretofore adopted by the Commission with respect to such matters. (See Engineer's letter of November 6, 1941, directed to the Oregon State Highway Commission, for details of recommendation.) After discussion the Commission approved the recommendation. The Engineer was thereupon authorized and instructed to forward the following letter to Mr. Currier, outlining the Commission's attitude with respect to his request:

Mr. William W. Currier
Maintenance Section Foreman
State Highway Department
Grants Pass, Oregon

Dear Sir:

In response to your request for consideration in the formation of an organization employees' association, advise that the Oregon State Highway Commission has requested me to inform you that it will not sponsor or endorse any particular plan such as yours or that of any particular group. It feels that this is a matter for the employees directly concerned. It does, however, wish to call attention again to the previously promulgated "Code of Relations" enclosed

herewith and particularly to paragraphs 2 and 5 thereof, since all employee activities, either individual or in groups, must conform to that code.

Very truly yours,

R. H. Baldock
Chief Engineer

The Commission discussed briefly the question whether or not to issue permits authorizing movements over Oregon state highways of truck and trailer combinations having an overall length of sixty feet, which is legal in the adjoining states but not in Oregon, and having a gross weight of 68,000 pounds. Action on this matter was deferred by the Commission pending Chairman Cabell's return from Washington, D. C., where he expects to attend an important committee meeting on November 10 with respect to highway legislation in Congress.

The Engineer asked the Commission to approve a program for special maintenance projects for 1942 performance, involving an expenditure of \$619,215.00. He submitted a list of projects together with the estimated cost of each, as follows:

1942 SPECIAL MAINTENANCE PROJECTS

DIVISION 1

Nothing

DIVISION 2

<u>Project</u>	<u>Estimate</u>
*Necanicum Jct.-Sunset Camp Section of Wolf Creek Hwy.(Div. 1 & 2)	\$36,000
*Wren Section of Kings Valley & Corvallis-Newport Highways	26,000
*Klaskanine Summit-Jewell Section of Nehalem Secondary Highway	19,200
*Halsey Section of Pacific Highway East	27,000
*Willamina Section on state highways in vicinity of Willamina	16,000
*McMinnville Section on state highways in vicinity of McMinnville	13,000
*Rickreall Section on state highways in vicinity of Rickreall	13,000
Hebo-Dolph Section of Three Rivers Highway & surf. on Little Nestucca Secondary	26,000
Newport-North Section of Oregon Coast Highway	20,000
Lebanon-Sweet Home Section of South Santiam Highway	20,000
	\$216,200

*Contracted or authorized by Commission

(1942 Special Maintenance Projects - Continued)

DIVISION 3

<u>Highway</u>	<u>Section</u>	<u>Yardage</u>	<u>Cost</u>
Oregon Coast	Bear Creek-Port Orford	16,000	\$36,000
Oregon Coast	Port Orford-Euchre Creek	9,000	20,000
Willamette	Tunnel-Forest Boundary	15,000	36,000
*Eugene-Swisshome	Eugene-Vaneta	4,000	9,000
*Territorial	Smithfield-Crow	6,000	16,000
*Eugene-Swisshome	Swisshome	8,600	20,000
*McKenzie	Belknap Springs-Four Mile Butte		<u>31,000</u>
			\$168,000

To be let in connection with surfacing work to be done between Smithfield and Crow.

DIVISION 4

<u>Highway</u>	<u>Section</u>	<u>Yardage</u>	<u>Cost</u>
*Columbia River & Mt. Hood	Hood River	11,200	\$18,450.
Mt. Hood	Parkdale	9,550	16,715
McKenzie, Santiam & McKenzie-Bend	Sisters-Redmond	16,200	28,350
McKenzie-Bend & The Dalles-Calif.	Bend-Redmond	5,565	9,750
Ochoco	Prineville-Marks Cr.	8,100	14,200
*The Dalles-Calif. & Midland Secon.	Klamath Falls	9,000	18,000
Klamath Falls-Lakeview, Klamath	Olene-Malin		
Falls-Malin & Hatfield Secon.		19,800	34,650
*Klamath Falls-Lakeview	Drews Valley	6,450	<u>12,900</u>
			\$153,015

DIVISION 5

<u>Highway</u>	<u>Section</u>	<u>Yardage</u>	<u>Cost</u>
*John Day	Condon-Service Creek	12,000	\$24,000
*Old Oregon Trail	Pendleton-Meacham	10,000	20,000
*Columbia River	Gilliam County Line-Umatilla	10,000	18,000
Central Oregon	Harney Jct.-Drewsey	10,000	<u>20,000</u>
			\$82,000

*Contracted or authorized by Commission

After due consideration the Commission approved all the projects and there-upon authorized the Engineer to advertise them for bids as soon as they can be prepared for contracting.

The Engineer discussed with the Commission a tentative program for federal and state funds (see mimeographed copy of tentative program, dated November 17, 1941, for details). Final action on such matter was deferred until a future meeting; however, the Engineer was authorized to work up the plans and specifications for the following projects:

1943 PROGRAM - REGULAR FEDERAL AID PROJECTS

County	Highway	Section and Kind of Work	Estimated Cost
<u>DIVISIONS 1 & 2</u>			
Multnomah	Columbia River	Troutdale-Dodson, Grade & Top	\$ 350,000T
Multnomah	Pacific West	Front Street, Grade, Pave & Bridge	300,000T
Yamhill	Salmon River	McMinnville-West	100,000T
Linn	Pacific East	Halsey-Muddy Creek, Pave	195,000T
<u>DIVISION NO. 3</u>			
Lane	Willamette	Goshen-Pleasant Hill, Grad. & Surf.	150,000T
Josephine	Pacific	Grave Creek-Jumpoff Joe Creek, Surf.	140,000T
Josephine	Pacific	Wolf Creek-Grave Creek, Gr. & Top.	150,000T
<u>DIVISION NO. 4</u>			
Gilliam	Columbia River	Quinton, 3.6 mi. Grad. & Surf.	150,000T
Deschutes	Dalles-California	Madras-Terrebonne, Surf. & Oil.	120,000T
<u>DIVISION NO. 5</u>			
Umatilla	Old Oregon Trail	Boardman-Stanfield, Surf. & Oil.	225,000T
Harney	Central Oregon	Buchanan-Malheur River, Bit. Mac.	150,000T

1943 PROGRAM-FEDERAL SECONDARY PROJECTS ON STATE HIGHWAYS

County	Highway	Section and Kind of Work	Estimated Cost
<u>DIVISIONS 1 & 2</u>			
Clackamas	Woodburn-Sandy	Deep Creek, Surf. & Oil	\$ 50,000T

T - Tentatively approved by Commission

(1943 Program - Federal Secondary Projects on State Highways - Continued)

County	Highway	Section and Kind of Work	Estimated Cost

<u>DIVISION NO. 5</u>			
Union	Starkey	Grading and Surfacing	50,000T
Umatilla	Weston-Elgin	Project to be selected	25,000T

T - Tentatively approved by Commission
a - Approved by Commission

1941

The Commission tentatively approved the following projects for the special strategic network of highways:

TELTATIVE PROGRAM - SPECIAL STRATEGIC NETWORK FUNDS

I. Assured Funds

Projects on Troutdale-Dodson Section - - - - -	\$250,000
Projects on Roseburg-Grants Pass Section - - - - -	250,000
	\$500,000

II. Fund Subject to Allocation By Federal Works Administrator

Harrisburg Bridge Approach - - - - -	\$125,000
Pudding River Bridge at Aurora - - - - -	90,000
Coast Fork Bridge east of Goshen - - - - -	150,000
Umpqua River Bridge north of Dillard - - - - -	100,000
Projects on Troutdale-Dodson Section - - - - -	250,000
Projects on Roseburg-Grants Pass Section - - - - -	285,000
	\$1,000,000

The Engineer was authorized by the Commission to advertise the following projects for bids to be received at the December meeting of the Commission, provided that meets with the approval of Commissioner Oliver:

Surfacing and oiling Soda Mountain-South Section of the John Day-Burns Highway in Grant County, estimated cost \$100,000.

Beech Creek Rock Production project on the Pendleton-John Day Highway in Grant County, estimated cost \$25,000.

Surfacing and oiling Seneca-South (Poison Creek) Section of the John Day-Burns Highway in Grant County, estimated cost \$125,000.

The Commission instructed the Attorney to investigate the matter of acquiring right of way needed for the improvement of the Oregon Coast Highway at Spencer Creek, in Lincoln County, which involves a fish pond.

The Commission adjourned at 12:00 noon and reconvened at 1:00 p. m. in the same room with the same persons present and participating.

The Engineer reported briefly on the cities and towns of the state that have signed agreements with the Commission for the improvement of certain city streets not on state highway routes. The Commission took no action on the matter.

The Engineer brought up for reconsideration the matter of constructing a new bridge over the Trask River on the Netarts State Secondary Highway

just west of Tillamook, to replace an existing, covered structure which is in a bad state of repair and is now posted for maximum loads of ten tons. He recalled that the Commission, at the previous meeting, authorized an expenditure to remove the cover over the existing structure in order to improve the sight distance, which it was thought would satisfactorily dispose of the problem until the Commission was in position to finance a new structure. However, since then, he has given the matter further study, and is now convinced that the proper thing to do is to entirely replace the structure, because, in its present condition, it is liable to fail under traffic at almost any time and, in his estimation, the Commission cannot very well afford to take a chance against such failure. He estimated the cost of a new structure at \$46,800.00, and recommended approval of the project and that he be authorized to advertise it for bids as soon as the plans can be prepared. After discussion the Commission approved the recommendation and so ordered.

The Engineer then requested authority from the Commission to prepare the plans for the structure and to present the same to the United States War Department, with a request for a hearing on the subject at an early date, so as to secure approval of the clearances of the structure before the contract is awarded. The Commission approved the request.

The Engineer also requested authority for an expenditure of approximately \$15,550 to finance the construction of the Warm Springs Secondary Highway under the tracks of the City of Prineville Railway, in Crook County. He advised that the Public Roads Administration, which is concerned, is anxious for the structure to be built, because the sight distance at the present crossing is very seriously impaired by embankments that have been constructed for a new grade line of the railroad. He recommended approval of the project so as to eliminate this hazard. The Commission approved the recommendation and authorized the advertising of the project for bids to be received as soon as the plans can be prepared.

Reconsideration was given by the Commission to the matter of constructing a pedestrian trestle on the Morrison Street Bridge, Portland, for the benefit and use of pedestrians during the time when the west end of the bridge is being remodeled to fit and harmonize with the Front Avenue improvement. The Engineer estimated the cost of such trestle as \$2,706. In this connection he presented letters from Mr. Franklin T. Griffith, Chairman of the Portland Traction Company, and Mr. Earl F. Campbell, Director of the Portland Traffic Safety Commission, urging the Commission to construct such trestle as an aid in the handling of pedestrian traffic across the Morrison Street Bridge, and explaining that such trestle would eliminate the necessity for rerouting the Montevilla and Mt. Tabor streetcar lines over the Steel Bridge and the Burnside Bridge during the time that the bridge construction work is under way, which rerouting of streetcars would not only be a great inconvenience to streetcar patrons but would also increase greatly the traffic congestion at the Steel and Burnside Bridges. The Commission considered that the pedestrian trestle would provide a satisfactory solution for the problem and thereupon authorized the Engineer to build the same at state expense.

A letter was presented from the Arrow Transportation Company, Portland, requesting permission to overload their trucks, in the transportation of petroleum products, in the amount of 700 pounds, which overweight consists of certain sanding equipment which is used to provide traction for the wheels of their trucks during the winter period when the pavement is slippery. The Engineer recommended approval of the request as a safety measure. The Commission approved the recommendation.

The Commission discussed the matter of erecting additional historical markers along the Old Oregon Trail as was requested by Mr. Walter Meacham, member of the Oregon Trail Historical Markers Committee, at the previous meeting. The Engineer advised that Mr. Meacham has asked for eleven additional markers, which would cost about \$2,937, based on the cost of markers previously installed. He recommended approval for ten additional markers costing approximately \$2,670. The Commission approved the recommendation.

The Engineer discussed briefly with the Commission the advisability of constructing an overhead crossing of the county road with the Wolf Creek Highway, near Davies in Washington County. He advised that the county road is used quite extensively at the present time by logging trucks, and there is a possibility that the road will be abandoned by the county when such traffic subsides. He also pointed out that there are possibilities that the road could be rerouted, which would eliminate the necessity of the overhead structure which is estimated to cost about \$14,000. The Commission deferred a decision in the matter until its meeting on November 17, and instructed the Engineer to investigate other prospective solutions of this problem in the meantime.

The Engineer reported the results of further investigations conducted since the last meeting of the Commission to determine the need for a sidewalk on the Rock Creek Bridge on the John Day Highway, near Olex, in Gilliam County. He advised that Division Engineer W. C. Williams, who made the investigation, is of the belief that the sidewalk is needed, because the bridge is narrow with sharp curves at each end and is a considerable hazard to school children who are obliged to cross the bridge in going to and from school. Mr. Williams, he said, recommends the construction of the sidewalk, which is estimated to cost about \$360.00. The Commission approved the project.

The Attorney reported that in conformance with instructions given him by the Commission at its previous meeting he has contacted the attorney for Mr. Alfred Buchheit, Jr., who was injured by a falling timber, while playing under the McLoughlin Bridge near Oregon City, and has ascertained that Mr. Buchheit's claim for injuries amounts to \$250.00, and that he is willing to release the state from further liability if such amount is paid to him. The Attorney recommended settlement of the claim on such basis. The Commission approved the recommendation.

The Commission discussed the agreement with the Southern Pacific Company pertaining to the reconstruction of the Pacific Highway between Eugene and Springfield, particularly the section of such agreement which concerns the disposal of the steel salvaged from the Southern Pacific Company's tracks

which have to be moved. The question arose: "Does the state or does the railroad company take possession of the rails?" The Engineer advised that it would cost about \$2,200 to remove the existing tracks, and there would be about 500 tons of steel rails salvaged, which could be sold at about \$10 per ton, realizing thereupon the sum of \$5,000. The net value of the steel, therefore, would be \$2,800. He suggested that it would be advisable to let the railroad company have the rails at an agreed price, because the company is in better position to remove them and can do the job much cheaper than the state can do it. After discussion, it was the Commission's decision that, if the railroad company does not want the rails, then the state will take them and have them removed by the state's contractor in connection with his contract for the road work. The contractor is to be required to include this item in his bid for clearing operations and the salvage value of the steel is to be given consideration by the contractor in his bid on such item. The Engineer was instructed to work out the details.

The Commission adopted the following resolution relative to the abandonment and retention of certain parcels of the old right of way of the Drews Valley Section of the Klamath Falls-Lakeview Highway upon recommendation of the Engineer, who advised that these parcels are no longer of value from a state highway standpoint inasmuch as the highway has been reconstructed on other alignment:

WHEREAS, in order to afford a better alignment and a more satisfactory, safe and convenient highway for the traveling public the Highway Commission found it necessary to relocate portions of the Klamath Falls-Lakeview Highway near Drews Valley in Lake County; and

WHEREAS, by reason of said relocation and reconstruction of said section of said highway there have been eliminated from the main travelled portion of said highway certain sections or fragments of land, which said sections or fragments of land are more specifically defined and described hereinafter in this resolution and are reflected on a print or map, marked "Exhibit A", a copy of which is attached hereto and made a part hereof; and

WHEREAS, while those sections hereinafter described as the parcels to be retained and shown in yellow on the attached print, are not required for use as a part of the main or travelled section of the highway, nevertheless the same are required, can be used, and are essential for other public purposes, to wit: storage purposes, parking area and other public uses in connection with said highway; and

WHEREAS, it is the judgment and opinion of the Commission that there should be recorded in the minutes and records of the Commission its purpose and plan to preserve for public use in connection with said highway the fragments or parcels of land hereinafter described as the parcels to be retained and shown in yellow on the attached print; and

WHEREAS, it is the judgment and opinion of the Commission that there should be recorded in the minutes and records of this Commission the purpose and plan of the Commission to abandon as parts of the state highway system certain portions of the highway eliminated from the main travelled portion of said highway, which sections are made unnecessary as a part of the completed highway and are shown shaded in red on the attached print or map;

NOW, THEREFORE, the premises being in general as above stated, it hereby is resolved by this Commission, all members being present and affirmatively participating, as follows:

1. That the fragments or parcels of land which heretofore were within the right of way property of the Klamath Falls-Lakeview Highway near Drews Valley, but which by reason of a relocation or realignment of said highway are now without the area improved and used by the traveling public but are adjacent to and abut upon the said right of way, which parcels are shown shaded in yellow on the attached print, shall be preserved by the Highway Commission for such other public use as said land may serve in connection with the construction, improvement, and maintenance of said highway or the use of the same, which said parcels or fragments of land are described as follows, to wit:

(Parcels to be retained shown in yellow on attached print)

All those certain parts of the old right of way of the Drews Valley Section of the Klamath Falls-Lakeview Highway lying on each side of the right of way required for the reconstructed Klamath Falls-Lakeview Highway over and across Sections 7, 8 and 9, Township 39 South, Range 18 East, W.M., Lake County, Oregon. The beginning and ending points with reference to the engineer's stations of the said reconstructed highway are as follows: Between engineer's stations 754+50 and 756+70 on the northerly side of the right of way; between engineer's stations 757+65 and 762+30 on the southerly side of the right of way; and between engineer's stations 764+85 and 770+25 on the northerly side of the right of way.

2. That the fragments of land confined within the area hereinafter described and designated as the parcels of land to be abandoned, which fragments were formerly within the limits of the right of way of the Klamath Falls-Lakeview Highway, be and said fragments of land are abandoned as a part of the right of way of said highway, and said fragments of right of way are, so far as control and supervision of this Commission are concerned, left to revert to the adjoining and abutting property owners or to the control and supervision of the County Court of Lake County. The fragments of land to be abandoned are described as follows:

(Parcels to be abandoned shown in red on attached print)

All those certain parts of the old right of way of the Drews Valley Section of the Klamath Falls-Lakeview Highway lying on the southerly side of the right of way required for the reconstructed Klamath Falls-Lakeview Highway, over and across Sections 7, 8 and 9, Township 39 South, Range 18 East, W. M., Lake County, Oregon. The beginning and ending points with reference to the engineer's stations of the said reconstructed highway are as follows: Between engineer's stations 706+20 and 752+40 on the southerly side of the right of way and between engineer's stations 770+85 and 818+45 on the southerly side of the right of way.

In addition to the foregoing descriptions of said fragments or parcels of land there is attached hereto a print or map, marked "Exhibit A", which by this reference is made a part hereof, and upon which map there are shown shaded in yellow the parcels of land formerly within the old right of way, but which are now by this official act preserved for public purposes, and upon which map there are shown shaded in red the abandoned sections of said right of way. Said exhibit or map for identification purposes bears the signatures of W. E. Chandler, Division Engineer, H. G. Smith, Construction Engineer, and C. B. McCullough, Assistant State Highway Engineer, and bears date of July 8, 1941.*

4. The Engineer hereby is instructed to properly and completely mark on the ground the boundaries of the fragments of land to be retained by the Highway Commission by erecting and maintaining thereon proper monuments or posts upon which shall be inscribed the words "State Property".

5. In the event there remains any physical connection between any portions of said abandoned right of way or highway and the present highway, and by reason of such physical connection traffic from the existing highway may enter or use the said abandoned portions of the old road to the possible damage or injury of such traffic by reason of any unsafe condition existing with respect to the said old or abandoned road, then the State Highway Engineer is hereby authorized and directed to erect such barricade or other safeguards as may be necessary to protect and safeguard traffic using and employing said newly located, constructed, and dedicated section of said state highway.

6. That this resolution be entered in the minutes and records of the Commission and a certified copy thereof promptly delivered to the County Court of Lake County, together with a copy of said exhibit or map, for such action as said County Court may desire to take with respect to the fragments of land to be abandoned, and should said abandoned portions of the right of way of

*Map filed Right of Way Abandonment and Retention File. - No. 96.

said Klamath Falls-Lakeview Highway be further employed for public or private highway purposes such use shall be entirely under the control and supervision of the County Court of Lake County and beyond any responsibility or supervision by the State Highway Commission.

For similar reasons the Commission adopted the following resolution abandoning a short section of the Pacific Highway (old route) near Gold Hill, in Jackson County:

WHEREAS, in order to afford a better alignment and a more satisfactory, safe and convenient highway for the traveling public the Commission found it necessary to relocate a portion of the Pacific Highway in Jackson County; and

WHEREAS, by reason of said relocation and reconstruction of said section of highway there was eliminated and made unnecessary as a part of the permanent highway a certain section, which section is more specifically defined and described hereinafter in this resolution; and

WHEREAS, it is the judgment and opinion of the Commission that there should be recorded in the minutes and records of the Commission its purpose and plan to abandon as a part of the said highway the fragment or portion of right of way heretofore designated and which was heretofore included within the area of the right of way of said highway as formerly located but which is now without the regular limits of said highway as relocated.

NOW, THEREFORE, the premises being in general as above stated, it hereby is resolved by this Commission, all members being present and affirmatively voting as follows:

1. That the fragment of land confined within the area hereinafter described, which fragment or parcel of real property was formerly within the limits of the right of way of the Pacific Highway but is no longer a part of the right of way of said highway as the same has been relocated and constructed be and said parcel of real property is abandoned as a part of the right of way of said highway, and said parcel of land is, so far as control and supervision by this Commission is concerned, eliminated and left to revert to the adjoining and abutting property owners. The fragment or parcel of land affected by this resolution is defined and described as follows, to wit:

All that certain section of the old right of way of the Pacific Highway lying on the southerly side of the right of way required for the reconstructed Pacific Highway and between Mile Post 297 and 298 of said highway, situated in Section 22, Township 36 South, Range 3 West,

W. M., Jackson County, Oregon, the beginning and ending points with reference to the engineer's stations of the reconstructed highway being Station 485+50 on the easterly end and Station 493+85 on the westerly end.

The location of said abandoned right of way may be more definitely and particularly ascertained and determined by reference to a map or blueprint marked Exhibit A attached hereto and by this reference made a part hereof, which said exhibit for identification purposes bears the signatures of K. D. Lytle, Division Engineer, H. G. Smith, Construction Engineer, and C. B. McCullough, Assistant State Highway Engineer, and is dated October 4, 1941, upon which map or exhibit is reflected the above described parcel of land by showing the same shaded in red.*

2. In the event there remains any physical connection between any portion of said abandoned right of way or highway and the present highway, and by reason of such physical connection traffic from the existing highway may enter or use the said abandoned right of way or highway to the possible damage or injury of such traffic by reason of any unsafe condition existing with respect to said old or abandoned road, then the State Highway Engineer is hereby authorized and directed to erect such barricade or other safeguards as may be necessary to protect and safeguard traffic using and employing said newly located, constructed and dedicated section of said highway.

3. That this resolution be entered in the minutes and records of the Commission and a certified copy thereof promptly delivered to the County Court of Jackson County, together with a copy of said exhibit or map, for such action as said County Court may desire to take with respect to the fragments of land to be abandoned, and should said abandoned portions of the right of way of said Pacific Highway be further employed for public or private highway purposes such use shall be entirely under the control and supervision of the County Court of Jackson County and beyond any responsibility or supervision by the State Highway Commission.

The Secretary presented a letter from the Deschutes County Court, in which the Commission was requested to approve the postponement of the payment of the balance due the state from the county, amounting to \$1,991.49, for oiling the Shevlin Park County Road, which payment, according to the previous agreement, is to be made by the Secretary of State from Deschutes County's share of the December 15, 1941, apportionment of motor vehicle and gas tax funds under his supervision. The county court asked that the payment be made from the January 31, 1942, apportionment of such funds, so as to permit the

*Map filed Right of Way Abandonment and Retention File. - No. 97.

county to meet certain pay roll obligations in the meantime. The Commission approved the request and instructed the Secretary to communicate such information to the Secretary of State.

The Commission discussed a letter from Zidell-Steinberg Company, to whom the Commission at its meeting on October 17, 1941, sold the old steel rails salvaged from the Front Avenue Project in Portland. The company alleges that the rails were covered with considerable concrete, and when this was removed it was found that the actual net weight of the steel was only 119.43 tons, whereas they paid the state for 148.315 tons, which indicates that the concrete adhering to the rails weighed 28.885 tons, for which they are asking reimbursement at the rate of \$11.66 per ton, the amount of their unit bid price for the steel, or a total of \$336.80. The matter was discussed at considerable length and it was the Commission's decision that, if the company can furnish a reasonable basis for determining the weight of the concrete, then the state will reimburse the company for the excess payment, but not otherwise. Furthermore, the state will not reimburse the company for the cost of removing the concrete from the rails. The Engineer was instructed to convey such information to the company.

The Secretary presented a letter from the South Umpqua Telephone Company, in Douglas County, requesting reconsideration by the Commission of the action taken on July 18, 1941, with respect to the re-establishment of its pole line on the Days Creek-Wright Ranch Section of the Tiller-Trail Highway. The Commission reviewed its previous action in the matter and concluded that the position taken therein is legally and ethically sound. The Commission thereupon decided not to make any change in its previous offer of settlement with the company.

The Commission discussed a letter from the Public Roads Administration inquiring as to when the Commission expects to make available for public use roadside oases constructed as federal aid projects adjacent to the Columbia River Highway at Boardman and Castle Rock, in Morrow County. The Engineer advised that the trees that were planted in these oases are of the variety that could not withstand the severe climate that obtains in this district, and, as a consequence, some of them died and had to be replaced. He recommended, in view thereof, that the oases be not opened for public use until the smaller trees have become more definitely established. He also recommended that there be constructed in the oases, in the meantime, drinking fountains and rest rooms, because, in his opinion, the oases would not be of much value to the traveling public unless such facilities are provided. After discussion the Commission approved both recommendations and authorized the Engineer to proceed with the construction of the drinking fountains and the rest room facilities, so that they will be ready when the oases are opened for general public use. The Engineer was instructed to so inform the Public Roads Administration.

The Commission also discussed a letter from Commissioner William A. Bowes, City of Portland, with respect to the request of Mr. Lambert, owner of Lambert Gardens in Portland, for permission to maintain signs on certain city streets, including those designated as state highway routes, directing traffic to his gardens. Mr. Bowes pointed out that the matter of maintaining signs

on state highway routes in Portland is covered by an agreement between the City of Portland and the State Highway Commission, wherein the responsibility for the erection and maintenance of all directional and informational signs is placed with the state. The Commission decided, after discussion, not to permit Mr. Lambert to maintain his signs on state highway routes, because of the undesirable precedent that would be established. The Engineer was instructed to so inform Mr. Bowes.

The Attorney brought up for discussion the question whether or not an attempt should be made to recover from the Ladd and Bush Bank of Salem approximately \$2,000, representing the unrecovered balance from the defalcation of one W. L. Moorman, former employee of the state highway department. He recalled that the amount taken by Mr. Moorman totaled approximately \$8,000, of which amount approximately \$6,000 was recovered under the Commission's forgery bond, leaving a balance of approximately \$2,000 unaccounted for, and the Secretary of State is asking that some action be taken by the Commission to clear the records, inasmuch as this item appears unsatisfied in each annual audit of the Highway Commission's books. He further advised that an opinion was obtained from the Attorney General as to the Highway Commission's responsibility, which opinion, briefly, is to the effect that the bank is liable for the loss. However, the bonding company does not take the same attitude and has abandoned its plan to recover the amount of its losses from the bank. The Attorney gave as his personal opinion that the Commission could not recover from the bank, because it appears to him that the Commission's liability in the case is simply a technical one, not a legal one. After discussion the Commission re-referred the matter to the Attorney for further study. He was instructed to submit an opinion and a recommendation to the Commission at its meeting on November 17.

The question whether or not either Mr. R. H. Baldock, present State Highway Engineer, or Mr. Roy Klein, former State Highway Engineer, could be held personally liable for the amount of the state's loss was discussed. It appeared to the Commission that neither Mr. Baldock nor Mr. Klein could be held liable. Furthermore, the Commission was of the opinion that under the circumstances neither Mr. Baldock nor Mr. Klein should be held liable for any part of the loss sustained by the state through the forgeries committed by Moorman.

The Engineer requested authority to purchase the following equipment:

- 1 power mower for use on landscape project at Newport.
Estimated cost \$390.
- 2 gasoline-driven spray paint machines. Estimated
total cost \$350.

The Commission approved the request, and ordered that the purchases be made through the State Purchasing Agent in the customary manner.

The Secretary presented a request from Casper and Cutler, furnace manufacturers, Salem, for permission to transport loads 12'6" overall in height over the Pacific Highway East, from Salem to Portland, during Saturday afternoons, Sundays, and during hours of darkness, as occasion arises. He explained that Casper and Cutler have a contract to furnish furnaces to the United States Army, and are obliged to make deliveries on short notice; particularly in cases where the furnaces are for shipment to the army bases in Alaska, requiring immediate delivery to Seattle, where they are loaded on boats for Alaskan points, and it appears that the furnaces are so constructed that the height cannot be reduced. The Commission authorized the granting of the permit as an emergency proposition.

The Engineer reported that, in conformance with previous authority granted him by the Commission, he awarded to the Triangle Construction Company on October 24, 1941, the contract for grading, surfacing and oiling the Brogan-Jamieson Section of the John Day Highway, bids for which were taken by the Commission on October 16, 1941, the bid of the Triangle Construction Company being the low one received at that time, and the conditions of the award having been satisfied. The Commission confirmed the award of this contract as reported.

The Commission discussed a letter from the County Court of Coos County requesting that the old bridge over Coal Bank Slough, in South Marshfield, be given to Coos County for use on its county road system, inasmuch as it has been replaced by a new structure. The Engineer advised that the structural steel in this bridge would weigh about 50,000 pounds, which, at a scrap price of approximately \$10 per ton, would be worth about \$250. He further advised that it could not be used on the state highway system, although it probably could be used to good advantage by the county on one of the county's minor roads. He recommended that the bridge be turned over to Coos County without charge. The Commission approved the recommendation.

The Commission confirmed the oral authority previously granted authorizing Mr. Ben Titus, Acting Director, Travel and Information Department, to attend at state expense the meeting of the Pacific Northwest Tourist Association, which was held in Spokane, Washington, on October 30 and 31, 1941.

The Engineer requested authority for Construction Engineer H. G. Smith, Engineer of Materials W. M. Finkbiner, and one of his assistants, to go to Wenatchee, Washington, at state expense, in the near future to inspect a Barber-Green Asphalt Plant which is in operation at this place, with a view to determining whether or not a similar plant could be used to advantage by the State of Oregon. He said that Messrs. Smith and Finkbiner would be away only a couple of days, but quite likely Mr. Finkbiner's assistant would have to remain there a week or so in order to secure detailed information on the product turned out by the plant. He estimated the total expense involved at approximately \$75. The Commission approved the request, subject to confirmation by Governor Charles A. Sprague.

The Commission discussed briefly the matter of entering into a supplemental agreement with Andrew Stambuck for the operation of the state-owned ferry across the Coos River, at a place known as Enegren Ferry, in Coos County, but deferred action thereon pending a full report from the Engineer at the meeting on November 17.

The Secretary presented letters from the Eugene Daily News and Mr. Sterling Behnke, Eugene, in regard to snow removal operations this winter on the McKenzie Highway, particularly inquiring whether or not the Commission intends to keep the McKenzie Pass open for travel this winter and if not what plans the Commission has to maintain travel up to the Hand Lake ski area. The Secretary was instructed to reply that the Commission has no intention of keeping the McKenzie Pass open during the winter season, because of the expense involved and for the further reason that it must conserve its equipment as much as possible, in view of the fact that it is becoming more and more difficult, on account of the war situation, to secure equipment needed for general highway purposes, and for similar reasons the Commission does not feel justified in even keeping the highway open up to the ski grounds.

The Commission discussed a letter from Marshfield Lodge No. 1160, B.P.O.E., requesting permission to erect and maintain on state highways in Marshfield and other towns in that vicinity certain signs bearing the wording: "Travel Safely-Defend America." The Commission denied the request as a matter of policy.

Commissioner Clough brought up for discussion the matter of improving certain city streets in the town of Reedsport, which streets are not on state highway routes. It appears that, according to original plans, it was intended to improve several blocks on "H" Street, whereas the city officials are now asking for improvement of Winchester Avenue, former route of the Oregon Coast Highway, because it carries so much state highway traffic. The matter was referred to the Engineer for investigation.

Reconsideration was given by the Commission to the penalty to be imposed on log haulers for overloading their trucks. It was recalled that the Commission, at the previous meeting, changed the penalty from five, ten and fifteen days' suspension of the P.U.C. plates, for the first, second and third offenses, to three, six and nine days' suspension for such offenses. The Secretary pointed out that the three-day suspension is not workable, because in most instances the time limit has expired before notification can be given to the weighmasters and the state police as to how long the plates are to be held. He suggested a further modification establishing a straight four-day penalty for each of the first three violations, which would eliminate the confusion that now obtains, in that the weighmasters and the state police would know exactly how long to keep the plates when they were picked up, and would provide a much more workable arrangement. He said that he discussed such arrangement with Captain Lee Bowen, Deputy Superintendent of State Police, and with Senator Franciscovich, of Astoria, who represents most of the loggers in that district, and both expressed their approval and gave as their opinion that the arrangement is much better than that now in effect. However, Senator Franciscovich made a further suggestion that the day the P.U.C. plates

are picked up be considered the first day of penalty, and that the procedure of submitting to the Commission, for instructions as to the penalty to be imposed for violations in excess of the first three, be continued. After some discussion the Commission modified its present ruling, as follows:

1. The penalty for each of the first three violations for overloading shall be four days suspension of the equipment involved in the overload. The P.U.C. plates of such equipment must be voluntarily surrendered, either at the time that the equipment is weighed or within twenty-four hours thereafter. If they are not surrendered within such twenty-four-hour period, the P.U.C. permits shall be cancelled as in the past.

2. The day that the P.U.C. plates are surrendered, if within the twenty-four-hour period, shall be considered the first day of the penalty, regardless of the time of day that the plates are surrendered, and the P.U.C. plates are not to be released to the operator before 4:30 p. m. on the fourth day.

3. As in the past, all violations in excess of three for any one operator shall be reported to the State Highway Commission for special instructions as to the penalty to be invoked. However, the operator must voluntarily surrender his P.U.C. plates for at least four days, as in the case of the first, second and third offense.

4. Except as above noted, the penalty now provided is to be continued.

The Secretary was instructed to see to it that such modifications are brought to the attention of highway department weighmasters, the state police department, and the Public Utilities Commissioner.

The Commission discussed and denied a request from Callow and Day, log haulers, for permission to truck-haul logs over the Mecanicum, Wolf Creek, and Oregon Coast Highways, on Armistice Day, November 11, and on Thanksgiving Day, November 20.

The Engineer presented a list of surveys that he has ordered since the last meeting of the Commission, and asked the Commission to confirm them and the amounts allocated for each. After due consideration the Commission authorized and instructed the Engineer to make such location surveys on various sections of the highways of this state, which said sections of highways, together with their identifying survey numbers and the amounts authorized and allocated for such survey expenditures, are as follows:

Right of Way - 102-1427 -	Benton County Line-Plunkett Creek Section, Kings Valley Hwy., Benton Co.	1st authorization -	\$150
Right of Way - 102-1428 -	Monroe-Ferguson Section, Territorial Highway, Benton County.	1st authorization -	\$150
Plans - - - - - 2-1429 -	South Third St. (Corvallis) Section, Pacific Highway West, Benton County.	1st authorization -	\$200

Plans	----	204-1451	- Furtado Creek Section, Elsie-Jewell County Road, Clatsop County.	1st authorization	\$180
Plans	----	204-1448	- Humbug-Fishhawk Falls Section, Wolf Creek-Nehalem Highway, Clatsop County.	2nd authorization	\$600
			Total to date \$4,200.		
Plans	----	4-1452	- North Fork Necanicum River Section, Wolf Creek Highway, Clatsop County.	1st authorization	\$125
Bench Mark	---	4-1453	- Necanicum Junction-Nehalem River Section, Wolf Creek Highway, Clatsop County.	1st authorization	\$65
Bench Mark	---	204-1454	- Elsie-Jewell Section, Elsie-Jewell Highway, Clatsop County.	1st authorization	\$60
Bench Mark	---	204-1456	- Astoria-Mist Section, Nehalem Highway, Clatsop County.	1st authorization	\$100
Right of Way	---	4-1457	- Quartz Creek-Tillamook County Line Section, Wolf Creek Highway, Clatsop Co.	1st authorization	\$2,825
Plans	----	4-1441	- Necanicum River-Hug Point Section, Oregon Coast Highway, Clatsop County	2nd authorization	\$2,575
			Total to date \$10,725		
Bench Mark	---	4-1453	- Necanicum Junction-Nehalem River Section, Wolf Creek Highway, Clatsop County.	2nd authorization	\$10
			Total to date \$75.		
Bench Mark	---	204-1454	- Elsie-Jewell Section, Elsie-Jewell Highway, Clatsop County.	2nd authorization	\$10
			Total to date \$70.		
Plans	----	5-1424	- Deer Island Section, Columbia River Highway, Columbia County.	1st authorization	\$300
Location	---	5-1425	- Rainier-Coble Section, Columbia River Highway, Columbia County.	1st authorization	\$3,300
Plans	----	5-1426	- Scappoose-Multnomah County Line Section, Columbia River Highway, Columbia Co.	1st authorization	\$350
Plans	----	107-1416	- Deschutes County Line-O'Neil Section, O'Neil Highway, Crook County.	1st authorization	\$250
Plans	----	9-1441	- Redmond-Crook County Line Section, Ochoco Highway, Deschutes County.	1st authorization	\$250
Location	---	10-1428	- Glendale Junction-Wolf Creek Section, Pacific Highway, Douglas County.	2nd authorization	\$4,000
			Total to date \$12,500.		
Quarries	----	11-1413	- Condon-Service Creek Section, John Day Highway, Gilliam County.	1st authorization	\$200
Plans	----	13-1417	- Harney County Line Section, Central Oregon Highway, Harney County.	1st authorization	\$150
Plans	----	15-1429	- Four Corners-Antelope Creek Section, Crater Lake Highway, Jackson County.	1st authorization	\$800
Slide	----	15-1430	- Siskiyou Mountain Section, Pacific Highway, Jackson County.	1st authorization	\$1,400
Location	---	15-1431	- Agate-Medford Section, Crater Lake Highway, Jackson County.	1st authorization	\$3,500
Prospecting	---	15-1432	- Medford-Antelope Creek Section, Crater Lake Highway, Jackson County.	1st authorization	\$200
Prospecting	---	18-1451	- Klamath Falls Vicinity Section, The Dalles-Calif. Highway and others, Klamath County.		
			Total to date	\$1200.	2nd authorization \$600

Prospecting - - 118-1456 - Texum-Highway 97 Section, Midland Highway, Klamath County. 1st authorization \$750
 Plans - - - - 118-1457 - Modoc Point grade crossing, Klamath Agency-Modoc Point Highway, Klamath County. 1st authorization \$300
 Location - - - - 18-1443 - Klamath Falls-Merrill Junction Section, Klamath Falls-Lakeview Highway, Klamath County. Total to date \$5,000. 2nd authorization \$1,800
 Location - - - 219-1501 - Cottonwood Hill-West Side & Maddocks Service Station-Idaho Grange Section, County Roads, Lake County. 1st authorization \$2,000
 Plans - - - - - 21-1445 - Otter Rock-Agate Beach Section, Oregon Coast Highway, Lincoln County. 2nd authorization \$600
 Total to date \$900.
 Right of Way - - 21-1450 - Newport-Waldport Section, Oregon Coast Highway, Lincoln County. 1st authorization \$125
 Plans - - - - - 21-1451 - Nelscott Section, Oregon Coast Highway, Lincoln Co. 1st authorization \$50
 Plans - - - - - 122-1435 - Detroit-South Santiam Junction Section, North Santiam Highway, Linn Co. 1st authorization \$300
 Right of Way - - 24-1441 - Salem-Hayes School Section, Pacific Highway East, Marion County. 1st authorization \$850
 Plans - - - - - 26-1444 - Steel Bridge-Barbur Boulevard Section, Pacific Hwy. West, Multnomah County. 6th authorization \$3,000
 Total to date \$16,000.
 Prospecting - - 30-1435 - Pendleton-Meacham Section, Old Oregon Trail Highway, Umatilla County. 1st authorization \$250
 Plans - - - - - 30-1436 - South Milton Section, Oregon-Washington Highway, Umatilla County. 1st authorization \$200
 Plans - - - - - 30-1437 - Gilliam County Line-Umatilla Section, Columbia River Highway, Umatilla County. 1st authorization \$150
 Reconnaissance - 31-1424 - La Grande-North Powder Section, Old Oregon Trail Highway, Union County. 2nd authorization \$100
 Total to date \$1,100.

Location - - - 204-1458 - Skipanon Connection Section, Ft. Stevens-Camp Clatsop County Road, Clatsop County. 1st authorization \$1,000
 Right of Way - - 4-1459 - Camp Clatsop-West Lake Section, Oregon Coast Highway. Clatsop County. 1st authorization \$80
 Bridge - - - - - 4-1460 - Nehalem River Crossing-East Section, Wolf Creek Highway, Clatsop Co. 1st authorization \$200
 Plans - - - - - 6-1421 - North Bend-Marshfield Section, Oregon Coast Highway, Coos County. 5th authorization \$1,000
 Total to date \$5,000.
 Maint. Site - - 107-1417 - Crooked River Highway-Paulina Section, Crooked River-Paulina Hwy., Crook Co. 1st authorization \$75

Pits - - - - 107-1418 - Crooked River-School Section, Crooked River-Paulina Highway. Crook Co. 1st authorization \$150
 Prospect - - - 7-1419 - Prineville-Marks Creek Section, Ochoco Highway, in Crook County. 1st authorization \$300
 Plans - - - - 8-1416 - Brookings Section, Oregon Coast Highway, Curry County. 1st authorization \$550
 Plans - - - - 8-1415 - Gold Beach Section, Oregon Coast Highway, Curry County. 2nd authorization \$600
 Total to date \$1,200.
 Plans - - - - 8-1415 - Gold Beach Section, Oregon Coast Highway. Curry County. 3rd authorization \$700
 Total to date \$1,900.
 Plans - - - 108-1417 - Hughes Ranch-Lighthouse Section, Cape Blanco Highway, Curry County. 1st authorization \$100
 Prospect - - 109-1435 - Lava Lake-East Forest Boundry Section, Century Drive Highway, Deschutes Co. 1st authorization \$200
 Right of Way 9-1438 - Sisters Scale Site, McKenzie Highway, Deschutes County. 1st authorization \$75
 Plans - - - 109-1436 - Lava Lake-East Forest Boundary Section, Century Drive Hwy., Deschutes Co. 1st authorization \$430
 Plans - - - 209-1443 - Powell Butte Highway-Alfalfa Section, Alfalfa Market Road, Deschutes County. 1st authorization \$1,000
 Plans - - - - 9-1442 - Squaw Creek Section, McKenzie Highway, Deschutes County. 1st authorization \$500
 Prospect - - - 9-1444 - Sisters-Redmond Section, McKenzie Highway, Deschutes County. 1st authorization \$300
 Plans - - - -10-1422 - North Dillard Bridge, Pacific Highway, Douglas County. Total to date \$1,300 4th authorization \$250
 Plans - - - 210-1432 - Oak Creek-Marks Ranch Section, North Umpqua County Road, Douglas County 2nd authorization \$75
 Total to date \$200.
 Plans - - - 110-1433 - Milo-Tiller Section, Tiller-Trail Secondary Highway, Douglas County. 1st authorization \$3,300
 Right of Way -15-1433 - South Medford Section, Pacific Highway, Jackson Co. 1st authorization \$210
 Plans - - - 15-1428 - Ashland Plaza Section, Pacific Highway, Jackson County. 2nd authorization \$550
 Total to date \$900
 Plans - - - 215-1435 - North Boundary Section, Medford Cantonment Access Road, Jackson County. 1st authorization \$450
 Plans - - - 215-1436 - South Boundary Section, Medford Cantonment Access Road, Jackson County. 1st authorization \$2,450
 Plans - - - 215-1438 - Dodge Ranch-Hoos Ranch, Medford Cantonment Access Road, Jackson County. 1st authorization \$1,050
 Plans - - - 15-1431 - Eagle Point-Medford Section, Crater Lake Highway, Jackson County. 2nd authorization \$2,000
 Total to date \$5,500.
 Plans - - - 116-1410 - Madras-Warm Springs Section, Warm Springs Highway, Jefferson County. 1st authorization \$650
 Prospect - - 17-1415 - Wolf Creek-Grave Creek Section, Pacific Highway. Josephine County. 1st authorization \$1,020

Prospect - - - 17-1416 - Wolf Creek-Jump Off Joe Creek, Pacific Highway, Josephine County. 1st authorization \$500

Prospect - - - 18-1451 - Klamath Falls Vicinity, Various Highways, Klamath County. 3rd authorization \$800
Total to date \$2,000.

Plans - - - 118-1456 - U. S. 99 to ORE. 66 Section, Midland Secondary Highway, Klamath County. 2nd authorization \$1,312.50
Total to date \$2,062.50.

Location - - - 18-1441 - Barclay Springs-Terminal City Section, The Dalles-California Highway, Klamath County. 4th authorization \$900
Total to date \$8,550.

Location - - - 18-1443 - Klamath Falls-Merrill Jct., Klamath Falls-Lakeview Hwy., Klamath County. 3rd authorization \$1,000
Total to date \$7,000.

Location - - - 18-1452 - Modoc Point-Barclay Springs Section, The Dalles-Calif. Hwy., Klamath County. 3rd authorization \$1,825
Total to date \$6,625.

Location - - - 218-1458 - Sprague River-East Section, Sprague River County Rd., Klamath County. 1st authorization \$3,000

Plans - - - 19-1426 - Drews Valley-E. Forest Boundary Sec., Klamath Falls-Lakeview Hwy., Lake Co. 1st authorization \$200

Plans - - - 20-1437 - Goshen-Lowell Section, Willamette Highway. Lane County. 7th authorization \$841.25
Total to date \$13,458.75.

Plans - - - 120-1447 - Veneta-Crow Section, Territorial Secondary Highway, Lane County. 1st authorization \$900

Plans - - - 120-1448 - Siuslaw Highway-Elmira Section, Territorial Secondary Highway, Lane County. 1st authorization \$750

Prospect - - - 120-1449 - Siuslaw Highway-Elmira Section, Territorial Secondary Highway, Lane County. 1st authorization \$175

Plans - - - 21-1452 - Taft Section, Oregon Coast Highway, Lincoln County. 1st authorization \$100

Plans - - - 21-1454 - Oceanlake Section, Oregon Coast Highway, Lincoln County. 1st authorization \$400

Stock Pile - - 21-1455 - Kernville-Seal Rocks Section, Oregon Coast Highway, Lincoln County. 1st authorization \$800

Right of Way - 22-1437 - Canyon Creek-Bryant Hill Section, Santiam Highway, Linn County. 1st authorization \$450

Quarry - - - 22-1436 - Foster-Cascadia Section, Santiam Highway, Linn County. 1st authorization \$200

Right of Way - 22-1438 - Cascadia State Park Section, Santiam Highway, Linn County. 1st authorization \$500

Plans - - - 22-1439 - Airplane Landing Field, Santiam Highway, Linn County. 1st authorization \$500

Prospect - - - 22-1440 - Lebanon-Sweethome Section, Santiam Highway, Linn County. 1st authorization \$400

Plans - - - 22-1441 - Lebanon-Sweethome Section, Santiam Highway, Linn County. 1st authorization \$1,500

Stock Pile - - 22-1442 - Tangent-Harrisburg Section, Pacific Highway East, Linn County. 1st authorization \$50

Plans	- - - -	23-1427	- Ontario Section, Old Oregon Trail Highway, Malheur County.	1st authorization	\$700
Plans	- - - -	26-1450	- Parkrose Section, Columbia River Highway, Multnomah County.	1st authorization	\$1,000

			Total to date	\$2,300.	
Plans	- - - -	34-1429	- Sylvan-West Slope Section, Tualatin Valley Highway, Washington County.	1st authorization	\$700
Plans	- - -	134-1430	- #140 - Hazeldale Section, Farmington Secondary Highway, Washington Co.	1st authorization	\$1,900
Plans	- - - -	34-1431	- Tigard Section, Pacific Highway West, Washington County.	1st authorization	\$400
Plans	- - - -	36-1428	- East Sheridan Section, Salmon River Highway, Yamhill County.	1st authorization	\$500

The Commission considered the following requests for extensions of time within which to complete highway construction projects:

Chester T. Lackey, contract No. 2359, for furnishing crushed rock in stock piles for the Sage Hen Hill-Harney County Line Section of the Central Oregon Highway in Harney County, requested an extension of time from June 15 to September 20, 1941, within which to complete this job. He alleged that all the work in connection with

the job was completed April 5, 1941, with the exception of construction of fences around the stock piles, and that he was delayed in completing this particular item because of difficulties in securing materials. The Engineer advised that the reasons given by Mr. Lackey for failure to complete the project within the specified time limit are correct; also, that Mr. Lackey made an honest effort to do the job within the specified time limit, but could not do so for the reasons stated. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. The Commission approved the recommendation.

Colonial Construction Company, contract No. 2372, for grading, surfacing and oiling the Follett Ranch-Cold Canyon Section of the Wallowa Lake Highway, in Union County, requested an extension of time from August 31 to October 10, 1941, within which to complete this job. They attributed their failure to complete the project within the specified time limit to adverse weather conditions, which prevented oiling operations. The Engineer advised that all mineral aggregate for this job had been manufactured, and the oiling crew was on the job early enough to have completed the work within the specified time limit, but they were not allowed to proceed with the oiling work because of unfavorable weather conditions. He recommended, in view of the circumstances, that the extension requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation.

Tidepoint Company, contract No. 2408, for furnishing crushed material in stock piles for the Svenson-Goble Section of the Columbia River Highway, in Clatsop and Columbia Counties, requested an extension of time from June 30 to October 14, 1941, within which to complete this job. They attributed their failure to complete the project within the specified time limit to difficulty in securing skilled labor. The Engineer advised that the contractor produced sufficient of the rock under the contract to satisfy all of the highway department's needs for spring and summer use of this year, so his failure to complete the project within the specified time limit did not inconvenience the state in any way. Defense work in the vicinity of Astoria, he said, made it difficult for the contractor to secure labor. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. The Commission approved the recommendation.

Babler Bros., contract No. 2447, for grading, surfacing and oiling the Vance Creek-Soda Mountain Section of the John Day-Burns Highway, in Grant County, requested an extension of time from August 31 to October 4, 1941, within which to complete this job. They alleged that their failure to complete the project within the specified time limit was due to unforeseen delay encountered in connection with their subcontract with Leonard & Slate, for the construction of the Quinton-Ramsey and Blalock-Ramsey Section of the Columbia

River Highway, they being unable to move their crushing plant and equipment to their own contract in time to complete the job within the specified time limit. The Engineer advised that the grading, surfacing and oiling work was all completed by September 18, and work remaining to be done after that time consisted of production of maintenance rock and shoulder work, which did not inconvenience the traveling public or increase the state's expense for engineering supervision to any extent. He recommended, in view of the circumstances, that the extension of time be granted without penalty. The Commission approved the recommendation.

J. F. Johnston, contract No. 2453, for construction of approaches to the Dayton Bridge on the South Yamhill River Bridge Section of Three Mile Lane Secondary Highway, at Dayton, in Yamhill County, requested an extension of time from September 30 to December 31, 1941, within which to complete this job. He alleged that his failure to complete the project within the specified time limit was due to his inability to obtain delivery of lumber. The Engineer advised that the reason given by Mr. Johnston is correct; that he used every reasonable effort to get prompt delivery of this material, but has been delayed because of the federal government's requirements and because of labor trouble at the mills supplying the lumber. He recommended that the extension of time requested be granted without penalty. The Commission approved the recommendation.

Babler Bros., contract No. 2459, for surfacing, oiling and construction of bituminous macadam on the Sunset Camp-Davies Section of the Wolf Creek and Nehalem Secondary Highways, in Washington County, requested an extension of time from September 30 to October 17, 1941, within which to complete this job. The Engineer advised that all work in connection with this job, with the exception of shoulder work, was completed within the specified time limit, and the road was opened to traffic early in September, so the delay in completing the contract did not inconvenience the traveling public; neither has it increased the state's expense for engineering supervision. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. The Commission approved the recommendation.

A. S. Wallace, contract No. 2460, for furnishing crushed materials in stock piles for the Dean Creek-Parker Creek Section of the Umpqua Highway, in Douglas County, requested an extension of time of thirty days from October 31 to November 30, 1941, within which to complete this job. He gave no reason for his failure to complete the project within the specified time limit. The Engineer advised that failure of the contractor to complete the job within the specified time limit will not inconvenience the traveling public; neither will it increase the state's expense for engineering supervision. He recommended the granting of the request for the extension of time without penalty. The Commission approved the recommendation.

E. L. Rigdon, contract No. 2473, for grading, surfacing and oiling the Days Creek-Wright Ranch Section of the Tiller-Trail Secondary Highway, in Douglas County, requested an extension of time from September 30, 1941, to June 30, 1942, within which to complete this job. They attributed their failure to complete the project within the specified time limit to their inability to secure rock-crushing equipment either by lease or purchase, and their inability to subcontract the rock-crushing work. The Engineer advised that the contract was awarded May 22, 1941, but the contractor did not start operations until July 21, 1941, which accounts for his failure to complete the job on time. His delay in completing the job, he said, has considerably inconvenienced the people who use the road, and has also increased the state's expense for engineering supervision. He recommended, in view of the circumstances that the extension of time requested be granted, but that the contractor be required to reimburse the state for extra engineering expense incurred in connection therewith subsequent to the specified date of completion. The Commission approved the recommendation.

C. J. Eldon, contract No. 2481, for grading, surfacing and construction of bituminous macadam on the Trask River-Pelts Corner Section of the Fairview-Clements Corner Road, and the Long Prairie County Road, in Tillamook County, requested an extension of time from September 30, 1941, to June 30, 1942, within which to complete this project. He attributed his failure to complete the project within the specified time limit to conditions existent at the time of the award of the contract and continuing thereafter for a period of approximately two months, which precluded the performance of the work of clearing, grubbing, draining and grading in sufficient time to permit construction of the oiled surface this season. Rainy weather during the month of September was also given as a contributing feature. The Engineer advised that the contractor was somewhat delayed at the beginning of his operations by the failure of Tillamook County to set back fences and utility pole lines and pipe lines. Such delay, he said, and subsequent rains, prevented the oiling work this year, so that part of the job will have to be carried over until 1942. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation.

C. W. Reeve, contract No. 2484, for remodeling the Oak Creek Bridge on the Corvallis-Newport Highway in Benton County, requested an extension of time from September 30 to October 28, 1941, within which to complete this job. He alleged that his failure to complete the project within the specified time limit was due to a request from the state highway bridge department to defer the construction of sidewalks and sewer drains until the paving work was completed. The Engineer advised that the reason given by Mr. Reeve for his failure to complete the job within the specified time is correct. He

recommended, in view of the circumstances, that the extension of time requested be granted without penalty. The Commission approved the recommendation.

United Contracting Company, contract No. 2499, for paving the Independence Section of the Independence Secondary Highway, in Polk County, requested an extension of time from September 15, 1941, to June 1, 1942, within which to complete this job. They attributed their failure to complete the project within the specified time limit to adverse weather conditions during August and September and to a letter from the Division Engineer dated October 25, 1941, ordering that the work be not started until suitable weather next spring. The Engineer advised that due to the press of other highway paving jobs it was impossible for the United Contracting Company to secure a plant setup in Independence until late in October, which was too late to insure a good job this year. He further stated that the United Contracting Company also had the contract for paving work in Sheridan and that he insisted that such work be completed before commencing the Independence job. Due to the fact that the Sheridan job was not completed early enough to complete the Independence job before bad weather set in, he ordered them not to commence it until next spring. He recommended, in view of the circumstances, that the extension of time be granted without penalty. The Commission approved the recommendation.

Frank Watt Construction Company, contract No. 2501, for construction of a bridge over East Dairy Creek on the Wolf Creek Highway, in Washington County, requested an extension of time of thirty days, from October 31 to November 30, 1941, within which to complete this job. He attributed his failure to complete the project within the specified time limit to extra work in changing the channel of East Dairy Creek and to difficulties encountered in securing metal hand rail that was specified for the job. The Engineer advised that the reasons given by the contractor for failure to complete the project within the specified time limit are correct, and that the delay was not primarily the contractor's fault. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. The Commission approved the recommendation.

The Engineer reported that Contracts Nos. 2359, 2372, 2408, 2447, 2459, 2464, and 2484, for the construction of state highway projects, have been completed according to the requirements of the contracts or modifications thereof, and that said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and was adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts and said jobs are now ready for acceptance:

Contract No. 2359, with Chester T. Lackey, for furnishing approximately 9,700 cubic yards of crushed rock in stockpiles on the Sagehen Hill-Harney Section of the Central Oregon Highway, in Harney County. Completed September 20, 1941.

Contract No. 2372, with Colonial Construction Company, for 1.67 miles grading, surfacing and oiling on the Follett Ranch-Cold Canyon Section of the Wallowa Lake Highway, in Union County. Completed October 10, 1941.

Contract No. 2403, with Tidepoint Company, for furnishing 8,000 cubic yards of crushed material in stockpiles on the Svensen-Gobel Section of the Columbia River Highway, in Clatsop and Columbia Counties. Completed October 14, 1941.

Contract No. 2447, with Babler Bros., for 4.02 miles grading and 18.02 miles surfacing and oiling on the Vance Creek-Soda Mountain Section of the John Day-Burns Highway, in Grant County. Completed October 4, 1941.

Contract No. 2459, with Babler Bros., for 9.53 miles surfacing and bituminous macadam, and 3.15 miles oiling on the Sunset Camp-Davies Section of the Wolf Creek and Nehalem Secondary Highways in Washington County. Completed October 17, 1941.

Contract No. 2464, with J. F. Johnston, for construction of the West Dairy Creek Bridge on the Wolf Creek Highway, in Washington County. Completed October 31, 1941.

Contract No. 2484, with C. W. Reeve, for the Oak Creek Bridge widening project, on the Corvallis-Newport Highway, in Benton County. Completed October 28, 1941.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

The Commission considered and signed agreements, et cetera, as follows:

Agreement with the Oregon-Washington Railroad & Navigation Company, the Union Pacific Railroad Company and Multnomah County, providing for an easement for the encroachment of the Columbia River Highway on railroad property near Bonneville.

Agreement with the Southern Pacific Company terminating a lease of a gravel storage site on railroad property at Derry, in Polk County.

Agreement with H. P. Fischer covering construction and use of a logging road across Silver Creek Falls State Park, Marion County.

Agreement with the Eugene Power Company covering purchase of real property which is to be conveyed to the Power Company in connection with the Eugene-Springfield Highway railroad improvement.

Agreement with Ward C. Barnes and wife disposing of their claim for damages to their property at Nyssa, on account of construction of the Nyssa railroad grade separation project. Right of way file No. 9723.

Agreement with F. R. Pendleton, et al., disposing of a claim for damages to property at Marshfield. Right of way file No. 4763.

Separate agreements with the following cities and towns, covering improvements to certain city streets that are not on state highway routes: Albany, Hillsboro, Astoria, Empire, Gearhart, Woodburn, Eastside, Weston, Warrenton, Newport, Corvallis, Umatilla, Beaverton, and Harrisburg.

Cancellation of lease agreement with Zelda Ploeger, affecting certain property acquired for borrow purposes in connection with the Tigard project.

The Commission confirmed Monday and Tuesday, November 17 and 18, as the dates for its next regular meeting for receiving bids for construction projects, this being a postponed meeting originally set for Wednesday and Thursday, November 12 and 13.

There being no further business to come before the Commission at this time, the meeting was adjourned at 5:15 p. m.

Spencer
State Highway Engineer

Henry F. Cabell
Chairman

Arbuckle
Secretary

Harmon M. Day
Commissioner

Portland, Oregon, November 17, 1941

The State Highway Commission met in regular session at 9:00 a. m. in the auditorium of the Public Service Building. Present were:

Henry F. Cabell, Chairman
Huron W. Clough, Commissioner
Herman Oliver, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

Bids as follows for highway construction work were opened and read in conformance with previously published notice, following which Chairman Cabell announced that the award of contracts would be made at 3:00 p. m. in the same room.

A delegation representing the Oregon Trail Association headed by Mr. Charles Reynolds, President, La Grande, and including County Judge C. D. Nickelsen, Hood River County; R. E. Steele, Secretary of the Hood River Chamber of Commerce; County Judge David F. Graham, Malheur County; and Frank M. Warren, Jr., Portland, representing Mr. J. H. Polhemus, Chairman of the Portland Committee, came before the Commission and urged haste in the construction of the new Columbia Gorge Highway between Troutdale and The Dalles, and additional improvements on the Old Oregon Trail between The Dalles and Ontario. Mr. Reynolds mentioned the following specific projects:

- (1) Either the modernization of the present highway between Union and North Powder or the construction of a new highway

on proposed alignment through Ladd Canyon. He advised that they are not advocating any particular route but would like to see something done soon.

(2) Boardman-Stanfield Highway:- Mr. Reynolds gave as his understanding that the Commission intends to complete this project during the 1942 season.

(3) Boardman-Arlington Section, 26 miles in length:- Mr. Reynolds urged a start in the near future on the modernization of this section which, he said, is badly needed. He suggested that the work be started at the Arlington end, working easterly.

(4) Quinton-John Day River Section:- Mr. Reynolds urged the construction of the remaining 8.8-mile section in the 1942 program.

(5) The Dalles-Portland Section:- Mr. Reynolds urged completion of this project at the earliest possible time. It was his thought that the Commission should spend millions immediately on this section in order to expedite completion of the work which would take a long time if expenditures were limited to \$500,000 or thereabouts annually.

Judge Nickelsen alleged that the noncompletion of the new highway up the Columbia Gorge is handicapping industry in the State of Oregon and that the existing poor road in Oregon is forcing industry into the State of Washington. He advocated the borrowing of money to finance the modernization of the Old Oregon Trail throughout its entire length from Portland to Ontario, the refunding of outstanding bonds and sale of additional bonds, and expenditure of two or three million dollars annually until the work is done.

Mr. Warren advised that the people in Portland are very much interested in the improvement of the Columbia River Highway from the safety standpoint as well as from the industrial standpoint.

Mr. Reynolds then advised the Commission that a special Columbia River Highway Committee, consisting of himself as President of the Oregon Trail Association, Judge Nickelsen, of Hood River County, and Russell M. Colwell, Portland, has been appointed to arrange, if possible, a plan for financing the Highway under discussion. He asked the Commission to authorize at least one member of the Commission to sit in with their committee in their discussions of this matter. Chairman Cabell suggested that the committee formulate some plan and present it to the Commission. The suggestion was approved and it was thereupon decided that the plan should be submitted to Chairman Cabell who was authorized by Commissioners Clough and Oliver to act for the Commission in the matter.

Chairman Cabell advised of the Commission's attitude with respect to the sale of bonds as was suggested by Judge Nickelsen. He pointed out that this is a broad, state-wide question and in the minds of the Commission it is a matter for the people of the state as a whole to decide through their representatives in the Legislature. The Commission now is of the opinion, he said, that legislative feeling is against the sale of additional bonds and unless

there is a broad, state-wide change in public opinion with respect thereto the Commission feels that it should not increase the state's bonded indebtedness. However, if the people have changed their attitude with respect thereto and will so express themselves, the Commission will be glad to respond accordingly. This concluded the conference.

Mr. Steele inquired as to whether or not the Commission has acted on the offer of the City of Hood River to deed to the state, free of charge, certain city property situated adjacent to the Columbia River Highway near the west city limits of Hood River, for use as a maintenance site. He said that, if the Commission wants this tract, the city is ready and willing to sign the deed as soon as advised. The Engineer was instructed to investigate the property and report to the Commission at its December meeting.

Judge Graham asked for the following Malheur County projects:

- (1) Construction of the proposed revision of the Old Oregon Trail between Ontario and Huntington.
- (2) Construction of a railroad underpass at Durkee.
- (3) Additional improvements on the 10N State Secondary Highway. He particularly asked the Commission to redesignate this highway as a primary state highway.
- (4) Rebuild bridges across the Snake River.
- (5) Reconstruct the North Powder-Union Section of the Old Oregon Trail.
- (6) Modernize Graham Boulevard (state secondary highway) at the earliest possible time.
- (7) Improve county roads in the vicinity of Nyssa and Ontario.
- (8) Continue the improvement to modernize Lytle Boulevard.

The Commission took no action on these requests.

Mr. Reynolds reappeared before the Commission in behalf of the Union County Court and the La Grande Chamber of Commerce and requested the following Union County improvements:

- (1) Extend improvement on Hunters Lane county road to a place known as Summerville or to a connection with the Tollgate Road west of Elgin.
- (2) Additional improvements on the Hillgard-Starkey Secondary State Highway. He urged the Commission to extend this

secondary highway from Starkey to the United States forest boundary and to spend about \$50,000 for additional improvement of the road, extending from the end of the improvement completed this year, or, if the Commission cannot see its way clear to do that, then to spend a like amount for the improvement at the Hillgard end.

(3) Continue improvement of the Minam Hill Section of the Wallowa Lake Highway between Minam and Elgin. Mr. Reynolds asked that the work be extended westerly from the end of the present improvement to Elgin and then on to La Grande.

(4) Improve the Enterprise-Flora Highway from Enterprise north. Mr. Reynolds urged the improvement of this section, alleging that it is now in very bad condition and that it carries a large volume of traffic. The Engineer estimated that the necessary improvement between Enterprise and Trout Creek, a distance of about seven miles, would cost about \$100,000.

(5) Widen the Wallowa Lake Highway between La Grande and Island City. Mr. Reynolds stated that the present road is only 18 feet wide and is rough and dangerous to travel. He urged the widening to 24-foot width.

(6) Construction of a bridge over North Powder River at North Powder.

Commissioner Oliver inquired as to which of the projects mentioned is of foremost importance from the county's standpoint. Mr. Reynolds replied that the county's first choice would be the continuation of the improvement on the Wallowa Lake Highway westerly from Minam Hill to La Grande and they are in hopes that the Commission will spend about \$50,000 there next year. Their second choice of projects, he said, is the improvement of the Old Oregon Trail between North Powder and Union. This concluded the presentation.

The Commission discussed the proposed improvement of the Pacific Highway at the Plaza Corner in Ashland and decided that it would be proper to improve the present route rather than to reroute the highway so as to bypass this town, as has been proposed, so as not to disrupt the present town facilities. The question whether or not to proceed with this improvement, in view of the high cost of right of way as compared with the cost of construction, was also discussed. The Commission decided to defer its final decision in the matter pending appraisals of all of the properties involved by appraisers not connected with the state highway department. The Commission indicated that, if such appraisals compare favorably with those made by employees of the state highway department, it would approve the project. The Attorney was instructed to have such appraisals made at once and report the results thereof at the December meeting of the Commission.

A delegation from Ashland, headed by Mr. F. D. Van Dyke, city attorney, and including Mayor T. S. Wiley and Mr. E. R. Green, came before the Commission in regard to the Plaza Corner improvement in Ashland. Chairman

Cabell advised the delegation of the action just taken by the Commission in regard to this matter. He explained that unless something unusual arises as a result of the new appraisals the Commission will proceed with the construction of the project as expeditiously as possible; further, that the Commission would give them a definite answer following its December meeting.

The Commission, by unanimous vote, approved the minutes of the meetings held on May 8 and 9, May 22, June 12 and 13, July 16, 17 and 18, and July 23 and 24, 1941.

The Engineer brought up for discussion the matter of installing flood lights at certain street intersections in Corvallis. He recalled that the Commission, at its meeting in May of this year, approved the installation of flood lights at two intersections, viz., Sixth and Van Buren Streets and Sixth and A Streets where the Southern Pacific railroad crosses the highway route, such approval being contingent upon the railroad company paying one-half of the cost involved and the city agreeing to pay the cost of the electrical current which is used to operate the lights. He advised that up to the present time he has been unable to get a declaration from the railroad company as to whether or not it would pay its share of the cost although the city has agreed to pay the cost of operation. He recommended in view of the desirability of the lights that they be installed entirely at state expense if the railroad company refuses to cooperate. He estimated the cost of installing the two lights at \$300. He also recommended approval of a third installation at the intersection of Seventh and A Streets on the same basis, making a total cost of \$450. After discussion the Commission approved the installation of the three flood lights at state expense if the railroad company will not assume a portion of the expense.

The Secretary presented a resolution from the County Court of Clatsop County requesting the designation, as a state secondary highway, of the route or location to be known as the Fishhawk Falls Secondary State Highway No. 103, connecting the Wolf Creek Highway with the Nehalem Secondary Highway and described as follows: beginning at a point on the Nehalem Secondary State Highway No. 102 near Fishhawk Falls and extending thence in a southerly direction to a connection with the Wolf Creek Highway at a point near Humbug Creek west of Ranger Station, a distance of about six miles. The Commission considered the request is in conformity with previous understanding with the county court and thereupon approved the same. The following resolution with respect thereto was adopted by the Commission by unanimous vote:

WHEREAS, under the provisions of Chapter 248, Laws of 1931; Chapter 196, Laws of 1935; and Chapter 529, Laws of 1939; the State Highway Commission, by mutual agreement with the respective county courts of the several counties of the State, is authorized and empowered to select, locate, and designate a system of secondary state highways, which highways shall be selected from the market roads or other county roads, or available locations or routes of the several counties; and

WHEREAS, the State Highway Commission, by mutual agreement with the Clatsop County Court of the State of Oregon, has selected the road or highway hereinafter named, and it is the purpose of the Commission to officially and regularly designate and adopt said highway as a highway to constitute, together with other highways heretofore adopted and/or which may hereafter from time to time be added, the system of secondary state highways under the provisions of said acts;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission, all members being present and affirmatively voting and participating, as follows:

1. That the following described market road, county road, highway, route, or location of a highway in Clatsop County be and the said market road, county road, highway, location, or route, hereby is selected, designated, established, adopted and approved as a secondary state highway and shall be and hereby is designated as a part of the secondary state highway system, to wit:

Fishhawk Falls Secondary State Highway No. 103:

Beginning at a point on the Nehalem Secondary State Highway No. 102 near Fishhawk Falls; thence in a southerly direction to the Wolf Creek Highway west of Ranger Station and near Humbug Creek; a distance of approximately 6.0 miles.

2. That the said highway shall be and hereby is qualified for improvement under the provisions of said Chapter 248, Oregon Laws of 1931; Chapter 196, Oregon Laws of 1935; and Chapter 529, Oregon Laws of 1939; and amendments thereof.

The Commission confirmed action taken at its meeting on October 16, 1941, for the disposal of the state's claim against Lincoln County for advancing the county's share of the cost of constructing the Eddyville-Toledo Section of the Corvallis-Newport Highway, and thereupon signed an agreement with the county court with respect thereto. (See agreement for details.)

The Commission discussed briefly the matter of improving South Sixth Street, Klamath Falls. It was decided to give this matter special consideration at the January meeting of the Commission.

The Engineer submitted primary and secondary highway maintenance budgets for 1942 performance, containing the following amounts: total general maintenance primary highways \$3,000,000; total primary minor betterments \$220,000; total general maintenance secondary highways \$850,000; total minor betterments on secondary highways \$100,000; maintenance and betterment of park roads, parking areas, and minor parks \$25,035. After discussion the Commission approved such budgets by unanimous vote. (See budget details attached to letter dated November 14, 1941, from J. N. Bishop, Maintenance Engineer, to R. H. Baldock, Chief Engineer.)

A letter was presented from the Parkrose Chamber of Commerce requesting that the name "Parkrose" be printed on state highway maps hereafter published. The Commission denied the request insofar as it pertains to the face of the map; however, authorized the Engineer to place the name of "Parkrose" on the large-scale map of Portland and vicinity which appears on the back of the state map.

The Engineer reported results of investigations as to the width of right of way of the Columbia River Highway (Sandy Boulevard) from Parkrose to Troutdale. It appears that the present right of way through the community of Parkrose is 80 feet wide but narrows down to 50 feet at the Powell Cemetery, about 200 feet east of 122nd Avenue. The Engineer suggested the acquisition of a 100-foot right of way throughout, in view of the aluminum plant that is to be established at Troutdale, which undoubtedly will increase the volume of traffic along this section, and will necessitate the widening of the highway for four lanes of traffic. The Commission concurred in the Engineer's viewpoint, and thereupon authorized him to make a location survey and prepare descriptions for right of way of such width. The Attorney was authorized and instructed to proceed with the securing of options for such right of way, commencing with that needed from the cemetery association, which involves the taking of trees, shrubs, et cetera, as well as land.

The Engineer discussed with the Commission bids received at this letting for the construction of the Eugene-Judkins Point Section of the Pacific Highway, in Lane County. He advised that the low bid submitted was that of Strong & MacDonald, Inc., in the amount of \$205,515.50, which amount is about \$600 in excess of the Engineer's estimate, plus 10 per cent. The present policy of the Commission, he said, is to reject the low bid if it is more than 10 per cent in excess of the Engineer's estimate. He suggested three alternate methods of disposing of the bids, viz., reject all of them in strict conformance with the Commission's policy; negotiate with the contractor to secure a reduction of \$600, which would bring his estimate within the ten per cent limit; or award the contract to the low bidder notwithstanding the excessive amount. After discussion the Commission decided to award the contract to the low bidder on the basis of the bid submitted, notwithstanding the slight deviation from the established policy.

The Engineer brought up for discussion the proposed extension of the Andrew Stambuck contract for operation of the state-owned ferry across Coos River on the Coos River Secondary Highway, at a place known as Enegren Ferry. He recalled that the Commission took bids for such ferry operations on September 4, 1941, on the basis of providing 20-hour service each day, and for a maximum loading of 15 tons, and that Mr. Stambuck submitted the only bid, which provided for the payment of \$1,369.60 monthly. He also recalled that the Commission rejected the bid and ordered negotiations with Mr. Stambuck to determine whether or not he would reduce the amount thereof. Such negotiations, he said, have been conducted and Mr. Stambuck has agreed to reduce his charge to \$1,050 per month for the same service which is approximately \$3,000 more per year than he is now receiving under his present contract, wherein he provides service for 20 hours daily for maximum loads of 10 tons. He questioned the justification of changing the present contract

in view of the fact that only one complaint has been received about the service that is now being rendered. After discussion the Commission decided not to change the conditions of the present contract. The Engineer was instructed to arrange for an extension of the present contract for a two-year period as provided therein, or until 6:00 a. m. on October 1, 1943.

The Commission adjourned at 12:00 noon and reconvened at 2:00 p. m. in the same room with all Commissioners, the State Highway Engineer, the Attorney, and the Secretary present.

Mr. W. H. Lichty, Jr., Eugene, dealer in long piling, was present and requested the privilege of truck-hauling piling 85 feet long over the Alsea-Deadwood Secondary Highway and the Siuslaw Highway from a place known as Paris to Swisshome, in Lane County. Mr. Lichty advised that he has rush orders from the government for a considerable amount of piling to be used in defense operations and, anticipating no difficulty in securing a permit to haul these piling over the highways mentioned above, arranged for the falling of 400 pieces in the Alsea-Deadwood district; however, his application for a permit for such privilege has been denied, the reason given being that they could not be moved over these highways without taking up more than half the roadway and endangering other traffic. He urged the Commission to permit him to take out the piling already cut, there being about 400 pieces, which he estimated would take about 30 days. He agreed to furnish flagmen and abide by all the rules and regulations which the Commission might promulgate to cover the movements.

After discussion the Commission authorized the granting of a 30-day permit to move the piling already cut, under the condition that Mr. Lichty will furnish flagmen to accompany each load, one flagman to proceed in advance of the load and the other to follow in the rear as protection to other traffic. Mr. Lichty is also to maintain two flagmen where the loads enter the Siuslaw Highway and where they leave the Siuslaw Highway at Swisshome, such flagmen to be stationed a sufficient distance at each side of these intersections to properly and effectively warn approaching traffic of the movement. The authority hereby granted by the Commission is an emergency expedient and is not to be considered as a precedent in the issuance of future permits of similar nature. The Engineer was instructed to arrange for another test run of piling over the route used by Mr. Lichty in connection with this hauling, the results thereof to be used as a guide in the issuance of future permits in this locality.

Messrs. Zidell and I. Pelz, representing the firm of Zidell-Steinberg Company, Portland, to whom the Commission, on October 16, 1941, sold the rails salvaged from the Front Avenue Project, Portland, came before the Commission in regard to their request for reimbursement for cement that they paid for in connection with this purchase. They alleged that the rails were covered with a considerable quantity of cement which was removed in their plant, where it was weighed, revealing that the net weight of the steel was 119.43 tons, rather than 148.315 tons, and that they actually paid the state for 28.885 tons of cement. It was their thought that they should not be required

to pay for the cement and asked the Commission to reimburse them for the excess payment, amounting to a total of \$336.80. The matter was discussed at some length, but a decision was deferred by the Commission until later in the session. (See ahead for final action of the Commission.)

The Engineer brought up for discussion the bids received by the State Board of Control for the furnishing of three paving plants for use of the state highway department. He said that only two bids were received, one being that of the Dallas Machine & Locomotive Works, of Dallas, Oregon, in the amount of \$12,500 each, and the other being that of the Cramer Machinery Company, Portland, representatives of the Madsen Iron Works, in the amount of \$11,500 each. One of the provisions of the specifications, he said, required the submission of detailed drawings with the bid, which drawings were furnished by the Dallas Machine & Locomotive Works but were not furnished by the other bidder, although in other respects both bids were in conformity with the specifications. He pointed out that it has been the policy of the Commission for a long time to recommend to the Board of Control acceptance of the low bid that meets the specifications in every respect and, in view thereof, he questioned the advisability of considering the bid of the Cramer Machinery Company. This matter was discussed at considerable length, during which the following alternative methods in disposing of the matter were suggested: (1) accept the offer of the Cramer Machinery Company, the low bidder, notwithstanding that the bid is not in strict conformance with the specifications; (2) accept the offer of the Dallas Machine & Locomotive Works, which is the low bid submitted that meets the specifications in all respects; (3) reject both bids and readvertise for new ones.

Mr. C. P. Cramer and his Attorney, Mr. Irving Rand, Portland, were present in regard to this matter. Mr. Rand was spokesman. He alleged that the Cramer Machinery Company had only ten-days' notice of the taking of bids, which did not give them time to prepare the required drawings; however, the drawings were submitted later. He suggested that the Commission either recommend the acceptance of the offer of the Cramer Machinery Company or call for new bids. He also said that in the event new bids are called for, Cramer Machinery Company will not submit a bid that is any higher than the present one.

Mr. John Waters, representing the Dallas Machine & Locomotive Works, was also present. He suggested the disqualification of the bid of the Cramer Machinery Company, because it did not fully comply with the specifications; also, that his company be given this business. He pointed out that the Dallas Machine & Locomotive Works builds the equipment in its plant at Dallas, Oregon, and is in a much better position to service the equipment than the other bidder; furthermore, it can provide such service in the best possible manner.

The matter was discussed at considerable length, but the Commission deferred a final decision until later in the session. (See ahead for final action.)

Mr. Phil Parrish, Chairman of the Old Oregon Trail Centennial Advisory Commission, was present and rendered a report on the activities of his

committee. He advised that considerable progress is being made, and there appears to be a lot of enthusiasm among the various cities and towns that are concerned, many of which are now seriously considering plans for the entertainment of visitors, but are waiting to ascertain just what kind of a program the City of Portland is going to provide before taking definite action. The Portland committee, he said, is also working conscientiously on the project, but has not as yet arrived at anything definite, because there are so many things involved.

He also advised that the work of the Advisory Commission is now such that it needs the services of a part-time man to act as a coordinator. He asked the Commission to approve employment of someone on half-time basis, it being understood that it may be necessary to put this man on full-time basis later on and that he would work directly under Mr. Ben Titus, Acting Director of the Highway Department's Travel & Information Department. The Commission, after discussion, approved employment of such coordinator on half-time basis provided that it is in conformity and meets with the ideas of Mr. Titus. The Commission agreed to give Mr. Parrish a definite answer after consulting Mr. Titus.

Chairman Cabell retired from the meeting at this time and returned later.

At 3:00 p. m. Commissioner Clough announced the following awards of contracts, bids for which were taken at the morning session, such awards having previously been approved by the Commission by unanimous vote:

"Grants Creek-Powers Section of the Powers Secondary Highway, in Coos County. 10.42 miles surfacing and oiling, also furnish 4,100 cu. yds. crushed gravel in stock piles. Coos Bay Dredging Company, Marshfield, submitted the low bid in the amount of \$49,246.50. Babler Bros., Portland, submitted the second-low bid in the amount of \$54,812.00. There were two higher bidders. The Commission refers all bids to the Engineer with power to award the contract to the low bidder, Coos Bay Dredging Company, when certain conditions have been fulfilled.

"Drews Valley Rock Production Project on the Klamath Falls-Lakeview Highway, in Lake County. Requires approximately 7,100 cu. yds. crushed rock in stock piles. The low bid for this project was submitted by Rogers Construction Company, Dayton, Washington, in the amount of \$13,842.00. The only other bid received was that of True Mix Concrete Company, Medford, in the amount of \$17,300.00. The Commission awards the contract to Rogers Construction Company, the low bidder, at its bid of \$13,842.00.

"Eugene-Judkins Point Section of the Pacific Highway, in Lane County. 1.87 miles railroad roadbed construction. Three bids were received for this project, the low one being that submitted by Strong & Macdonald, Inc., Tacoma, Washington, in the amount of \$205,515.50,

and the second-low being that of Colonial Construction Company, Spokane, Washington, in the amount of \$208,738.00. The Commission refers all bids received to the Engineer with power to award the contract to the low bidder, Strong & Macdonald, Inc., when certain conditions have been fulfilled.

"Corbett Section of the Columbia River Highway, in Multnomah County. 0.57 mile of rock toe embankment. Sixteen bids were received for this project, the low one being submitted by Colonial Construction Company, Spokane, Washington, in the amount of \$87,340.00, and the second-low being submitted by White's Trucking Company, Walla Walla, Washington, in the amount of \$95,224.00. The Commission awards this contract to the Colonial Construction Company at its low bid of \$87,340.00.

"Front Avenue (Ankeny Street-Washington Street) Section of the Pacific Highway West, in Multnomah County. 0.24 mile grading and paving. Edlefsen-Weygandt Company, Portland, were the low bidders on this project with a bid of \$181,871.50. Porter W. Yett, Portland, was the second-low bidder with a bid of \$188,118.50. There was one higher bid. The Commission awards this contract to the low bidder, Edlefsen-Weygandt Company, at its low bid of \$181,871.50.

"Willamina Rock Production Project on state highways near Willamina, in Polk, Tillamook and Yamhill Counties. Requires approximately 7,900 cu. yds. crushed rock or crushed gravel in stock piles. Three bids were received for this project, the low one being that of Independence Sand & Gravel Company, Independence, in the amount of \$18,170.00 and the second-low being that of O. C. Yocom, Willamina, in the amount of \$18,407.00. The Commission awards the contract to the low bidder, Independence Sand & Gravel Company, at its bid of \$18,170.00.

"McMinnville Rock Production Project on state highways near McMinnville, in Polk and Yamhill Counties. Requires approximately 6,500 cu. yds. crushed rock or crushed gravel in stock piles. Independence Sand & Gravel Company, Independence, submitted the low bid in the amount of \$12,350.00, and A. H. Saxton & Son, Corvallis, submitted the only other bid received in the amount of \$13,864.00. The Commission awards the contract to the Independence Sand & Gravel Company, the low bidder, at its bid of \$12,350.00.

"Tigard Section of the Pacific Highway West, in Washington County. 1.58 miles roadside improvement. Only two bids were received for this project, the low one being that of Blair T. Alderman, Eugene, in the amount of \$4,342.00, and the other bid being that of Leonard & Slate, Multnomah, in the amount of \$6,220.00. The Commission awards the contract to Blair T. Alderman at his low bid of \$4,342.00."

Mr. A. R. Meyers, Stayton, was present and asked the Commission to revise the alignment of the North Santiam Highway through the town of Stayton so as to eliminate several right angle turns and to facilitate log-hauling operations. He suggested the following change: beginning at the easterly city limits of Stayton, extending thence in a northwesterly direction a distance of about 1.6 miles to a connection with an oiled county road which runs in a northerly direction and connects with the present highway at a point $1\frac{1}{2}$ miles west of the town of Sublimity. The Engineer advised that this would be a good change, but it is quite costly and the Commission does not have funds available at the present time to finance it. He suggested, as an alternate proposition, a short revision in the town of Stayton, beginning at the easterly boundary of the town and connecting with the present highway in the city limits, thence following the present highway to and through Sublimity and westerly to Aumsville with a slight improvement at the two right-angle turns in the present highway about $1\frac{1}{2}$ miles west of Sublimity.

Commissioner Clough advised that the Commission is not in position at this time to make a decision with respect to the major change requested by Mr. Meyers; however, there are possibilities in the revision suggested by the Engineer and he would be inclined to favor investigation of such possibilities. Commissioner Oliver concurred. The Engineer was thereupon authorized to investigate the changes suggested by himself and report the cost to do the work involved, the idea being that the Commission might authorize the project as one in its program of improvement of city streets not now on state highway routes if it is not too costly. It was understood that the application for the improvement should come from the Marion County Court as well as from the City of Stayton.

Mr. Meyers also requested state aid in improving the county road which extends up the Little North Fork of the North Santiam River from Mehama. He was informed by Commissioner Clough that it is contrary to the policy of the Commission to spend state funds for the improvement of county roads, so it is necessary to deny the request. Commissioner Oliver concurred; however, suggested that, inasmuch as the road is not within the jurisdiction of the Highway Commission, Mr. Meyers present his request to the Marion County Court.

Messrs. Don Peoples, Secretary, Bend Chamber of Commerce, and Myrl Hoover, representing Mt. Hood Stages, were present and inquired as to the plans of the Commission for the further improvement of the Warm Springs Highway. They were informed that this project is in the Commission's program for construction when funds are available to finance it, but there is a question as to the government funds at the present time, both as to the amount that will be available and when it will be available, so the Commission is not in position to make any definite statement at this time.

The Engineer reported on the necessity and cost to build a structure to carry a county road over the Wolf Creek Highway near a place known as Davies, in Washington County, as instructed by the Commission at a previous meeting. He said that the county road is now carrying considerable traffic, consisting principally of logging trucks, and while it is possible to reroute traffic at some future time without causing local people too much inconvenience,

that could not very well be done at the present time because of the logging operations. He estimated that it would cost about \$13,400 to construct an overpass of concrete and about \$4,500 to build it of untreated timber. The Commission approved the project on the basis of using untreated timber.

The Attorney brought up for consideration matters pertaining to the "Moorman" defalcation. He presented a resolution relative thereto for adoption by the Commission. The matter was discussed briefly but action thereon was deferred until the next meeting of the Commission.

The Commission had under discussion a letter from the Honorable Earl Snell, Secretary of State, suggesting that the Commission authorize the use of state scales for weighing motor trucks, truck tractors, et cetera, in connection with the initial registration of such vehicles. Mr. Snell pointed out that the law requires the applicant for such registration to furnish the Secretary of State a certificate of weight of the vehicle being registered, which information is used in computing the fee to be paid by the applicant, and he advised that in some localities there are no private scales available to the applicant who is required to travel a great distance to reach an approved, privately-owned scale, whereas, if the Commission would authorize the use of the state scales in such localities, it would alleviate this hardship and inconvenience. The Engineer recalled that the Commission passed on a similar request at its meeting on March 24, 1941, at which time the use of the state scales for such purpose was denied. After discussion the Commission approved the use of the state scales in the weighing of private equipment for initial registration with the Secretary of State, provided the equipment has to be driven more than 15 miles to a privately-owned commercial scale. It was understood, however, that neither the state's weighmasters nor the officers of the state police department need make special trips to the scales to weigh the privately-owned vehicle but they can do such weighing if they are at the scale at the time the request is made. The Engineer was instructed to convey such information to Mr. Snell and to the department of state police for their information.

The Commission had under discussion a report from the Engineer on the matter of removing the Alsea-Deadwood Secondary State Highway, in Lane County, from the state highway system, and designating in lieu thereof certain county roads that may be approved by the county court. He advised that Lane County Court has been contacted by Mr. Oscar Cutler, Assistant Office Engineer, relative to such exchange of roads but it appears that the county court is not yet ready to make a decision as to any of the county roads that meet the state's requirements although the county is now improving two roads of approximately equal length with the Alsea-Deadwood Secondary Highway and it is possible that within the next year or two these roads will be in satisfactory condition as to right of way, et cetera, to enable the change to be made. The Commission approved the report and ordered it filed.

The Engineer also reported on the exchange of the Clackamas-Boring County Road for a section of the Woodburn-Sandy Secondary Highway, in Clackamas County. He advised that this matter was discussed with the county court which was not particularly interested in such an exchange because the county

road between Clackamas and the Mt. Hood Highway is in good condition and maintenance costs are light; however, the court agreed to the removal of a section of the Woodburn-Sandy Secondary Highway, from Estacada to the town of Sandy, from the state secondary highway system if the Commission would designate as a state secondary highway, in lieu thereof, the county road east of Molalla and extending up the Molalla River to North Fork, a distance of 7.6 miles. He estimated that it would cost \$258,000 to reconstruct the Molalla-North Fork Road to modern standards and that necessary repairs that are needed at once would cost about \$58,000. The Commission decided not to make the change at the present time.

The matter of employing a safety engineer in connection with state highway work had the attention of the Commission. Action on this matter was deferred to give the Engineer an opportunity to render a full report on the subject.

The Commission had under discussion an application from the Portland Traction Company for permission to operate trolley busses on certain state highway routes in the city of Portland. The Attorney presented a form of permit covering the matter and advised that it was prepared in conformity with authority granted the Commission under provisions of Chapter 329, Oregon Laws 1941. The Commission discussed and approved the provisions of the permit and thereupon signed the permit.

The Engineer requested instructions relative to the payment of the claim of Harry Harkness whose automobile was damaged in an accident that occurred on the Interstate Bridge. It appears that Mr. Harkness had stopped his car near the traffic barrier on the Washington side of the bridge, the barrier being up at the time, and that the gate tender inadvertently pressed the wrong control button which lowered the barrier, causing damage to Mr. Harkness's car. The Engineer gave as his thought that the state is liable, and recommended payment of the claim. The Commission approved the recommendation.

The Engineer requested authority to purchase two portable fire pumps for use by the state parks department. He estimated the cost of each at \$350, or a total of \$700. The Commission approved the purchase through the State Board of Control.

The Engineer requested instructions relative to furnishing maps of highway locations to individuals requesting the same. He particularly referred to such a request from a Mr. S. F. Walsh, Portland, for a map showing certain sections of the Oregon Coast Highway, in Lincoln County. He advised that in this particular instance the alignment along the sections requested is not definitely determined, and there is a question whether or not we should give Mr. Walsh any map, because it might confuse him and cause the Commission embarrassment. The Commission decided, as a matter of policy, not to furnish maps of highway alignment unless the highway location has been permanently adopted.

Mr. Cabell returned to the meeting at this juncture.

The Commission had under discussion a form of resolution to be used in connection with the establishment of speed zones on state highways. The Engineer presented a form of resolution, as follows, which the Commission, by unanimous vote, adopted as the standard form to be used hereafter in the establishment of such speed zones:

WHEREAS, the Highway Commission, pursuant to the provisions of Section 115-320, O.C.L.A., as amended by Chapter 458, Oregon Laws, 1941, has caused an engineering and traffic investigation to be made with respect to certain state highways and/or certain sections of state highways more particularly and completely described and set forth hereinafter; and

WHEREAS, the data, facts and information obtained in connection with said investigation are all on file in the office of the State Highway Commission at Salem, Oregon; and

WHEREAS, based upon said engineering and traffic investigation the Commission has determined that the fixed and designated speeds prescribed by the provisions of subsection (b) of said Section 115-320, O.C.L.A., as amended, are in certain specified instances greater than is reasonable and safe, and in other specified instances are less than is reasonable under the conditions found to exist on or with respect to the state highways or sections of state highways hereinafter set forth and more particularly described and defined hereinafter, and the State Highway Commission has therefore determined to designate a different speed thereupon than the speed fixed in said statute, which said different speed or speeds shall be as specifically set forth hereinafter.

NOW, THEREFORE, based upon said engineering and traffic investigation and upon the finding and determination made by the Commission with respect thereto, the Commission does hereby determine and does hereby order that within the meaning and purpose of said Section 115-320, O.C.L.A., as amended, the speed at which a vehicle may be driven upon said state highway and/or upon said sections of said state highway shall not exceed the rate of speed set forth immediately following.

1041

BE IT FURTHER ORDERED that the State Highway Engineer be and he hereby is ordered and directed to erect at appropriate places in sufficient number adequate signs giving notice of the particular applicable speed on said state highway.

BE IT FURTHER ORDERED that any previous order heretofore made by the Commission with respect to speed or speeds applicable to any of the highways or sections of highways specified herein which is in conflict with the provisions of this order hereby is vacated and annulled.

The Commission thereupon considered the establishment of speed zones along the following highways:

Two sections of the Pacific Highway West between milepost 9.477 and milepost 10.780.

Eight sections of the Oregon Coast Highway between milepost 24.0 and milepost 44.0.

A short section of the Wolf Creek Highway between milepost 46.63 and milepost 47.29.

After careful consideration the Commission by unanimous vote adopted the following resolutions with respect thereto:

WHEREAS, the Highway Commission, pursuant to the provisions of Section 115-320, O.C.L.A., as amended by Chapter 458, Oregon Laws, 1941, has caused an engineering and traffic investigation to be made with respect to certain state highways and/or certain sections of state highways more particularly and complete described and set forth hereinafter; and

WHEREAS, the data, facts and information obtained in connection with said investigation are all on file in the office of the State Highway Commission at Salem, Oregon; and

WHEREAS, based upon said engineering and traffic investigation the Commission has determined that the fixed and designated speeds prescribed by the provisions of subsection (b) of said Section 115-320, O.C.L.A., as amended, are in certain specified instances greater than is reasonable and safe and in other specified instances are less than is reasonable under the conditions found to exist on or with respect to the state Highways or sections of state highways hereinafter set forth and more particularly described and defined hereinafter, and the State Highway Commission has therefore determined to designate a different speed thereupon than the speed fixed in said statute, which said different speed or speeds shall be as specifically set forth hereinafter.

NOV 17 1941

NOW, THEREFORE, based upon said engineering and traffic investigation and upon the finding and determination made by the Commission with respect thereto, the Commission does hereby determine and does hereby order that within the meaning and purpose of said Section 115-320, O.C.L.A., as amended, the speed at which a vehicle may be driven upon said state highway and/or upon said sections of said state highway shall not exceed the rate of speed set forth immediately following.

NOV 17 1941

BE IT FURTHER ORDERED that the State Highway Engineer be and he hereby is ordered and directed to erect at appropriate places in sufficient number adequate signs giving notice of the particular applicable speed on said state highway.

BE IT FURTHER ORDERED that any previous order heretofore made by the Commission with respect to speed or speeds applicable to any of the highways or sections of highways specified herein which is in conflict with the provisions of this order hereby is vacated and annulled.

Commissioner Oliver brought up for discussion the matter of securing legislation requiring truck owners to attach splash guards to their trucks so as to prevent mud, water, et cetera, being thrown onto cars approaching from the rear. It was his thought that such legislation and the enforcement thereof would provide for greater safety of travel on the highway. The suggestion was approved by the Commission, and the Attorney was instructed to prepare a form of bill covering the matter for presentation to the next legislative assembly.

The Engineer requested authority to make location surveys, as follows:

Complete surveys of the new Columbia River Highway between Troutdale and The Dalles.

Complete surveys for reconstruction of the Pacific Highway between Roseburg and Grants Pass.

Complete the survey of the Wilson River Highway between Washburn and North Plains.

He advised that these surveys will run into a considerable sum of money, but gave as his thought that the expenditure is justified at the present time so that projects can be prepared for contracting on short notice if the war situation should change, requiring quick action on the matter of road building. Furthermore, these projects will be needed to take up the slack in employment as soon as the war is over. After discussion the Commission approved the request by unanimous vote.

The question arose as to what facilities the state highway department has to properly preserve the records of the surveys in the event that the accumulated data is not used for two or three years, it being the thought of the Commission that precautions should be taken to safeguard them from loss by fire, et cetera, inasmuch as the investment in the surveys will be a considerable sum. The Engineer was instructed by the Commission to investigate the matter of preserving the records and report his findings at the next Commission meeting.

A communication was presented from Mr. Theodore R. Conn, Lakeview, requesting in behalf of the Lakeview city council the oiling of the unoled strips along each side of Western Avenue, route of the Klamath Falls-Lakeview Highway, from the present oiled section to the end of the section along which sidewalks have recently been constructed by the city. The Commission referred this matter to the Engineer for investigation and report at its next meeting.

The Commission discussed a letter from Mr. Frank Hull, Manager, Jackson County Chamber of Commerce, Medford, renewing his request for certain improvements to the Crater Lake Highway at three or four points between Trail Junction and McLeod where, it is alleged, a dangerous condition obtains because of the narrowness of the highway and shortness of sight distance along the highway. The Engineer recalled that the Commission some time ago authorized an expenditure of \$30,000 for the improvement of this section, but later deleted the item from the program but authorized certain improvements, such as pavement patching, which were done by maintenance forces at a cost of some \$60,000. The widening work and the cutting off of the points, he said, was not done because it was contemplated doing considerable widening and general improvement on the highway to accommodate the proposed army cantonment at Medford and the Commission did not care to take a chance on losing the investment. After discussion the Commission instructed the Engineer to work up the project in detail and present it to the Commission for discussion again at its next meeting.

The Commission discussed a request from the City of Baker for the installation of traffic lights at the following places: one light at the intersection of 10th Street and Broadway; one at the intersection of Main and Campbell Streets; and one at the intersection of Auburn, Main, Dewey and Bridge Streets. The Engineer advised that this matter was investigated some time ago by Traffic Engineer John Beakey, who recommended that the request be denied and who suggested the following: (1) that the manner of stopping traffic at the three intersections be changed so as to require three-way stops at each, but permitting right turns at all of them for certain movements; and (2) adoption of an ordinance requiring the parallel parking of cars along state highway routes. After discussion the Commission approved the suggestions and ordered that the city council be informed that, if the city will make the changes suggested by Mr. Beakey and will give them a fair trial, the Commission will reconsider the matter of installing traffic signals if the other arrangement does not prove satisfactory.

The Secretary presented communications from the Lincoln County Court, Miss Annie Brownlie, Depoe Bay, and Mr. L. V. Mix, Depoe Bay, requesting the construction of additional street approaches to the highway at Depoe Bay. The Engineer advised that during the preparation of the plans for the Depoe Bay project considerable study was made of the layout of connecting streets, so as to provide adequate approaches to the highway without introducing undue hazards to highway traffic, and, in his estimation, the approaches that were constructed are adequate for the needs of this community. The opening up of other street approaches, he said, would increase the traffic hazard and undoubtedly would result in accidents. It was his thought that the request should be denied. The Commission appeared favorably inclined to accept

NOV 17 1941

the Engineer's recommendation; however, deferred a definite decision pending inspection of the premises the next time it is in that vicinity.

A letter was presented from L. W. Hobbs, Chairman of the Board of Raleigh School District No. 95, requesting the establishment of a "no parking" area in front of the Raleigh schoolhouse, which is located on the Scholls Ferry Road, about one-half mile south of the Bertha-Beaverton Highway, in Washington County. The Commission referred this matter to the Engineer with authority to maintain appropriate signs in front of the schoolhouse if he considers that advisable.

The Commission discussed a letter from Mrs. Mary Agnes Kelly, Portland, opposing the naming of the Wolf Creek Highway the "George L. Baker" Highway as has been proposed by certain residents of Portland. The Commission instructed the Secretary to inform Mrs. Kelly that the Commission does not feel that it should advocate the use of any name for any highway in view of the fact that the tendency of the times is to designate highways by route number rather than by name, and for the further reason that the system of numbering highways has been adopted by the American Association of State Highway Officials and is national in scope.

The Commission discussed a letter from the Parkrose Chamber of Commerce suggesting that tables and benches be provided at convenient places along state highways, for the accommodation of the touring public. The Engineer advised that an experiment is now being conducted on the Mt. Hood Highway along the lines suggested by the chamber of commerce. In view thereof the Commission deferred action on the request until the results of the experiment are known.

The Secretary presented a letter from the Rotary Club of Portland recommending the establishment of a permanent plaque in the Vista House at Crown Point in recognition of the achievements of the late Samuel C. Lancaster. The Commission denied the request as a matter of policy, which policy will not permit the installation of plaques unless they are furnished and paid for by sponsors of the same, except in the case of plaques that are installed on bridge structures. The Secretary was instructed to inform the Rotary Club that, while the Commission feels that the idea is a good one and appropriate, it cannot approve the installation unless the plaque is furnished by the sponsors and the wording thereon is approved by competent authority.

Communications were presented from Alva Lewis, Chairman, Legislative Committee, Shasta View Grange, Klamath Falls, and from Myron E. Shannon, Klamath Falls, with respect to the need for improvement of the state highway on South Sixth Street, Klamath Falls. In the discussion of this matter it was brought out that the final reports of the Engineer and the Attorney on construction and right of way features are not ready for submission to the Commission. The Commission ordered completion of such reports so they can be discussed by the Commission at its January meeting. The Secretary was instructed to convey such information to Messrs. Lewis and Shannon.

A letter was presented from the Weston Chamber of Commerce inviting the members of the Commission to be its guests at a "Get-Together Turkey Banquet" on Wednesday evening, November 26, 1941. The Secretary was instructed to acknowledge the invitation with thanks and express regrets that the Commission members would not be able to accept the invitation. The Engineer was thereupon instructed to have Division Engineer W. C. Williams represent the Commission on such occasion.

The Commission discussed a resolution from the Inland Empire Waterways Association, suggesting "that the Columbia and Snake Rivers should be considered a part of the highway systems of Idaho, Washington and Oregon as regards highway connections, and the principal roads and routes best suited for roads leading to the river shipping points be made parts of the highway systems of the states, to the end that suitable roads for the transportation of freight to the rivers may be available when the river improvements are completed, and that roads not so made parts of the state highway systems shall have the first consideration of the county commissioners of the various counties in the three states." The Secretary was instructed to inform the Association that the Highway Commission of Oregon now has under consideration matters recommended in this resolution.

The Engineer reported briefly on the condition of the traffic scales at Molalla. He advised that, as instructed by the Commission at the previous meeting, he had the scales checked by the State Sealer of Weights and Measures who found them to be absolutely correct, which is in contradiction to statements made by Mr. George Clausen and his attorney, Mr. J. Dean Butler, Oregon City, at such previous meeting. The Commission took no action.

The Engineer then asked the Commission to reconsider the matter of penalizing Mr. Clausen for transporting loads weighing in excess of the statutory limits. He advised that since the last meeting additional information has been secured, and it now appears that Mr. Clausen not only violated the law by overloading, but also inconvenienced the weighmaster by refusing to drive his truck off the scales after being weighed, thus making it impossible to weigh other trucks, which had to be flagged by. The Commission decided not to impose any additional penalty on Mr. Clausen for the present offense; however, ordered, in the event he again refuses to drive his truck off the scales after being weighed, that the matter be called to the Commission's attention for instructions as to the penalty to be imposed. Mr. Clausen is to be given the same treatment as other log haulers for other violations.

The question of the penalty to be imposed on log haulers who refuse to remove mud and debris from their trucks before entering state highways was discussed. The Engineer advised that in certain localities, particularly along the Salmon River Highway, a very dangerous condition exists because of mud that is dropped on the surface of the road by logging trucks, and motorists who are not aware of the slippery condition of the road surface are very likely to become involved in serious accidents. He suggested several ways to alleviate this condition, if the logging operators will cooperate, such as the rocking of the logging roads a sufficient distance back from the highway, and the installation of mud racks and/or corrugations off the highway. Either

NOV 17 1941

of these methods, he said, would reduce the present hazard to a minimum, but in order to be effective must have full cooperation of the loggers. He further advised that the permits issued by the Public Utilities Commissioner contain provision for the cleaning of the logging equipment before entering the highway, so it might be that all that is required is strict enforcement by the state police. After considerable discussion the Commission decided to discuss the matter with Mr. Ormond R. Bean, Public Utilities Commissioner, and Mr. Charles P. Pray, Superintendent of the Department of State Police, in an endeavor to provide a satisfactory solution.

The Commission discussed briefly a report from the State Police Department on the complaint of Mrs. Walter K. Powell, Lebanon, that log haulers in the vicinity of Lebanon do not maintain binder chains around their logs, as is required by the rules and regulations, and as a consequence frequently lose their loads on the highway. The report indicates that the state police are watching this condition as well as they possibly can, and that the McDowell Creek Logging Company, which is the chief offender, has been notified hereafter to comply with the rules. The report was ordered filed, as the Commission considers that this is a matter of enforcement of the rules, rather than the making of new rules.

The Secretary presented a request from the Updegrave Trucking Company, Chiloquin, for permission to transport logs over state highways in the vicinity of Agency Lake on Thanksgiving Day. They advised that they are furnishing logs to the mill of the Algoma Lumber Company, and are required to dump them in Agency Lake, from which place they are towed to the mill; further, that this operation will have to be discontinued when the lake freezes over, which they anticipate will be in the not distant future, and in the meantime the lumber company is very anxious to get all of the logs it possibly can. The Commission approved the request.

The Commission discussed a request from the Consolidated Timber Company for permission to maintain gasoline tanks and pumps on a wide section of the Wolf Creek Highway, just east of McNamars Camp, for use in connection with the servicing of its logging trucks which are operating in this vicinity. It appears that this is the most convenient place for the company to maintain such facilities. The Engineer pointed out that it is contrary to the Commission's established policy to permit encroachments on state property; however, in this particular instance it is a case of the company requesting the use of property that it deeded to the state as a gift for park purposes, and it could have retained possession of this area in the first instance if it so desired. He suggested, in view of the fact that the company donated the property, that it might be advisable to grant the company a revocable lease for five years for a nominal consideration or, if the Commission preferred, it could deed back to the company the area which it wants to use with the understanding that, when the company was through with it, it would deed it back to the state, which method would preserve the Commission's policy. The Commission indicated a preference for the granting of a revocable lease, and instructed the Attorney to prepare an appropriate lease form covering the matter for consideration by the Commission at its next meeting. He was also instructed to ascertain definitely whether or not the Commission has received a deed for the area in

question in view of the thought that the company may have deeded it to the county in the first instance, the county making the transfer to the state.

The Commission had under consideration the following requests for extensions of time within which to complete highway construction projects:

Berke Bros., contract No. 2348, for grading, surfacing and oiling and construction of bridges on the Veneta-Fisher Road Section of the Eugene-Veneta County Road, in Lane County, requested an extension of time from June 30 to August 20, 1941, within which to complete this job. They gave the following reasons for failure to complete the project within the specified time limit: (1) inability to complete the placing of riprap in the fall of 1940, on account of early rains which inundated the ground between the quarry and the new highway, shutting off access to the riprap material; (2) inability of the subcontractor, O. C. Yocom, to do the oiling work until the riprap was placed, instructions having been given by the Resident Engineer not to do the oiling work until the riprap work was done, in order to avoid the possibility of damage to the oiled surface by heavy rock trucks; (3) inability to install sight posts until the oiling work was completed, so as to avoid the spraying of oil on the posts, necessitating repainting. The Engineer advised that the reasons given by Berke Bros. for failure to complete the project within the specified time limit are correct. He recommended, in view thereof, that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation.

A. Milne, contract No. 2374, for grading, surfacing and oiling the Mud Hollow-Oak Creek Section of the North Umpqua County Road, in Douglas County, requested an extension of time, from July 31 to September 30, 1941, within which to complete this job. He attributed his failure to complete the project within the specified time limit to adverse weather conditions which prevented grading operations until materials to be excavated were thoroughly dried. The Engineer advised that this contract was awarded on October 12, 1940, and that the contractor commenced construction operations five days later; however, was forced to suspend operations during the following week because of heavy rains, and it was impossible for him to resume construction until July, 1941. The delay, he said, was no fault of the contractor, and, in view thereof, he recommended that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation.

A. T. Dolan, contract No. 2420, for grading and construction of bituminous macadam surfacing on the Kernville-Forest Boundary Section of the Siletz Secondary Highway, Lincoln County, requested an extension of time from July 31 to October 14, 1941, within which to complete this job. He gave no reason for failure to complete

NOV 17 1941

the project within the specified time limit. The Engineer advised that the contract provided that the job should be completed by July 31, 1941, and that the rocking and oiling work was completed by that time; however, the contractor was required to produce certain maintenance materials in stock piles under a price agreement, which work was not done until August 30. The actual completion of the contract, he said, was not accomplished until October 14; however, the work remaining to be done after August 30 consisted simply of cleaning up the premises and removing equipment from the highway property, which work involved no pay quantities under the contract. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. The Commission approved the recommendation.

Edward F. Altree, contract No. 2432, for the construction of roadside improvement along the South Newport Section of the Oregon Coast Highway, in Lincoln County, requested an extension of time, from April 30 to July 21, 1941, in which to complete this job. He gave no particular reason for his failure to complete the project within the specified time limit. The Engineer advised that the contractor was prevented from completing the project within the specified time by inclement weather, it being impossible, because of weather conditions, to do certain planting work as planned. All work in connection with the job, he said, except for furnishing of additional top soil, was completed on June 15, 1941, but top-soil material could not be placed until certain oiling work was completed under another contract. It was at his request, he said, that the contractor deferred placing the top soil until the other work was done. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation.

Roy L. Houck, contract No. 2437, for surfacing and construction of bituminous macadam on the Donaldson Creek-Mills Bridge and McNamars Camp-Washburn Sections of the Wilson River Highway, in Tillamook and Washington Counties, requested an extension of time of fifteen days, from September 30 to October 15, 1941, within which to complete this project. He attributed his failure to complete the job within the specified time limit to delays caused by W.P.A. forces in completing certain grading and topping work, and to extra crushing and hauling which was required under special price agreements. The Engineer advised that the reasons given by the contractor for failure to complete the project within the specified time limit are correct; that the grading and rock work which was being done by W.P.A. forces was not completed in time to permit the contractor to finish his work within the specified time. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. The Commission approved the recommendation.

NOV 17 1941

Frank Watt Construction Company, contract No. 2450, for construction of a grade separation structure at the Southern Pacific Railroad crossing of the Cascade Secondary Highway near Clackamas, in Clackamas County, requested an extension of time from August 31 to October 13, 1941, within which to complete this job. They attributed their failure to complete the project within the specified time limit to difficulties encountered in securing materials, delays caused by the Southern Pacific Company, and adverse weather conditions which interfered with painting work; also extra work required by the Engineer. The Engineer advised that the work covered by the original contract was completed on September 19, and that the time between September 19 and October 13 was consumed by the contractor in constructing a retaining wall, which was not a part of the original contract. During the progress of the job, he said, the contractor experienced considerable difficulty in obtaining a sufficient number of competent steel workers, due to the national defense work that was under way at the time, and on this account he estimated that the contractor was delayed one week. It was also his thought that the contractor is entitled to three days extra time due to certain work under two price agreements, which work was not included in the original contract. He recommended for the above reasons that an extension of time from August 31 to September 10 be granted without penalty, and that a further extension of time from September 10 to September 19 be granted subject to the condition that the contractor be required to reimburse the state for extra engineering expense incurred during that period. He further recommended that an additional extension of time be granted from September 19 to October 13, without penalty, in view of the fact that the contractor was engaged in constructing a retaining wall during that period which work was not included in the original contract. A letter was presented from the Public Roads Administration concurring in such recommendation. The Commission approved the recommendation.

Berke Bros., contract No. 2466, for grading the Miner Creek-Spencer Creek Section of the Oregon Coast Highway, in Lincoln County, requested an extension of time from October 31, 1941, to July 31, 1942, within which to complete this job, giving as their reason for such request that they were ordered by the Resident Engineer in charge to suspend grading operations until next summer, so as to avoid interruption of traffic on the highway. The Engineer advised that he ordered the contractor to suspend operations on October 27, because the work could not be done properly during the winter season and it was quite evident that the work could not be finished before bad weather set in this fall. He recommended the granting of the extension of time requested without penalty. The Commission approved the recommendation.

E. L. Rigdon, contract No. 2474, for grading, surfacing, oiling and bridge construction on the Oak Creek-Marks Ranch Section of the North Umpqua County Road, in Douglas County, requested an extension

NOV 17 1941

of time from September 30, 1941, to June 30, 1942, within which to complete this job. They attributed their failure to complete the project within the specified time limit to difficulties in securing rock crushing equipment, either by purchase or lease; also difficulties in securing a subcontractor to do the rocking work for them. The Engineer advised that the reasons given by the contractor for failure to complete the project within the specified time limit are correct—that he was unable to obtain equipment because of national defense activities under way at the same time. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty; however, that the contractor be required to maintain the road at his own cost and expense until oiling work has been completed next year. The Commission approved the recommendation.

Norris Brothers, contract No. 2487, for surfacing and oiling the West Ranch-Island City Section of the Summerville-Island City County Road in Union County, requested an extension of time of ten days, from September 30 to October 10, 1941, within which to complete this job. They attributed failure to complete the project within the specified time limit to adverse weather conditions which prevented completion of the oiling work. The Engineer advised that the reasons given by the contractors for failure to complete the job within the specified time limit are correct; that all of the mineral aggregate necessary for the job had been produced and the oiling crew was on hand to do the oiling work, but was unable to finish such work because of rainy weather. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. The Commission approved the recommendation.

The Engineer reported that Contracts Nos. 2348, 2374, 2420, 2432, 2437, 2450, 2487, and 2509, for the construction of state highway projects, have been completed according to the requirements of the contracts or modifications thereof, and that said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and was adopted by unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts and that said jobs are now ready for acceptance:

Contract No. 2348, with Berke Bros., for grading, surfacing, oiling and construction of bridges on the Veneta-Fisher Road Section of the Eugene-Veneta County Road, in Lane County. Completed August 20, 1941.

Contract No. 2374, with A. Milne, for grading, surfacing and oiling on the Mud Hollow-Oak Creek Section of

the North Umpqua County Road, in Douglas County. Completed October 1, 1941.

Contract No. 2420, with A. T. Dolan, for grading and bituminous macadam surfacing on the Kernville-Forest Boundary Section of the Siletz Secondary Highway, in Lincoln County. Completed October 14, 1941.

Contract No. 2432, with Edward F. Altree, for roadside improvement on the South Newport Section of the Oregon Coast Highway, in Lincoln County. Completed July 21, 1941.

Contract No. 2437, with Roy L. Huck, for surfacing and oiling on the Donaldson Creek-Mills Bridge and McNamars Camp-Washburn Sections of the Wilson River Highway, in Tillamook and Washington Counties. Completed October 15, 1941.

Contract No. 2450, with Frank Watt Construction Company, for construction of the Clackamas Grade Separation Project, on the Cascade Secondary Highway, in Clackamas County. Completed October 13, 1941.

Contract No. 2487, with Norris Bros., for surfacing and oiling on the West Ranch-Island City Section of the Summer-ville-Island City County Road, in Union County. Completed October 7, 1941.

Contract No. 2509, with Blair T. Alderman, for roadside improvement on the South Milton Section of the Oregon-Washington Highway, in Umatilla County. Completed November 8, 1941.

THEREFORE, BE IT RESOLVED, that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

The Commission confirmed Thursday and Friday, December 18 and 19, 1941, for its regular meeting in December, 1941, and also confirmed Thursday and Friday, January 15 and 16, 1942, as the date for its regular meeting in January, 1942. The Secretary was instructed to make the usual arrangements to hold these meetings in the auditorium of the Public Service Building in Portland.

The Commission adjourned at 6:00 p. m. to reconvene at 8:00 p. m. in the Imperial Hotel, to dispose of real property matters.

NOV 17 1941

The State Highway Commission reconvened at 8:00 p. m. in Room 234, Imperial Hotel, with all Commissioners, the State Highway Engineer, the Attorney and the Secretary present.

The Attorney brought up for discussion the settlement with the estate of one Daniel Gorman, deceased, for property needed as an addition to Short Sand Beach State Park, Tillamook County, real property file No. 8114. He advised that Mr. Gorman died in 1916, and a question has arisen as to his marital status, some of the evidence indicating that he was unmarried, while other indicates that he was a married man. He also advised that there are three living heirs whose interests in the property are not questioned. The agreed purchase price, he said, is \$2,000 for the 40 acres involved, and the deed has been signed and delivered. He requested instructions whether to pay over the full amount of the purchase price at this time, or to wait until he has had an opportunity to clear the title under condemnation proceedings. He suggested, however, that the entire \$2,000 be delivered to the attorney for the heirs, inasmuch as the heirs are entitled to it, with instructions to pay over \$1,000 to the three heirs whose interest are not contested, the balance to be paid over after the title is clear. After discussion the Commission approved such disposition of the matter and authorized the Attorney to proceed with the condemnation of the property. An offer of \$2,000 was approved by the Commission for use in connection with the condemnation. The following resolution authorizing the Attorney to condemn the property was adopted by the unanimous vote of the Commission:

WHEREAS, by virtue of the laws of the State of Oregon, the State Highway Commission is authorized and empowered to acquire land or ground necessary for the development, maintenance, and operation of parks, parking places, automobile camps, camp sites, public squares, recreational grounds or resorts, and land for the preservation of trees or timber growing thereon; and

WHEREAS, said Highway Commission is authorized to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property, or any interest therein, necessary or deemed by the Highway Commission necessary for said purposes; and

WHEREAS, in the judgment and opinion of the State Highway Commission it will be for the convenience and is for the best interests of the general public that there be acquired for public purposes, to wit: for the purpose of developing and maintaining a park, recreational ground and/or resort, and for the purpose of preserving the timber growing thereon, the following described parcel of land, to wit:

Property of the Unknown Heirs of Daniel Gorman, Deceased

All of the northwest quarter (NW $\frac{1}{4}$) of the northwest quarter (NW $\frac{1}{4}$) or Lot 1 of Section 7, Township 3 North, Range 10 West, W. M., Tillamook County, Oregon; containing 38.67 acres.

NOW, THEREFORE, BE IT RESOLVED that the said parcel or tract of land be and the same hereby is declared by this resolution to be necessary for the purpose herein stated; and

BE IT FURTHER RESOLVED that title to the said parcel or tract of land be acquired by the State of Oregon, by and through its State Highway Commission, for the above specified public use and purpose.

BE IT FURTHER RESOLVED that the best interests and convenience of the general public require that title to the said tract or parcel of real property be acquired for the purpose of developing and maintaining the same for a park, recreational ground or public resort and for the purpose of preserving the timber growing thereon, and for the further purpose of making said parcel of land available for the use and enjoyment of the general public.

BE IT FURTHER RESOLVED that J. M. Devers, Attorney for the State Highway Commission, be and he hereby is requested to negotiate further with the owner, or owners, of said property and endeavor to acquire said property by agreement, and, in the event that said property cannot be acquired by agreement, then the said J. M. Devers, Attorney for the State Highway Commission, is hereby requested to institute and prosecute such condemnation proceeding or other suit or action as may be necessary to acquire the said real property.

BE IT FURTHER RESOLVED that in such suit, action, or procedure as may be prosecuted for the acquisition of said real property provision be made whereby title in fee simple shall be acquired in the name of the State of Oregon, by and through its State Highway Commission.

The Attorney also brought up for discussion the controversy with respect to the use of the Market Building, Portland, during the progress of construction of the Front Avenue Project. He was instructed to arrange a conference with the city officials for a discussion of this matter at 1:30 p. m. on the following day.

The Assistant Attorney rendered a status report on the right of way budget which was approved by the Commission, particular attention being given to the report concerning the Front Avenue Project, Portland.

The Attorney requested authority to acquire certain parcels of real property that are needed for various highway improvements throughout the state. He submitted a list of such properties, together with offers that he recommended be made in connection with each. After careful study of each item the Commission approved the request and by unanimous vote adopted the following resolution in regard thereto:

NOV 17 1941

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed:

NOW, THEREFORE, BE IT RESOLVED that the several offers, or bases of settlement hereinafter enumerated be, and the same hereby are, approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

The Attorney requested instructions relative to the acquisition of certain property in Marshfield that is needed for the improvement of the highway between Marshfield and North Bend, particularly property owned by a Mr. J. D. Bergen on which Mr. Bergen maintains a battery of five greenhouses. The Attorney advised that Mr. Bergen will give the Commission title to the entire property, which consists of 17,200 square feet, for the sum of \$16,000 cash, provided he can keep accessories and is not required to vacate the premises until August 1, 1942. The offer made Mr. Bergen by the highway department's agent, he said, was \$16,000 with the state to keep all of the accessories, which offer was refused. The Attorney valued the property at \$12,500, and estimated the cost of belongings, including shrubs, et cetera, at \$2,500, or a total of \$15,000. The matter was discussed at considerable length, but the Commission deferred action thereon pending appraisal of the property by a specialist in greenhouse construction. The Attorney was authorized and instructed to secure the services of a competent man to make such appraisal and report the results thereof.

The Attorney also requested authority to institute condemnation proceedings to acquire certain parcels of real property that are needed for highway improvements and concerning which he has been unable to reach satisfactory settlements. He presented a list of such properties, together with offers that he recommended be made in condemnation, as follows:

File No.	Name	Purpose Required	Recommended Offer
9495	Jesse Kotovsky	Right of Way	\$ 1,500.00
9521	K. Horn	" " "	4,000.00
*8114	Unknown heirs of Daniel Gorman, deceased	Park	2,000.00
9249	A. D. Jones	Right of Way	11,000.00

After discussion the Commission approved the offers and thereupon, by unanimous vote, adopted the following resolution authorizing the Attorney to institute condemnation proceedings:

WHEREAS, the State Highway Commission is authorized to locate, relocate, construct, reconstruct, maintain, widen, straighten, and otherwise improve state highways, both primary and secondary,

*See separate resolution

and said Commission is also authorized to construct shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, and snow fences, and is authorized to acquire quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, and broadcasting stations, and is further authorized to develop, construct, improve, operate, and maintain parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, and other places of attraction and scenic value; and

WHEREAS, said Highway Commission is authorized to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property, or any interest therein, necessary or deemed by the Highway Commission necessary for the accomplishment of any and all of the foregoing things; and

WHEREAS, in the judgment of the Highway Commission the several tracts or parcels of land hereinafter described are each and all necessary for the specific and particular purposes hereinafter specifically set forth;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the Commission does hereby find and declare that the several parcels of real property hereinafter described are each and all necessary for the accomplishment of the purposes hereinafter expressly and specifically set forth, which said real properties and the specific purposes for which the same are being acquired are described as follows, to wit:

Real property owned by Jesse Kotovsky, which property is located in Lots 12, 13, 14, and 15, Block 51, Townsite of North Bend, Coos County, Oregon, and is more particularly described on the attached sheet and designated as Parcel No. 1 and is further identified in the records of the Highway Commission as file R 9495, and which property is being acquired for right of way purposes in connection with the Oregon Coast Highway;*

Real property owned by Kitchman Horn, which property is located in Lots 8 and 9, Block 33, Coos Bay Plat "B" Addition to North Bend, Coos County, Oregon, and is more particularly described on the attached sheet and designated as Parcel No. 2 and is further identified in the records of the Highway Commission as file R 9521, and which property is being acquired for right of way purposes in connection with the Oregon Coast Highway;*

Real property owned by Katherine Helen Jones, et al., which property is located in Lots 7, 8, and 9 in Block 32 and in Lot 25, Lot 26, and Lot or Tract 27X in Block 34, and vacated portion of street or streets abutting said lots, all in Fairmount, according to the amended plat thereof, in Lane County, Oregon, and is more particularly described on the attached sheet and designated as Parcel No. 3 and is further identified in the records of the Highway Commission as file R 9249, and which property is being acquired for right of way purposes in connection with the Pacific Highway.*

2. That the Commission does hereby find and declare that each of the said described parcels of real property is necessary and acquisition of the same by the State is required for the specific purposes hereinabove set forth, and the said properties are being acquired for the express and specific purposes in this resolution set forth.

3. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real properties, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of the said real properties, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property or properties, whether said properties be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

4. That J. M. Devers, Attorney for the State Highway Commission, be and he is hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement or agreements can be reached, then it is hereby further resolved that J. M. Devers, Attorney for the State Highway Commission, be and he hereby is requested to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated.

*(The detailed descriptions of the respective parcels of real property mentioned in this resolution are attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 18, under the heading "Real Property Condemnation Resolutions," and said descriptions by this reference are made a part of this minute entry to the same extent as if copied in full herein.)

5. That this resolution be entered in full in the minutes and records of this Commission.

The Attorney brought up for discussion the acquisition of the Hitchcock & Reagan properties which are needed in connection with the reconstruction of the Pacific Highway between Eugene and Springfield. He advised that he has been unable to reach satisfactory settlements in either of these cases and requested approval of proceeding with condemnation of the properties if necessary. The matter was discussed at considerable length with the result that the Commission approved such procedure. An offer of \$12,000 in condemnation for the Hitchcock property, and \$12,500 in condemnation for the Reagan property, was approved by the Commission.

The Commission reconsidered the bids received by the State Board of Control for furnishing of three paving plants, being those submitted by the Cramer Machinery Company and the Dallas Machine and Locomotive Works. After a lengthy discussion of this matter, during which the Engineer recommended the acceptance of the low bid that strictly meets the specifications, being that of the Dallas Machine and Locomotive Works, in order to maintain the Commission's policy with respect to the acceptance of the low bid, the Commission decided to defer final action until the following day.

Mr. Ben Titus, Acting Director of the Travel and Information Department, was present and discussed with the Commission matters pertaining to the 1943 Old Oregon Trail Centennial celebration. He reported the need at this time of the services of someone on half-time basis to take care of details, and suggested a Mr. Carl Werner as being the best man available. The person selected, he said, would work directly under Mr. Phil Parrish, Chairman of the Old Oregon Trail Centennial Advisory Commission, as well as himself, but it will be necessary for Mr. Parrish or the committee to see to it that he actually spends one-half of his time on this work. He suggested a salary of \$100 per month for such service; however, pointed out that expenses would have to be paid while engaged in this work outside of the city of Portland. After discussion the Commission approved employment of Mr. Werner, if that is satisfactory with the committee, and the payment of his expenses outside of Portland. Mr. Titus was instructed to inform Mr. Parrish that the employment of Mr. Werner is satisfactory if his services can be secured on a reasonable basis.

The Commission adjourned at 11:00 p. m. to reconvene the following morning in the Public Service Building.

Portland, Oregon, November 18, 1941

The State Highway Commission reconvened at 9:00 a. m. in the auditorium of the Public Service Building. Present were:

Henry F. Cabell, Chairman
Huron W. Clough, Commissioner
Herman Oliver, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

NOV 18 1941

Bids as follows for highway construction projects were opened and read in conformance with previously published notice, following which Chairman Cabell announced that the award of contracts would be made at 3:00 p. m. in the same room:

NEHALEM SECONDARY HIGHWAY
KLASKANINE SUMMIT-JEWELL ROCK PRODUCTION

A. H. Saxton & Son	\$16,160.00
Fisher Bros.	16,800.00
R. O. Dail & Warren Bros.	17,440.00
Babler Bros.	19,730.00
S. S. Montague	19,840.00

PACIFIC HIGHWAY EAST AND HALSEY-SWEETHOME SECONDARY HIGHWAY
HALSEY ROCK PRODUCTION

A. H. Saxton & Son	\$22,840.00
R. O. Dail & Warren Bros.	23,330.00
E. C. Hall Company	25,365.00
Babler Bros.	26,100.00
Chas. H. Hoyt	27,300.00
A. T. Dolan	27,420.00
Roy L. Houck	29,115.00
S. S. Montague	31,485.00
Rogers Construction Company	36,525.00
P. B. Doherty	40,200.00

PACIFIC HIGHWAY EAST
ILLAHEE-STEINER HILL SECTION - GRADING AND PAVING

	<u>Using Asphalt</u>	<u>Using Tar</u>
C. J. Montag & Sons	\$148,028.50	- -
E. C. Hall Company	151,997.50	- -
Porter W. Yett	- -	\$155,640.00
Roy L. Houck	\$156,499.00	156,499.00

PACIFIC HIGHWAY EAST
INTERSTATE BRIDGE-OREGON SLOUGH SECTION - ROADBED WIDENING

Porter W. Yett	\$3,820.00
S. S. Montague	4,097.00

STATE HIGHWAYS NEAR RICKREALL
RICKREALL ROCK PRODUCTION

Independence Sand & Gravel Company	\$10,500.00
W. C. Hill	10,986.00
C. W. Reeve	11,830.00
J. F. Ulrich	14,667.50

ATHENA-HOLDMAN SECONDARY HIGHWAY
GERKING SCHOOL-ATHENA SECTION
GRADING, SURFACING AND OILING

R. O. Dail & Warren Bros.	\$26,288.50
Rogers Construction Company	29,014.00

TUALATIN VALLEY HIGHWAY
SYLVAN-WEST SLOPE SECTION
GRADING AND PAVING

Porter W. Yett	\$100,664.50
Jacobsen-Jensen Company	101,862.00
C. J. Montag & Sons	102,270.00

Reconsideration was given by the Commission to the matter of reimbursing the Zidell-Steinberg Company for cement that adhered to the steel rails purchased from the Commission at the previous meeting. The Engineer advised that, since this matter was discussed on the previous day, he has studied carefully the resident engineer's report on the subject, and is satisfied that the company is entitled to a refund based on the following facts: total weight of the rails, based on pounds per cubic yard, 107.663 tons; net weight of two loads of clean switches and plates 13.085 tons; total weight of steel 120.748 tons; total weight bid for by Zidell-Steinberg Company, at \$11.66 per ton, 148.315 tons. According to these facts, he said, the weight of the concrete is 27.567 tons. He recommended that the company be allowed a credit for 27.567 tons of concrete at the rate of its unit bid price of \$11.66, or a total of \$321.43. The Commission approved the recommendation.

Messrs. James Morrell, Secretary, and Thomas White, Attorney, representing the Consolidated Freightways, Inc., came before the Commission in regard to the company's previous request for permission to operate over Oregon highways, in interstate traffic, truck and trailer combinations having an overall length of 60 feet, and having a gross weight of 68,000 pounds. They were informed that the Commission has not as yet made its decision with respect to such matter but will do so as soon as possible although the probabilities that the Commission will approve such movements do not appear to be very good at the present time for reasons previously stated.

Mr. Chester McCarty, Portland, attorney for a California concern known as "Tulane Farm", owned by Messrs. Ben Liskey, Dan Liskey, and Richard Hinsel, came before the Commission and requested authority to operate over a 20-mile section of the Pacific Highway, north of the California state line, certain truck and trailer equipment having a gross weight of 68,000 pounds loaded, but which meets the Oregon requirements in other respects. He advised that the people he represents are farmers engaged in the stock business, and they are obliged to transport cattle frequently between their farms in Oregon and California; that the equipment they intend to use is a special type capable of carrying 68,000 pounds, which is legal in California, and that they would like the privilege of operating in the state of Oregon to full capacity so as to avoid the expense of adjusting their loads at the state line.

Chairman Cabell explained the Commission's attitude with respect thereto, and the reasons why the Commission cannot grant the request, particularly pointing out that the 1941 Oregon Legislature voted down a bill that would have authorized movements of this kind. He further advised that the Commission is now giving this matter serious study, the results of which will determine whether or not permits for such movements will be granted. He agreed to notify Mr. McCarty when final action is taken.

The State Parks Superintendent, Mr. S. H. Boardman, was present and reported on the following state park matters:

Park budget matters:- The Parks Superintendent presented a status report on the park budget which was approved by the Commission by unanimous vote. (See report dated November 1, 1941, in general file.)

Purchase of Kvaile property adjacent to the Upper Columbia River Highway at Shell Mountain:- The Parks Superintendent reported the taking of an option for the purchase of this property, a portion of which is at the rate of \$75 per acre, the balance at \$45 per acre, total \$1,775. The Assistant Attorney, who was present, questioned the unit price as being considerably in excess of the prices heretofore paid for other property in that vicinity. After discussion the Commission decided not to close the option at this time. It was agreed, however, to reconsider the matter after the survey for a revision of the highway has been made, such reconsideration to be from the standpoint of right of way acquisition and acquisition of additional land for wayside protection.

The Cove State Park:- The Parks Superintendent asked the Commission to approve the renewal of the lease obtained from the federal government covering government-owned lands in this park. The consideration is \$10 per year for the 2,800 acres involved. The Commission approved the request.

Acquisition of juniper wayside strips:- The Parks Superintendent presented a form of agreement between the United States Department of Interior and the State of Oregon providing for cooperation between these bodies in the protection and preservation of juniper waysides in Eastern Oregon, particularly along Oregon Highway No. 20, between Bend and Horse Ridge, along Oregon Highway No. 28, between Redmond and Powell Butte, and between Redmond and Sisters. He explained that Mr. Nic Monte, Regional Director of the United States Grazing Service, is anxious to preserve the juniper trees and has suggested such form of agreement covering the matter, in which agreement the state is simply asked to assist the Department of Interior in the control of this class of timber. He explained that the state's obligation, under the agreement, is simply to supervise and that no expense will be involved so far as the state is concerned. After discussion the Commission approved the provisions of the agreement but deferred signing the same until they have been approved by the federal authorities.

Proposed purchase of Gilbaugh tract:- The Parks Superintendent advised that a Mr. J. H. Gilbaugh is the owner of a tract of land situate between the Columbia River Highway and the O.W.R. & N. railroad at Crown Point, and that Mr. Gilbaugh is of the opinion that this property is valuable to the state not only from the scenic standpoint, but also from the road-building standpoint, because it consists largely of solid rock formation, which he believes can be used to good advantage in such work. The Parks Superintendent advised that so far as he is concerned the property is valuable only from the scenic standpoint, and if it could be purchased at reasonable cost he would recommend that it be acquired. He further advised that the removal of rock from the property would have a very damaging effect from the scenic standpoint. After discussion the Commission ordered further investigation of the property by the Engineer, the Attorney and the Parks Superintendent, which investigation shall include a joint inspection of the property.

Purchase of Short Sand Beach C.C.C. Camp Site:- The Parks Superintendent advised that this camp site, which contains 11 acres, is situate adjacent to the Oregon Coast Highway about three miles west of the town of Nehalem and that the property is owned by a Mr. E. B. Gresham who leased it to the state for a five-year period at an annual rental of \$120 with provision that the property might be purchased by the state, upon proper notice, for the sum of \$1200, and with the understanding that the rentals previously paid by the state would be applied as part of this purchase price. He further explained that up to the present time there has been paid to Mr. Gresham the sum of \$270, so if the Commission considers it advisable to purchase the property outright it would have to pay Mr. Gresham only \$930 at the present time. He recommended purchase of the property for use in connection with the further development of Short Sand Beach by C.C.C. forces and, in this connection, advised that he has a five-year program arranged for C.C.C. forces operating from this camp. The Commission approved the purchase of the property.

Proposed monument in Cascadia Park:- The Parks Superintendent presented a request from Mr. W. L. Jackson, owner of the Albany Democrat-Herald, for permission to erect a monument in Cascadia Park honoring the late Joseph Ralston, of Albany, who pioneered in this district and was one of the main leaders in the interests of the Santiam Highway construction. The Commission ordered that the matter be referred to Mr. Lewis A. McArthur, Chairman of the Historical Marker Committee, for recommendation, it being understood that the Commission would approve the project if Mr. McArthur so recommends.

Proposed soil conservation district, in Lane County:- The Parks Superintendent advised that the Port of Siuslaw is endeavoring to form a soil conservation district to control the shifting sands along the coast line in the vicinity of Florence, and is desirous of including in this district Jessie M. Honeyman State Park,

NOV 18 1941

consisting of 522 acres, as it was thought that this would assist greatly in the formulation of the district which requires the affirmative vote of 60 per cent of the acreage included in its boundaries. The Port of Siuslaw, he said, wants the Highway Commission to sign a petition creating the district. The Commission decided not to join the district unless it is absolutely necessary that it do so.

Proposed state park at Wilhoit Springs:- The Parks Superintendent delivered to Chairman Cabell a personally-written report on the adaptability of Wilhoit Springs for state park purposes, for his use in replying to United States Senator Rufus Holman, who has requested the establishment of a state park at this place. (See files of State Parks Superintendent for contents of report.)

The State Parks Superintendent requested instructions whether or not to allow Reverend D. V. Poling and Mr. F. H. Pfeiffer, of Albany, to continue to maintain private residences in Cascadia Park. It appears that they have been notified to vacate the premises, but they do not want to do so until they have had an opportunity to discuss the matter with the Commission. The Attorney advised that these gentlemen are represented by Mr. Willard Marks, of Albany, who expected to be present at this meeting of the Commission, but was unable to attend. Action on this matter was accordingly deferred by the Commission until Mr. Marks is present.

The Attorney brought up for reconsideration the controversy concerning the purchase of land needed as right of way for the Wolf Creek Highway across the property of Mr. B. F. Friday, in Washington County. He stated that he offered Mr. Friday \$175 for the land, including right of access to the highway, but his offer was refused, and he is informed by Mr. Friday's attorney, Mr. Tongue, of Millsboro, that Mr. Friday would not accept less than \$475. He recommended condemnation of the property. The Commission approved the recommendation.

The Commission discussed the claim of the Phoenix Iron Works, Portland, for damages to its property at the north end of the Union Avenue viaduct. The company alleges that its property was damaged by reason of the construction of the highway improvement in front of its premises, which improvement was completed July 30, 1937, and is now requesting payment from the state for such damage. Chairman Cabell recited the history of the case. In the discussion that followed, the question arose whether or not the Phoenix Iron Works has been damaged sufficiently to justify the opening of the case and the payment of the claim. Mr. Cabell stated his inclination to refuse to pay the claim. He suggested, in any event, an investigation to determine the actual amount of the damage which might have had some effect on a rearrangement of the company's plant facilities. The matter was considered at some length and the following action taken: the Engineer was instructed to have an investigation made of the premises to determine whether or not the company had an outlet on the street on the opposite side of the company's plant from the highway before the highway improvement was made, and to look into the records to determine definitely whether or not the state paid for the paving of such street at the time that the Union Avenue project was constructed. Such report is to be rendered to the Commission at its December meeting.

Mr. M. H. Lyons, Portland, was present and requested authority to transport turkeys from Portland to California points in special truck equipment which is legal in the state of California but is not in the state of Oregon, being 60 feet overall in length. He alleged that the cost to ship the turkeys to California by methods that he is now using costs about four times as much as it will cost to transport them by this special equipment. Furthermore, the time consumed in moving these turkeys under the present method is considerably more than by the proposed method. He particularly requested authority to move three loads of turkeys during the Thanksgiving holiday period as a trial proposition, explaining that he has arranged with a turkey grower in California to move them in special equipment of the type he has in mind. He indicated that it was his intention to purchase similar equipment if the test run proves satisfactory, and the Commission will grant him the necessary permit to operate it on Oregon highways. Chairman Cabell expressed regrets that the Commission cannot grant the permit, in view of the action taken by the 1941 Oregon Legislature, when it voted down a bill which would have permitted operation of equipment of this size over the highways of this state. He also advised that the Commission is now studying this problem seriously in an endeavor to find a solution whereby it could legally authorize such movements. Mr. Lyons then urged the Commission to grant his permit for one experimental load. The Commission took the matter under advisement. (The matter was reconsidered later in the session, at which time the Secretary was instructed to inform Mr. Lyons that the Commission could not see its way clear to grant the request.)

The Commission adjourned at 12:00 noon and reconvened at 2:30 p.m. in the same room with all Commissioners, the Engineer, the Attorney and the Secretary present, after having conferred with certain Portland city officials in the city hall relative to the Market Building on Front Avenue. (See memorandum, prepared by the Attorney, in files, for details of this conference.)

The Commission discussed a letter from Mr. Earl Reynolds, Secretary of the Klamath County Chamber of Commerce, with respect to the proposed improvement of South Sixth Street, Klamath Falls. The Commission decided to discuss this project thoroughly at its meeting in January, 1942, and instructed the Engineer to so inform Mr. Reynolds.

The Engineer reported a request from the United States Army officials for the use of certain state-owned property adjacent to the Old Oregon Trail, opposite the Pendleton airport, for recreational purposes. He recommended approval of the request. The Commission approved the recommendation subject to the condition that the matter be covered by written agreement, which will provide for the return of the property to the state when the army no longer requires it for the purpose intended.

The Attorney reported the results of his investigation of the claim of Mrs. John Thomson for damages to her property arising out of the construction of the Nyssa underpass. He advised that he inspected the property and it is his opinion that very little, if any, damage was done to the property by reason of the highway improvement; furthermore, it is his understanding

that the sidewalk elevation in front of her property is now the same as it was before the street was rebuilt. He gave as his opinion that the state is not liable in the case. He recommended, however, construction of an approach to an adjoining lot owned by Mrs. Thomson on which she proposes to build a service station, so as to permit ingress and egress from the highway. The Commission approved the recommendation.

The Commission discussed a communication from Mr. Edward E. Sox, attorney, Albany, who has requested, in behalf of certain people who own property adjacent to Waverly Lake at Albany, permission to enter upon and improve the state land lying between their properties and the edge of Waverly Lake, so as to provide a continuous plan of beautification. The Commission denied the request as a matter of policy.

In this connection the Engineer reported that the Albany Chamber of Commerce, which conducted a log-rolling contest in Waverly Lake on July 4, 1941, cleaned up the park premises satisfactorily after the celebration with the exception of removal of two high poles which were used in connection with the log-rolling event. The sponsors, he said, have asked permission to leave the poles in their present location, so they can be used again next year for similar purposes, inasmuch as they plan to make this log-rolling contest an annual event. The Commission considered that the poles detract greatly from the beauties of the park, and accordingly denied the request and ordered the poles removed.

The Commission discussed the advisability of selling certain state-owned property situate adjacent to the Warm Springs Highway at the Madras overcrossing of the Union Pacific railroad. The Attorney advised that two offers have been received, one from a Mr. Howard W. Turner, of Madras, and the other from the Deschutes Grain and Feed Company of Redmond. The matter was discussed at some length but action thereon was deferred by the Commission pending further investigation and recommendation from the Attorney and the Engineer, in accordance with the Commission's established policy covering matters of this kind. Such report is to be rendered at the next meeting of the Commission.

The Attorney reported briefly on matters pertaining to the acquisition of right of way needed for the proposed improvement of the Columbia River Highway, past the Celilo Indian village, in Wasco County. He suggested that it would be advisable to move this Indian village to some other location satisfactory to the Indians, the state to purchase the new site and deed it to the Indians in exchange for the property desired from the Indians. Construction Engineer H. G. Smith advised that a satisfactory site, containing 40 or 50 acres of land, is available nearby. After discussion the Commission referred the matter to the Attorney, with instructions to secure an option for such site, if possible, the intention being to exchange this land for the Indian property, if such an arrangement can be effected.

The Commission discussed briefly the matter of adopting a permanent location for the Green Springs Highway, near the city limits of Klamath Falls, as an accommodation to a Mrs. Hecker, Klamath Falls, whose property will be

affected by the change. The Commission deferred action on the matter until some future time, in view of the fact that the highway improvement is not scheduled for early construction.

At 3:00 p. m. Chairman Cabell announced the following awards of contracts for which bids were received at the morning session, such awards having previously been approved by the Commission by unanimous vote:

"Klaskanine Summit-Jewell Rock Production Project on the Nehalem Secondary Highway, in Clatsop County. Requires approximately 8,000 cu. yds. crushed rock in stock piles. Five bids were received for this project, the low one being that of A. H. Saxton & Son, Corvallis, in the amount of \$16,160.00, and the second-low being that of Fisher Bros., Oregon City, in the amount of \$16,800.00. The Commission awards the contract to the low bidder, A. H. Saxton & Son, at their bid of \$16,160.00.

"Halsey Rock Production Project on the Pacific Highway East and Halsey-Sweethome Secondary Highway, in Linn County. Requires approximately 15,000 cu. yds. crushed rock in stock piles. Ten bids were received for this project, the low one being that of A. H. Saxton & Son, Corvallis, in the amount of \$22,840.00, and the second-low being that of R. O. Dail & Warren Bros., Portland, in the amount of \$23,330. The Commission refers all bids received to the Engineer with power to award the contract to the low bidder, A. H. Saxton & Son, when certain conditions have been fulfilled.

"Tillamook-Steiwer Hill Section of the Pacific Highway East, in Marion County. 2.22 miles grading and paving. C. J. Montag & Sons, Portland, submitted the low bid for this project in the amount of \$148,028.50, using asphalt. They did not submit a bid based on the use of tar. E. C. Hall Company, Eugene, submitted the second-low bid in the amount of \$151,997.50, using asphalt. No bid was received from this company for the use of tar. There were two higher bidders. The Commission awards the contract to the low bidder, C. J. Montag & Sons, at their low bid of \$148,028.50, based on the use of asphalt.

"Interstate Bridge-Oregon Slough Section of the Pacific Highway East, in Multnomah County. 0.27 mile roadbed widening. Only two bids were received for this project, the low one being that of Porter W. Yett, Portland, in the amount of \$3,820.00, and the other being that of S. S. Montague, Portland, in the amount of \$4,097.00. The Commission refers all bids received for this project to the Engineer with power to award the contract to the low bidder, Porter W. Yett, when certain conditions have been fulfilled.

"Rickreall Rock Production Project on state highways near Rickreall, in Polk County. Requires approximately 6,000 cu. yds. crushed rock or crushed gravel in stock piles. The low bid for this project was submitted by the Independence Sand & Gravel Company, Independence, in the amount of \$10,500.00. The second-low bid was submitted by

NOV 18 1941

W. C. Hill, Independence, in the amount of \$10,986.00. There were two higher bidders. The Commission awards the contract to the low bidder, Independence Sand & Gravel Company, at its bid of \$10,500.00.

"Gerking School-Athena Section of the Athena-Holdman Secondary Highway, in Umatilla County. 2.97 miles grading, surfacing and oiling. R. O. Dail & Warren Bros., Portland, submitted the low bid in the amount of \$26,288.50, and Rogers Construction Company, Dayton, Washington, submitted the only other bid, in the amount of \$29,014.00. The Commission awards the contract to the low bidders, R. O. Dail & Warren Bros., at \$26,288.50.

"Sylvan-West Slope Section of the Tualatin Valley Highway, in Washington County. 1.44 miles grading and paving. Porter W. Yett, Portland, submitted the low bid, in the amount of \$100,664.50. Jacobson-Jensen Company, Portland, submitted the second-low bid, in the amount of \$101,862.00. There was one higher bidder. The Commission awards this contract to the low bidder, Porter W. Yett, at his bid of \$100,664.50."

Mr. Chester McCarty, attorney, Portland, reappeared before the Commission at this time relative to the request of Messrs. Ben Liskey, Dan Liskey and Richard Hinsel, for permission to operate over Oregon highways certain special motor equipment, involving gross loads of 68,000 pounds. He was again informed that the Commission cannot authorize a permit today for reasons previously stated, but hopes to be able to make its decision relative to this problem within a month or so.

The Attorney brought up for discussion the matter of acquiring from Klamath County a gravel pit situate in Section 10, Township 41 South, Range 10 East, W. M., for use in connection with the improvement of the Klamath Falls-Merrill Section of the Klamath Falls-Malin Highway. He was instructed by the Commission to discuss this matter with the county court and report the results thereof.

The Commission discussed an arrangement with the Klamath Falls School District for an exchange of lands so as to secure certain right of way needed for the proposed South Sixth Street improvement, Klamath Falls. The arrangement provides for the deeding to the school district of a portion of a state-owned stock-pile site situate adjacent to the Ashland-Klamath Falls Highway, in Section 13, Township 39 South, Range 8 East, W. M., and for the deeding to the state by the school district of certain school land adjacent to South Sixth Street, Klamath Falls. Such exchange of properties was approved by the Commission by unanimous vote.

The Attorney requested instructions relative to the disposal of a small building on property acquired from Lester Pummill, Madras, as right of way for the improvement of the Warm Springs Secondary Highway. He advised that Ex-County Judge W. R. Cook has offered \$10 for this building; also, that in his estimation it would cost the state more than such amount to wreck the building. He recommended acceptance of the offer, because it is now too late

to advertise the building for sale, in view of the fact that the state's contractor is ready to enter upon the property on which the building is located. The Engineer gave as his thought that the wrecking of this building was included as one of the items in the contract for the road work. The Commission offered no objection to the sale of the building to Judge Cook but considered it advisable for him to obtain it through the state's contractor.

The Commission discussed the matter of disposal of the Knapp Hotel building in Port Orford, which was purchased in connection with the acquisition of right of way for the improvement of the Oregon Coast Highway at this place. It was brought out in the discussion that an offer has been received for the purchase of this building; also that the Oregon Roadside Council wants the building preserved on account of its historic background. The Commission deferred a definite decision on the matter; however, ordered that the prospective purchaser and the Oregon Roadside Council be informed if the Commission later on decides to sell the building. The Engineer was instructed to board up the windows of the building securely, so as to prevent vandalism so far as is possible.

The Attorney brought up for discussion a request from a Mr. Emil Henskie for fence construction along the right of way of The Dalles-California Highway in front of his property, situate a short distance south of the town of Madras. He advised that Mr. Henskie's property was formerly owned by Jefferson County, from whom the right of way for the highway was acquired, the consideration being \$1.00. Mr. Henskie, he said, is asking for a fence inasmuch as the state constructed fences along the adjoining property as a right of way consideration. He further advised that he consulted Ex-County Judge W. R. Cook, who was a member of the County Court when the state acquired the right of way, and it is Judge Cook's remembrance that the Commission agreed to build the fence; however, that was not done, and there is nothing in writing to indicate that it is a state obligation. In the discussion the question arose whether or not Mr. Henskie paid the county less for his property than he would have had to pay if the fence had been built. The Commission appeared inclined to accept Judge Cook's statement, but deferred final action on the matter pending further investigation by the Attorney as to the price paid by Mr. Henskie. The Commission indicated that it would authorize the fence construction if the present county court will support Judge Cook's contention, and provided Mr. Henskie did not pay the county less for the property on account of the lack of the fence. There is also a question whether or not the obligation to build the fence, if such obligation exists, is in favor of the county rather than Mr. Henskie. The Attorney was instructed to ascertain the additional facts and report back to the Commission.

The Secretary presented a letter from the Oregon Roadside Council offering suggestions relative to the acquisition of roadside strips along state highways. Chairman Cabell read the letter aloud. After discussion the Secretary was instructed to acknowledge the letter, and to advise the Roadside Council that the Highway Commission heartily appreciates the suggestions contained therein, and will carry them out to the best of its ability, insofar as funds are available, because the suggestions are in conformity with the Commission's ideas with respect to such matters.

NOV 18 1941

The matter of purchasing outright Camas Mountain State Park on the Coos Bay-Roseburg Highway, in Douglas County, which property is now under lease from the federal government, had the attention of the Commission. The Commission confirmed the decision reached at the previous meeting, approving the purchase of this park, and thereupon signed a petition directed to The Honorable Secretary of the Interior, Washington, D. C., with respect thereto.

The Commission discussed and approved the vacation of a certain dead-end street in the city of Cottage Grove, which street fronts on state-owned property in this town, described as Lots 3 and 4, of Block 22. A petition affecting such vacation was thereupon signed by the Commission. The Secretary was authorized to sign the certificate of acceptance in connection therewith in behalf of the Commission.

The Commission approved and ordered filed county resolutions, as follows, disposing of abandoned parcels of old state highway right of way:

Resolution from Washington County retaining for public road purposes certain portions of the old right of way of the Middleton-Newberg Section of the Pacific Highway West, heretofore abandoned by the Highway Commission as a state highway.

Resolution from Lincoln County retaining for county road purposes a small portion of the Waldport-Scott Creek Section of the Alsea Highway, heretofore abandoned by the Highway Commission as a state highway.

The Attorney reported results of further negotiations with a Mr. Harry Mercer with respect to the purchase of a triangular tract of land at the intersection of Union Avenue and Denver Avenue, Portland. He advised that Mr. Mercer originally agreed to accept \$50 for this area, if the Commission would allow the Standard Oil Company, which is leasing adjacent property, the use of a nine-foot strip of highway right of way. However, Mr. Mercer is now willing to deed the triangular tract to the state without charge, although he still wants permission for the Standard Oil Company to use the nine-foot strip for the parking of cars, et cetera. After discussion the Commission approved the arrangement, and authorized the Attorney to inform the Standard Oil Company that the Commission has no objections to the company rearranging its facilities at once notwithstanding that some little time may elapse before the exchange of deeds is effected.

In this connection the Engineer requested authority to channelize traffic at this intersection. He explained that it is a very dangerous intersection and the control of traffic by channelization is essential to traffic safety. He estimated the cost of the work at \$7,000. The Commission approved the project by unanimous vote.

The Attorney reported an offer from Mary Eastman and R. A. Eastman, Jr. to purchase a portion of the property that was acquired from Mrs. Sadie Sheridan in connection with the improvement of the Dillard Section of the Pacific Highway, in Douglas County. He said that in order to acquire right

of way for this improvement it was necessary to buy Mrs. Sheridan's entire tract and that was done with the understanding that the portion that was not needed by the state would be sold to adjoining property owners. He recommended the acceptance of the offer which, he said, would be cash, in the amount of \$239.25. The Commission approved the sale on such basis.

The Attorney requested instructions relative to the renewal of the several hospital contracts covering state highway department employees. He presented a letter from Mr. C. C. Bechtold, Manager of the National Hospital Association, advising that on account of the increasing cost of medical supplies and hospitalization, it may be necessary to raise the rate for providing this service, and requesting a modification of the present agreement to provide that such increase in rate can be put into effect on 30-days' notice. After considerable discussion, the Attorney was instructed to ask Mr. Bechtold to submit a definite rate at this time for 1942, so as to give employees an opportunity to decide whether or not they wish to continue receiving such service in the company. It was the thought of the Commission that the form of contract with the several companies should continue to be uniform in every respect, except as to rates, and that each company should decide for itself a definite price that it would ask for such service for a definite term. (Mr. Bechtold and Mr. Walter J. Page, his assistant, appeared before the Commission later in the session in regard to this matter. See ahead.)

The Attorney reported a complaint from Mr. Ormond R. Bean, Public Utilities Commissioner, that log-hauling operators, who transport logs across the Pacific Highway in Canby, do not respect the rules that require them to stop before crossing the Southern Pacific Company's railroad tracks at this place. Mr. Bean, he said, is of the opinion that stop signs should be placed at the railroad crossing. The Engineer advised that the road between the highway and the railroad tracks is either a county road or a city street; hence is without the jurisdiction of the State Highway Commission. The Commission authorized the erection of the signs if the request comes from the county court.

The Attorney reported briefly on the proposal of Senator F. M. Franciscovich of Astoria, for the installation of special traffic scales near the Wolf Creek Highway junction with the Oregon Coast Highway, in Clatsop County, for the use and benefit of log haulers. The Commission discussed the matter at considerable length but deferred action until some time next year.

A letter was presented from Mr. Marshall M. Dana, Portland, Chairman of the Battleship Oregon Commission, with respect to the installation of a light in Battleship Oregon Marine Park, which is now being developed and beautified in conjunction with the Front Avenue Project, Portland. Mr. Dana advised that he has been in communication with the Commander of the United States Coast Guard, Seattle, with respect to securing a lighthouse lens for such purpose and it appears that such a lens is available at North Head Light Station at the entrance to the Columbia River. Mr. Dana suggested that the lens be inspected by the Commission's Landscape Engineer, and if

found suitable that it be installed in the park. The Engineer was instructed to have such inspection made.

The Commission discussed briefly and ordered filed a letter from the District Director of the Interstate Commerce Commission, Portland, with respect to the condition of the Pudding River Bridge on the Pacific Highway East, at Aurora.

The Engineer reported the need to construct in the not distant future two small bridges on the North Plains-Sylvan Section of the Wolf Creek Highway, in Washington County, being bridges over McKay Creek and Rock Creek. He estimated the cost of each of these structures at \$12,000 and advised that the bridges should be constructed so they will be available for traffic when the grading work on this highway west of North Plains is finished, which he estimated would be about August 31, 1942. The Commission authorized the inclusion of both bridges in the construction program for state funds, but deferred until later a definite allocation of funds for the same.

The Commission discussed the Engineer's report on investigations that have been made of three county roads in Malheur County, which the county court wants placed on the state secondary highway system, being the Quaker Corner county road, Valley View and Clark Avenue county road, and the Enterprise Avenue county road. The Engineer advised that inspection of these roads reveals that they do not qualify as state secondary highways, although they are eligible for the federal aid secondary highway system. The Commission decided not to place these roads on the state secondary system; however, agreed to give them consideration in the formulation of the next partial program for federal aid secondary highway funds.

In this connection the Engineer reported receipt of a request from the Public Roads Administration for another partial program of federal aid secondary highway projects, in order to increase the total program to at least 50 per cent of that allowed. The Commission took the matter under advisement.

Reconsideration was given by the Commission to the matter of granting permits for movements over state highways of loads 60 feet long and having a gross weight of 68,000 pounds. The Engineer suggested the adoption of the following rule for use hereafter in passing on requests for permits for oversized and overweight movements:

"No permits will be issued for movements of overdimension or overweight vehicles save and except for isolated movement of such loads which cannot be feasibly reduced to legal dimensions and/or weights. This does not apply to the movement of logs which movements are covered by special statute."

The Commission tentatively approved the suggestion, but deferred a definite decision relative thereto pending consultation with Governor Sprague. Chairman Cabell was authorized to act for the Commission in the matter.

The Commission also reconsidered the bids received by the Board of Control, heretofore discussed at this meeting, for furnishing three new paving plants, and decided unanimously that it must not deviate from its long-established policy with respect to acceptance of the lowest qualified bid, and, in conformity therewith, decided to recommend to the State Board of Control acceptance of the bid submitted by the Dallas Machine and Locomotive Works, provided no objections thereto are offered by Governor Sprague, who is to be consulted before notification is sent to the Board of Control. Chairman Cabell was authorized to discuss the matter with the Governor.

Messrs. C. C. Bechtold and Walter J. Page, representing the National Hospital Association, came before the Commission relative to the renewal of its contract with the Commission, for furnishing medical service to state highway department employees. Chairman Cabell explained that the Commission previously had under discussion at this meeting Mr. Bechtold's letter requesting modification of the present form of contract, so as to permit the company to increase its rate at any time on short notice. The Commission is of the belief, he said, that the contracts with the several hospital associations should be uniform in every respect except as to the price to be paid for the service rendered; also, that the Commission believes that a definite rate should be specified for such service and, if necessary to increase the rate, that sufficient time should be given the employees to make up their minds whether or not they wish to continue with the company. Mr. Bechtold declared that it is improbable that the National Hospital Association can continue giving service at the present rate, because the prices of medical supplies, doctors' fees, and hospitalization costs are rising and indications are that they will continue to rise; further, that the costs for such items during the past year increased thirty-three and a third per cent over those of the previous year. He said that, in view of the circumstances, the company could not very well set a definite rate that would be in effect for all of 1942 without taking a chance on loss. After considerable discussion Chairman Cabell suggested renewal of the present contract at the present rate for a period of six months, or until June 30, 1942, with provision for automatic renewal of the contract at that time for the balance of 1942, unless an increase in rates is requested at least thirty days prior to that date; also, that, if an increase in rates is requested, department employees shall have ample opportunity to make a decision as to whether or not they wish to continue membership at the increased rate, and that no increase in rates will be permitted prior to July 1, 1942. The suggestion was approved by all parties, and the Attorney was instructed to prepare new contract forms in conformity therewith.

A letter was presented from the Oceanside Community Club requesting the installation of signs along the roadway leading to the beach at Oceanside, warning autoists of the dangers of driving their cars on the ocean beach. The letter was referred to the Engineer for investigation and erection of the signs if he considers that advisable.

The Commission also discussed a letter from the Tillamook Junior Chamber of Commerce, suggesting the erection of historical signs and markers on the Wilson River Highway and other highways in Tillamook County, pointing out historical locations. The Secretary was instructed to reply that the

NOV 16 1941

highway department is now erecting historical markers along the Old Oregon Trail as an experiment on which it hopes to be able to adopt a permanent policy with respect to such matters, and, until the results of this experiment have been studied, the Commission considers it inadvisable to spend state funds for markers in other localities.

The Commission sent the following telegram to each member of Oregon's delegation in Congress:

Press reports indicate that Morgenthau has recommended to Congress cancellation of road funds to be made available next year. The Oregon State Highway Commission in session today most earnestly requests that you do all in your power to retain congressional authorization of federal road funds for next fiscal year, and that you endeavor to secure prompt appropriation of sufficient funds to carry on the work.

The Commission considered and signed agreements, et cetera, as follows:

Agreement with each of the following cities and towns providing for improvement of certain city streets that are not on state highway routes:

Brownsville
McMinnville
Hornmouth
Toledo

Waldport
Seaside
Sheridan
Ione

Stayton
Freewater
Vernonia
Tillamook

Agreement with Malheur County providing for state maintenance of the Owyhee-Vale County Road (Lytle Blvd.) from its junction with the Nyssa-Adrian Secondary Highway, at Owyhee, to a place known as Cow Hollow, a distance of 6.01 miles. The state is to advance the funds to pay for the work, the county to reimburse the state later for the full amount of the costs.

Agreement with Sherman County and the City of Moro providing for the lease of a maintenance headquarters site in the town of Moro.

Agreement with Harold A. Green and H. H. Kingrey and wife, disposing of their claim for damage to their property in the town of Nyssa, arising out of construction of the Nyssa underpass. Real property file No. 9387.

Permit granting the Portland Traction Company authority to operate its trolley busses over certain state highway routes in Portland.

Bargain and sale deed conveying unto the Pacific Power & Light Company, for the sum of \$38.55, 3,855 square feet of land situate

in Section 11, Township 11 South, Range 13 East, Jefferson County.
Right of way file No. 6606-A.

Bargain and sale deed conveying unto O. D. Rhoads and wife
Lots 1 and 2, Block 7, Kincaid Park Addition to Eugene, Lane County.
Right of way file No. 9662.

Bargain and sale deed conveying unto Emil Duyck and wife 11.18
acres of land, less roadway, situate in the East $\frac{1}{2}$ of Section 33,
Township 2 North, Range 3 West, W. M., Washington County. Right of
way file No. 6527-A.

Bargain and sale deed conveying unto Curtis Hansen and wife
0.34 acre of land situate in the NW $\frac{1}{4}$ of Section 29, Township 18
South, Range 2 West, W. M., Lane County. Right of way file No. 8922.

Bargain and sale deed conveying unto George D. Saxton and wife
two parcels of land containing 0.06 and 0.09 acre of land, respec-
tively, in the NE $\frac{1}{4}$ of Section 9, Township 2 North, Range 4 West,
W. M., Washington County. Right of way file No. 6260-A.

Bargain and sale deed conveying unto Rose Utecht and Chris
Utecht two parcels of land containing 0.79 and 0.04 acre, respec-
tively, adjacent to the Wolf Creek Highway, in Lots 17 and 18,
Block 45, North Plains. Right of way file No. 6535.

Bargain and sale deed conveying unto Nathan Wise, trustee,
550 sq. ft. of land situate in Lot 1, Block 11, McClure's Addi-
tion to Astoria. Right of way file No. 9303.

There being no further business to come before the Commission at
this time, the meeting was adjourned at 5:45 p. m.

HEADQUARTERS AND GENERAL OFFICE OF DEPARTMENT
LOCATED AT SALEM, OREGON

TABLE OF CONTENTS

<u>Page</u>	<u>Date</u>	<u>Subject</u>
	1921	
10757	Dec. 18	Bids received on following projects and sale of buildings: Sisters Rock Production Project; Wright Ranch-Milo Section, grad., surf., and oiling; Soda Mountain-Silvies Section, grad., surf., and oiling; Polallie Creek-Hood River Rock Production Project;
10758		Sun Dial Highway Section, paving; S. Unit, Enterprise-Forest Boundary Section, grad., surf., and oiling; Campbell Bridge-Hazeldale Section, grad., surf., and oiling; Porcupine Butte-Chichester Gulch Section, grad. and topping; Sale of residence building in North Salem; Sale of residence building in South Salem. Baker County. Dooley Mountain Section, Baker-Unity Highway. Construction of guardrail considered.
10759		Harney County. Judge Nelson B. Higgs confers relative to plans for various highway improvements. Deschutes County. Terrebonne-Lower Bridge Road. Commissioner E. E. Varco confers relative to improvement. State agrees to proceed with improvement.
10760		Multnomah County. Portland. Request of Lambert Gardens to maintain signboards on state highway routes denied. Umatilla County. Delegation requests following: Directional sign at junction of Pendleton-John Day Highway and Old Oregon Trail, Pendleton. Pendleton-John Day Highway. Improvement requested, especially Battle Mountain Section;
10761		Battle Mountain Section. Engineer instructed to stockpile sand at slippery points for use of log haulers. Intersection of Pendleton-John Day Highway and road leading to Albee. Request for investigation approved. Log hauling. Delegation requests following: Measurement of loads of logs by scale instead of by weight; Modification of penalty for transporting overweight loads. American Assn. of State Highway Officials. Commission not to be represented at meeting of Executive Committee at Chicago. Washington County. Hillsboro-Cornelius Pass Road. County requests improvement of 3.8-mile section. Request denied. Civil defense guard. Cooperation with state police to organize and maintain approved. Increased budget approved.
10762		Jackson County. Plaza Corner, Ashland. Report on result of reappraisal of right of way. No action taken. Delegation confers re project. (See P.10773) Lane County. Eugene-Springfield Project. Delegation confers relative to financial setup. No action taken. Log hauling. Request of W. F. Bingham for extension of permit to haul piling, Deadwood and Siuslaw Highways, approved.
10763		Policy re permits for overlength piling discussed. Cases involving more than 10 loads per month to be given individual attention.

<u>Page</u>	<u>Date</u>	<u>Subject</u>
10763	Dec. 18	Log hauling. Procedure for issuance of special carrier permits approved, as agreed upon at conference, Dec. 11, 1941.
10764		Wand steering devices for trailers. Ruling requiring such devices to be modified. Tandem axle truck and trailer equipment. Policy modified re taking up of PUC plates for overweight loads. Malheur County. Nyssa-Adrian Secondary Highway. Request of Oregon Trail Grange, for improvement, denied. Klamath County. Klamath Falls. South Sixth Street. Engineer's report on cost to improve. (See P. 10770)
10765		Bids. Policy re award of contracts approved as follows: Single bid. Contract to be awarded to bidder, if the bid does not exceed estimated cost by more than 10%. Two or more bids. Contract to be awarded to low bidder, if bid does not exceed estimated cost by more than 15%. Multnomah County. Sun Dial Secondary State Highway 124. Resolution designating as secondary highway adopted.
10766		Travel & Information Department. Advisory Committee on Publicity Matters recommends suspension of advertising program, funds to be held intact for later expenditure. Approved. Yamhill County. Newberg-McMinnville Section, Pacific Highway West. Delegation requests widening of three sections, also widening of bridge at Newberg.
10767		Tillamook County. Proposed Boyer-Dolph Road. Yamhill County delegation requests construction. Little Nestucca Secondary Highway, from Dolph to coast. Delegation requests completion. Awards. Chairman announces awards of contracts and sale of buildings.
10769		Klamath County. The Dalles-California Highway. Stipulation re crossing government-owned lands at Algoma discussed.
10770		Multnomah County. Troutdale-Airport Road. Delegation requests construction. Project approved if eligible for federal funds. Klamath County. Klamath Falls. South Sixth Street. Construction on 80-foot right of way approved. Right of way. Closing of option on B. Frank Owens property authorized.
10771		Radio Program, "Oregon on Parade." Report of Burton K. Hutton, KOAC, discussed and ordered filed. Union County. Oregon Trail Association requests consideration of certain highway projects in Union County. Umatilla County. Request for construction of road paralleling Weston-Elgin Hwy., for use of tractors, combines, etc., denied. Lane County. Territorial Secondary Highway. Request for improvement of Lane-Benton Co. Line-Cheshire Section denied. Douglas County. Tiller-Trail Secondary Highway. Request for improvement from Tiller to Jackson County line denied. Tillamook County. Short Sand Beach Park. Improvement of parking area adjacent to Oregon Coast Highway approved.

	1941	
10771	Dec. 13	Equipment. Purchases authorized as follows:
10772		One refrigeration plant for Silver Creek Falls Park; 14 pick-up trucks; one lighting plant for Pistol River Maintenance Station; 4 $\frac{1}{2}$ -yard power shovels.
		Awards. Commission confirms following awards:
		Malsey Rock Production Project, A. H. Saxton & Son;
		Interstate Bridge-Oregon Slough Section, Porter W. Yett;
		Grant Creek-Powers Section, Coos Bay Dredging Company;
		Eugene-Judkins Point Section, Strong & Macdonald, Inc.;
		Lake County. Lakeview. City requests oiling of strips along Western Avenue. Action deferred.
10773		Jackson County. Plaza Corner, Ashland. Delegation guarantees to secure reduction in cost of right of way. Project approved for construction.
		Clackamas County. Mrs. W. H. Tucker opposes construction of new road extending up DuBois Canyon.
		Lincoln County. Alsea Highway. Waldport Chamber of Commerce urges modernization of remaining section. No action.
10774		Multnomah County. Portland. Request for installation of "stop and go" lights, on Sandy Boulevard, denied.
		Klamath County. Klamath Falls. City's request for lighting system along South Sixth Street denied.
		Tillamook County. Tillamook. Agreement with city disposing of state's claim for construction of Oregon Coast Highway.
		Submerged and tide lands. Request for contribution, for purpose of contesting congressional legislation, denied.
		Coos County. Viaduct, Coal Bank Slough. State to demand payment from F. A. Greer and James Saint, for damage to handrail
		Multnomah County. Interstate Bridge, Portland. Request of Pacific Telephone & Telegraph Company for permit to place cable between towers of bridge denied.
10775		Claims. Payment of following claims approved:
		Gasoline obtained by W. B. Gaskins, Jr., with credit cards secured from stolen state car;
		Privately-owned bridge, Lane County. A. E. Gault Lumber Company claims damages for destruction.
		Permits. Resolution adopted, authorizing movements of oversized equipment during present war emergency.
10778		Form of permit, for movements of defense goods, approved.
10779		Hospital association. Supplemental agreement with National Hospital Association, for 1942, approved and signed.
		Klamath County. Crescent Lake County Road. Request of county court for snow removal approved. County to pay cost.
		FUC permits. Commission to pay 50% of salary of man employed by FUC to handle permits.
10780		Permits. Oregon Coast Highway Assoc. protests authorizing increase in weights and lengths of commercial trucks.
		Josephine County. Intersection of Redwood & Pacific Highways, Grants Pass. Further study of traffic hazard requested.
		Fences. C. A. Brown, Pleasant Valley, suggests fencing main highways in range counties to prevent livestock accidents.

	1941	
10780	Dec. 18	Jackson County. Pacific Highway. Letter from county court abandoning portion of old right of way, previously abandoned by state.
		Coos County. Coquille. Letter from city concerning disposal of portion of Burns Acres, previously abandoned by state.
10781		Lane County. Oregon Coast Highway. Resolution from county court retaining portion north of Florence, abandoned by state.
		Wallowa County Court. Wallowa Lake Highway. Resolution of county court abandoning portion of old right of way, heretofore abandoned by state.
		Union County. Union-Medical Springs Secondary Highway. Request that highway be named "The Dunham Wright Trail" denied.
		Marion County. Salem School Board requests survey for rerouting of Pacific Highway, on account of Parrish Junior High School.
		Scrap steel. OPM advises that present method of disposing of steel is satisfactory, if prices fixed by OPM are observed.
		Surveys. List of surveys ordered since last meeting.
10783		Surveys. List of surveys completed. Resolution adopted.
10785		Extensions of time, as follows:
		Coos Bay Dredging Company, Bandon Section;
		Porter W. Yett, Lombard Street-Killingsworth Street Section;
10786		McNutt Brothers, Sexton Mountain Section;
		D. C. & A. L. Williams, Wallowa Lake & Old Oregon Trail Hwys.;
		Chester T. Lackey, Cairo Junction-Adrian Section;
10787		Norris Brothers, Ochoco Creek Section;
		M. L. O'Neil & Son, Gilliam County Line-Zinter Ranch Section;
		Gales Creek Sand & Gravel Co., Vandehey & Van Dyke Sections;
10788		Porter W. Yett, Vollmer Creek & Necanicum Junction Sections;
		Warren Northwest, Inc., Crabtree Corner-Lebanon Section;
		The United Contracting Co., Astoria (Astor St.-Bond St.) Sec.;
10789		O. C. Yocom, Fulton Canyon-Locust Grove Section;
		E. L. Gates, Kimberly-Simas School Section;
		Warren Northwest, Inc., Middle Unit, Crabtree Corner-Lebanon Section.
10790		Contracts completed and accepted, as follows:
		Bandon Section, Coos Bay Dredging Company;
		Lombard St.-Killingsworth St. Section, Porter W. Yett;
		Tillamook Rock Production Project, F. C. Feldschau;
		Sexton Mountain Section, McNutt Brothers;
		La Grande Rock Production Project, D. C. & A. L. Williams;
		Cairo Jct.-Adrian Rock Production Project, Chester T. Lackey;
		Gooserock Bridge, Averill & Corbin;
		Ochoco Creek Section, Norris Brothers;
		Gilliam County Line-Zinter Ranch Sec., M. L. O'Neil & Son;
10791		Vandehey & Van Dyke Sections, Gales Creek Sand & Gravel Co.;
		Dean Creek-Parker Creek Section, A. S. Wallace;
		Vollmer Creek & Necanicum Junction Sections, Porter W. Yett;
		Pendleton-Adams Section, M. E. Myers & Son;
		Astoria (Astor St.-Bond St.) Sec., The United Contracting Co.;

10938	Mar. 20	Juniper wayside strips. (cont.) Redmond-Bend Section, The Dalles-California Highway. Outright purchase from federal government, rather than lease, approved.
10939		Marion County. Silver Creek Falls CCC Camp. Renewal of CCC camp for period of one year approved. Progress report for February, re operation of camp, approved. Umatilla and Union Counties. Emigrant Park. Pacific Tel. & Tel. Co.'s request for permit to fall trees approved. Parks Department. Financial report approved.
10940		Douglas County. Paul Schuttpels lease for roadway across park property. Resolution adopted re cancellation of lease.
10941		Surveys. List of surveys ordered since last meeting approved.
10943		Extensions of time, as follows: Roy L. Houck, Scappoose-Multnomah County Line Section; M. L. O'Neil & Son, Plunkett Creek-Read Creek Section; Chester T. Lackey, Lapine Rock Production Project;
10944		M. L. O'Neil & Son, Taylor Creek Section; E. L. Gates, Kimberly-Simas School Section; A. O. Ekstrom, Detroit-South Santiam Junction Section;
10945		Porter W. Yett, Interstate Bridge-Oregon Slough Section. Contracts completed and accepted, as follows: Lost River-Malin Bridge Section, W. D. Miller Const. Co.; Plunkett Creek-Read Creek Section, M. L. O'Neil & Son; Lapine Rock Production Project, Chester T. Lackey;
10946		Taylor Creek Section, M. L. O'Neil & Son; Detroit-South Santiam Junction Rock Prod., A. O. Ekstrom; Interstate Bridge-Oregon Slough Section, Porter W. Yett. Agreements, et cetera, signed as follows: Board of County Commissioners of Multnomah Co., re construction and maintenance of Portland Air Base East Access Road; City street improvements as follows: Dayton, Forest Grove, St. Helens, Medford, Gaston, West Linn, Chiloquin, Sherwood; Jackson County, providing for maintenance of one-way traffic on Crater Lake Highway and Bybee County Road; Coos Bay Dredging Co., disposing of claim for extra compensation arising out of contract No. 2339, Bandon Section; Marion County, covering maintenance of North Santiam County Road, between Niagara and Detroit. Benton County, providing for improvement of 4.5 mile section of the Independence County Road;
10947		Clatsop County, covering improvement of DeLaura Access Road; Bargain and sale deed conveying lot in Ashland to G. H. Billings; Bargain and sale deed conveying property in Albany to Chris A. Vandran; Bargain and sale deed conveying 10.75 acres of land in Washington County to Henry Duyck; Bargain and sale deed conveying three parcels of land in City of Ashland to H. L. Claycomb; Bargain and sale deed conveying approximately four acres of land in Curry County to W. G. Hellier.

Portland, Oregon, December 18, 1941

The State Highway Commission met in regular session at 9:00 a. m. in the auditorium of the Public Service Building. Present were:

Henry F. Cabell, Chairman
Huron W. Clough, Commissioner
Herman Oliver, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

Bids as follows for highway construction work and sale of buildings were opened and read in conformance with previously-published notice, following which Chairman Cabell announced that the awards would be made at 2:30 p. m. in the same room:

STATE HIGHWAYS NEAR SISTERS
SISTERS ROCK PRODUCTION

E. C. Hall Company	\$24,475.00
R. O. Dail & Warren Bros.	24,755.00
S. S. Montague	25,767.50
Rogers Construction Company	27,000.00
Babler Brothers	27,450.00
Max J. Kuney Company	29,700.00
A. O. Ekstrom	43,085.00

TILLER-TRAIL SECONDARY HIGHWAY
WRIGHT RANCH-MILO SECTION
GRADING, SURFACING AND OILING

C. J. Eldon	\$75,787.50
E. C. Hall Company	77,928.75
E. L. Rigdon	79,658.25
Babler Brothers	89,984.00

JOHN DAY-BURNS HIGHWAY
SODA MOUNTAIN-SILVIES SECTION
GRADING, SURFACING AND OILING

M. L. O'Neil & Son	\$110,090.75
--------------------	--------------

MT. HOOD HIGHWAY
POLALLIE CREEK-HOOD RIVER ROCK PRODUCTION

C. J. Eldon	\$26,400.00
E. C. Hall Company	27,955.00
Babler Brothers	28,495.00
S. S. Montague	29,690.50

SUN DIAL SECONDARY HIGHWAY
SUN DIAL HIGHWAY SECTION - PAVING

Parker-Schram Company	\$19,939.50
Porter W. Yett	21,122.00
Warren Northwest, Inc.	25,106.00
The United Contracting Company	26,221.00

ENTERPRISE-LEWISTON HIGHWAY
SOUTH UNIT OF ENTERPRISE-FOREST BOUNDARY SECTION
GRADING, SURFACING AND OILING

Rogers Construction Company	\$123,299.40
-----------------------------	--------------

FARMINGTON SECONDARY HIGHWAY
CAMPBELL BRIDGE-HAZELDALE SECTION
GRADING, SURFACING AND OILING

	<u>Using Asphalt</u>	<u>Using Tar</u>
A. H. Saxton & Son	-	\$55,872.50
Babler Brothers	-	61,768.00

SHANIKO-FOSSIL SECONDARY HIGHWAY
PORCUPINE BUTTE-CHICHESTER GULCH SECTION
GRADING AND TOPPING

Norris Brothers	\$32,881.00
C. J. Eldon	35,172.20
Leonard & Slate	38,150.00
Vernie Jarl	40,617.40
M. L. O'Neil & Son	48,604.50

SALE OF RESIDENCE BUILDING IN NORTH SALEM

Building No. 2754 (Former owner Carl Vogl)

Burt Picha	\$51.50
------------	---------

SALE OF RESIDENCE BUILDING IN SOUTH SALEM

Building No. 9482 (Former owner Christian Ramseyer)

C. Ramseyer	\$100.00
Burt Picha	66.50

Commissioner Oliver mentioned the necessity for guardrail construction along certain portions of the Dooley Mountain Section of the Baker-Unity Highway, about twelve miles in length, where, he said, accidents frequently occur. The matter was referred to the Engineer for investigation and to construct guard fence as may be necessary, using the log type of fence if that appears satisfactory.

County Judge Nelson B. Higgs of Harney County was present and inquired as to the Commission's plans for highway improvements in Harney County. Chairman Cabell explained the status of funds available to the Commission, particularly pointing out that so far as federal funds are concerned the outlook at the present time is not very good and indications are that it is going to be rather difficult to secure approval of the federal moneys unless a showing can be made that the expenditures are in the interests of national defense. He also pointed out the difficulties in securing priority on materials and equipment used in highway construction. He inquired as to the improvements most needed in Harney County. Judge Higgs asked for the improvement of the Burns-Crane Highway and U.S. Highway No. 395. He recalled that the Commission, last year, started reconstruction of this road. He suggested that the moneys budgeted for continuation of this work be reallocated for the improvement of Highway No. 395, which is their most important project. Judge Higgs also asked for the improvement of the Frenchglen Secondary Highway and the East Side Road and for construction of the secondary highway between Princeton and a connection with the ION Highway, near Rome. Chairman Cabell reiterated the difficulties that are facing the Commission with respect to funds and advised that the Commission is not in position to make any commitments at this time as to what it can do or how soon anything can be done, inasmuch as it now appears that improvements will have to be limited to state-financed jobs, if it is possible to secure materials for the same. Judge Higgs asked the Commission to give all consideration possible to these projects.

County Commissioner E. E. Varco, Deschutes County, was present in regard to the improvement of the Terrebonne-Lower Bridge Road. He advised that the county grading work on this road will be completed in two or three months and the county would like to do the rock surfacing, which, under the present arrangement, is an obligation of the state along with the oiling work, if the Commission is agreeable and will spend an equal amount of state money for oiling on some other county road. He was informed that this is a federal aid secondary highway, involving federal funds, and there is a question whether or not the government officials will approve the project in view of the war situation. It was also pointed out that the government may require the federal funds to be spent on projects that are most needed for national defense and that there is a question whether or not the Terrebonne-Lower Bridge Road is eligible from that standpoint.

Mr. T. M. Davis, Senior Highway Engineer of the Public Roads Administration, who was present, advised that federal funds cannot be used to pay the county for surfacing work performed on force-account basis; however, if the county will submit a bid for the work along with other contractors and is awarded the contract as the low bidder, then the federal funds could be used to pay the costs.

Chairman Cabell pointed out that the county court was led to believe that the state would do this job and, accordingly, in his estimation, the work should go forward in conformance with the original arrangement if at all possible. The Engineer suggested that it might be advisable to place this road on the state secondary highway system and pay for the improvement with state

DEC 18 1941

money under the original arrangement. The county, he said, could submit a bid for the rock work if it so desired. After further discussion the Commission acknowledged the obligation to rock and oil the road and agreed to proceed with the improvement just as soon as a way can be found to finance it.

Mr. A. B. Lambert, owner of Lambert Gardens, Portland, came before the Commission and requested authority to maintain fingerboard signs on state highway routes in Portland, directing tourists to his gardens. The Commission denied the request as a matter of policy.

A delegation from Umatilla County, consisting of County Judge Carl W. Chambers; County Commissioner Wm. R. Meiners; and J. H. Patty and Cecil Erving of the Pilot Rock Chamber of Commerce, was present. Judge Chambers asked for the installation of a directional sign at the junction of the Pendleton-John Day Highway and the Old Oregon Trail near the Pendleton Round-Up grandstand to properly direct traffic. He said that there is confusion under the present sign arrangement and traffic bound for Spokane frequently takes the Pilot Rock road and travels a considerable distance before the mistake is realized. The matter was referred to the Engineer to correct.

Judge Chambers also asked for the improvement of the Pendleton-John Day Highway, advising that certain sections are in bad state of repair on account of heavy log-hauling traffic which, he stated, is bound to increase in view of the new lumber mills that are being constructed in this vicinity. Mr. Erving presented statistics relative to the amounts that users of this road are now paying into the state highway fund by reason of gasoline-tax payments, license fees and transportation fees. He urged the Commission to improve this section, at least to repair the worst spots if the Commission cannot finance a first-class improvement over the entire distance. He mentioned a particularly bad condition at Battle Mountain.

Chairman Cabell advised that the Commission had no idea when the road was first built that it would carry so much travel and, consequently, did not build as high a type of road as is required by present traffic; further, that the outlook for reconstructing the entire section is not very good on account of government control of funds; however, the Commission will do the best that it can in the way of maintenance. He explained that it will be necessary to use federal funds to rebuild the road and indications are that the government will not approve the expenditure of such funds for the construction of roads other than those termed access roads and those that will facilitate the movement of troops. He also advised that the federal government has control over road-building machinery and that it is becoming more and more difficult on account of the war situation for contractors to acquire new equipment, replacements and repair parts, so about the only thing that the Commission can do in the next two or three years is maintain the present road in the best possible manner that circumstances will permit, and oil the uncoiled gap. Judge Chambers urged the Commission to keep the project in mind and to place it in the program within the next three or four years.

DEC 18 1941

Mr. Patty asked for the improvement of two particularly bad places on Battle Mountain where a slippery condition obtains in the winter season on account of excess superelevation on curves. The Engineer was instructed by the Commission to stock-pile sand at these points for the use of log haulers during such periods.

Mr. Erving asked the Commission to investigate a bad condition at the intersection of the Pendleton-John Day Highway with the road leading to the town of Albee. The matter was referred to the Engineer for such investigation.

Mr. Patty also asked the Commission to support the movement to secure a change in the Oregon laws to provide for measurement of loads of logs by scale rather than by weight and to modify its ruling with respect to the surrender of PUC plates by loggers who are found to be transporting loads weighing in excess of the legal limitations. The Commission denied both requests.

A telegram was presented calling a meeting of the Executive Committee of the American Association of State Highway Officials to be held in Chicago on December 20, 1941. The Commission decided not to be represented at such meeting.

The Commission discussed the matter of continuing the improvement of the Hillsboro-Cornelius Pass Road, in Washington County, as a federal aid secondary highway project. The Engineer advised that a 2.17-mile section of this road, beginning at Hillsboro and extending easterly, has already been improved with federal aid secondary highway funds and state funds; also that the county has resurfaced and oiled a section 3.6 miles in length, beginning at the Multnomah County line and extending southwesterly, and is now asking for improvement of the intervening section 3.8 miles in length. He estimated the cost of the work at approximately \$60,000 and advised that the county has offered to reshape the grade, construct ditches and drainage facilities with county forces and to manufacture materials from a county quarry up to a value of about \$8,000, as cooperation. The Commission decided not to approve the project at the present time.

The Engineer brought up for discussion the matter of cooperating with the State Police Department in organizing and maintaining a state police civil defense guard for patrolling and guarding selected structures on the state highway system during the present war emergency. He advised that a careful study of the matter reveals that it will be necessary to employ 54 stationary guards and 21 patrol guards with automobiles; further, that it will be necessary to pay the stationary guards a salary of \$125 per month and patrol guards salaries ranging from \$100 to \$140 per month, making a total monthly outlay of approximately \$9,480 for salaries. In addition, it will be necessary to furnish seven automobiles for use of the patrol guards. These, he said, will be purchased by the State Police Department but the State Highway

DEC 18 1941

Department will have to pay the cost of maintenance, operation and depreciation of the same which is estimated at \$2,625 per month. He estimated that miscellaneous and incidental expenses would amount to about \$395 per month, or a grand total of approximately \$150,000 annually. He asked the Commission to approve the arrangement and increase the budget setup a sufficient amount to take care of this item. The Commission approved the request by unanimous vote.

The Assistant Attorney reported the results of reappraisals of the property in Ashland needed as right of way for the improvement of the Pacific Highway in this town. He advised that two new appraisals were made by qualified citizens of Ashland, one of whom estimated the value of the properties at \$38,000 and the other at \$48,700, whereas the total of the options taken by the right of way agent was \$54,000. The average of the options and the two appraisals, he said, is \$47,000. The matter was discussed at some length during which the question was raised whether or not the property should be condemned. Action on the matter was deferred until later in the session.

A delegation from Ashland, consisting of Mayor T. S. Wiley, F. J. Van Dyke, City Attorney, and G. M. Green, Editor of the Daily Tidings, was present in regard to the Ashland project. Chairman Cabell explained the results of reappraisals and advised that the Commission is ready to proceed with the project if right of way can be obtained at a reasonable figure. He inquired as to whether or not the delegation considers it possible to secure a reduction in the total cost, to the average of the new appraisals and the option prices, or a reduction of approximately \$7,000. He explained that, unless such reduction can be secured, it will be necessary to condemn the various parcels, which would be a long process, and that it is contrary to the policy of the Commission to enter into any property under condemnation until the case has been tried and the jury has had an opportunity to view the property before it is disturbed. The matter was discussed at considerable length but action was deferred until later in the session, it being understood that the delegation in the meantime would confer with local citizens with respect thereto. (See ahead for final action.)

Messrs. Wm. Tugman and Ed Turnbull, Eugene, were present and discussed with the Commission matters pertaining to the Eugene-Springfield Project and the general status of funds. The matter was discussed in general during which the present financial setup was explained in full by Chairman Cabell. No particular action was taken.

The Commission considered the application of W. F. Bingham, Eugene, for an extension of his permit, authorizing hauling of piling 100 feet overall in length over the Deadwood and Siuslaw Highways to a log dump at a place known as Siuslaw, in Lane County. The Secretary recalled that the Commission, at a previous meeting, approved the granting of a 30-day permit covering such hauling with the understanding that the privilege would not be extended and was simply to cover the movement of 400 piling that had already been felled. However, it seems that, on account of bad weather conditions, all of the piling was not moved and the operator is now asking for an extension in order to move the balance. The Commission approved a 30-day extension of this permit.

The Engineer brought up for discussion the proposed modification of the present ruling which limits the transportation over state highways of loads of piling 75 feet overall in length to ten loads per month if more than half of the traveled roadway is taken up in the movement. The Commission decided not to change the present rule. Cases involving more than ten loads per month are to be brought to the attention of the individual Commissioners, by telephone, and instructions will be given at that time.

The Commission discussed a proposed modification of the procedure to be followed in connection with the issuance of special carrier permits by the Public Utilities Commissioner. The following procedure was approved by the Commission by unanimous vote, which arrangement was agreed upon at a conference held in the office of the State Highway Engineer on December 11, 1941, attended by the Honorable Ormond R. Bean, Public Utilities Commissioner, and his assistants Messrs. A. F. Harvey and Perry O. DeLap; Lieutenant Max Alford, representing the Department of State Police; and Messrs. R. H. Baldock, Loren Spaulding, W. C. Crews, and H. B. Glaisyer, representing the State Highway Department:

(1) The State Highway Department will transmit to the Public Utilities Commissioner, in writing, blanket recommendation authorizing him to grant permits for the truck hauling of logs over any state highway excepting those which contain physical features that will not permit such operations without creating too great a hazard to the general traveling public. The Public Utilities Commissioner is to be given a list of the highways not covered by the blanket recommendation. The hauling of logs over such highways is not absolutely prohibited although each individual request for such privilege is to be considered on its own merits and, if approved, a separate recommendation will be issued in each instance, which recommendation will contain conditions under which the permit may be granted.

(2) The Public Utilities Commissioner will continue to issue special-carrier permits as in the past but instead of limiting the operations to certain sections of highways the permit will authorize log hauling over any state highway except those specifically eliminated. The names of the highways eliminated are to be printed in the permit. Only one permit is to be issued to an operator regardless of how many trucks are to be covered, eliminating the necessity for the permit to be carried on each truck. There is to be carried on each individual truck, however, a declared weight slip as required by law, on the back of which is to be printed, for the benefit of state police officers and highway department weighmasters, a list of the highways over which log hauling is not permitted under the blanket recommendation. In the event of approval of truck hauling of logs over any of such highways then such information is to be typed on the back of the weight slip for the information of the state police and the weighmasters.

DEC 13 1941

The Engineer recommended a modification in the present ruling, requiring hand-steering devices on trailers used in connection with the hauling of overlength loads of logs and piling. He gave as his opinion that a hand-steering device is not required because the wheels of a trailer properly connected with a truck will follow the wheels of the truck just as closely without hand-steering device as with it. The Commission approved such modifications by unanimous vote; however, ordered that the following clause be inserted in such permits:

"The coupling device connecting truck and trailer shall be of such design that the wheels of the trailer will follow approximately the tracks made by the rear wheels of the truck furnishing the motive power, without allowing any portion of the hauling equipment or load carried thereon to extend over or across the center line of the highway."

The Engineer also requested a modification of the present ruling with respect to the taking up of FUC plates of logging operators who are using tandem axle truck and trailer equipment. He advised that under the present ruling FUC plates are not requested unless the gross weight of the combination load and equipment exceeds 71,400 pounds which is 68,000 pounds plus the five per cent tolerance authorized by the Commission; whereas, in some cases, the allowable gross weight determined by formula is less than 68,000 pounds. It was his thought that the rule should be amended to cover such cases and suggested the following: The surrender of FUC plates shall be requested if the actual gross weight, as determined on the scales, exceeds an allowable gross weight of 68,000 pounds, as determined by formula, plus a five per cent tolerance; and also shall be requested if the actual gross weight, as determined on the scales, exceeds the allowable gross weight, as determined by formula, plus a ten per cent tolerance provided that such tolerance shall not apply if the resultant gross weight is in excess of 71,400 pounds. The Commission approved the suggestion and ordered that such procedure be followed hereafter.

The Engineer reported on the cost to improve the Nyssa-Adrian Secondary Highway as has been requested by the Oregon Trail Grange, to eliminate existing hazards. He advised that this matter was investigated by Division Engineer W. C. Williams who estimates the cost of grading, surfacing and oiling work to eliminate five right angle turns in a section 6,500 feet in length at \$17,000 but who does not believe that the expenditure is justified. He gave as his thought that, if the improvement suggested by Mr. Williams is undertaken, it would be advisable to extend it to eliminate two railroad crossings which undoubtedly would add another mile to the improvement and increase the estimate to at least \$30,000. The Commission decided not to approve the project at the present time on account of the existing financial stringency.

The Commission discussed the Engineer's report on the cost to improve South Sixth Street, Klamath Falls, on a 60-foot right of way basis as compared to an 80-foot right of way, and the report on the cost to construct a bypass line from Main Street to South Sixth Street via the reclamation canal. According to the report, to reconstruct Sixth Street on a 60-foot right of way basis would cost \$283,027.92 with an additional expense of \$11,165 for right of way, making a total of \$294,192.92, and to construct on an 80-foot right of way will cost \$621,193.33 with an additional cost of \$149,330.00 for right of way, making

DEC 13 1941

a total estimated cost of \$770,523.33. The cost to construct the bypass route, from Main Street to South Sixth Street via the United States Reclamation Service canal, is \$660,915.20 and right of way costs are estimated at \$48,952.00 additional, making a total estimated cost of \$709,867.20. He recommended improvement of South Sixth Street on an 80-foot right of way basis. The Commission discussed the matter at considerable length but deferred a decision relative thereto until later in the session. (See additional record ahead.)

The Commission adjourned at 12:15 p. m. and reconvened at 2:00 p. m. in the same room with the same persons present and participating.

The Commission discussed the question whether or not to change its policy with respect to the award of contracts to low bidders in view of the uncertainty of the times and probable increases in labor and material costs. After considerable discussion the Commission decided unanimously, in the case of a single bid being received for a job, to award the contract to the bidder if the amount of the bid does not exceed the estimated cost of the project more than ten per cent. If two or more bids are received for any project, the award of the contract shall be made to the low bidder if the total amount of such bid does not exceed the estimated cost of the project more than fifteen per cent. This modification of policy is to remain in full force and effect during the present emergency or until changed by the Commission.

The Secretary presented a resolution from the Board of County Commissioners of Multnomah County requesting the designation, as a state secondary highway, of the following described county road or route:

Beginning at a point on the Columbia River Highway approximately one mile west of Troutdale where said highway is intersected by a county road known as the Sun Dial Road and extending thence northerly to the dike, a distance of approximately 1.3 miles.

The Commission considered such request in conformity with previous understanding with the Board of County Commissioners and accordingly approved the resolution. The following resolution designating the road a state secondary highway was thereupon adopted by the Commission by unanimous vote:

WHEREAS, under the provisions of Chapter 248, Laws of 1931; Chapter 196, Laws of 1935; and Chapter 529, Laws of 1939; the State Highway Commission, by mutual agreement with the respective county courts and boards of county commissioners of the several counties of the State, is authorized and empowered to select, locate, and designate a system of secondary state highways, which highways shall be selected from the market roads or other county roads, or available locations or routes of the several counties; and

WHEREAS, the State Highway Commission, by mutual agreement with the Multnomah County Board of County Commissioners of the State of Oregon, has selected the road or highway hereinafter named, and it is the purpose of the Commission to officially and regularly designate and adopt said highway as a highway to constitute, together with

DEC 13 1941

other highways heretofore adopted and/or which may hereafter from time to time be added, the system of secondary state highways under the provisions of said acts;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission, all members being present and affirmatively voting and participating, as follows:

1. That the following described market road, county road, highway route, or location of a highway in Multnomah County be and the said market road, county road, highway, location, or route, hereby is selected, designated, established, adopted and approved as a secondary state highway and shall be and hereby is designated as a part of the secondary state highway system, to wit:

Sun Dial Secondary State Highway No. 124:

Beginning at a point on the Columbia River Highway approximately one mile west of Troutdale where the Columbia River Highway is intersected by the Sun Dial County Road; thence northerly to the Dike; a distance of approximately 1.3 miles.

2. That the said highway shall be and hereby is qualified for improvement under the provisions of said Chapter 248, Oregon Laws of 1931; Chapter 196, Oregon Laws of 1935; and Chapter 529, Oregon Laws of 1939; and amendments thereof.

Mr. Merle Chessman, Chairman of the Advisory Committee on Publicity Matters, appeared before the Commission and presented the following resolution which, he said, was adopted by his committee on the previous day, recommending the suspension of magazine and newspaper advertising during the present war emergency:

"Because of the state of war and because Oregon is a defense area, the Advisory Committee of the Travel and Information Department recommends to the Commission that it suspend its magazine and newspaper advertising program for the time being. The committee also urges that the advertising fund be kept intact and available for use at the earliest possible moment when advantageous to the public interest. The committee also recommends that no change be made in the status of the Travel and Information Department at the present time because of the necessity for performing essential work of permanent value to the state regardless of the temporary suspension of space advertising."

The Commission approved the resolution, it being understood, however, that the funds involved will be held intact for expenditure at some future date for the purpose intended, if the Commission so elects.

A delegation from Yamhill County, consisting of about fifteen members

and including County Judge William O. Powell; Eugene Marsh, attorney McMinnville; Senator W. E. Burke; S. L. Parrot, Chairman of the Highway Committee, Newberg Chamber of Commerce; Mr. Toney, McMinnville, and former County Commissioner W. S. Allan, Dundee, came before the Commission in regard to the improvement of the Pacific Highway West between Newberg and McMinnville. Mr. Marsh headed the group. He alleged that this road is the second heaviest-traveled road in the state and that there are three sections between Newberg and McMinnville that are entirely too narrow to carry this traffic and where accidents frequently occur. He strongly urged the improvement of these three sections in the interest of safety to the general public and from the military standpoint to facilitate the movement of troops. The three places particularly mentioned for improvement are between Newberg and Dundee, between Dundee and the Unity School or Dayton Junction, and at the St. Joseph Underpass. He also asked for the widening of the bridge at Newberg.

Mr. Parrott endorsed the remarks of Mr. Marsh and particularly pointed out the large volume of log-hauling traffic that uses this road. Senator Burke also endorsed Mr. Marsh's remarks. He alleged that the highway between Portland, McMinnville and the Coast is second only to the Upper Columbia River Highway. Judge Powell and Mr. Allan also spoke for the improvement. Mr. Allan also asked consideration for the construction of the proposed road between Boyer on the Salmon River Highway and Dolph on the Three Rivers Highway, and completion of the Little Nestucca Secondary Highway from Dolph to the Coast. Mr. Marsh presented numerous newspaper clippings pertaining to accidents that have occurred on the section of highway under discussion.

Chairman Cabell advised that the Commission is cognizant of the condition of the Newberg-McMinnville Section and appreciates that it is in need of improvement; however, in his estimation, the condition of the road is only partially responsible for accidents. The Commission, he said, must be very careful about expending funds under its jurisdiction on the basis of accident reports because there may be other places in the state where similar conditions exist but where the accidents have not been brought to the attention of the Commission. Present plans of the Commission, he said, are to complete the reconstruction of the highway between Portland and McMinnville before doing very much improvement west of McMinnville and, under this program, the Commission has already completed a number of projects between Portland and Newberg. The Commission hopes, he said, to be able to spend additional funds on the project in the future but is not in position to make any definite commitments at this time because of the federal requirements which necessitate approval of the projects by the army and navy officials before federal funds can be expended thereon, and the Commission does not yet know just what highways are to be emphasized as defense roads. It is the intention of the Commission, he said, to provide a balanced program for the entire state but until that is done the Commission will not be in position to make any definite statements or commitments with respect to projects such as under discussion. This concluded the conference.

At 2:30 p. m. Chairman Cabell announced the following awards of contracts and sale of buildings, bids for which were received at the morning session, such awards having previously been approved by the Commission by unanimous vote:

"Sisters Rock Production Project on state highways near Sisters, in Deschutes County. Requires approximately 17,000 cu. yds. crushed gravel in stock piles. Seven bids were received for this project, the low one being that of E. C. Hall Company, Eugene, at \$24,475, and the second-low being that of R. O. Dail & Warren Bros., Portland, in the amount of \$24,755. The Commission awards this contract to E. C. Hall Company at its low bid of \$24,475.

"Wright Ranch-Milo Section of the Tiller-Trail Secondary Highway, in Douglas County. 6.17 miles grading, surfacing and oiling; also furnish 2,600 cu. yds. crushed gravel in stock piles. C. J. Eldon, Portland, submitted the low bid for this project in the amount of \$75,787.50. E. C. Hall Company, Eugene, submitted the second-low bid in the amount of \$77,928.75. There were two higher bidders. The Commission refers all bids received for this project to the Engineer with power to award the contract to the low bidder when certain conditions have been satisfied.

"Soda Mountain-Silvies Section of the John Day-Burns Highway, in Grant County. 7.19 miles grading, surfacing and oiling; also furnish 2,000 cu. yds. crushed rock in stock piles. Only one bid was submitted for this project being that of M. L. O'Neil & Son, Stanfield, in the amount of \$110,090.75. The Commission refers the bid received for this project to the Engineer with power to award the contract to the bidder when certain conditions have been satisfied.

"Polallie Creek-Hood River Rock Production Project on the Mt. Hood Highway, in Hood River County. Requires approximately 12,400 cu. yds. crushed rock or crushed gravel in stock piles. Four bids were received for this project, the low bid being that of C. J. Eldon, Portland, in the amount of \$26,400, and the second-low being that of E. C. Hall Company, Eugene, in the amount of \$27,955. The Commission awards this contract to C. J. Eldon at his low bid of \$26,400.

"Sun Dial Highway Section of the Sun Dial Secondary Highway, in Multnomah County. 1.25 miles paving. The low bid for this project was submitted by Parker-Schram Company, Portland, in the amount of \$19,939.50, and the second-low bid was submitted by Porter W. Yett, Portland, in the amount of \$21,122. There were two higher bidders. The Commission refers all bids received for this project to the Engineer with power to award the contract to the low bidder when certain conditions have been satisfied.

"South Unit of Enterprise-Forest Boundary Section of the Enterprise-Lewiston Highway, in Wallowa County. 7.75 miles grading, surfacing and oiling; also furnish 2,500 cu. yds. crushed rock in stock piles. The only bid for this project was submitted by Rogers Construction Company, Dayton, Washington, in the amount of \$123,299.40.

The Commission refers this bid to the Engineer with power to award the contract when certain conditions have been satisfied.

"Campbell Bridge-Hazeldale Section of the Farmington Secondary Highway, in Washington County. 4.56 miles grading, surfacing and oiling. Two bids were received for this project, the low one being that of A. H. Saxton & Son, Corvallis, in the amount of \$55,872.50 based on the use of tar, and the other being that of Babler Brothers, Portland, in the amount of \$61,768.00 also based on the use of tar. Neither of the contractors submitted a bid based on the use of asphalt. The Commission awards this contract to A. H. Saxton & Son at their low bid of \$55,872.50 based on the use of tar.

"Porcupine Butte-Chichester Gulch Section of the Shaniko-Fossil Secondary Highway, in Wheeler County. 3.37 miles grading and topping. Norris Brothers, Seattle, Washington, submitted the low bid in the amount of \$32,881.00 and C. J. Eldon, Portland, submitted the second-low bid in the amount of \$35,172.20. There were three higher bidders. The Commission awards the contract to Norris Brothers at their low bid of \$32,881.00."

Sale of Buildings:

"Sale of residence building in North Salem, No. 2754, formerly owned by Carl Vogl. Only one bid was received for the purchase of this building, being that of Burt Picha, Salem, at \$51.50. The Commission considers this bid satisfactory and accordingly the building is sold to Mr. Picha at his bid price of \$51.50.

"Sale of residence building in South Salem, No. 9482, formerly owned by Christian Ramseyer. Two bids were received for this building, the high one being that of C. Ramseyer, Salem, at \$100.00 and the other bid being that of Burt Picha, Salem, at \$66.50. The Commission considers the bid of C. Ramseyer satisfactory and accordingly sells the building to him at his high bid of \$100.00."

The Attorney brought up for discussion a stipulation prepared by the United States Department of Interior relative to the Commission's application for right of way needed for the improvement of The Dalles-California Highway across government-owned lands near Algoma, Klamath County. He read aloud the provisions of the stipulation and advised that the federal authorities require acceptance of the same by the State Highway Commission, and that the state consent that they be made a part of the right of way easement before the right of way will be granted. The Commission considered the provisions of the stipulation too severe, and thereupon refused to approve or sign the stipulation. In view of the fact that only a very small parcel of government-owned land was required in this particular instance and for the further reason that the highway work has been completed, the Commission decided not to make an issue of this particular case, but to wait until a more important project arises in the future. The Attorney was instructed to write the Registrar of the U. S. Land Office, Lakeview, Oregon, and request a modification of the proposed requirements.

A delegation from Troutdale, consisting of A. R. Frey, Secretary of the Troutdale Commercial Club; A. D. Kendall, President of the Troutdale Commercial Club; Erick Enquist; and Dr. H. C. Tomlinsen, was present in regard to the construction of a road extending northerly from the Columbia River Highway at Troutdale to the new airport that is being constructed at this location. Mr. Frey headed the group. He advised that two routes are under discussion, one of which extends along the westerly bank of the Sandy River, and the other intersects the Columbia River Highway a short distance west of the Troutdale depot. He stated a preference for the first-mentioned road and advised that right of way for the same has already been secured although the road has not yet been designated a county road but will be so designated later. This road, he said, will pass under the new Columbia River Highway when constructed and will connect with the old highway. The other route, he said, will also pass under the new highway when constructed and will connect with Second Street in Troutdale. Construction of either of these roads, he said, will relieve considerably traffic over the Sun Dial Road leading to the proposed aluminum plant at Troutdale. He advised that quick action is necessary because the airport is now being constructed and indications are that construction of an aluminum plant will proceed in the very near future. He urged the Commission to designate either of the routes as a secondary state highway and to construct the same. Chairman Cabell advised that the Commission will assist in the undertaking as much as possible but must know where the aluminum plant is to be located before it can make the necessary investigations and surveys to determine whether or not the road is eligible for federal access road moneys. The Engineer was thereupon authorized to make the necessary studies when definite decision has been reached with respect to the location of the aluminum plant and to submit the project to the government authorities for approval if the investigations indicate that the project is eligible for the government funds.

Reconsideration was given by the Commission to the matter of improving South Sixth Street, Klamath Falls. After considerable discussion the Commission voted unanimously to improve this street on an 80-foot right of way basis. The Engineer was thereupon authorized and instructed to work up the plans for the project and submit the same to the federal authorities for approval.

The Assistant Attorney requested authority, in view of the Commission's action, to close an option for the acquisition of right of way needed from B. Frank Owens. He explained that this property is to be acquired for moving the Piggly Wiggly Store now located on the H. G. Beardsley property, and also for moving the store on the adjoining Mary F. Park property; further, that the option for this property expires on January 1, 1942, that it is a very good deal, and, if the Commission intends to proceed with the improvement, the option should be completed immediately. He further explained that the land is being donated but the state's obligation is to move the store buildings. After discussion the Commission authorized the taking up of this option at the option price of \$6,000, it being understood, however, that this is the only one authorized at this time. It was also understood that the Piggly Wiggly people would be allowed to continue occupancy of the building in its present location until the property is needed for the highway improvement.

The Commission discussed briefly and ordered filed a report from Burton Hutton, Director of the "Oregon on Parade" program conducted by Oregon State College radio station KOAC during the period June 10 to September 10, 1941, toward which program the State Highway Department contributed \$1,800 to defray a portion of the expense involved.

The Commission also discussed briefly and ordered filed a communication from Charles H. Reynolds, LaGrande, President, Oregon Trail Association, requesting consideration of certain highway projects, in Union County, which were presented by him orally at the previous meeting.

The Commission discussed a petition from Umatilla County residents requesting the construction of a dirt road paralleling the Weston-Elgin Highway between Basket Road Junction and a point five miles westerly thereof so that tractors, combines, et cetera, may be moved over this highway without damaging the oiled roadway. The Commission denied the request.

A resolution was presented from Long Tom Grange No. 866, Junction City, Oregon, in which the Commission is requested to continue improvement of the Territorial Secondary Highway from the Lane-Benton County line to Cheshire, in Lane County. The Engineer pointed out that the Commission's budget provides for the improvement of this highway between Veneta and Crow and that it is proposed to award a contract for grading, surfacing and oiling this section, involving an expenditure of \$60,000, at the January meeting of the Commission. It was his thought that it is now too late to change the program. It was the opinion of the Commission that the Veneta-Crow Section is the more important of the two projects and should go forward as planned. In any event it is now too late to change the allocation. The Secretary was instructed to so inform the petitioners.

A resolution was presented from the Douglas County Taxpayers League requesting improvement of the Tiller-Trail Secondary Highway from Tiller to the Jackson County line, a distance of 4.5 miles. The Engineer estimated the cost to complete this section on a primary-highway basis at \$965,000 and on a secondary-highway basis at about \$500,000. The Commission denied the request because of lack of funds with which to finance the work.

The Commission discussed a request from the State Parks Superintendent for authority to improve an automobile parking area adjacent to the Oregon Coast Highway at Short Sand Beach State Park, involving an expenditure of approximately \$5,800 of state funds. It was explained that the Parks Superintendent has a large quantity of government-owned materials on hand for use in connection with this job, the value of the same being estimated at \$2,400, and unless this material is used now the probabilities are that the government will recall it and the state will lose the benefit of the same. The Commission considered that the construction of such parking area is highly desirable and thereupon authorized the expenditure.

The Commission discussed a request from the State Parks Superintendent for authority to purchase the following equipment for use in Silver Creek Falls State Park:

- 1 refrigeration plant. Estimated cost \$350.00
- 1 hot food table. Estimated cost \$385.00

The Commission approved the purchase of the refrigeration plant but not the hot food table.

The Engineer also requested authority to purchase the following equipment:

- 14 pick-up trucks, 11 old trucks to be traded in as part purchase price. Estimated total cash outlay \$9,450.00
- 1 lighting plant for use at Pistol River Maintenance Station to replace a worn-out plant at this location. Estimated cost \$750.00
- 4 $\frac{1}{2}$ -yard power shovels, 3 old shovels and 1 old steam hoist to be traded in as part purchase price. Estimated total cash outlay \$26,000.00.

After discussion the Commission approved the purchase of such equipment by unanimous vote.

The Engineer reported the following awards of contracts in accordance with authority previously given him by the Commission, the conditions of the awards having been satisfied:

"Halsey Rock Production Project on the Pacific Highway East and Halsey-Sweethome Secondary Highway, in Linn County. Bids taken November 18; contract awarded November 25, 1941, to A. H. Saxton & Son, the low bidders.

"Roadbed widening on the Interstate Bridge-Oregon Slough Section of the Pacific Highway East, in Multnomah County. Bids taken November 18; contract awarded December 4, 1941, to Porter W. Yett, the low bidder.

"Surfacing and oiling the Grants Creek-Powers Section of the Powers Secondary Highway, in Coos County. Bids taken November 17; contract awarded December 15, 1941, to Coos Bay Dredging Company, the low bidder.

"Railroad roadbed construction on the Eugene-Judkins Point Section of the Pacific Highway, in Lane County. Bids taken November 17; contract awarded December 16, 1941, to Strong and Macdonald, Inc., the low bidders."

The Commission confirmed the awards as reported.

A letter was presented from the City of Lakeview, requesting the oiling

DEC 18 1941

of the unrolled strips along Western Avenue (route of the Klamath Falls-Lakeview Highway), where new sidewalks were recently constructed by the city. The Engineer advised that this project is about 2,440 feet in length and extends from the westerly city limits to Dewey Street, which is the Fremont Highway intersection. He estimated the cost of the project at \$15,000. He gave as his opinion that this is a meritorious project and should be constructed if possible. The Commission indicated a favorable attitude toward the project but deferred a definite decision until next spring when it decides its 1942 oiling program. The Secretary was instructed to so inform the city.

The Ashland delegation reappeared before the Commission in regard to the proposed Plaza Corner improvement on the Pacific Highway in Ashland. Mr. Van Dyke, City Attorney, stated that they have conferred by telephone with the local appraisers of the property needed by the state and are convinced that they can secure a \$5,000 reduction in the total cost based on a 7½ per cent reduction of the option prices. He urged the Commission to approve such reduction and to definitely authorize the project at this meeting so that work can go forward at the earliest possible time. After considerable discussion the Commission by unanimous vote approved the project on the basis of a \$5,000 reduction, such reduction to be secured from all of the property owners involved, if possible, rather than from only one or two. This will reduce the total cost of the project from \$82,000 to \$77,000. The Engineer was authorized to advertise this project for bids when right of way matters have been satisfactorily disposed of and the reduction in the total cost of right of way secured. The delegation members guaranteed to secure the \$5,000 reduction and an additional reduction of \$1,000 if possible.

A letter was presented from Mrs. W. H. Tucker, Estacada, opposing the construction of a new road extending up DuBois Canyon, Clackamas County, as a substitute for the present road. The Engineer advised that the road referred to is a part of the Woodburn-Sandy Secondary State Highway No. 161, south of Estacada; also that several years ago a survey was made for a new alignment from Estacada to Springwater, a distance of about four miles. An estimate made at the time, he said, indicated that the reconstruction of this section would cost about \$200,000. In view of the expense involved the Commission decided not to construct the new section; however, instructed the Engineer to maintain the present road in the best possible condition.

A letter was presented from the Waldport Chamber of Commerce urging modernization of the remaining section of the Alsea Highway. The Engineer read the letter aloud and advised that the Commission's budget contains an item of \$75,000 for improvement of the Tidewater-Alsea Section; also that, for an additional expenditure of about \$50,000, a light oil treatment could be placed on the remaining section. He was instructed to inform the chamber of commerce that the Commission had plans to spend \$75,000 of state funds on this road and to approve additional forest highway funds for the improvement of another section; however, the present war emergency has made it necessary to change the plans so, under the circumstances, it doubts if the work can be done at all, at least not until the present emergency is over.

A letter was presented from A. E. Papineau, Chairman, Roads and Highway Committee, Parkrose Chamber of Commerce, relative to the installation of "stop and go" lights on Sandy Boulevard at its intersection with N. E. 89th Avenue, N. E. 99th Avenue, and N. E. 105th Avenue. The Engineer advised that flashing beacons are now being maintained at these intersections and there is a doubt in his mind whether or not "stop and go" lights will prevent accidents occurring; also, there is a question whether "stop and go" lights can be purchased in view of the present emergency. After discussion the Commission ordered that the chamber of commerce be informed of the facts and that the Commission does not consider the time propitious for the installation of such type of signals.

The Commission discussed and denied a request from the City of Klamath Falls for the installation of a lighting system along South Sixth Street, route of the Klamath Falls-Lakeview Highway, between Main Street and the Klamath Falls southerly city limits.

The Commission considered and signed an agreement with the City of Tillamook providing for the disposition of the state's claim against the city arising out of the construction of the Oregon Coast Highway between First Street and the northerly city limits of Tillamook, as per agreement dated January 8, 1931. (See agreement for details of settlement)

A letter was presented from the Commission of Public Docks, Portland, renewing its request for a contribution of \$25 of state highway funds to assist in the cost of preparing maps for use in opposing proposed congressional legislation with respect to submerged and tide lands. The Commission considered it inadvisable to spend state funds for such purpose and instructed the Attorney to so inform the Commission of Public Docks.

The Attorney requested instructions whether or not to take legal action against Messrs. F. A. Greer and James Saint, Marshfield, for damaging the railing on the state highway viaduct at the south end of Broadway Street, in Marshfield. It appears that these men had an erroneous idea that the old viaduct at the Coal Bank Slough Bridge location was to be wrecked upon completion of a new highway improvement and accordingly removed the hand-rail therefrom without first obtaining permission so to do from the State Highway Department. It also appears that it was not intended that this entire viaduct would be wrecked and that Messrs. Greer and Saint have refused to restore the railing, notwithstanding that they have been requested on several occasions so to do. The Engineer estimated that it would cost about \$225 to restore the handrail. After discussion the Commission instructed the Attorney to point out to Messrs. Greer and Saint that they are criminally liable for this damage and are subject to prosecution on such basis. However, the Commission does not feel inclined to take criminal action unless absolutely necessary and will not do so if they will pay the account without delay.

The Commission had under discussion a request from the Pacific Telephone and Telegraph Company for permission to place an aerial telephone cable between the towers of the Interstate Bridge at Portland. The Engineer

DEC 18 1941

recommended denial of the request for the reason that the granting of such permit would establish a general policy which would react adversely in disposing of similar requests in the future, and for the further reason that the cable would be unsightly and might cause an accident if an aviator should have occasion to fly between the bridge towers. The Commission approved the recommendation.

The Commission had under discussion the matter of paying certain claims for gasoline incurred by a Mr. W. B. Gaskins, Jr., which gasoline was used in a State Highway Department truck that was stolen and used by Mr. Gaskins. It appears that the truck in question was assigned to the State Parks Department and that it was stolen by Mr. Gaskins on October 13, 1941; further, that he used the truck to travel up and down the Oregon Coast Highway between Newport and Marshfield, and used the credit cards that were in the truck to purchase gasoline for the most part, although in one instance he obtained gasoline from a Texas Oil Company service station without a credit card, the attendant having extended credit because he was driving state equipment and had credit cards from other companies. It also appears that Mr. Gaskins purchased groceries, et cetera, charging the same to the State Highway Department. The question arose whether or not the State Highway Commission is responsible and liable for the payment of such claims. The Attorney gave as his opinion that the state is not legally obligated to pay for the groceries, et cetera, and the gasoline that was purchased without credit card, but the state is liable for the payment of gasoline that was purchased with the credit cards that were in the truck. After discussion the Commission approved payment of the claims covering gasoline purchased on the credit cards but assumed no obligation as to the remaining claims.

Reconsideration was given by the Commission to the claim of the A. E. Gault Lumber Company, Gresham, Oregon, for the destruction of a bridge on a private road approach to the Siuslaw Highway, in Lane County, said claim being in the amount of \$80.00. It appears that the bridge in question was being maintained on property owned by a Mr. Charles Pope who had granted the Gault Lumber Company permission to maintain and use the same for a roadway across his property in connection with the transportation of equipment and timber products from the lumber company's mill to the highway, and that such agreement will not expire for some five years. It also appears that, during the improvement of the Siuslaw Highway at this location, instructions were given the contractor by the Engineer to wreck the bridge which was done without consent of the Gault Lumber Company. The Engineer recommended payment of the claim in view of the fact that the old bridge was destroyed under orders of the resident engineer, notwithstanding that there is some question whether or not the state is liable. The Commission approved the recommendation.

The Commission had under discussion the matter of authorizing movements of equipment 60 feet overall in length and having a gross weight of 68,000 pounds over state highways during the present war emergency. It was brought out in the discussion of this matter that it is absolutely necessary to move defense materials and supplies quickly and without delay from points in California to points in Oregon and in Washington, necessitating the use of

DEC 18 1941

Oregon highways; further, that, in connection with such movements, it is frequently necessary to use equipment that exceeds the Oregon limitations as to length and weight. It was the thought of the Commission that everything possible should be done to expedite such movements in the present emergency. The following resolution pertaining thereto was adopted by the Commission by unanimous vote:

WHEREAS, under and by virtue of the provisions of section 115-385 O. C. L. A., it is provided with respect to the movement of motor vehicles over the public highways of the State that no vehicle with or without load shall exceed a length of thirty-five (35) feet extreme overall dimension, inclusive of front and rear bumpers, and that no train of vehicles coupled together with or without load shall exceed a total length of 50 feet; and

WHEREAS, likewise with respect to the movement of vehicles over the public highways of the State, it is provided by section 115-387 O. C. L. A. that no motor vehicle shall be driven upon any highway of the State having a combined weight of both vehicle and load, or a combined weight of any combination of vehicle and load, in excess of 54,000 pounds; and

WHEREAS, it is provided by section 115-393 O. C. L. A. that the State Highway Commission may, upon application and upon a finding by the Commission that the interests of the public will be served by the proposed movement, grant written permission for the movement of any vehicle, article, property, or thing having a combined weight in excess of that permitted by law or being of a size or description not permitted under the provision of the law; and

WHEREAS, because of the emergency which now exists it appears that transport facilities by motor vehicle are inadequate for the proper and efficient movement of defense materials if motor transports are required to conform to the law of the State with respect to maximum length of vehicle or combination of vehicle and load, and with respect to maximum weight of vehicle or combination of vehicle and load; and

WHEREAS, after and as a result of investigation caused to be made by the State Highway Commission with respect to the needs of the Federal Government and the transportation facilities available for the movement of defense materials, and with respect also to the particular highways over which it is proposed to move said materials, it is deemed by and is the judgment of the Highway Commission that the best interests of the State of Oregon and of the country as a whole require that some special and temporary arrangement be made to facilitate movement by motor transport of defense materials over the public highways of the State of Oregon; and

WHEREAS, under the laws of the State of California to the south, and the laws of the State of Washington to the north, and the

laws of the State of Idaho to the east, the maximum length of vehicle or combination of vehicle and load is fixed by law at 60 feet, and the maximum or combined weight of vehicle or combination of vehicle and load at 68,000 pounds; and

WHEREAS, it appears that because of the restrictions and inhibitions imposed by Oregon laws by which the maximum length of vehicle and load or combination of vehicle and load is fixed at 50 feet, and the maximum combined weight of vehicle and load or combination of vehicle and load is fixed at 54,000 pounds, the efficient and necessary movement of defense materials through Oregon is materially handicapped and impaired.

NOW, THEREFORE, because of and based upon the foregoing recitals and findings the Oregon State Highway Commission, all members being present and voting affirmatively, does hereby resolve and declare as follows:

1. That during the present emergency a permit or permits may be granted for the movement over public highways of the State of Oregon of a vehicle or combination of vehicles having an overall length of load and vehicle up to but not exceeding 60 feet in length.
2. That likewise during the present emergency a permit or permits may be granted for the movement over public highways of the State of Oregon of a vehicle or combination of vehicles having a combined weight of load and vehicle or combination of vehicle and load up to but not exceeding 68,000 pounds.
3. No permit shall be issued for any movement until the applicant shall disclose in a manner satisfactory to the Highway Commission the type and character of vehicle, its size or dimensions, and whether single vehicle or combination of vehicles, the maximum load or loads to be carried thereon, with a sufficient and satisfactory description of the commodities or materials to be hauled; and shall also disclose to the satisfaction of the Commission, the point of origin, the point of destination, the name of the consignor, the name of the consignee, and a description of the property being moved together with the road or highway over which the same is to move and such other information or data as the Highway Commission may require.
4. Each applicant for a permit shall establish to the satisfaction of the Commission that the applicant carries adequate public liability and property damage insurance for the protection not only of the members of the Highway Commission and members of its staff but for the protection of the members of the general public who may sustain injuries or loss by reason of or caused by the movement of a vehicle or vehicles under and pursuant to any

permit issued by virtue of this resolution.

5. Any permit issued shall contain a definite provision that the gross weight of any vehicle or combination of vehicles shall not exceed 68,000 pounds and that the axle weight shall in no instance be in excess of 18,000 pounds. Said permit shall contain a further provision that the allowable gross weight shall be controlled by the formula $W-750x(L+40)$, wherein W equals total gross weight, L equals length between first and last axles. The total gross weight applied to any group of axles spaced closer than 18 feet apart shall not exceed that determined by the formula W equals $650x(L+40)$, wherein W equals gross weight and L equals distance between first and last axles of the group in question.

6. This resolution shall be entered in the minutes and records of the Commission and a certified copy thereof given to each applicant for a permit under this emergency procedure and provision, and thereafter, for the purpose of expediency, further matters with respect to any particular application or permit may be handled by telegram between the applicant or permittee and the Highway Commission through its Secretary at Salem, Oregon, with such follow-up data as may be required by the Commission.

7. The disclosures made by the applicant with respect to any particular movement, the kind and character of commodity to be moved, the point of origin and point of destination, the name of consignor and the name of consignee shall be verified under oath by someone qualified to make such disclosures for the applicant or permittee.

8. Any permit issued under the provisions of this resolution shall be for a single movement only and for the return of the vehicle with or without load. If the vehicle is to return loaded, permission for such movement will, upon telegraphic application, be granted without the requirement of certificate concerning defense commodities or supplies. The return load may consist of defense and civilian commodities and supplies, but the gross weight of vehicle, or combination of vehicle and load, shall not exceed 68,000 pounds.

9. This procedure and policy on the part of the State Highway Commission is influenced and controlled by existing war emergencies and may by the Commission and within its sole discretion be discontinued and rescinded at any time.

The Commission also approved the following form of permit covering such movements of defense goods and authorized the Secretary to issue permits in conformity therewith:

Gentlemen:

Pursuant to your request for the movement of defense goods, advise that until further notified, due to this period of war emergency,

DEC 18 1941

permits will be issued for the individual movements of truck trains of maximum dimensions and weights as hereinafter described, in the carrying of defense goods destined to or from a government army or navy depot and required to move into and through this state. At least one-half of the goods hauled, either in bulk or in weight, must be what is termed defense goods.

The truck train shall not exceed 60 feet in length, shall not have a gross weight of more than 68,000 pounds, nor an axle weight in excess of 18,000 pounds. The allowable gross weight shall be controlled by the formula $W=750x(L+40)$, wherein W =total gross weight, L =length between first and last axles. The total gross weight applied to any group of axles spaced closer than 18 feet apart shall not exceed that determined by the formula $W=650x(L+40)$, wherein W =gross weight and L =distance between first and last axles of the group in question.

A collect telegraphic permit will be given for the movement of the truck train at the point of origin, which telegram will serve as notification to the state police of the authority to make the movement under the conditions of this letter over the highway routes stated. Please state in your telegram to us route desired and identification numbers of your truck and trailer. A copy of the telegram for each and every movement will be sent on the same day to your office.

Please return one copy of the telegram, with an affidavit similar to the one attached which certifies that the movement was in the interests of national defense and that the truck train was carrying defense goods as enumerated.

It is to be expected that the necessity for transportation of defense goods may arise for a movement in one direction only and that the return movement may be made without the carrying of defense goods. In such case a permit will be necessary for the return movement and the affidavit shall state that the truck on its former trip carried defense goods pursuant to permit No. ____.

The Commission approved and signed a supplemental agreement with the National Hospital Association covering the furnishing of medical service to state highway department employees during the calendar year 1942.

A letter was presented from the County Court of Klamath County requesting snow removal operations on the Crescent Lake county road during the winter of 1941 and 1942, on the same basis as such work was performed during the past winter, viz., the state agrees to remove snow from this road and the county agrees to reimburse the state for such undertaking. The Commission approved the request.

The Engineer reported an inquiry from the Public Utilities

DEC 18 1941

Commissioner as to whether or not the State Highway Commission will pay 50 per cent of the salary of a man employed in his office to handle permits in which the Highway Commission is particularly concerned. It appears that most of the permit work that is handled by the Public Utilities Commissioner originates in or concerns the State Highway Department and, under the present budget arrangement, the Public Utilities Commissioner is unable to handle the details and still keep his costs within the budget allowance, which necessitates other financial arrangements. It was the thought of the Public Utilities Commissioner that, inasmuch as most of such permits concern the State Highway Department, the State Highway Commission might be willing to pay 50 per cent of the salary of the man who handles them. After discussion the Commission by unanimous vote approved such arrangement.

The Commission discussed briefly and ordered filed a letter from the Oregon Coast Highway Association opposing the increasing of weights and lengths of commercial trucks, that use Oregon highways, on the grounds of public safety and convenience because it is not believed that thoroughfares built at the expense of Oregon motorists should be converted to the use of private enterprise and profit until such enterprise shall assume or agrees to assume a fair share of the expense of reconstruction and maintenance of such highways.

A petition, signed by 36 businessmen and citizens of Grants Pass and vicinity, was presented in which the Commission was urged to make further studies of conditions at the intersection of the Redwood Highway and the Pacific Highway at Grants Pass and to do what may be necessary to reduce the traffic hazard at this point. The Engineer advised that this matter has been given very careful study and in his estimation all possible has been done to safeguard traffic at this point. The Commission took no action on the matter.

The Secretary presented a letter from Mr. C. A. Brown, Pleasant Valley, Oregon, directed to the Honorable Earl Snell, Secretary of State, in which Mr. Brown suggests approval of a plan to fence all main highways in the range counties of the state so as to prevent livestock from having access to the highways and the occurrence of accidents involving livestock. The Commission considered that the adoption of a fence-construction program at this time is too costly an undertaking and accordingly denied the request.

The Commission considered and approved the following communications relative to the abandonment of certain portions of right of way of state highways that have been rendered valueless from the state highway standpoint on account of reconstruction of the highway on new alignment:

Letter from the County Court of Jackson County abandoning to the use and benefit of adjoining and abutting property owners a portion of the old right of way of the Pacific Highway in Section 22, Township 36 South, Range 3 West, W.M., Jackson County.

Letter from the City of Coquille stating that the county has deeded to Mary A. Burns that portion of Burns Acres known as Block 1, originally a county road, inasmuch as this property is not needed for

county road purposes and has been abandoned as a state highway by the State Highway Commission.

Resolution from Lane County Court retaining for county road purposes a portion of the old right of way of the Oregon Coast Highway just north of the city of Florence heretofore abandoned by the State Highway Commission as a state highway on account of the reconstruction of the highway on another alignment.

Resolution from Wallowa County Court abandoning to the use and benefit of the abutting property owner a portion of the old right of way of the Wallowa Lake Highway heretofore abandoned by the State Highway Commission when the highway was reconstructed on another alignment.

A letter was presented from the LaGrande Rotary Club endorsing the movement to name the highway between Union and Medical Springs "The Dunham Wright Trail" inasmuch as this movement is to commemorate the one-hundredth anniversary of the birth of Dunham Wright, one of Oregon's oldest pioneers. The Commission denied the request for such designation as a matter of policy.

A letter was presented from the Salem School Board in which request was made for a survey to determine the possibilities of rerouting Pacific Highway traffic so that it will not pass in front of the Parrish Junior High School on North Capitol Street, Salem, endangering the lives of school children. The Engineer pointed out that the school was built after the highway was routed on Capitol Street and that, when the site for the school was being discussed, this feature was brought to the attention of the school board notwithstanding which the board approved the site and constructed the school building. After discussion the Commission ordered that the school board be advised that the present routing of traffic on Capitol Street was made at the request of the Salem City Council and that the Commission does not feel inclined to make any change although it will concur in any change that the city may propose; also, that, if a change is made, the city will have to assume the responsibility for maintenance of the street over which the traffic is rerouted. The Engineer was instructed to discuss the matter with the city officials before such reply is made to the school board. He was also instructed to bring the matter to the Commission's attention again after consulting with the city officials.

A letter was presented from Alex Miller, Industrial Specialist, Iron and Steel Branch, Office of Production Management, in reply to the Engineer's letter of November 6, 1941, with respect to the sale of scrap steel, in which Mr. Miller advises that it will be satisfactory for the Commission to continue to dispose of its scrap materials as in the past but suggests that the material be not sold above the ceiling prices fixed by the Office of Price Administration. The Commission took no action.

The Engineer presented a list of surveys that he has ordered since the last meeting of the Commission, and asked the Commission to confirm them and the amounts allocated for each. After due consideration the Commission

DEC 18 1941

authorized and instructed the Engineer to make such location surveys on various sections of the highways of this state, which said sections of highways, together with their identifying survey numbers and the amounts authorized and allocated for such survey expenditures, are as follows:

Plans - - - - -	1-1428 - Durkee Undercrossing, Old Oregon Trail Highway, Baker County	1st authorization	\$500
Stock Pile - - -	1-1429 - Baker Rock Production, Old Oregon Trail, Baker-Homestead, Baker-Unity Highways, Baker County	1st authorization	\$200
Plans - - - - -	3-1431 - West Linn Section, Oswego Highway, Clackamas County	1st authorization	\$400
Plans - - - - -	4-1461 - Astoria (Bond St.-Com'l. St.) Section, Oregon Coast Highway, Clatsop County	1st authorization	\$600
Plans - - - - -	204-1458 - Skipanon Connection, Military Access Road, Clatsop County	2nd authorization	\$700
	Total to date \$1,700		
Right of Way - -	-4-3003 - Volmer Creek-Necanicum Junction Section, Wolf Creek Highway, Clatsop Co.	1st authorization	\$110
Plans - - - - -	6-1425 - Marshfield-Bunker Hill Section, Oregon Coast Hwy., Coos County	1st authorization	\$450
Right of Way -	-106-1426 - Grants Creek-Powers Section, Powers Highway, Coos County	1st authorization	\$300
Plans - - - - -	-10-1434 - Rice Hill-Chenoweth Park Section, Pacific Highway, Douglas County	1st authorization	\$850
Location - - -	110-1433 - Wright Ranch-Tiller Section, Tiller-Trail Highway, Douglas County	2nd authorization	\$1,700
	Total to date \$5,000		
Plans - - - - -	13-1407 - Cinder Butte-Wagontire Section, Lakeview-Burns Hwy., Harney County	3rd authorization	\$850
	Total to date \$3,350		
Plans - - - - -	13-1418 - Poison Creek Section, John Day-Burns Highway, Harney County	1st authorization	\$3,000
Relocation - - -	21-1456 - South Delake Section, Oregon Coast Highway, Lincoln County	1st authorization	\$300
Plans - - - - -	21-1457 - Toledo Footpath Section, Corvallis-Newport Highway, Lincoln County	1st authorization	\$475
Prospect - - - -	22-1440 - Lebanon-Sweethome Section, Santiam Highway, Linn County	2nd authorization	\$400
	Total to date \$800		
Plans - - - - -	122-1443 - Schindler Bridge-Lyons Section, Albany-Lyons Hwy., Linn County	1st authorization	\$200
Location - - - -	22-1444 - Foster-Cascadia Section, Santiam Highway, Linn County	1st authorization	\$3,600
Slide - - - - -	22-1445 - Slide MP 56.9, Santiam Highway, Linn County	1st authorization	\$250
Plans - - - - -	224-1442 - Hood Street (Broadway St.-Church St.), City of Salem, Marion County	1st authorization	\$150
Plans - - - - -	224-1443 - 12th Street (State St.-City Limits), City of Salem, Marion County	1st authorization	\$750

Plans - - - -	-26-1449 - Front Street (Portland), Pacific Highway West, Multnomah County	2nd authorization	\$600
	Total to date \$1,100		
Location - - -	26-1453 - Dodson-Bonneville Section, Columbia River Highway, Multnomah County	1st authorization	\$3,000
Plans - - - -	226-1454 - Germantown Road-Logie Trail Section, County Road, Multnomah County	1st authorization	\$2,000
Plans - - - -	-26-1455 - Parkrose-Troutdale Section, Columbia River Highway, Multnomah County	1st authorization	\$3,000
Plans - - - -	226-1456 - Sundial Ranch Section, Sundial Highway, Multnomah County	1st authorization	\$200
Location - - -	127-1419 - Gooseneck Creek-Mill Creek Section, Dallas-Coast Hwy., Polk County	1st authorization	\$300
Location - - -	29-1435 - Tillamook-Pleasant Valley Section, Oregon Coast Hwy., Tillamook County	2nd authorization	\$6,000
	Total to date \$8,000		
Location - - -	29-1436 - Tillamook-Donaldson Creek Section, Wilson River Hwy., Tillamook County	1st authorization	\$3,488
Location - - -	30-1442 - Milton-Washington State Line, Oregon-Washington Hwy., Umatilla County	1st authorization	\$4,000
Plans - - - -	-36-1429 - Sheridan-McMinnville Section, Salmon River Highway, Yamhill County	1st authorization	\$2,700
Plans - - - -	4-1455 - Neawana Creek-Seaside Golf Course Section, Oregon Coast Hwy., Clatsop Co.,	1st authorization	\$3,000

The Engineer reported that a number of surveys heretofore authorized by the Commission have been completed. He presented a list of such surveys and reported briefly on each survey listed thereon. After due consideration the Commission approved the respective surveys, as reported, and adopted the following resolution in regard thereto:

WHEREAS, the State Highway Commission heretofore has authorized and instructed the State Highway Engineer to make surveys on certain sections or portions of the highways of the State of Oregon; and

WHEREAS, pursuant to said authorization the State Highway Engineer has made and completed the said surveys and has filed the maps and plans of the said surveys in the files of the State Highway Commission, in Salem, Oregon; and

WHEREAS, the maps and plans of the said surveys have been examined by the State Highway Commission and have been found suitable in all respects for approval and adoption by the State Highway Commission;

NOW, THEREFORE, BE IT RESOLVED that the surveys hereinafter designated and described, together with their identifying location map file numbers, as shown in the map-filing records of the State Highway Commission in its Salem office, be and they are hereby

DEC 18 1941

adopted and approved as the location surveys of the various portions or sections of highways involved:

DEC 18 1941

BE IT FURTHER RESOLVED that the State Highway Engineer be and he hereby is authorized to make such minor changes in the said locations as may improve the standards of alignment and grades not inconsistent with the general location of the section of highway involved.

The Commission had under discussion the following requests for extensions of time within which to complete highway construction projects:

Coos Bay Dredging Company, contract No. 2339, for grading and construction of bituminous macadam surfacing on the Bandon Section of the Oregon Coast Highway, in Coos County, requested an additional extension of time, from July 31 to September 5, 1941, within which to complete this project. It gave no reason for failure to complete the project within the specified time limit. The Engineer advised that the Commission took bids for this project on June 14, 1940; however, the contract was not awarded until July 12, 1940, and the contractor started operations on July 15, 1940. He further advised that the date of completion specified in the contract was October 31, 1940, but on account of the delay in the award of the contract this was extended by the Commission to July 31, 1941, without penalty. Practically all of the work in connection with this job, he said, was done before the first of this year, the unfinished portion consisting of construction of the pavement which work was sublet to Warren Northwest, Inc., which was prevented from starting the work early in the summer due to contracts that it had for pavement work at airports and was greatly hindered in the progress of construction by scarcity of skilled workmen. He recommended, in view of the circumstances and the fact that there is heavy demand by the government for paving plants, that the extension of time requested be granted without penalty notwithstanding that the Public Roads Administration concurs in the granting of the extension only to August 23, 1941, without penalty. The Commission approved the recommendation.

Porter W. Yett, contract No. 2344, for grading and paving Lombard Street-Killingsworth Street Section of Lombard Street and Northeast Portland Secondary Highway, in Multnomah County, requested an extension of time from July 31 to September 25, 1941, within which to complete this project. He gave the following reasons for failure to complete the project within the specified time limit: (1) additions to the contract ordered after completion date, consisting of three additional culvert pipes under driveways; one set of concrete steps; additional grading work at 60th Avenue Northeast as requested by the county roadmaster; also increase in the oiling of street intersections; (2) orders from the Division Engineer to delay grading operations between 72nd and 82nd Avenues to facilitate the movement of United States Army troops during the summer months; also loss of time on account of movement of said troops; (3) excessive wet weather

DEC 18 1941

conditions between the middle of August and the actual date of completion of the project. The Engineer advised that this contract was awarded on July 18, 1940, but work was not started until October 18, 1940, three months after the award; further, that, during the progress of the work, the contractor's operations were delayed for reasons stated in his request for an extension of time. He recommended, in view of the circumstances, that the request for the extension of time be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

McNutt Brothers, contract No. 2385, for grading the Sexton Mountain Section of the Pacific Highway, in Josephine County, requested an extension of time, from August 31 to October 25, 1941, within which to complete this job. They attributed their failure to complete the project within the specified time limit to extra work required in removal of slides and installation of drainage ditches and temporary culverts to take care of substrata water flow, and to adverse weather conditions. The Engineer advised that the reasons given by the contractor for failure to complete the project within the specified time limit are substantially correct; further, that the general traveling public has not been inconvenienced by the delay, neither has the state incurred a great amount of extra engineering expense by reason thereof. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation.

D. C. and A. L. Williams, contract No. 2388, for furnishing crushed rock in stock piles for the Wallowa Lake and Old Oregon Trail Highways, in Union County, requested an extension of time, from June 30 to November 12, 1941, within which to complete this job. They attributed their failure to complete the project within the specified time limit to bad weather conditions. The Engineer advised that the reason given by the contractor for overrun of time limit is substantially correct, that the overrun in time did not in any manner inconvenience the state, neither did it increase the engineering expense on the job. He recommended that the extension of time requested be granted without penalty. The Commission approved the recommendation.

Chester T. Lackey, contract No. 2400, for production of rock for the Cairo Junction-Adrian Section of the Old Oregon Trail, Nyssa-Adrian and Adrian-Parma Highways, in Malheur County, requested an extension of time, from June 30 to September 18, 1941, within which to complete this job. He alleged that he failed to complete the job within the specified time limit because he was unable to secure capable labor. The Engineer advised that Mr. Lackey experienced considerable trouble in securing competent labor as well as necessary parts for his crushing plant. Under ordinary circumstances, he said, he would not consider this sufficient reason for granting the extension of time without

penalty; however, in this particular instance, the circumstances are unusual and the state was not inconvenienced by the delay, neither were the engineering costs on the job increased. He recommended the granting of the extension of time requested without penalty. The Commission approved the recommendation.

Norris Brothers, contract No. 2424, for grading and construction of bridges on the Ochoco Creek Section of the Madras-Prineville Secondary Highway, in Crook County, requested an extension of time, from July 31 to October 10, 1941, within which to complete this job. They attributed their failure to complete the project within the specified time limit to additional work ordered by the Engineer and difficulties in securing materials necessary to perform the same. The Engineer advised that the contractor experienced difficulty in securing delivery of treated lumber and lost 27 days thereby, and also lost three days' time because of delays in securing short piling. Additional delays, he said, were occasioned by the lining of the irrigation canals and additional work ordered by the Engineer. He gave as his thought that the circumstances surrounding this case are sufficient reason for granting the extension of time requested without penalty, and he so recommended. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation.

M. L. O'Neil & Son, contract No. 2438, for grading, topping and construction of bridges on the Gilliam County Line-Zinter Ranch Section of the Wasco-Heppner Secondary Highway, in Morrow County, requested an extension of time from August 31 to October 28, 1941, within which to complete this job. They attributed their failure to complete the project within the specified time limit to delays in securing bridge material and culvert pipe. The Engineer advised that the reasons given by the contractor for overrunning the time limit are correct. He recommended in view thereof that the extension of time requested be granted without penalty. The Commission approved the recommendation.

Gales Creek Sand and Gravel Company, contract No. 2448, for grading, surfacing and oiling the Vandehey and Van Dyke Sections of the Nehalem Secondary Highway, in Washington County, requested an extension of time, from September 30 to October 25, 1941, within which to complete this job. It gave unfavorable weather conditions as the reason for failure to complete the project within the specified time limit. The Engineer advised that this contract was awarded on April 4, 1941, but the contractor did not start operations until July 16, 1941, and continued until August 4, 1941, when the work was shut down for eight days. Placing of gravel on the base course was started on August 18, 1941, and oiling was started on September 26, 1941. The entire project, he said, was completed on October 25, 1941. The contractor experienced some delay, he said, during the month of September because of rainy weather although prior to that time general

DEC 13 1941

weather conditions were favorable. The main reason for failure of the contractor to complete the project within the specified time limit, he said, was delay in starting the project and lack of equipment for handling the work. He recommended that the extension of time requested be granted but that the contractor be charged for the extra engineering expense incurred by the state subsequent to October 10, 1941. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation.

Porter W. Yett, contract No. 2472, for grading, surfacing and bituminous macadam on the Vollmer Creek and Necanicum Junction Sections of the Wolf Creek Highway, in Clatsop County, requested an extension of time, from September 1 to November 1, 1941, within which to complete this job. He attributed his failure to complete the project within the specified time limit to bad weather conditions which prevented oiling work. The Engineer advised that this contract was not handled satisfactorily as regards expediting the work and convenience to the traveling public. Finishing work, he said, was particularly delayed unnecessarily and traffic was considerably discommoded during the fall weekends. He recommended that the extension of time requested be granted but that the contractor be charged with all the extra engineering expense incurred by the state subsequent to the specified date of completion. The Commission approved the recommendation.

Warren Northwest, Inc., contract No. 2475, for paving the Crabtree Corner-Lebanon Section of the Santiam Highway, in Linn County, requested an extension of time, from October 31, 1941, to May 31, 1942, within which to complete this job. They attributed their failure to complete the project within the specified time limit to abnormal weather conditions. The Engineer advised that the reason given by the contractor for failure to complete the project within the specified time limit is correct, that the contractor experienced inclement weather conditions during the fall of 1941, making it necessary to defer the construction of the cutback wearing surface. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. The Commission approved the recommendation.

The United Contracting Company, contract No. 2488, for grading and paving the Astoria (Astor Street-Bond Street) Section of the Oregon Coast Highway, in Clatsop County, requested an extension of time, from August 31 to October 18, 1941, within which to complete this job. It alleged that its failure to complete the project within the specified time limit was due to compliance with the provisions of the specifications which would not permit it to commence work prior to July 15, 1941, in order to give the State Highway Commission time to effect the removal of certain buildings located within the right of way. The Engineer confirmed the reasons given by the contractor for failure to complete the project within the specified time limit. He recommended, in view of the circumstances, that the extension of time requested be granted

DEC 18 1941

without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation.

O. C. Yocom, contract No. 2490, for grading, surfacing and oiling the Fulton Canyon-Locust Grove Section of the Fulton Canyon-Wasco County Road, in Sherman County, requested an extension of time, from September 30 to October 6, 1941, within which to complete this job. He attributed his failure to complete the project within the specified time limit to inclement weather conditions and difficulties in obtaining guard fence material. The Engineer advised that this contract was complete, with the exception of construction of guard fence, on September 27 and that the contractor's delay was due entirely to his being unable to obtain steel brackets for use in connection with the guard fence construction. He recommended that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation.

E. L. Gates, contract No. 2495, for grading and surfacing the Kimberly-Simas School Section of the Kimberly-Long Creek Secondary Highway, in Grant County, requested an extension of time of 120 days, from October 31, 1941, to February 28, 1942, within which to complete this job. He attributed his failure to complete the project within the specified time limit to unfavorable weather conditions and inability to either purchase or rent necessary equipment. The Engineer advised that the reasons given by Mr. Gates for overrun of time limit are correct. He also said that the engineering costs in the project will not be increased because it was not necessary to maintain an engineering party on the job until the work was started. It appeared to him that the reasons for the delay are justification for granting the extension of time requested without penalty, and he so recommended. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation.

Warren Northwest, Inc., contract No. 2506, for paving the Middle Unit, Crabtree Corner-Lebanon Section of the Santiam Highway, in Linn County, requested an extension of time, from November 30, 1941, to May 31, 1942, within which to complete this job. They alleged that abnormal weather conditions prevented completion of the project within the specified time limit. The Engineer advised that the contractor worked diligently to complete this project within the specified time with minimum inconvenience to traffic and did complete all of the work except the construction of the final cutback top course, which work he ordered deferred until next year when weather conditions are favorable. He recommended that the extension of time requested be granted without penalty. The Commission approved the recommendation.

DEC 18 1941

The Engineer reported that contracts Nos. 2339, 2344, 2371, 2385, 2388, 2400, 2403, 2424, 2438, 2448, 2460, 2472, 2482, 2488, 2490 and 2513, for construction of state highway projects, have been completed according to the terms of the contracts or modifications thereof, and that said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and was adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts and said jobs are now ready for acceptance:

Contract No. 2339, with Coos Bay Dredging Company, for grading and plant-mix bituminous macadam surfacing construction on the Bandon Section of the Oregon Coast Highway, in Coos County. Completed August 23, 1941.

Contract No. 2344, with Porter W. Yett, for grading and paving the Lombard Street-Killingsworth Street Section of the Lombard Street and Northeast Portland Secondary Highway, in Multnomah County. Completed September 25, 1941.

Contract No. 2371, with F. C. Feldschau, for the Tillamook Rock Production Project on the Oregon Coast and Wilson River Highways, in Tillamook County. Completed April 4, 1941.

Contract No. 2385, with McNutt Brothers, for grading the Sexton Mountain Section of the Pacific Highway, in Josephine County. Completed October 25, 1941.

Contract No. 2388, with D. C. and A. L. Williams, for the LaGrande Rock Production Project on the Wallowa Lake and Old Oregon Trail Highways, in Union County. Completed November 12, 1941.

Contract No. 2400, with Chester T. Lackey, for the Cairo Junction-Adrian Rock Production Project on the Old Oregon Trail, Nyssa-Adrian and Adrian-Parma Highways, in Malheur County. Completed September 18, 1941.

Contract No. 2403, with Averill & Corbin, for construction of the Gooserock Bridge over the John Day River on the John Day Highway, in Grant County. Completed October 31, 1941.

Contract No. 2424, with Norris Brothers, for grading and construction of two composite type pile trestle bridges on the Ochoco Creek Section of the Madras-Prineville Secondary Highway, in Crook County. Completed October 10, 1941.

Contract No. 2438, with M. L. O'Neil & Son, for grading, topping and construction of two untreated timber bridges on

DEC 18 1941

the Gilliam County Line-Zinter Ranch Section of the Wasco-Heppner Secondary Highway, in Morrow County. Completed October 28, 1941.

Contract No. 2448, with Gales Creek Sand & Gravel Company, for grading, surfacing and oiling on the Vandehey and Van Dyke Sections of the Nehalem Secondary Highway, in Washington County. Completed October 25, 1941.

Contract No. 2460, with A. S. Wallace, for furnishing crushed gravel in stock piles for the Dean Creek-Parker Creek Section of the Umpqua Highway, in Douglas County. Completed November 13, 1941.

Contract No. 2472, with Porter W. Yett, for grading, surfacing and bituminous macadam on the Vollmer Creek and Necanicum Junction Sections of the Wolf Creek Highway, in Clatsop County. Completed November 1, 1941.

Contract No. 2482, with M. E. Myers & Son, for roadside improvement on the Pendleton-Adams Section of the Oregon-Washington Highway, in Umatilla County. Completed November 14, 1941.

Contract No. 2488, with The United Contracting Company, for grading and paving the Astoria (Astor Street-Bond Street) Section of the Oregon Coast Highway, in Clatsop County. Completed October 18, 1941.

Contract No. 2490, with O. C. Yocom, for grading, surfacing and oiling the Fulton Canyon-Locust Grove Section of the Fulton Canyon-Wasco County Road, in Sherman County. Completed October 6, 1941.

Contract No. 2513, with A. S. Wallace, for the Gilliam County Line-Umatilla Rock Production Project on the Columbia River Highway, in Morrow and Umatilla Counties. Completed November 29, 1941.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

The Commission confirmed Thursday and Friday, January 15 and 16, 1942, the date heretofore set for its next regular meeting. (This meeting was later postponed to Wednesday, January 21, 1942.)

DEC 18 1941

The Commission considered and signed agreements, et cetera, as follows:

Agreement with Linn County providing for use by the state of a county-owned quarry site situate in the SW $\frac{1}{4}$ of the NE $\frac{1}{4}$ of Section 9, Township 13 South, Range 3 West, W. M.

Agreement with the University of Oregon relative to reconstruction of the Pacific Highway between Eugene and Springfield.

Agreement with the University of Oregon and the Eugene Power Company relative to reconstruction of the Pacific Highway in Eugene.

Agreement with Carl Barclay and wife covering release of damage to property adjacent to the state's gravel pit, in Linn County.

Agreement with the United States of America, Department of Indian Service, covering cooperation between the state and the government with respect to the construction of the Sprague River Road, in Klamath County.

Agreement with Carl M. Stevens and Claude and Arline Stevens providing for lease of a maintenance headquarters site at Newberg.

Agreement with Bonneville Power Administration covering the cutting of trees on highway property between Pendleton and LaGrande.

Agreement with Clatsop County covering repairs to the Warrenton-Fort Stevens Road.

Agreement with the City of Tillamook disposing of the state's claim against the city arising out of construction of the Oregon Coast Highway, between First Street and the north city limits, in 1931.

Agreement covering city street improvements, as follows:

Mt. Angel	Salem
Pendleton	Dufur
Baker	Eugene
Sandy	Milton

Supplemental agreement with the National Hospital Association covering the furnishing of medical service to highway department employees in 1942.

Agreement with Consuelo Oregon Mines covering dredging and mining operations on right of way of the Sumpter Valley Highway.

Permit authorizing Harry Mercer and the Standard Oil Company of

California the right to use a strip of state-owned land at the intersection of Union and Denver Avenues, Portland.

Easement granting Carl Bauers permission to construct and maintain a private roadway on state highway property at Harris Beach State Park, Curry County.

Ground lease with The Booth Land Company covering renewal of a stock-pile site lease on the Roseburg-Myrtle Creek Section of the Pacific Highway, in Douglas County.

Bargain and sale deed conveying unto Irvin A. Gibbins and wife all of Lots 3 and 10, Block 7, Kincaid Park First Addition to Eugene, Lane County. Right of way files No. 9310 and No. 9662.

Bargain and sale deed conveying unto Washington County 1.68 acres of land situate in Lot 16, Block 51 of North Plains in Section 12, Township 1 North, Range 3 West, W. M., Washington County. Right of way files No. 9407 and No. 9417.

Bargain and sale deed conveying unto R. A. Eastman, Jr., and wife 1.45 acres of land situate in the NE $\frac{1}{4}$ of Section 32, Township 28 South, Range 6 West, W. M., Douglas County. Right of way file No. 9643.

Bargain and sale deed conveying unto Benton County 2 acres of land situate in the NW $\frac{1}{4}$ of the SW $\frac{1}{4}$ of Section 13, Township 12 South, Range 5 West, W. M., Benton County. Right of way files No. 8125 and No. 4523.

The Commission adjourned at 5:45 p. m. and reconvened at 8:00 p. m. in Room 415, Imperial Hotel, with all Commissioners present and participating. Also present were the State Highway Engineer, the Attorney and the Secretary.

The Assistant Attorney rendered the following status report on the acquisition of right of way for the Front Avenue Project, Portland: original estimate of cost for such right of way, between the Steel Bridge and Southwest Columbia Street, was \$1,279,000. Practically all settlements have been made and it now is estimated that the total cost will be approximately \$30,000 over the original appraisal although this sum may be affected by any change which is made in the original estimated cost at the Public Market. Between Southwest Columbia Street and Southwest Barbur Boulevard the original appraisal was approximately \$300,000. Present estimates indicate that the cost will overrun about \$15,000. However, new and additional properties have been added, the estimated cost of which is approximately \$75,000, making the present revised estimate \$360,000 between Southwest Columbia and Southwest Barbur Boulevard. In addition to the above there will be some claims for damages which cannot be estimated with any degree of accuracy at this time owing to the uncertainty of the final grade line. However, indications are that they will not exceed the sum of \$15,000. The Commission approved the report.

DEC 18 1941

The Attorney requested authority to acquire certain parcels of real property that are needed for various highway improvements throughout the state. He submitted a list of such properties, together with offers that he recommended be made in each instance. After careful consideration the Commission approved the request and by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed:

NOW, THEREFORE, BE IT RESOLVED that the several offers, or bases of settlement hereinafter enumerated be, and the same hereby are, approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

9518	P. M. Ross, et ux.	R/W	7000.00
9945	George Craddock	R/W	10.00

After discussion the Commission approved the request and the offers presented. The following resolution with respect thereto was adopted by the Commission by unanimous vote:

WHEREAS, the State Highway Commission is authorized to locate, relocate, construct, reconstruct, maintain, widen, straighten, and otherwise improve state highways, both primary and secondary, and said Commission is also authorized to construct shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, and snow fences, and is authorized to acquire quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, and broadcasting stations, and is further authorized to develop, construct, improve, operate, and maintain parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, and other places of attraction and scenic value; and

WHEREAS, said Highway Commission is authorized to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property, or any interest therein, necessary or deemed by the Highway Commission necessary for the accomplishment of any and all of the foregoing things; and

DEC 18 1941

WHEREAS, in the judgment of the Highway Commission the several tracts or parcels of land hereinafter described are each and all necessary for the specific and particular purposes hereinafter specifically set forth;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the Commission does hereby find and declare that the several parcels of real property hereinafter described are each and all necessary for the accomplishment of the purposes hereinafter expressly and specifically set forth, which said real properties and the specific purposes for which the same are being acquired are described as follows, to wit:

Real property owned by Reinault Selle, et al., which property is located in the south half ($S\frac{1}{2}$) of the northwest quarter ($NW\frac{1}{4}$) of Section 26, Township 17 South, Range 31 East, W. M., Grant County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 1 and is further identified in the records of the Highway Commission as file R 9947, and which property is being acquired for right of way purposes in connection with the John Day-Burns Highway;*

Real property owned by the heirs of Austin S. Thompson deceased, and by the heirs of Lydia G. Moyer, which property is located in the northwest quarter ($NW\frac{1}{4}$) of the northwest quarter ($NW\frac{1}{4}$) of Section 16, Township 4 South, Range 22 East, W. M., Gilliam County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 2 and is further identified in the records of the Highway Commission as file R 9743, and which property is being acquired for the purpose of securing roadbuilding materials therefrom for use in connection with the Wasco-Heppner Highway;*

Real property owned by P. M. Ross and Elizabeth H. Ross, which property is located in Lots 6, 7, 8, 9, 10, and 11, Block 34, Coos Bay Plat "B", North Bend, Coos County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 3 and is further identified in the records of the Highway Commission as file R 9518, and which property is being acquired for right of way purposes in connection with the Oregon Coast Highway;*

Real property owned by Julius L. Poole, et al., which property is located in the northeast quarter ($NE\frac{1}{4}$) of Section 30, Township 30 South, Range 3 West, W. M. Douglas County, Oregon, and is more particularly described on the

DEC 18 1941

attached sheets and designated as Parcel No. 4 and is further identified in the records of the Highway Commission as file R 9909, and which property is being acquired for right of way purposes in connection with the Tiller-Trail Highway;*

Real property owned by Frederick W. Bigham, which property is located in the northwest quarter (NW $\frac{1}{4}$) and in the northeast quarter (NE $\frac{1}{4}$) of Section 29, Township 30 South, Range 3 West, W. M., Douglas County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 5 and is further identified in the records of the Highway Commission as file R 9914, and which property is being acquired for right of way purposes in connection with the Tiller-Trail Highway.*

2. That the Commission does hereby find and declare that each of the said described parcels of real property is necessary and acquisition of the same by the State is required for the specific purposes hereinabove set forth, and the said properties are being acquired for the express and specific purposes in this resolution set forth.

3. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real properties, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of the said real properties, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property or properties, whether said properties be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

4. That J. M. Devers, Attorney for the State Highway Commission, be and he is hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement or agreements can be reached, then it is hereby further resolved that J. M. Devers, Attorney for the State Highway Commission, be and he hereby is requested to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated.

5. That this resolution be entered in full in the minutes and records of this Commission.

*(The detailed descriptions of the respective parcels of real property mentioned in this resolution are attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 19, under the heading "Real Property Condemnation Resolutions", and said descriptions by this reference are made a part of this minute entry to the same extent as if copied in full herein.)

NOTE: The remaining parcels for which offers were approved by the Commission were settled without resorting to condemnation.

The Attorney brought up for discussion a settlement with Mr. Arthur D. Jones, Eugene, for right of way needed in connection with the reconstruction of the Pacific Highway between Eugene and Springfield. He advised that Mr. Jones is demanding \$12,000 for this property and agrees, if he is paid such sum, to take care of his tenants. He further advised that five separate appraisals have been made of the property as follows: C. W. Parker, right of way agent, \$10,000; C. L. Payne \$9,500; Mrs. Mary R. Miles \$10,000; F. L. Chambers \$10,000; and C. F. Hyde \$12,930. He also said that Mr. Jones refuses to accept the Commission's offer of \$11,000 as settlement in full, including settlement with the tenants. After discussion, the Commission authorized the Attorney to offer Mr. Jones \$11,500, Mr. Jones to assume the expense of taking care of the tenants and to be allowed to have the benefits accruing from rentals of the property until the property is needed by the state, or until about July 1, 1942. It was understood that Mr. Jones's dealings with the tenants must be satisfactorily disposed of before the \$11,500 is paid to him by the state.

The Attorney also brought up for discussion a controversy with Mr. B. F. Friday for right of way needed for the Wolf Creek Highway construction across Mr. Friday's property, in Washington County. He explained that the property desired consists of a strip on each side of the highway and is additional to right of way heretofore secured from Mr. Friday; further that the property is now under condemnation because Mr. Friday has refused to accept the state's offer of \$250 and is demanding the sum of \$500 for his land. He further advised that he has received information from Mr. Friday's attorney, Mr. Thomas Tongue of Hillsboro, that Mr. Friday will now accept the sum of \$350 for his land but he wants the privilege of removing the timber therefrom and wants the timber heretofore cut by WPA forces, and also wants the state to construct for him three approaches from the highway to his property. He recommended payment of the \$350 for the three acres involved and letting Mr. Friday have the timber. The matter was discussed at some length during which a question arose as to the roadway approaches to the highway. Final action in the matter was deferred by the Commission until a future meeting, pending securing of additional information relative to the approaches.

The Attorney presented a form of agreement between the State Highway Commission and the United States Indian Service, covering cooperation between the state and the government with respect to the construction of the Sprague River county road, in Klamath County, particularly covering the matter of the state's contribution toward such project. The Attorney read aloud the provisions of the agreement. The Commission approved and signed the agreement subject to the condition that there shall be added thereto a clause to the effect that the state is relieved of its obligation if restrained from acting by conditions of the national emergency.

The Attorney reported an offer received from Emil H. Duyck to purchase a parcel of state-owned property adjacent to the Davies-Vadis Section of the Wolf Creek Highway, in Washington County, consisting of approximately 34 acres, situate on the south side of the highway. He advised that Mr. Duyck's offer is \$50 per acre. However, since receiving the same an offer has been received from a Mr. W. G. Ide, in the amount of \$2,000. He inquired whether or not he should accept the high offer of Mr. Ide or advertise the property for sale. The Commission decided that it would be best to take bids for the purchase of the property and so ordered.

The Commission considered a request from Mr. J. W. Goin, Albany, to lease a state-owned topsoil pit southwest of Albany. The Engineer advised that Mr. Goin is willing to pay \$5.00 per year rental for the use of the entire area except the portion that has been excavated by the state in its topsoil borrow work. He recommended acceptance of the offer provided Mr. Goin will agree to let the state secure any topsoil which might be required from that portion of the pit which has already been opened and used. The Commission approved the recommendation and ordered that the matter be covered by letter rather than by formal agreement.

Reconsideration was given by the Commission to the request of Colonel Frank W. Wright, who has charge of the Pendleton airport, for use of certain state-owned land adjacent to such airport and the Old Oregon Trail, for recreational purposes. The Engineer advised that there is no sale for the property and the Highway Department has no immediate use for the same. He recommended that the army be allowed to use the property for the purpose intended, without charge, provided it will relinquish the same on reasonable notice when the state needs it. The Commission approved the recommendation.

The Commission also reconsidered a request of the Consolidated Timber Company for permission to maintain a private service station for its logging trucks on the Wilson River Highway right of way about 1,000 feet east of McNamers Camp. The question arose whether or not the Commission could grant this privilege in view of its policy which prohibits encroachments upon state highway rights of way. The Attorney pointed out that the right of way at this location is extra wide and includes a timber strip which really could not be considered right of way, and that it is on this extra-width parcel that the company wishes to maintain its service station. He suggested, if the Commission desires to grant the privilege, it could do so and still maintain its policy if it would, by appropriate resolution, declare and set off the right of way

DEC 18 1941

from the balance of the land and then allow the company the use of the land that is beyond the right of way limit as determined by such resolution. The Commission appeared favorably inclined toward such arrangement, in view of the fact that the Consolidated Timber Company donated the right of way and the timber strips and could have reserved a sufficient area for its service station in the first instance had it so desired. After discussion the Commission approved such solution of the problem and thereupon by unanimous vote adopted the following resolution relative thereto:

WHEREAS, when the right of way for the Wilson River Highway between engineer's station 1447+50.71 at or near the Wilson River and engineer's station 1467+10 was procured an unusually wide area was procured so that there might be ample ground for right of way and for other highway purposes; and

WHEREAS, said highway has now been constructed and it is now possible to determine what width of right of way between said termini will be ample for highway purposes, leaving the area outside the right of way proper available for other purposes;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Oregon State Highway Commission as follows:

1. That the right of way of said highway between the place where said highway crosses the Wilson River at engineer's station 1447+50 and engineer's station 1467+10 shall be described as follows, to wit:

A parcel of land lying in the Northeast quarter (NE $\frac{1}{4}$) of Section 6 and in the Northwest quarter (NW $\frac{1}{4}$) of Section 6, Township 1 North, Range 6 West, W. M., Tillamook County, Oregon; the said parcel being a strip of land 120 feet in width, 60 feet on each side, parallel to and adjoining the center line of the Wilson River Highway as said highway has been constructed over and across said property; the location of the said strip of land being determined by the said center line from engineer's station 1447+50.7 to engineer's station 1467+10; beginning at said station 1447+50.7, said station being 75 feet south and 595 feet west of the northeast corner of said Section 6; thence North 80° 48' 30" East 109 feet; thence on a spiral curve right (the long chord of which bears North 83° 58' 30" East) 380 feet; thence on a 1145.9 foot radius curve right (the long chord of which bears South 88° 18' 30" East) 55.3 feet; thence on a spiral curve right, (the long chord of which bears South 80° 35' 45" East) 380 feet; thence South 77° 25' 45" East 47.7 feet; thence on a spiral curve left, (the long chord of which bears South 78° 55' 45" East) 360 feet; thence on a 2291.8 foot radius curve left) 60.7 feet; thence on a spiral curve left (the long chord of which bears South 86° 26' 45" East) 360 feet; thence South 87° 56' 45" East 166.2 feet to the westerly line of the State Park.

DEC 13 1941

2. That the above described area shall be and the same hereby is declared to be the right of way of said highway between said termini.

3. That all of the remainder of the real property owned by the State between said termini and outside the limits of said right of way shall be retained so that the same may be available for storage sites, maintenance quarters or such other uses as the Highway Commission may deem proper.

4. That there is attached hereto, marked Exhibit A and by this reference made a part hereof, a blueprint on which there is shown in parallel lines shaded in red the area above described.

5. That this resolution shall be entered in the minutes and records of the Commission.

The Attorney was instructed to prepare an appropriate form of agreement between the company and the state, covering the use of the state's property for a period of five years.

A letter was presented from J. B. Beddingfield, Attorney for the Coos Bay Lumber Company, in which the Commission was requested to join with the Company in securing the vacation of certain streets that have been dedicated for public use in a subdivision known as Watts Acres and Plat Two Watts Acres, Douglas County. The Engineer advised that Watts Acres is situate adjacent to the Pacific Highway at Green Station, about seven miles south of Roseburg, and that the matter of vacation of streets has been investigated, such investigation revealing that the streets have never been constructed and are of no benefit whatsoever from the state highway standpoint, in fact it would be advantageous if the streets were vacated because they intersect an important highway. He recommended approval of the request. The Commission approved the recommendation and thereupon authorized the Secretary to sign the "Consent to Vacation" in behalf of the Commission.

The Commission discussed the advisability of purchasing timbered wayside strips along the Pendleton-John Day Highway between Desolation Creek and Camas Creek, particularly some twenty-one 40-acre tracts fronting on both sides of the highway just north of the Umatilla-Grant County line. Mr. T. M. Davis, Senior Highway Engineer of the Public Roads Administration, who was present, advised that it would not be possible to secure federal aid funds with which to finance this purchase on account of the war situation and the need to use the funds for other purposes. The Commission decided, after discussion, to continue negotiations with the owners for options. The Attorney was instructed to secure such options at the lowest possible figure. It was also decided that this purchase shall be placed at the top of the list of purchases of this nature for financing with federal aid funds as soon as such funds are again made available.

The following resolution abandoning a portion of the Nehalem Secondary Highway, Washington County, was adopted by the Commission by unanimous vote

upon recommendation of the Engineer who stated that the land described therein is part of the old right of way and has been rendered valueless for highway purposes by reason of realignment of the highway:

WHEREAS, in order to afford a better alignment and a more satisfactory, safe and convenient highway for the traveling public the Commission found it necessary to relocate a portion of the Nehalem Highway in Washington County; and

WHEREAS, by reason of said relocation and reconstruction of said section of highway there were eliminated and made unnecessary as parts of the permanent highway certain sections, which sections are more particularly defined and described hereinafter in this resolution; and

WHEREAS, it is the judgment and opinion of the Commission that there should be recorded in the minutes and records of the Commission its purpose and plan to abandon as a part of the said highway the fragments or portions of right of way heretofore designated and which were heretofore included within the area of the right of way of said highway as formerly located, but which are now without the regular limits of said highway as relocated.

NOW, THEREFORE, the premises being in general as above stated, it hereby is resolved by this Commission, all members being present and affirmatively voting, as follows:

1. That the fragments of land confined within the area hereinafter described, which fragments or parcels of real property were formerly within the limits of the right of way of the Nehalem Highway but are no longer parts of the right of way of said highway as the same has been relocated and constructed be and said parcels of real property are abandoned as parts of the right of way of said highway, and said parcels of land are, so far as control and supervision by this Commission is concerned, eliminated and left to revert to the adjoining and abutting property owners. The fragments or parcels of land affected by this resolution are defined and described as follows, to wit:

All those certain sections of the old right of way of the Nehalem Highway in Sections 7 and 18, Township 1 North, Range 3 West, W. M., Washington County, lying on the easterly and westerly side of the right of way required for the reconstructed Nehalem Highway, the beginning and ending points with reference to the engineer's stations of the said reconstructed highway being engineer's station 5+90 on the southerly end and engineer's station 33+00 on the northerly end.

The location of said abandoned right of way may be more definitely and particularly ascertained and determined by reference to a

DEC 13 1941

map or blueprint marked Exhibit A attached hereto and by this reference made a part hereof, which said exhibit for identification purposes bears the signatures of E. A. Collier, Division Engineer, H. G. Smith, Construction Engineer, and C. B. McCullough, Assistant State Highway Engineer, and is dated December 15, 1941, upon which map or exhibit are reflected the above described parcels of land by showing the same shaded in red.*

2. In the event there remains any physical connection between any portion of said abandoned right of way or highway and the present highway, and by reason of such physical connection traffic from the existing highway may enter or use the said abandoned right of way or highway to the possible damage or injury of such traffic by reason of any unsafe condition existing with respect to said old or abandoned road, then the State Highway Engineer is hereby authorized and directed to erect such barricade or other safeguards as may be necessary to protect said safeguard traffic using and employing said newly located, constructed and dedicated section of said highway.

3. That this resolution be entered in the minutes and records of the Commission and a certified copy thereof promptly delivered to the County Court of Washington County, together with a copy of said exhibit or map, for such action as said County Court may desire to take with respect to the fragments of land to be abandoned, and should said abandoned sections of the right of way of said Nehalem Highway be further employed for public or private highway purposes such use shall be entirely under the control and supervision of the County Court of Washington County and beyond any responsibility or supervision by the State Highway Commission.

The State Parks Superintendent, Mr. S. H. Boardman, was present and reported on the following park matters:

Relinquishment of Helmick Park for use in connection with United States Army cantonment:-The Parks Superintendent advised that he has been approached by army officials relative to the acquisition of Helmick Park, which has been included within the boundaries of the proposed army cantonment north of Corvallis, and inquiry has been made as to how much the state wants for the property. He further advised that this park was conveyed to the state by James and Amanda Helmick and that the deed specifically states that it shall be held for state park purposes for all time. The Commission considered that it would have to relinquish the park if the army demanded it and in view thereof instructed the Attorney to contact the donors or their heirs and secure, if possible, a waiver of the provision that the state cannot dispose of it but must

*Map filed Right of Way Abandonment and Retention File - No. 98

keep it for park purposes. The Parks Superintendent was instructed to inform the army officials of the facts in the case and to set a price on the property, including land and improvements, of such amount that the proceeds of the sale will be sufficient to acquire a similar area outside of the boundaries of the proposed cantonment.

Cutting of trees in Emigrant Park:-The Parks Superintendent reported a request from the Pacific Telephone and Telegraph Company to cut 128 trees which the company lists as danger trees to its telephone line on Emigrant Hill Section of the Old Oregon Trail between milepost 258 and milepost 259. He said that the telephone company has acquired a 120-foot right of way strip for its facilities, bordering the highway timbered right of way and has erected its pole line along the center of this strip. Investigation on the ground, he said, reveals that if the company had constructed its pole line 15 feet west of the center line 59 per cent of the trees, which it desires to cut, could have been saved, and if the company had constructed its pole line 50 feet distant from the center line of its strip 97 per cent of the trees could have been saved. He recommended that the request of the company for the cutting of the trees on the state's property be denied and that the company be required to move its pole line farther away from the state's timbered strip so as to avoid the cutting of the trees inasmuch as the state's purchase of the property was for the specific purpose of preserving the tree growth. The Commission approved the recommendation.

Use of state park property in Curry County for mining purposes:-The Parks Superintendent reported receipt of a letter from the State Department of Geology and Mineral Industries relative to the desire of a certain private mining group to obtain state park property north of Port Orford which contains valuable chromite deposits and suggesting that it would be to the state's interests if the Highway Commission would approve the conveying of such property to this mining group, perhaps on the condition that the company would pay the state cash, in the amount that the state paid for the property, and five per cent of the value of the minerals produced from the land up to an amount of \$10,000. The Commission discussed the matter briefly but deferred action until its next meeting.

Addition to Short Sand Beach State Park:-The Parks Superintendent presented an offer from T. M. Collins, Portland, to sell to the state as an addition to Short Sand Beach State Park a 42-acre tract of land for the sum of \$12,000 or to sell 36 acres to the state for the sum of \$6,000 if he is allowed to retain a certain 6-acre tract for his own use and enjoyment. The Commission considered it inadvisable to acquire only the 36 acres and that the price asked for the entire 42 acres is exorbitant, and thereupon deferred the purchase for the time being. The Attorney was instructed to investigate Mr. Collin's income tax report to ascertain just how much the property is valued therein.

Roadway easement across state park property near the Clatsop-Tillamook County line:-The Commission considered a request from a

Mr. E. W. Kruschke for permission to construct and maintain a roadway across state-owned property situate in Section 6, Township 3 North, Range 10 West, W. M. adjacent to the Oregon Coast Highway a short distance south of the Clatsop-Tillamook County Line. The Parks Superintendent advised that Mr. Kruschke is simply asking for a privilege that he has already taken without the consent of the State Highway Commission or any other state official and that Mr. Kruschke has already constructed a roadway in connection with which he cut a strip of timber 40 feet wide and deposited the debris by the wayside. He recommended denial of the request and that Mr. Kruschke be prosecuted for falling the timber. The Commission approved the recommendation and instructed the Attorney to institute suit against Mr. Kruschke to collect triple damages for destroying the state's property.

Use of Harris Beach Park by Mrs. Anna Barclay:-The Parks Superintendent presented the application of Mrs. Anna Barclay, Brookings, for permission to continue operation of a restaurant business on state-owned park property recently acquired from Carl Bauers, in Curry County, at least during the year 1942. The Parks Superintendent advised that, according to the arrangement effected at the time of the purchase of the property by the state, Mrs. Barclay was to be given until December 15, 1941, within which to vacate the premises. After discussion the Commission denied Mrs. Barclay's request; however, granted her a period of six months within which to secure a new location and move her building thereto.

Mrs. Inez Van Dyke encroachment in Casey State Park, Jackson County:-The Parks Superintendent advised that Mrs. Inez Van Dyke has been trespassing on the state's property for a long time and refuses to vacate the premises although she has been ordered to do so on numerous occasions. The Attorney was instructed by the Commission to take necessary steps to evict her.

There being no further business to come before the Commission at this time, the meeting was adjourned at 11:10 p. m.

DEC 18 1941

Portland, Oregon, January 5, 1942

The State Highway Commission met in special session at 9:30 a. m. in Room 234, Imperial Hotel. Present were:

Henry F. Cabell, Chairman
Huron W. Clough, Commissioner
Herman Oliver, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

The Engineer brought up for discussion matters pertaining to the highway department's finances. He predicted the falling off of the revenues in view of recent government orders with respect to the rationing of automobile tires and the cessation of manufacture of passenger automobiles, and recommended the following in order to conserve state highway funds for use in connection with the matching of federal aid funds which may be allocated to the State of Oregon:

1. Discontinue the contracting of all state construction projects;
2. Reduce minor betterment expenditures to a bare minimum;
3. Reduce expenditures for publicity purposes;
4. Discontinue purchase of additional parks and curtail activities of the Parks Department to a bare minimum.

He read aloud a letter directed to the Commission, dated January 3, 1942, with respect thereto. (See letter for details.) The Commission discussed this matter very carefully and decided in view of the existing emergency not to contract additional state-financed projects unless there are exceptional cases that must go ahead. This procedure is to be followed for the next three or four months and then will be changed as conditions warrant.

As to expenditures of the Travel and Information Department, the Commission approved the reduction as recommended by the Advisory Committee in its resolution presented at the previous meeting of the Commission. It was decided to call the members of the committee together to pass on future reductions in this department as may be deemed necessary.

As to the purchase of additional roadside strips, the Commission decided to defer such purchases on the representation of Mr. T. M. Davis, Senior Highway Engineer of the Public Roads Administration, who was present, that the use of federal aid funds for such purposes will not be approved unless the purchase is approved by the United States Army authorities.

Discussion of the proposed reduction in the expenditures of the Parks Department was deferred until the afternoon session when the State Parks Superintendent will be present.

It was decided that the personnel of the several departments affected should be reduced to a minimum and that only the key personnel in such departments should be retained. The personnel to be relieved in such departments is to be absorbed in other departments in so far as is possible.

Chairman Cabell brought up for discussion the matter of distributing federal funds to the various divisions of the state. It was his thought that the present method of distribution cannot be followed during the present emergency in view of the fact that the moneys cannot be expended for projects other than those approved by the army and navy authorities. The Commission decided to keep a record of the expenditures, from this time until the emergency is passed, and to consider the expenditures made in the interim in the distribution of funds from then on. The Engineer was instructed to report to the Commission at the next meeting the present status of expenditures in the several divisions.

The matter of curtailing minor betterment work on primary and secondary highways was also discussed and it was decided to defer all such work that is not immediately necessary, and to effect all economies possible in maintenance work, keeping in mind, however, that road facilities must not be allowed to depreciate to such an extent that they will interfere with the furnishing of adequate service for the transportation of goods and movement of troops.

The question which projects are to be considered exceptional and which should proceed was discussed. Several were mentioned, such as the Plaza improvement in Ashland, improvement of the Columbia River Highway through the Parkrose District east of Portland, South Sixth Street Project in Klamath Falls, and the proposed improvement of the Oregon Coast Highway through the town of Gold Beach. The Commission decided to proceed with the Plaza improvement in Ashland as soon as right of way matters have been clarified. Similar action was taken on the proposed Parkrose improvement. The Engineer was instructed to include these two projects in the list to be presented to the Public Roads Administration for approval by the army authorities. The Attorney was instructed to complete the right of way negotiations on such projects.

The Commission decided not to construct the South Sixth Street Project, Klamath Falls, at this time; however, authorized and instructed the Attorney to obtain the right of way so that it will be ready when the Commission is able to proceed with construction.

The Commission tentatively decided not to construct the Gold Beach improvement; however, deferred a definite decision with respect thereto pending consultation with local citizens. The Secretary was instructed to invite the Gold Beach delegation to the next regular meeting of the Commission for a discussion of the matter if they so desire.

The Attorney was instructed by the Commission to report at the next meeting the status of the right of way budget on unfinished work so as to give the Commission an idea how much money will be necessary to purchase right of way during 1942. The Engineer remarked that he would like to have as much right of way as possible acquired in advance so there will be no delays on

JAN 5 1942

that account when projects are approved, particularly projects that must be expedited. The Commission decided to discuss this matter at the next meeting.

Consideration was given by the Commission to the matter of constructing the DeLaura Road, 0.7 mile in length, which extends from the Oregon Coast Highway at Skipanon Junction to the Crest Road between Fort Stevens and Camp Clatsop. The Engineer reported receipt of a letter from Mr. W. H. Lynch, District Engineer, Public Roads Administration, stating that the United States War Department, has approved this project as important to national defense under the provisions of the Defense Highway Act of 1941; also, that the Work Projects Administration has \$20,000 of nonlabor funds which can be applied to the project. The Engineer estimated the cost of construction at \$66,000, exclusive of right of way which he estimated would cost about \$1,000. In connection with this matter the Commission also discussed the proposed realignment of the Oregon Coast Highway to accommodate the U. S. Naval Base at Tongue Point, it being pointed out that this particular project has been approved for federal access money and for performance by contract by all authorities except the final authority in Washington, D. C. It was the thought of the Commission that the Tongue Point project should proceed on contract basis as planned, using federal access money to finance the same, the state to contribute approximately \$60,000 of state funds as heretofore authorized; also, that the DeLaura project should be constructed as a WPA project. The Commission also decided to acquire the right of way for the DeLaura project using state funds to finance the same.

The matter of curtailing expenditures in connection with the Oregon Trail Centennial was brought up for discussion by Chairman Cabell and it was decided not to authorize additional expenditures if that meets with the approval of the Centennial Commission and Governor Sprague. The matter is to be discussed with the Centennial Commission by Mr. Titus, Acting Director of the Travel and Information Department, and Chairman Cabell was delegated to discuss the matter with the Governor.

The Commission adjourned at 11:30 a. m. and reconvened at 2:00 p.m. in the same room with all members present and participating. Also present were the State Highway Engineer, the Attorney and the Secretary.

The Attorney brought up for discussion an accident which involved a state car or truck operated by John Smith Jackson. The accident resulted in the death of one man and the severe injury of his wife. Two damage actions have been commenced, one by the estate of the deceased and the other by the widow for personal injuries. The state's insurance company, through its attorneys, has notified the state that, under its policy, it is not liable in connection with the personal injury case for any sum in excess of \$10,000; also, that the insurance company will appear and defend, but, since it is liable only in the maximum sum of \$10,000, it has given the Highway Commission or its employee an opportunity to employ private counsel to help in the defense. The Commission instructed its Attorney to discuss the situation with the insurance company's attorneys and with the defendant, Mr. Jackson, but to take no action or make no arguments until the Commission has again considered the matter.
